* Many of the figures in this table with an analysis are included in the Monthly Review of Business Statistics issued by the Dominion Bureau of Statistics, price $1.00 per year.

† Week ended June 29, 1944.

(1) Base, 1926=100. (2) Figures are for the end of the preceding month. (3) Base, June, 1941=100. (4) Base, 1935-1939=100. (5) Adjusted, where necessary, for seasonal variation. (6) Notes in the hands of the public. (7) Figure for four weeks ended June 24, 1944 and corresponding previous periods. (8) MacLean's Building Review.

declined from the previous month by 1·6 per cent to $57,958,026 at May 1. The reduction may be explained partly by industrial disputes in the automobile industry and by lessened employment and overtime work. Per capita weekly earnings receded from the recorded high level of $32.37 at April 1 to $32.26 at May 1.

The greatest decline in employment at May 1 took place in the manufacture of durable goods while manufacturing in general showed slightly increased activity. Increased employment was noted also in logging, communications, transportation, services and trade while the mining and construction industries showed decline.

The index of the physical volume of business recorded a further decline in May to 236·0 from 239·5 in April and from 248·8 in December 1943, the highest point in the record. This compares with 231·8 in May, 1943. Construction, manufacturing and mineral production averaged lower in May, although coal production showed some increase. The indexes for the production of electric power and for the distribution of goods advanced above the levels of the previous month.

The trend of economic conditions averaged higher in the first five months of 1944 than in any other similar period in the record. The index of the physical volume of business for this period averaged 5·1 per cent over the first five months in 1943. In the same comparison, industrial production increased 2·8 per cent, mineral production 5·4 per cent, manufacturing production 2·7 per cent, the value of contracts awarded 44·0 per cent, carloadings 11·4 per cent, export trade 37·2 per cent, import trade 2·8 per cent, the positive balance of foreign trade 106·6 per cent, wholesale prices 4·5 per cent, and the circulating media expanded 22·5 per cent. The 6·5 per cent reduction in the production of creamery butter was more than offset by the 31·5 per cent increase in the production of factory cheese. Employment in building construction declined 46·2 per cent and in highway construction 7·7 per cent, coal production decreased 3·9 per cent, mint receipts of gold 20·0 per cent and net exports of non-monetary gold 25·0 per cent in the same comparison.

Dominion-provincial conference on health insurance

A conference of Provincial Ministers of Health and their Deputies was held in Ottawa on May 10, 11 and 12, 1944, to discuss the subject of health insurance.

The meeting was attended by all Provincial Ministers of Health and their Deputies. There were also in attendance members of the Advisory Committee on Health Insurance and the Finance Committee and a good representation of the Special Committee on Social Security.

All Ministers of Health approved of the principle of health insurance and expressed themselves as being favourable to its early adoption, though some doubt was expressed by some of the Ministers as to their ability to introduce all of the benefits of the Bill at one time or to apply its benefits in all parts of the province at once.

A special committee studied the question of the per capita cost of the plan, which has been estimated at $21.60.

Each item forming the total of $21.60 was thoroughly discussed and, with the exception of the amount allocated to dentistry which it was thought should be submitted to the Canadian Dental Association for consideration, each item was approved by a motion and passed unanimously.

The report of the committee is as follows:

The Committee appointed to examine the estimated per capita operational cost figure for health insurance in Canada of $21.60 begs to report as follows:

Item 1. Physicians' Fees.

In view of the information available the Committee is not prepared to recommend any reduction in the per capita of $9.50 for physicians and consultant services.

Item 2. Hospitalization.

The Committee recommends that the figure of $3.60 per capita for hospital fees be approved.

Item 3. Nursing.

The Committee recommends that the figure of $1.75 per capita for nursing benefits be accepted in lieu of reasonable information to show that the figure should be higher or lower.

Item 4. Medicines and Surgical Appliances.

The Committee recommends that the figure of $2.55 per capita for medicines and appliances be accepted.

Item 5. Laboratory Services.

The Committee recommends that the per capita figure of 60 cents for laboratory, X-ray services, etc., be accepted.

Item 6. Dentistry.

The Committee recommends if the dental services are to be limited to children between 3 and 16 years of age the per capita cost figure of $3.60 for dentistry should be re-examined and a figure established after discussion with representatives of the Canadian Dental Association.

The draft bill provides dentistry for everyone in so far as the number of dentists in Canada is available.

Cost of living index declines slightly

The Dominion Bureau of Statistics cost of living index on the base 1935-1939 =100 declined from 119·2 on May 1 to 119·0 on June 1. The food index recorded an unusual decrease from 131·7 to 131·1, affected by lower prices for potatoes, butter, eggs and onions. Cabbage, carrots and lemons were moderately higher. Seasonal influences in June are generally upward, and in the preceding three years, the food index has registered gains of 2·8, 1·9, and 1·0 points. The only other change in June was for home furnishings and services which moved from 118·5 to 118·4. Other budget group indexes remained unchanged as follows: rent, 111·9, fuel and lighting, 112·5, clothing, 121·5; and miscellaneous items, 109·0. After adjustment to the base August, 1939, as 100 the index was 118·1 at June 1.

Vacations with pay in Canada

In reply to a question in the House of Commons on June 5, Mr. Paul Martin, K.C., M.P., Parliamentary Assistant to the Minister of Labour, stated that 1,007 vacation with pay plans were made effective during 1943 by the National War Labour Board and regional boards. The plans affected 549,863 employees. "The standard plan," Mr. Martin stated, "allows an employee one-half day vacation with pay in any year for every 25 days actually worked during the previous year. Under the standard plan an employee may become entitled to not over six days' vacation with pay." In further reply, Mr. Martin said it was not possible to estimate the cost to industry of vacation-with-pay plans.

Labour organization in Canada

The thirty-second annual Report on Labour Organization in Canada, recently published by the Department of Labour, covers the calendar year 1942. It describes the historical background of the labour movement in Canada, and gives an account of the present structure and membership of labour organizations.

During 1942 union membership in Canada, as recorded in the Department of Labour, totalled 578,380. Of this total, 230,290 were in local unions affiliated with the Trades and Labour Congress of Canada, and 200,089 in unions associated with the Canadian Congress of Labour. The Canadian and Catholic Confederation of Labour had 46,477 members, mainly in the Province of Quebec, and the Railway Brotherhoods 32,984.

Union membership in Canada had totalled 461,681 in 1941 and 362,223 in 1940. In 1919, an earlier year of union strength, 378,047 workers were recorded as union members.

An estimate of union membership for 1943 was given in the House of Commons on June 5 by Mr. Paul Martin, K.C., M.P., Parliamentary Assistant to the Minister of Labour. Based on partial returns, this estimate indicated that membership had risen to about 660,000.

The Labour Organization Report, which is available from the Department of Labour at a charge of twenty-five cents, lists all trade unions of larger than local proportions and gives their affiliation (if any), names and addresses of officers, and the number of branches with their location. It also contains sections on trade union benefits, women in trade unions, and associations of public employees. The report is illustrated by a number of charts, and contains tables imparting a variety of statistical information.

Crown corporation to dispose of surplus war supplies

Bill No. 137, respecting surplus crown assets, received royal consent on June 30. The Act sets up a Surplus Crown Assets Corporation and an advisory committee on surplus crown assets.

The purpose of the corporation is to sell, lease, lend or otherwise dispose of, manage, or deal with surplus government assets. It is responsible to the Minister of Munitions and Supply. The committee will advise the Minister on matters relating to the handling of surplus crown assets.

The Surplus Crown Assets Corporation replaces the War Assets Corporation which is now dissolved. In explanation of the short life of the War Assets Corporation, set up by Order in Council in November, 1943, the Minister explained that the powers of the government under the War Measures Act would expire after the end of the war, but the work of disposal of surplus crown assets would necessarily continue for a long period thereafter. An act of Parliament was therefore necessary to provide the new corporation with continuous authority. While the War Assets Corporation chiefly concerned itself with selling scrap to the public and transferring material from one government war supply program to another, the new corporation is authorized to sell any surplus material, scrap or otherwise.

Labour will be represented on the Board of Directors of the new Corporation by Mr. J. B. Ward, Chairman of the General Conference Committee of the Standard Railway Labour Organizations.

Death of Mr. Frank Lafortune

The Department of Labour lost a loyal and competent official in the death on June 29 at Rouyn of Frank Lafortune, a member of the Industrial Relations Branch.

Mr. Lafortune died on duty while taking a representation vote of miners. He had been in indifferent health for a considerable period but actuated by a high sense of service to the Department and the country had persisted in carrying on his duties in work of a particularly important nature and in which there is an acute shortage of trained personnel.

In the conciliation service of the Department his understanding and fairness, and knowledge of labour problems, were invaluable assets in the settlement of disputes.

Universities provide courses in prevention of industrial accidents

The leading article in a recent issue of *Industrial Safety Survey*, published by the International Labour Office, draws attention to a recent development in industrial accident prevention. The writer of the article is Mr. R. B. Morley, General Manager, Industrial Accident Prevention Associations, Toronto.

The present world war is credited with providing universities in the United States and Canada with the incentive to open their doors to training in accident prevention.

It is pointed out that since the outbreak of war "the demand for men and women with some knowledge of accident prevention soon absorbed the available supply". Some quick means had to be found to equip individuals with even a slight knowledge of accident prevention to meet the immediate needs in many industries, whether producing materials for war or for civilian use.

Mr. Morley goes on to say: "In a 96-hour course or in an even shorter course, the student can learn something of the investigation of accidents and the analysis of accident records. He may learn some of the fundamentals of the inspection of buildings, machinery, equipment and property." But there are many phases of accident prevention of which he cannot learn much in so short a time. Among such factors might be mentioned, the checking of plans, specifications, contracts and purchase orders, as well as the control of hazards through design, plant layout, and other changes in environment. Then too, he can learn "something of the installation of safeguards and the provision of personal protective equipment and job training and analyses from the standpoint of safety . . . safety promotion, the education of employees and the public . . . plant management and labour co-operation."

The plan followed at the University of Toronto was: (1) To interest a group of at least 40 to 60 men and women from industry to the extent that they would attend a course of lectures in accident prevention; (2) to paint for those students a broad general picture of accident prevention and workmen's compensation and then to depict the intimate details of plant organization, plant safeguarding, safety education, etc.

Similar courses were established, a little later, by the University of Western Ontario, one at London and another at Sarnia, Ontario. The University of Manitoba provided a like course during the autumn of 1943 and early winter of 1944.

The conclusions reached by those responsible for the courses were generally favourable to the plan, alike from the standpoints of industry, the students who took the courses and the universities. It is urged that industrialists and the universities might well explore the whole field so that they might co-operate the better either in the provision of separate courses in accident prevention, or incorporating them in courses in engineering, chemistry, business administration, etc.

Passage of reinstatement act in Great Britain

The Reinstatement in Civil Employment Act, 1944, of the Parliament of the United Kingdom was passed on March 21. The provisions of the Bill were summarized in the LABOUR GAZETTE, March, 1944, p. 264. Changes made in the course of the passage of the Bill through Parliament include an increase in the fine to which an employer is liable for failure to comply with the order from £50 to £100, the omission of the clause empowering the Minister of Labour and National Service to make regulations defining the meaning of "reasonable and practicable" in relation to certain requirements with regard to reinstatement; the provision that where an applicant for reinstatement had been continuously employed for not less than 52 weeks before the beginning of his war service, he must be employed for a minimum period of 52 weeks instead of a minimum of 26 weeks, the period applicable to any other reinstated person.

The Act is to be brought into effect on a day appointed by the Minister. Meantime, the provisions of the National Service Acts regarding reinstatement remain in force.

"Maintenance-of-membership" clauses in collective agreements in U.S.A.

During the closing months of 1943 Industrial Relations Councilors, Inc., of New York, completed an extensive study of trade union security in the United States, with particular emphasis on the origin and application of varying forms of "maintenance-of-membership" clauses in collective agreements. The results were embodied in Industrial Relations monograph, No. 8, prepared by Bryce M. Stewart and Walter J. Couper, under the title *Maintenance-of-Union Membership*. (See also, L.G., 1942, pp. 812 and 1372; 1943, pp. 303 and 1328).

The monograph defines some seven types of union security one or other of which is included in many collective agreements in force in the United States. Federal statistics are quoted to indicate the extensive development of union security in recent years, and an explanation is given of the governmental machinery set up for the adjustment of labour disputes in war industries, both prior and subsequent to the conference of industrial and labour leaders summoned by President Roosevelt late in 1941.

The evolution of maintenance-of-membership clauses in the United States is explained in considerable detail and specific instances of its application are cited. It is pointed out that the National War Labour Board of the United States adopted a standard maintenance-of-membership clause in August, 1942, and sought to have it included voluntarily in collective agreements where union security was an issue.

It is stated that from February 25, 1942, to July 1, 1943, the N.W.L.B. handled 246 cases involving union security. The Board disposed of these cases by 203 decisions. Maintenance-of-membership was directed in 173, or about 85 per cent and denied in 15, or seven per cent of the decisions.

The monograph concludes with a critical analysis of the principles involved and the results so far derived from the inclusion of maintenance-of-membership provisions in labour-management agreements in the United States.

U.S. Government and safety work

The United States Department of Labour and the War Production Board have made an agreement for co-operation as a further step in the safety campaign being waged by Federal Government agencies, trade unions, employers' organizations, and other private groups.

Under the agreement, the Industrial Health and Safety Section of the WPB Labour Production Office will receive reports, suggestions and complaints regarding the industrial hygiene and the safety of war workers, refer them to the proper Federal agency when remedy is necessary, see that all organizations make use of educational material, and aid in ensuring that labour and management representatives co-operate with Federal and State agencies in carrying out health and safety programs in designated critical war industry areas.

On its part, the Labour Department, through its Division of Labour Standards, will work with labour, management, State labour departments and the American Standards Association in drafting safety codes; analyze and distribute information concerning safety laws and regulations; publish material on industrial safety and health; and conduct training courses, in conjunction with the U.S. Office of Education, for supervisors and trade union representatives.

Hours for women in U.S. factories

A leaflet issued by the U.S. Women's Bureau indicates to what extent State hours for women have been relaxed since the war. Ten of the 14 most highly industrialized States amended their laws in 1942 or 1943 to permit longer hours than the normal maximum of 8 or 9 hours in a day or 48 hours in a week for women in factories. Four of these 10 States placed no statutory limit on this extension of hours. Four of the 10 had previously had some overtime provision before the wartime amendments, but the exact number of hours allowed is unspecified in the bulletin. Four of the 14 States made no change in 1942 or 1943; two permit no overtime beyond 8 and 48 hours and the other two provide for limited overtime.

U.S. Conference on labour standards

State Labour Commissioners from 14 States with the greatest concentration of industry met with representatives of the three branches of the Forces, the War Production Board and U.S. Department of Labour to formulate plans for the return to peacetime labour standards. The conference was called by the Honourable Frances Perkins, Secretary of Labour. Machinery for notifying State Labour Departments promptly regarding cutbacks and cancellations of war contracts should be developed, the Conference considered, in order that problems arising from the sudden discharge of large numbers of workers may be avoided. The State Labour Commissioners agreed to review all exemptions from State

laws concerning hours in order to determine the need for them. They urged that for juveniles from 16 to 18 years of age who are attending school and also employed in industry, school and job should not occupy more than 8 hours a day or 48 a week.

Wisconsin children in street trades

Street-selling and the door-to-door distribution of magazines and newspapers by children is regulated in Wisconsin by an Act of 1937. Permits are required in larger places for all boys under 18 who engage in a street trade but are not necessary in places of less than 1,000 inhabitants. A "street trade" includes the distribution of newspapers or other goods from house to house. No girls under 18 may be employed in any street trade and no boy under 13, except that a boy of 12 may be permitted to engage in house-to-house selling or distribution in residential areas during the war.

The hours of work are limited to 24 a week between 5.00 a.m. and 7.30 p.m. for those under 16, with the additional restriction that they may not be employed when public schools are in session unless they have completed the highest school grade available to them. For boys between 16 and 18, the hours may not be more than 8 a day or 40 a week, nor any hours when they are required by law to attend school. No street trade permit is to be issued to any boy unless he is physically and mentally able to carry on such employment in addition to the school work required by law.

The Industrial Commission of Wisconsin is charged with the enforcement of the Street Trades Law, and police and truant officers assist by questioning minors and reporting all cases of apparent violation. Every minor selling or distributing newspapers is considered an employee and each independent news agency, or each selling agency of a publisher, or, failing that, each publisher, is considered an "employer" of such a minor.

The number of permits issued in 1942 was approximately 38 per cent greater than in 1940, but 10 per cent less than in 1941. From 1940 to 1942 there was a very large increase in the proportion of 13 year-olds who were granted permits, while in the other age-groups there was a decline. The general trend toward the employment of younger boys is shown in all street trades except magazine distributors, and is especially evident among boys handling newspapers. The decreasing number in the older age-groups is due to the fact that these youths obtained industrial jobs during school holidays.

Holidays with pay in New Zealand

The New Zealand Annual Holidays Act is to come into force on August 1, 1944. It makes provision for two weeks' holiday with pay for every worker at the end of a year's employment.

The Act applies to persons of all ages and of either sex who are "employed by any employer to do work for hire or reward," including domestic servants and apprentices and other persons learning a trade while employed. It will not affect workers who are already entitled to more favourable annual holidays under other arrangements.

Payment during the holiday will be the worker's ordinary pay, on the basis of the "normal weekly number of hours of work calculated at the ordinary time rate of pay." It is to include the cash value of any board or lodging provided by the employer as part of the worker's remuneration.

In the case of workers employed for less than a year, holiday payments are to be made by the employer proportionate to the worker's length of service. The amount is to be equivalent to 1/25 of the worker's ordinary pay for the period of his employment. In the case of workers employed less than 12 months but more than 3 months, the amount is to be paid on termination of employment. Where employment is less than three months, the worker must be given a "holiday-card" to which postage or revenue stamps are affixed to the value of 1/25 of the worker's ordinary pay. The card may be converted into cash at a post-office one year after the earliest period of employment for which stamps are affixed.

Holiday pay is to be regarded as salary or wages, and is accordingly subject to deductions in respect of socially security charges, taxes, etc.

The two weeks' holiday to which full-time workers become entitled must be given within six months of the date it becomes due. Upon mutual agreement between employer and worker it may be split up into two periods of one week each or may be taken wholly or partly in advance of the completion of the year of service.

A "holiday-book," kept by the employer, must be open at all times to a factory inspector, showing the duration of employment, the date on which the workers' holidays are due, the dates of the holidays, the amount paid to each worker in respect of such holidays, and similar details. An inspector may take proceedings on behalf of a worker where improper payment has been made by an employer.

Manpower

Allocation of Manpower in Canada

Functions of National Selective Service and Manpower Situation Reviewed by Mr. Arthur MacNamara, Deputy Minister of Labour, at Annual Meeting of Canadian Manufacturers' Association

MR. CHAIRMAN, I welcome the opportunity of speaking to this most representative gathering of employers in the manufacturing industry, for it gives me an opportunity of better acquainting you with some of the wartime problems with which the Department of Labour and National Selective Service have had to struggle.

At the outset, I wish to express my thanks for the excellent co-operation given all over Canada by employers upon whom have been made many demands not only for reports to National Selective Service but also for assistance in many directions. Our task would have been impossible had this assistance not been cheerfully and readily given.

It is not easy to give a simplified definition of the term "National Selective Service." To one the term signifies the call-up for military service. To another, it means an office to which he goes to look for labour or to find a job. To a third—a farmer—it may mean an agency to bring farm workers when he needs them from a point several hundreds of miles away.

In its origin the term referred to a body of regulations, aimed at channeling our manpower and woman-power into the spots where each may render the most effective service, make the most effective contribution to our general and common war effort.

On the administrative side, National Selective Service refers to the actual direction and guidance, whether on a voluntary or a compulsory basis, of the men and women of the country, to carry out the purpose and intention of the regulations to which I have referred. Therefore, speaking from the administrative point of view, the term National Selective Service is almost indistinguishable from all the problems inherent in "manpower supply," and it is under this aspect mainly that I wish to deal with Selective Service.

Administrative Principles Involved

It seems to me that one point on which just about all exports in the manpower field have come to agree is the difficulty, the virtual impossibility, of preparing a manpower blueprint good for the duration of the war, and expecting that it will be found possible to carry it through without a hitch. For all the leading members of the United Nations this has been a war of surprises, and each surprise has forced a change in thinking, major changes in planning for the immediate future. The strategy of war changes. The theatre of war changes.

What we have adopted is a set of flexible administrative principles, based upon realism—principles which may be varied, continually fitted in, variously applied, to meet the ever changing needs.

I think there will be much of interest in going over the principles of Selective Service once again. Speaking in the House of Commons on April 28 last, my chief, the Honourable Humphrey Mitchell, Minister of Labour, admirably recapitulated the procedures and success under National Selective Service.[1] I feel that pointing out how Selective Service has met and proposes to meet constantly changing conditions, will be timely now when we are face to face with the most critical labour supply situation since 1939.

As citizens you are vitally concerned on all that bears on our war effort. As manufacturers (and consequently, employers) manpower becomes a personal problem to you—a matter of endeavouring to secure the staffs needed to do your work, to meet production schedules.

Allotment of Canadian Workers

Latest complete figures on the wartime distribution of our national population are for December 1, 1943. At that time 57·3 per cent of our people, aged 14 years and over,

[1] L.G., May, 1944, p. 558.

12558—2½

were in the Armed Forces or at work. From the beginning of the war to that date there had been an increase of 1,317,000 or 35 per cent in the gross number working and serving in the Armed Forces. These figures are as at December 1, 1943. We are now six months later and the figures are considerably higher, possibly 62 per cent instead of 57·3 per cent. A record of which we can be proud!

It is the highest level of employment which has been attained in the history of Canada. It leaves mainly those attending school, the unemployable and housewives and homemakers not working at wages. We will increase that 57·3 per cent in 1944, but to a limited extent, for we are nearing the peak of our capacity, unless we were to resort to more strenuous measures regarding young people at school and married women.

And these figures I have been using do not give full weight to the contribution being made by some sections of our population. For example, another 8·6 per cent (or 760,000) are farm women who certainly have given a most excellent account of themselves during the war. They are *not* included in the figures quoted. Also, housewives, homemakers, in a multitude of cases, though not listed as employed, are making a magnificent contribution of one sort or another to our common effort.

One more figure—as of December 1, 1943—there were 769,000 men and women in the Armed Forces—four and a quarter million working—a total of over five out of every eight persons, fourteen years and over, either directly in the fighting line or working. You and I and every other Canadian can be very proud of this record.

Civilian and Military Requirements

At December 1, 1942, the military call-up was transferred to the Department of Labour. This made it possible to more closely correlate the demands for manpower on the civilian and military sides. In planning to meet civilian requirements, we are in a position to know what requisitions for men we will have to meet insofar as the Army is concerned.

We have had labour shortages, but no one who considers the situation will be at all surprised at that. With the build up of the Armed Forces, with the increase in agricultural and industrial production, with the frequent demand for the erection of new structures, these shortages were inevitable.

Manpower Requirements in 1944

Before going on to the details of Selective Service operations I would like to discuss the conditions which we will face in 1944. How will you fare during the rest of this year? To what extent will labour supply requirements be met?

It would be more logical and more orderly for me to leave this portion until later on. You are all interested in how your businesses will be affected during 1944. I felt I should come to this part of my statement at an early stage.

I wish I could give you a reassuring answer insofar as labour supply during 1944 is concerned. It would be such a relief to be able to say, "You can count on securing just whatever workers you require".

Of course I can give you no such reassurance: on the contrary, I must warn you that we shall go through the most stringent conditions in respect to shortage of labour that have ever existed in Canada.

I said I should like to be able to give a reassuring answer, but that is only from one point of view. We are all proud of Canada's fighting strength, of Canada's position among the United Nations. Civilian labour shortages are the result of the development of our strength. It could not be otherwise. We could not have built a war machine as we have, we could not have become suppliers of our Allies, and *not* have labour shortages. Therefore, while admittedly embarrassing, our labour shortages are symptomatic of our total war effort, and as such, a cause of some gratification.

At June 2 last, we needed 134,117 men to fill vacancies (other than in logging and farming) listed with our employment offices. This figure was mounting rapidly: it had nearly doubled since the end of February, when it was at the winter low. Moreover, we had 67,323 vacancies calling for women, unfilled. This gave an overall total of men and women required (in other than logging and farming) of 201,340—quite an appreciable total. And of the total, just over 100,000 vacancies for men and nearly 45,000 for women were in high priorities—"A" and "B".

To name the industries short of workers would mean a big list. As an indication I mention a few. Railways are short; base metals need 2,000 men; packing plants are in sore need; foundries and agricultural implements are hard pressed; and the heavy shell program needs help—to mention just a few.

Then agriculture will need a quarter million men and women for various lengths of time.

Also, during the present fiscal year the Armed Forces, it has been announced, will need 98,000 men. Some of these will be young men finishing school, but most will be those now employed; there is no other source. Many of those taken from industry will have to have their work taken over by someone else, so that will give us another problem.

In the face of this critical shortage, what's to be done? It is no time to panic: we must meet the situation head on, and do our best to alleviate it. Several devices and principles for meeting labour needs, some new and some old, will be invoked.

More reliance will be placed on compulsory transfers, to help out high priority work. We must do this—it's a case of grim necessity. However, with the way less essential jobs have already been picked over, we cannot expect too much labour from that source. Shifts within high priority industries also will be necessary.

How Employers May Help

In this critical situation, I appeal to employers once more to help Selective Service. You have done it before; it is more necessary than ever now. The more obvious ways in which you may help are:

(*a*) If you actually require labour, get in touch with the nearest Employment and Selective Service Office, giving them as much notice as possible.

(*b*) Please do *not* notify the Employment Office of a need for labour unless it is real and actual.

(*c*) If you list vacancies with the Employment Office, cancel them if the need disappears. This means we have an accurate picture of the situation.

(*d*) Please notify the nearest Employment Office as early as possible of any proposed lay-off—whether employees are to be laid off temporarily or permanently. This means their services will be available elsewhere.

(*e*) Notify the employment office of any employees you have who are surplus to requirements; this applies also to any employees whose services you might be able "to lend," even for a short while.

(*f*) Make the best possible productive use of the employees you have; readjust them within your plant to meet your needs as far as possible.

(*g*) Bear in mind particularly Canada's underlying need of farm production; where you have employees who may be able to work on the farm for a while, without loss of war production, encourage them to do so, and take the matter up with the nearest Employment Office.

(*h*) Consider and discuss with your employees the possibilty of forming a labour-management production committee — representing yourself and the employees. You will find a good committee an aid to production.

We ask employers to bear in mind that more than ever before, in spite of the help we are prepared to give them, they must rely on their own resources in the first instance. I am not trying to frighten anybody away from appealing to Selective Service for assistance in regard to labour supply; on the contrary, where assistance is needed, I appeal to you to take your problems up with us. But where you can solve your own problem within the plant, please do so. I am not blind to the fact that industry has done a great deal of this since 1939. But more can be done—and due to the over-all labour shortage this year, which will probably reach its peak by about October, more than ever *must* be done.

Plan to Allocate Workers

National Selective Service is developing a three-fold plan which will be of some assistance. It is:—

First, some 500,000 men who have been rejected for service in the Armed Forces will be interviewed individually, with a view to moving them, where necessary, to more essential employment.

I might add that in order to speed up this plan arrangements have been made for Selective Service and Employment Offices throughout Canada to stay open when necessary during evenings.

Second, the Compulsory Transfer Regulations now in effect are to be extended to cover a greater number of occupations and will be applied more vigorously.

Third, the Industrial Mobilization Survey plan will be extended to cover all industries, regardless of priority. The employment of all men aged 16 to 40 inclusive, in all industrial and commercial establishments will be subject to survey.

These surveys will be made as rapidly as possible. Their primary purpose is:—

To determine cases where men on postponement can be called for military training without interference with essential production;

to arrange transfer to more essential jobs of men who are medically unfit or not callable for military service for any reasons;

to discover cases where an employer, in any priority, has a temporary or permanent surplus of men in the age groups mentioned, who may be moved to essential work.

I would stress the point that in regard to men in the age groups mentioned, whether callable for military training or not, or whether

married or single, all cases will be examined most carefully. Essential and non-essential industries will all be covered.

Every effort will be made to treat fairly the employers and employees involved—but the paramount importance of war production will be the deciding factor.

Workers transferred have the right to reinstatement in former jobs, after the emergency passes.

Under certain conditions, special allowances will be paid to those moved to other jobs where hardship would be involved.

Employers and employees may appeal decisions of these Committees to Courts of Referees, which are widely distributed throughout the country and which include representatives of labour and employers.

The plan I have outlined will be put into effect immediately.

Selective Service Technique

We shall continue to rely upon the established principles and special devices which have been put into effect at various times and which I shall outline briefly.

Stabilization of Employment:

(*a*) Continuous change in personnel is wasteful of manpower. Therefore, a brake was put upon the speed of these changes by requiring an employer or an employee to conform with the principle of the job permit and the seven days' notice of separation from employment.

(*b*) In highly important industries Selective Service Stabilization amounts to refusal to permit workers to leave a given high priority industry, in practically any circumstances except ill health.

(*c*) Postponement of military training has been related to labour needs in essential industries. Men have been left in civilian life where their services are deemed essential to war production or essential civilian services. In agriculture—generally short of workers—postponements have been practically general.

(*d*) In an extreme instance, even the voluntary enlistment of men from an industry such as coal mining was stopped.

(*e*) Equally a stabilization measure, I might refer to the conciliation work of the Labour Department in industrial disputes. Here the aim is to keep the wheels of industry turning, and to settle disputes without resort to a work interruption. We have had lockouts and strikes. We have had the loss of production due to work stoppages. But a comparison between our own experience in this war and the last, and between our experience in this war with that of other countries, indicates that our employers and labour leaders have acted in the main with discretion and restraint, with a full sense of their responsibilities, and with a full realization of the utmost necessity of uninterrupted production.

Workers from Unusual Sources:

(*a*) It has been true of Canada that a substantial number of women do not ordinarily engage at gainful employment. These women early became the first additional source of increase to the total of workers, becoming employed on both a full-time and part-time basis. From the beginning of war to October last, the number of women in employment and in the Armed Forces increased by 437,000, bringing the total to slightly over a million. I wish to pay tribute to our Canadian women and the part they have played in the war effort.

(*b*) Members of the Armed Services, in several instances, where they could be spared from military duties, have been given leave to help agriculture or industry.

(*c*) We have secured workers from miscellaneous sources—prisoners of war, conscientious objectors, Indians from reserves, part-time workers for a few hours a day, and other different categories of workers have been placed in employment under special arrangements to overcome shortages. Particularly has agriculture benefited from these sources, although manufacturing and trade have also secured a great many hours not otherwise available.

Transfers from Less Essential to More Essential Jobs:

(*a*) Through a system of voluntary appeals, many workers were induced to move from work of less importance to more essential occupations.

(*b*) A system of compulsory transfers was inaugurated a year ago, of male employees to high priority work.

Priorities and Direction:

The adoption of a priority system two years ago laid the foundation for both negative and positive compulsion. At one and the same time it placed us in a position where labour available for engagement could be diverted to the most important job offering; while in 1943 it provided a basis for the start of our system of compulsory transfers. Also, it has indicated the points at which pressure should be applied, when choosing among competitive demands for workers.

Mobility of Labour:

With our distances, shortages of manpower may develop locally, while workers are avail-

able elsewhere. Mobility of labour becomes vitally important when you are reduced to a situation where every last worker counts. Through assistance by way of transportation and special grants, we have overcome most of the natural difficulties, even the workers' inclinations, standing in the way of making our working forces as mobile as necessary. We have moved men and women by the thousands —frequently over long distances, and frequently, I would add, with the co-operation, financial and otherwise, of industrial management.

Trade Training:

The War Emergency Training Program (now the Vocational Training Program) has given training courses to 340,000 workers, to fit them for specialized work. We had been sadly deficient in trade training for 10 years before the war started. By methods of intensive training this lack of skill has been overcome in large measure. Such training has assisted industry to make more extensive use of latent woman-power.

Dovetailing of Employment:

We have dovetailed employment. We have induced urban dwellers to help the farmers during their vacation or on holidays. We have induced farmers to help industry during the off-season on the land. There always is, of course, a good deal of dovetailing of employment in Canada, but I think it may be claimed that it never before existed to anything like the same extent as during the last two years.

Labour-Management Committees:

The Labour Department has given encouragement to the establishment of labour-management production committees. By increasing the joint interest of management and labour in production, these committees perform a useful purpose in increasing production, with the mutual consent and co-operation of the two partners to industry.

Industrial Mobilization Surveys:

Under the Industrial Mobilization Survey plan, there has been provided an orderly system for withdrawing men from industry for the Armed Forces.

Administrative Machinery:

To carry through Selective Service on the civilian front without duplicating administration, we took over, expanded and completed organization of the employment service then being set up under the Unemployment Insurance Commission. We doubled the points with local Employment and Selective Service Offices and I think we may add still more. Staff has been greatly increased.

We have made the employment offices the focal point of manpower problems for civilian employment. We believe this has made for much better integration of our several plans, better handling of our problems in the long run. If the offices have not given perfect service, then one need point only to the hectic conditions they had to face, that they were called into being over night and that even we, in relation to our own staff, have had to face manpower shortages. We do feel the local offices have acquitted themselves rather well in the circumstances.

Consultative Machinery:

Through a system of boards, advisory committees and Courts of Referees, we have drawn very heavily on the advice and rich experience of those who know industry—employers and trade unions. And the guidance and advice we have received has been simply invaluable. To them a large part of any success through Selective Service rightfully belongs.

In outline, I have given the principles on which Selective Service in action has rested. As long as the war lasts, critical labour needs must be met by one or other or several of these principles being applied—with the addition of new devices as required. They may all look fairly simple, but they are not always so simple when an effort is made to put them into effect. Plans such as we have employed can only work if there is almost unanimous consent and support on the part of the population. This we have had, in very large measure; we hope that support will continue till the war's end.

National Selective Service in Post-war Era

Although we must allow nothing to distract our attention from the supreme purpose of making victory a reality, nevertheless it is not inappropriate to ask, what of National Selective Service in the post-war era? Will National Selective Service survive the war in its present form? If it will not, then will any parts of it survive?

The Minister of Labour has stated more than once that he feels the compulsory features of Selective Service will disappear rapidly once the war is won. This follows from two considerations: first of all, it is doubtful that the same need for compulsory direction of workers will exist after the war.

But perhaps the over-riding consideration is the second: that in a democracy like our own, while the citizens are quite prepared to co-operate with governmental direction and

compulsion in wartime, in normal times they would probably threaten rebellion if compulsion were continued for long.

Even though compulsion may not be possible following the war—it may not be necessary and probably would be undesirable—a great deal of the experience of Selective Service will be of inestimable value in the post-war world. I might briefly particularize:—

Employment Service Machinery

At the beginning of the war we had employment offices operated by the provinces, with federal financial assistance. I think it was largely through failure of the public to realize what a well-equipped, well-staffed and well-financed public employment service could mean to our economy, that we had failed to set up a proper national employment service. Under the urgings of war, however, we have done this, although the organization had to be built over-night, as I have said—premises and staff had to be acquired, on short notice; staff training had to be given in a minimum of time; and so forth. Perhaps our employment service will be even better by reason of the earnestness which had to be thrown into its formation. Certain it is that the wartime experience it has gained should prove to be extremely helpful during the period of re-adjustment after the war, and even beyond that period. We have within the staff of over 5,000 men and women in the 5 regional and 230 local offices, a wealth of experience to meet any employment emergency which arises following the war.

Even though our employment office personnel may have had to carry out regulations and laws which at times appeared somewhat irritating, it is to be hoped that they have developed a sense of confidence, a feeling of goodwill, among the employers of Canada, so that after the war employers will regard the employment service as their friends and advisers in all employment matters. In the re-adjustment of workers from one industry to another and from one district to another, from military to civilian life, the lessons learned the hard way during the war should make the task very much simpler. This, then, is one of the chief gains arising out of Selective Service.

As with Employment Service, so in the field of trade training have we acquired a great deal of experience. Undoubtedly training will be a heavy factor in post-war re-establishment. Discharged members of the Forces will have to be trained. Civilians who have worked on specialized war jobs will have to be re-trained. Our experience in war-time training should certainly equip us to handle this job—to handle it in much better fashion than we were equipped to handle the war-training job when we first started.

Unemployment Insurance

The Unemployment Insurance Fund now stands at more than $200,000,000. It is a comfort to know that we have this fund of over two hundred million dollars contributed by employees, by employers and by the Government, to give us that much of a back-log to meet the periods of unemployment during the re-adjustment from war to peace-time production.

General Post-war Employment Problems

It is not my intention to go into the various schemes being considered to ensure full employment in the post-war era. As you know, the Government proposes a new department to handle general problems of reconstruction, whose main responsibility will be the post-war re-settlement. Nevertheless, the Department of Labour will have the duty of co-operating in regard to all programs, and I would consider it probable that as Selective Service has been our responsibility during the war, manpower and woman-power problems will still be a heavy responsibility of ours when the war is over.

We have made a small start in this direction, even at this early date. Already we are undertaking the placement, through the Selective Service offices, of members of the Armed Forces who are being discharged. We have a joint committee, with the Department of Pensions and National Health and the Armed Forces, to deal with the employment problems of veterans. Here again we are acquiring an experience which will provide a foundation for handling the larger task when general demobilization is carried through.

Also, in the Labour Department we are setting up a system of surveys in regard to post-war employment possibilities. This, too, will provide a background for our new responsibilities after hostilities cease.

Those who have studied the problem are optimistic in regard to post-war employment possibilities. They point to the shortage of civilian goods; to the building, railway, highway and other construction interrupted by the war; to the new industrial developments—in aircraft, in plastics, in railway and automobile transportation, and so forth—as promising vistas of employment. We all sincerely hope that the feverish activity of the war may be followed by a normal and healthy prosperity lasting for years.

I do feel, and I say it with all sincerity, that National Selective Service will leave to the Department of Labour a heritage of administrative machinery and administrative experience which should contribute mightily in the direction of assisting in that period of full employment which the experts predict, and for which we all sincerely pray.

Now I conclude with a sincere word of thanks for the very wonderful co-operation given by employers to our organization during these times of tests and with a definite promise that our offices and our staffs will spare no effort to give real and helpful service to you employers so that your difficulties will be lessened, and thank you for your kind attention.

New Class Callable for Military Service

A RECENT Order in Council (P.C. 4238) extends the age and marital classes designated for the purpose of the National Selective Service Mobilization Regulations to include men born in the year 1926. Men in this group, however, will be served with "Order-Medical Examination" as they reach the age of eighteen years and six months.

Those callable for military service now include every man who was born in any of the years 1926, 1925, 1924, 1923, 1922, 1921, 1920, 1919, 1918, 1917, 1916, 1915, 1914 and 1913, and every man who was born in any of the years 1912, 1911, 1910, 1909, 1908, 1907, 1906, 1905, 1904, 1903 or 1902, who was on the fifteenth day of July, nineteen hundred and forty, a widower without child or children or a judicially separated or an unmarried man or who has since the said date been divorced or judicially separated or become a widower without child or children.

It is estimated that 104,000 men born in 1926 will reach the age of 18½ years between July 1, 1944 and June 30, 1945.

Amendment to National Registration Regulations

IN order to facilitate the work of the branches of the armed services charged with the duty of apprehending deserters and absentees without leave, an amendment has been made in the National Registration Regulations empowering members of such branches to require persons to produce their registration certificates. (P.C. 3205, June 9, 1944.)

The amended section reads as follows:

"Any person may at any time after the registration period be accosted by any peace officer, police officer or constable, member in uniform of a designated corps or any other person designated for the purpose by the Minister, the Chief Registrar for Canada or the Attorney General of any province of Canada and questioned as to whether or not he is registered and as to whether or not he belongs or has belonged to the armed forces. It shall be the duty of any person so accosted to answer truthfully all relevant questions put to him concerning his registration and his membership (if any) in the armed forces. If, on being questioned by any peace officer, police officer or constable or any other person designated as aforesaid, other than a member of a designated corps, he answers untruthfully or evasively, or if the officer questioning shall have reasonable ground to believe that his answers are untruthful or evasive, the officer may detain such person and take him before a justice of the peace to be dealt with according to law. If, upon questioning a person, a member in uniform of a designated corps reasonably suspects that such person is a deserter from or has absented himself without leave from the armed forces, it shall be lawful for him, if no peace officer can be immediately met with, to apprehend such person and forthwith to bring him before a justice of the peace to be dealt with according to law."

Health Services in Canada

Report of Medical Procurement and Assignment Board

A REPORT on the health service of Canada, resulting from a survey carried out by the Canadian Medical Procurement and Assignment Board, was tabled in the House of Commons recently by the Hon. J. L. Ralston, Minister of National Defence.

The Board was established in July, 1942, its primary function being to secure physicians for the armed forces and at the same time to endeavour to preserve adequate medical services for the civilian population. It consisted of the directors of medical services from the three branches of the armed services and of representatives from Government departments, National Selective Service, and the Canadian Medical Association.

In January, 1943, a survey was launched with the purpose of discovering the number of physicians, dentists, nurses, etc., and their availability for appointment to the armed forces. Studies were also made into the fields of public health, medical schools, industrial medicine, hospital personnel and facilities, dental services, etc. Every community in Canada was investigated. The resulting report contains the findings of the survey, with the Board's recommendations.

Medical Manpower

In March, 1943, Canada's medical population totalled 12,235, the report states. Of this number 3,006 were in the Armed Forces. Of the remaining 9,229 physicians, 8,614 were active while 615 were living in retirement.

By March 1, 1944, the number of doctors in military service had increased to 3,589.

The report points out that there has been a steadily growing demand on the services of physicians under war-time conditions. In an average year there are between five and six hundred disabling illnesses per one thousand population, that is illnesses which involve absence from work and usual occupation. On the average, 3 per cent of the population is disabled on account of sickness each day during the year. This means that on any day over 350,000 persons are unable, by reason of illness, to pursue their usual occupations.

The annual number of deaths in Canada each year exceeds 110,000 and the annual number of confinements exceeds 250,000.

Since 1939 there has been a 10 per cent increase in the number of patients treated in hospitals and a like increase in the birth rate.

Of the active Canadian physicians still in civil life, only 41·7 per cent are under forty-five years of age. The older physicians, particularly that group who were too old to enlist, have had to assume an increasingly heavy burden. Some areas in Canada will be found to have been more denuded of physicians than others—some to the danger point.

In March, 1943, Canada's civilian population was estimated at 11,861,159, being served by 8,614 physicians, or one per each 1,261 persons.

In March, 1943:—

Prince Edward Island had 52 physicians, or one to 1,659 persons;

Nova Scotia had 366 physicians, or one to 1,450 persons;

New Brunswick had 198 physicians, or one to 2,136 persons;

Quebec had 2,681 physicians, or one to 1,206 persons;

Ontario had 3,326 physicians, or one to 1,068 persons;

Manitoba had 473 physicians, or one to 1,438 persons;

Saskatchewan had 408 physicians, or one to 2,078 persons;

Alberta had 460 physicians, or one to 1,626 persons; and

British Columbia had 650 physicians, or one to 1,168 persons.

The report recommends that "freezing" and moving of doctors for the war be controlled by the Canadian Medical Procurement and Assignment Board, and that the Board be given "the same powers with respect to the disposal of medical personnel as National Selective Service has for the disposal of other personnel." It further suggests that each province be requested to grant interim licences to practice to military doctors serving in that province who may be called upon to render services to civilians; and that medical officers of the Armed Forces be encouraged and permitted to assist civilian medical practitioners whenever and wherever possible consistent with their military duties.

(The Minister stated that action had been taken in regard to this last recommendation with the co-operation of the provinces, and that a limited number of military medical personnel was being made available to civilian communities where needs for medical services were "very exceptional and urgent".)

Medical Schools

In pre-war years the nine medical schools of Canada graduated an average of 491 students annually. In spite of a decline of 18·5 per cent in the number of full-time instructors, due to enlistments, the schools have accelerated their curriculum, practically eliminating holiday periods, and are now turning out approximately 540 graduates every eight months.

Public Health

The public health services of Canada—federal, provincial and municipal, were carefully examined and surveyed by experts in the public health field. The present personnel of the Federal, Provincial and local Health Departments, is to be considered as a war-time minimum if the measure of health protection which is now being given is to be maintained, the Report states.

The staffs of the mental hospitals and the tuberculosis sanatoria have been depleted almost to the danger point. The reporting committee is satisfied that no further depletion can be made of the existing staffs without dangerously jeopardizing the welfare of the patients cared for in these institutions.

Hospital Personnel and Facilities

Canada now possesses 1,220 hospitals with 119,019 beds and cribs, and 6,766 bassinets. The percentage of the population treated in hospitals in 1940 varied from 7·2 per cent in Prince Edward Island to 12·9 per cent in British Columbia.

Hospital personnel has been very seriously depleted by the War, the Report indicates. In addition to the enlistment of doctors and nurses, there has been a tremendous turnover of staff, amongst both skilled and semi-skilled workers. This has meant not only considerable disorganization but actual loss in efficiency of operation.

To remedy this situation, the Board proposes that regional wage levels be set for classes of employees engaged in comparable work, that hospitals paying these approved wages should be able to look to National Selective Service for the necessary staff which would be "frozen" in employment, and that hospitals be subsidized by the Federal Government, where necessary, to meet these standardized wage requirements. It is also recommended that hospital strikes of any kind be declared illegal, that chronic absenteeism be considered as an offence punishable by law, and that a large percentage of women now engaged in non-essential activities could be transferred to essential activities.

The Report shows the distribution of hospitals and then devotes considerable attention to the post-war hospitalization needs of Canada, having particular reference to the possibility of health insurance and how it would affect the hospital problem.

Industrial Medicine

All war industries in Canada were studied, either by questionnaire or visitation or both, from the point of view of the health facilities they provide. It was found that there are 6,500 factories in Canada with fifteen or more employees.

The Report indicates those manufacturing establishments which employ either whole-time or part-time physicians and nurses. It also indicates those which do not do so.

Of the 404 physicians engaged in industry, 112 are devoting their full time to the service, 229 are devoting part time, while 63 perform some service on a fee basis.

Twenty-nine factories employing from 1,000 to 3,000 employees were found to be without physicians, full-time or part-time. The findings of the Survey emphasize that a great many employees do not receive the benefits of industrial medical care "which they would and should receive if there were a substantial increase in the number of physicians and nurses engaged in industrial medicine."

The report's recommendations in regard to industrial medicine are as follows:

1. That a decision should be reached as to whether employees of industries now without health supervision should receive supervision as provided for in Dominion Order in Council No. 1550.
2. That the Canadian Medical Procurement and Assignment Board be authorized to provide physicians and nurses as required to industry.
3. That great care be exercised in removing or replacing physicians engaged in industry, bearing in mind the great importance that health plays to industrial output.
4. That full time and part time physicians working in industries be provided with the necessary nurse assistance.
5. That provision be made for medical direction in factories where nurses are working alone.
6. That the part time services of physicians at the rate of one hour per week per one hundred employees and full time services at the rate of one physician for 3,000 employees, at the factory be accepted as the standard for determining medical supervision in industry.

Nurses

The report puts the number of nurses in Canada at 52,483, and indicates a waiting list for the armed forces of 3,741.

Of the total number registered, 22,136 nurses were employed as nurses. In addition 16,818

reported that they were available for full time, part time, or emergency nursing.

An additional 27,051 registered nurses, that is about 52 per cent of the total registrants, stated that they were engaged in employment other than nursing. Of these 25,298 are housewives.

Of the total registration, 42,159 of the nurses reporting graduated in 1920 or since.

Among a number of proposals on this subject, it is recommended that closer control over the supply and distribution of nurses be maintained. Steps should be taken to ensure all nurses receiving salaries that are commensurate with their responsibilities and that compare favourably with wartime salary scales. It is suggested that as much use as possible be made of nurses available for part-time duty. It will be noted that 84 per cent of the nurses who have left the profession since December 31, 1939, have done so to be married. Many of these and other married nurses are returning to the profession, and give valuable service. Adjustments on a part-time basis are frequently necessary.

Dental Services

As of February, 1943, there were 3,284 dentists in Canada attempting to serve approximately eleven million people, or at the ratio of one dentist to every 3,447 persons, the report states.

As of the same date, there were 1,019 dentists in the Canadian Dental Corps.

Dental manpower available for civilian services had been reduced by 21·4 per cent since 1939.

The report advocates the establishment of a procurement and assignment board for dentists and dental technical personnel. It considers that for the duration of the war all dentists at present practising in Canada should be fixed in their present locations and only allowed to change on the approval of the provincial dental advisory committee; and that in the interests of civilian dental services cognizance should be taken of the serious situation regarding dental supplies. Finally it recommends that dental personnel for civilian services be not reduced below 70 per cent of the pre-war level and that in any province where this level has been reached no further dental enlistment be permitted.

Scope of Report

The report is voluminous and detailed in its factual findings, containing approximately 350,000 words. It is available from the King's Printer, Ottawa.

Child Labour on Farms in the United Kingdom

THE defence regulation concerning the employment of children over 12 years of age in agriculture in Great Britain, which was issued in May, 1942, has been amended to prohibit children between 12 and 14 being employed in lifting sugar-beets or by gang-masters.

The regulation permits a child over 12 to be exempted from attendance at school for 20 half-days in any year if the permission of the parent or guardian has been obtained. In cases of emergency, to meet urgent seasonal needs, inspectors are empowered to grant exemptions beyond this prescribed limit.

No child may be employed more than four hours in any half-day nor more than seven hours in any full day, nor more than 36 hours in any week. A break of at least one hour must follow a period of four hours work. In a Board of Education circular issued on May 5, war agricultural executive committees were asked to discourage the employment of children under 14 until all other sources of labour were exhausted.

Suitable clothing, footwear and supervision were required by the regulation. Schools are being used as the picking-up point for the children to eliminate the problem of transport facilities. Local education authorities have been asked to fix the eight weeks of school holidays at such times as will best meet agricultural needs.

Decisions of National War Labour Board

List of Decisions

THE National War Labour Board recently issued decisions in the following cases:—

Messrs. Acme Plumbing and Heating Service, Barr & Anderson Limited, B. Boe Limited, F. N. Hamilton, Sidney Hall, Gordon Latham, Leek & Co. Ltd., Mitchell Bros. Plumbing, Heating and Sheet Metal Co. Ltd., O. S. McMorran, David W. Ross Co., San-O-Heat Limited, Stewart & Phillips (Vancouver) Ltd., Weeks & Co. Ltd., Fred Welsh & Son, all of Vancouver, B.C., and United Association of Journeymen Plumbers and Steamfitters of the United States and Canada, Local 170.

Master Plumbers of Kitchener and Waterloo and United Association of Journeymen Plumbers and Steamfitters of the United States and Canada, Local 527.

Toronto Metal Spinning Limited and United Electrical Radio and Machine Workers of America.

Winnipeg Free Press Company Limited and South Company, Limited and Compositors, Pressmen and Stereotypers' Union.

Canadian International Paper Company and International Brotherhood of Pulp, Sulphite and Paper Mill Workers and International Brotherhood of Paper Makers.

Dominion Textile Company Limited, the Montreal Cottons Limited, and Locals 100 and 102 of the United Textile Workers of America.

New York Central System, Pere Marquette Railway Company, Wabash Railroad, Great Northern Railway, Vancouver, Victoria and Eastern Railway and Navigation Company, Nelson and Fort Sheppard Railway, and the Midland Railway of Manitoba and Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, Order of Railway Conductors, Brotherhood of Locomotive Firemen and Enginemen, Order of Railroad Telegraphers, Brotherhood of Maintenance-of-Way Employees, Brotherhood of Railroad Signalmen of America, Federated Shop Trades, International Brotherhood of Firemen and Oilers.

The E. B. Eddy Company Limited (Hull, Quebec) and International Brotherhood of Pulp, Sulphite and Paper Mill Workers and International Brotherhood of Paper Makers.

J. R. Booth, Limited (Ottawa)) and International Brotherhood of Pulp, Sulphite and Paper Mill Workers and International Brotherhood of Paper Makers.

Defence Industries Limited (Verdun Works and Westmount Tool Works) and International Association of Machinists, Lodge 1594.

Paton Manufacturing Company, Limited (Sherbrooke, Que.) and Textile Workers' Organizing Committee (C.I.O.).

Howard Smith Paper Mills Limited (Cornwall Division) and International Brotherhood of Pulp, Sulphite and Paper Mill workers and International Brotherhood of Paper Makers.

Eddy Match Company Limited and Canadian Splint and Lumber Corporation Lmited (Pembroke, Ontario) and United Brotherhood of Carpenters and Joiners of America, Locals 2823 and 1775.

Hull Printing Company (Winnipeg, Man.) and Typographical Union No. 191 and Printing Pressmen and Assistants' Union No. 87.

Re: Messrs. Acme Plumbing & Heating Service, Barr & Anderson, Limited, B. Boe Limited, F. N. Hamilton, Sidney Hall, Gordon Latham, Leek & Co. Ltd., Mitchell Bros. Plumbing, Heating & Sheet Metal Co. Ltd., O. S. McMorran, David W. Ross Co., San-O-Heat Limited, Stewart & Phillips (Vancouver) Ltd., Weeks & Co. Ltd., Fred Welsh & Son, all of Vancouver, B.C., and United Association of Journeymen Plumbers and Steamfitters of the United States and Canada, Local 170.

Reasons for Decision

An appeal by the Association from a decision of the British Columbia Regional Board dated December 17, 1943, refusing an application under P.C. 5963 for an increase in the basic rate to plumbers and steamfitters and helpers in Vancouver and for the inauguration of vacations with pay. Leave to appeal was granted by the Regional Board.

These journeymen and helpers are employed in general construction and repair work. The application sought the restoration of the $1.25 rate prevailing in 1930 for plumbers and steamfitters, as well as a substantial increase for helpers (from 62½c to $1.00). The basic rate paid to journeymen was $1.12½ per hour. The Regional Board found that local comparisons did not warrant any increase in the current rates and that conditions prevailing in 1930 were not present to-day. Nor did it feel that in this type of employment it should direct employers to grant vacations with pay.

We do not feel that we can on any sound basis interfere with the decision and we must dismiss the appeal.

June 9, 1944.

Re: Master Plumbers of Kitchener and Waterloo and United Association of Journeymen Plumbers and Steamfitters of the United States and Canada, Local 527.

Reasons for Decision

This is an appeal by the master plumbers of Kitchener and Waterloo from a decision of the Ontario Regional Board directing a basic hourly rate of 90 cents to journeymen plumbers and steamfitters in that area. The journeymen involved are engaged in construction and general repair work and are not employed as industrial mechanics. The decision is dated October 29, 1943, and was made under Section 25 of P.C. 5963. Leave was given by the Regional Board to bring this appeal.

We have on several occasions expressed the view that we would not interfere with the decision of a Regional Board under Section 25 when there was involved an estimation of comparative wages upon the basis of local comparisons. But in this case it is not clear whether the Regional Board proceeded upon the basis of journeymen rates prevailing in comparable districts, or upon a comparison of rates paid in the construction trade with those paid to these classifications in industry generally. That being the case, we feel free to make our own comparisons in the building trades in various localities. On the basis of these, we arrive at a basic rate of 85 cents (exclusive of cost of living bonus).

We consequently allow the appeal to this extent.

June 9, 1944.

Re: Toronto Metal Spinning Limited and United Electrical, Radio and Machine Workers of America

Reasons for Decision

(Oral Decision)

It is apparent that the Regional Board has given careful consideration to all the questions involved in this case. In view of the fact that there was an agreement between the parties to make a time study, and which study is now being made, we think the results of such study should have been considered before the application was made.

In any event, however, it is apparent that the Regional Board considered fully all the questions of comparability on a proper basis. We, therefore, see no reason to interfere and this appeal will be dismissed.

June 12, 1944.

Re: Winnipeg Free Press Company, Limited, and Southam Company, Limited, and Compositors, Pressmen and Stereotypers Union

Reasons for Decision

This is an appeal from the Finding and Direction of the Regional War Labour Board for Manitoba directing the employer to maintain without change the cost of living bonus presently paid employees and directing the employer to inaugurate the system of annual vacations with pay.

This appeal was restricted to the second direction quoted above, namely, the inauguration of holidays with pay for the employees. For the employer, it was urged first, that the application by the employees for holidays with pay was contrary to the spirit of an agreement signed between the employer and the employees a month earlier. Second, that by reason of the other terms of the agreement and the conditions therein provided, a system of holidays with pay could not be given. The employees on the other hand state that at the time the agreement was signed it was clearly indicated to the employer that an application of this nature would be made to the Regional Board. We must assume that these matters which are questions of fact were fully considered by the Regional Board and disposed of by it. We see no reason why its finding should be reversed. The appeal will, therefore, be dismissed.

June 13, 1944.

Re: Canadian International Paper Company and International Brotherhood of Pulp, Sulphite and Paper Mill Workers and International Brotherhood of Paper Makers

Reasons for Decision

This is an application by way of appeal from a decision of the Quebec Regional Board dated March 15, 1944 refusing a joint request for wage increases to 26 hourly rated employees.

The matter follows an earlier general application under P.C. 5963 by which the Unions asked for equalization of the rates paid in the Company's mills with the rates prevailing in the newsprint mills located in Ontario. By decision dated December 22, 1943, the Regional Board ordered a general 5-cent increase "except in cases where the Petitioners have requested less", that is, where the differential between the Ontario rate and Quebec rate was less than 5 cents. The latter was the case of the classifications involved in this appeal.

It is contended on this application that these classifications are not altogether comparable with those in Ontario and that the full 5 cent increase should now be extended to this small group to restore established intra-plant differentials.

Having to decide the appeal under section 20 (1) (a) of P.C. 9384 as amended, we must say that in the circumstances described, we are unable to find anything of the nature of a "gross inequality" and the application must be dismissed.

June 12, 1944.

Re: Dominion Textile Company Limited, The Montreal Cottons Limited and Locals 100 and 102 of the United Textile Workers of America

Reasons for Decision

Locals 100 and 102 of the United Textile Workers of America seek leave to appeal from the decision of the Regional War Labour Board of the Province of Quebec refusing to hear applications on behalf of the said textile workers until the Union had clearly established its right to act as bargaining agent for the employees in question.

On October 5, 1943, this Board dismissed an appeal asserted by the same Union on applications for the same purposes relating to the same employees for the reason that at that time the rights of the said Union to represent the employees had not been established. On that occasion the status of the Union was under consideration by Conciliation Boards under the Chairmanship of the Honourable Mr. Justice Savard. In dismissing that appeal this Board said:

> "Accordingly, with regret, we must dismiss the appeal but without prejudice to any subsequent application to the Regional Board by the Union when it has definitely established its status by the process it is now properly undertaking before Mr. Justice Savard or by any other legal process."

Subsequently, in the majority report of the said Conciliation Boards, the status of the Union to represent certain of the employees of the respondent Companies was recognized. The Union, therefore, on January 25 and 26, 1944, submitted new applications (this time

pursuant to the provisions of Order in Council P.C. 9384) to the Regional War Labour Board of the Province of Quebec. On February 3, 1944, the Labour Relations Act of the Province of Quebec came into force. This fact in our opinion fully justified the Regional War Labour Board of the Province of Quebec in requiring the Union to obtain from the Quebec Labour Relations Board proper certificate that it represents the employees before dealing with the merits of the said applications. We think this decision the proper one in the circumstances. The applications for leave to appeal are therefore refused. June 13, 1944.

Re: New York Central System, Pere Marquette Railway Company, Wabash Railroad, Great Northern Railway, Vancouver, Victoria and Eastern Railway and Navigation Company, Nelson and Fort Sheppard Railway, and the Midland Railway of Man. and Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, Order of Railway Conductors, Brotherhood of Locomotive Firemen and Enginemen, Order of Railroad Telegraphers, Brotherhood of Maintenance of Way Employees, Brotherhood of Railroad Signalmen of America, Federated Shop Trades, International Brotherhood of Firemen and Oilers.

Reasons for Decision

The Companies named above are owned in the United States and operate railway services in Canada on railway lines either owned by them or under lease to them. The Unions above named represent certain Canadian as well as United States employees of these Companies. Pursuant to wage agreements of long standing the Canadian employees of these Companies have for many years been in receipt of wage rates similar to those paid to employees of the same Company outside of Canada.

On February 11, 1944, applications were filed with this Board to authorize the employers to pay to their employees in Canada the increased wage rates payable to their employees in United States as provided in wage agreements signed with their employees on January 14 and January 17, 1944.

In support of these applications the Unions represented as follows:

(1) The Canadian lines are operated by and are a part of the involved railways whose principal operations are conducted in the United States.

(2) The employees on such Canadian lines are employed by the involved United States Railways. Moreover, such employees perform service identical to that performed by similar employees in the United States.

(3) These employees for many years have been covered by system agreements governing wages and working conditions, without distinction as between those working on lines in the United States and those on lines in Canada. These agreements are subject to interpretation by the National Railroad Adjustment Board as provided under the Railway Labor Act in the United States.

(4) These employees are also subject to the provisions of the Railroad Retirement and Railroad Unemployment Insurance Acts in the United States and are exempted from the provisions of the Canadian Unemployment Insurance Act.

(5) The traffic on the Canadian lines of the involved railways originates for the most part on their United States lines and is destined to points in the United States.

(6) Large sums of money are transferred annually by the involved railways from the United States to Canada to meet the payrolls of such employees.

The Unions represented also:

The attention of the Board is directed to a previous case which in all respects was similar to the present case. In December, 1941, wage agreements were negotiated granting increases in wage rates to substantially all employees, and vacations with pay to certain other employees on railways in the United States. A petition was filed with the Board requesting the application of such agreements to the employees on the Canadian lines of the affected railways. On February 6, 1942, the Board issued an order directing that the agreements be approved for application on such railways. It should be added that no cost of living bonus has ever been paid to the employees on these lines as provided under various Orders in Council.

It should be pointed out that the approval of the wage increases referred to in the order of the Board dated February 6, 1942, was made pursuant to Section 62 of Order in Council P.C. 5963. The present applications however must be governed by the provisions of Order in Council P.C. 9384, which as amended by Orders in Council P.C. 1727 and P.C. 3277, contains this Section:

22. (1) If the National Board finds that the rate or range of rates payable by an employer for an occupational classification of his employees engaged in international railway service was, at November 15, 1941, pursuant to a collective agreement or to a recognized practice of long standing, based upon a rate or range of rates payable to similar employees of that employer outside of Canada, and if the National Board also finds that the rate or range of rates outside of Canada

upon which the said rate or range of rates was based has been changed by a collective agreement, established practice or competent authority, the National Board may in its sole discretion authorize or direct the payment of a new rate or range of rates for that occupational classification in respect of any of such employees engaged in international railway service based in a corresponding manner upon the corresponding new rate or range of rates payable outside of Canada.

(2) *Any rate or range of rates established under subsection 1 of this section shall not be taken into account by the National Board in considering any other application for changes in wage rates.*

(3) No authorization or direction may be made under this section by a Regional Board.

The Board wishes to direct attention to the provisions of subsection (2) of Section 22 above quoted, and wishes to add also that not only will the rate or range of rates established pursuant to these applications "not be taken into account in considering any other application for changes in rates" but also that the Board does not consider that it must automatically approve or authorize rates payable pursuant to collective agreements referred to in Section 22 (1). The facts and conditions may be such that in its discretion the Board may refuse to approve such increases.

However, having regard to all the circumstances in this particular case, the Board approves the wage increases sought in the applications, and Findings and Directions will issue accordingly.

June 14, 1944.

Re: The E. B. Eddy Company Limited (Hull, Quebec) and International Brotherhood of Pulp, Sulphite and Paper Mill Workers and International Brotherhood of Paper Makers

Reasons for Decision

By leave of the Quebec Regional Board, the Unions bring this appeal from decisions under P.C. 5963 dated December 22, 1943, February 15, 1944 and March 30, 1944 increasing the base labour rate from 45 cents to 47½ cents and refusing to raise the cost of living bonus above the weekly $2.75 being paid.

The Unions first applied for the prevailing Ontario newsprint rate of 56 cents and later for the 50 cent rate directed for the Quebec newsprint mills. The evidence was that the mill involved here is not at the moment a newsprint mill, but has become a specialty mill. The Regional Board recognized a differential and adopted the 47½ cents base rate. We do not propose to interfere with this part of the decision.

On the matter of the cost of living bonus, however, we are of the opinion that in view of what was the general practice throughout the industry and to establish parity of rates with the Booth mill located next door, the bonus will be increased to $3.58 effective from October 20, 1943. Under all the circumstances and taking a broad view of the industry we have come to the conclusion that we are within the power given to us by P.C. 2370 in so doing.

There will be findings and directions accordingly.

June 15, 1944.

Re: J. R. Booth, Limited (Ottawa) and International Brotherhood of Pulp, Sulphite and Paper Mill Workers and International Brotherhood of Paper Makers

Reasons for Decision

This is an appeal by the Company from a decision of the Ontario Regional Board dated March 4, 1944, under P.C. 5963 increasing the base labour rate from 45 cents to 50 cents. Leave to appeal was granted by the Regional Board.

This mill is now very largely engaged in the production of specialty paper products and can no longer be classified as a newsprint mill. The Company has also referred to the serious effect the increased rate would have upon the financial results of its operations, although we must say that a full defence of inability to pay was not attempted.

With this in mind and to place this mill in line with the Eddy mill located in Hull we conclude that the base rate should be 47½ cents with adjustments to be made from that basis.

June 15, 1944.

Re: Defence Industries, Limited (Verdun Works and Westmount Tool Works) and International Association of Machinists, Lodge 1594

Reasons for Decision

By leave of the Regional Board for Quebec, the Union appeals from a decision dated January 18, 1944, refusing an application made under the Wartime Wages Control Order, 1943, P.C. 9384 for:

(1) re-grouping certain of the existing classifications into five main categories of beginners, learners, production workers class "B", production workers class "A" and journeymen;

(2) wage adjustments for three classifications including an increase in the wage rates paid to electricians to the rate now prevailing for electricians in the construction trades;

(3) overtime on a daily basis;

(4) modification of the terms defining payment of rates for charge hands and lead hands.

We understand that there is an agreement between the parties which runs until August 31, 1944. If these requests were granted we take it that the agreement would be substantially altered. There is also the burden of meeting the conditions laid down in the Wages Control Order.

After careful consideration of the Union's well prepared material, we fail to see upon what reasonable basis this Board could upset the Regional Board's decision and our only course is to dismiss the appeal.

June 15, 1944.

Re: Paton Manufacturing Company Limited (Sherbrooke, Que.) and Textile Workers' Organizing Committee (C.I.O.)

Reasons for Decision

This is an appeal by the Company from a decision of the Regional Board of Quebec dated February 15, 1944, under P.C. 5963 with respect to the following:

(1) To pay—at the rate of time-and-one-half the actual rate all overtime worked over 48 hours a week.

(2) Payment of the full cost of living bonus.

(3) A premium of 5 cents per hour for night shifts.

(4) A week's vacation with pay under D.B. 17.

(5) A guaranteed minimum of 55 cents per hour for weavers.

We are of the opinion that the appeal should be dismissed in respect to items (1), (3), (4) and (5), but that it should be allowed with respect to item (2). No case was made out for the full bonus under Section 34 (3) of the governing Order in Council.

June 15, 1944.

Re: Howard Smith Paper Mills Limited (Cornwall Division) and International Brotherhood of Pulp, Sulphite and Paper Mill Workers and International Brotherhood of Paper Makers

Reasons for Decision

This is an appeal by the Unions from a decision of the Ontario Regional Board dated March 3, 1944 directing the Company to pay a schedule of rates based upon a labour rate of 50 cents. The former rate was 47 cents. The application was for a base rate of 56 cents and was considered under the provisions of the former order P.C. 5963. Leave to appeal was granted by the Regional Board.

Briefly stated the argument for the appeal is the contention that this mill should either be brought up to the prevailing Ontario newsprint rate of 56 cents or be given the general 5 cent increase allowed in the Quebec, New Brunswick and Nova Scotia newsprint mills.

This mill is what is called in the industry a "fine grades" mill. The Regional Board's decision was the result of a careful investigation of the established rate-differential between newsprint and "fine grades" mills as well as of the rate structure in this particular mill. Upon the basis of recognition of the differential, the rates arrived at by the Regional Board cannot be disturbed and we must dismiss the appeal.

June 15, 1944.

Re: Eddy Match Company, Limited and Canadian Splint & Lumber Corporation Limited (Pembroke, Ontario) and United Brotherhood of Carpenters and Joiners of America, Locals 2823 and 1775

Reasons for Decision

This is an appeal by the Companies from a decision of the Ontario Regional Board dated January 22, 1944, under P.C. 5963 directing a general hourly increase of 5 cents in the basic wage effective from the date of application, June 12, 1943.

The application was by the Union for a 7 cent raise in wages and an increase in the cost of living bonus from $3.20 to the maximum amount. The Regional Board's decision rests upon a finding that "the basic wage rates are low", but that is not enough to warrant its direction under section 25 of the Order. The Board could undertake to do what it did only if it found the wages to be low by comparison with wages in similar occupations in the locality or in a comparable locality.

Wages in the match-splint manufacturing business are unmistakingly low and the same can be said of wages generally in the Pembroke area, but a careful examination of the comparative data available leads to no other conclusion than that these companies were paying as much, if not more, than other employers in the locality and throughout the industry as well.

We are of opinion that the decision under appeal cannot be sustained under the only relevant section of the order under which it was made, but we are prepared to give in a broad manner effect to a proposal made the Companies in the course of the protracted proceedings before the Regional Board and direct payment of a general 3 cent increase from October 1, 1943. There will be a finding and direction accordingly.

June 26, 1944.

Re: Hull Printing Company (Winnipeg, Man.) and Typographical Union No. 191 and Printing Pressmen & Assistants' Union No. 87

Reasons for Decision

An appeal by the Company from decisions dated March 1, 1944 and April 5, 1944 of the Manitoba Regional Board under the former wages control order P.C. 5963. The matter is before this Board by leave given below. The Regional Board directed payment of rates to journeymen, pressmen and assistant pressmen of 90 cents, 79 cents and 65 cents respectively (inclusive of cost of living bonus being paid).

The appellant is a small partnership and pleads its inability to pay the increased rates. The Regional Board established the rates mentioned throughout the printing industry in the Winnipeg area and gave some, but perhaps not thorough consideration to this particular employer's profit position. The statements for the year 1943 filed in support of the appeal indicate a sound financial situation but rather modest profits to the owners of the business, although the rates heretofore paid would appear to have been lower than those generally prevailing in the district.

Our view is that the directions should be changed into authorizations to pay rates up to the rates established by the Regional Board. This will allow the parties to negotiate on the basis of the situation present here and if they cannot agree, recourse may be had to the Regional Board who may then give the question of ability to pay under the price ceiling closer attention in terms of this particular case.

June 26, 1944.

Re: Sutton-Horsley, Limited, (Toronto, Ontario) and Local 1673, International Association of Machinists

Reasons for Decision

The Company has appealed a decision of the Ontario Regional Board dated January 10, 1944 under P.C. 5963 which directed payment of full cost of living bonus effective January 1, 1944. The Union has entered a cross appeal for payment of such increased bonus retroactive to May 27, 1943.

Broadly speaking we have come to the conclusion that the Regional Board have properly exercised their discretion under Section 34 (3) of the Order in Council. But we are of opinion that the combined remuneration (basic rate plus cost of living bonus) in this plant should not exceed in any classification the combined remuneration (basic rate plus cost of living bonus) paid by Canadian Aircraft Instruments and Accessories Limited to the same classification. Subject to this qualification, we therefore dismiss the appeal.

Further, we do not think the Regional Board's decision should be disturbed as to the date from which the decision is to be effective and the cross-appeal will be dismissed.

June 26, 1944.

Re: Hiram Walker & Sons, Limited (Windsor, Ontario) and Distillery, Rectifying and Wine Workers International Union, Local 61

Reasons for Decision

This was a joint application under P.C. 9384 for approval of the following provision for vacations with pay contained in the parties' collective agreement dated July 1, 1943:

> . . . any employee who has been in the employ of the Employer for a period of at least one (1) year and less than five (5) years as of October 1, 1944, shall receive one week's vacation with full pay at his regular rate. Any employee who has been in the employ of the Employer for five (5) years or more as of October 1, 1944, shall receive two weeks' vacation with full pay at his regular rate.

The practice of granting one week's vacation after one year's employment was established prior to November 15, 1941, but the Regional Board refused to authorize the extension of the vacation period to two weeks in the case of employees having an employment record of 5 years or more. Leave to appeal was granted by the Regional Board and both the Company and the Union join in the appeal.

The vacation plan proposed is one which is not unknown in the distillery industry, and on the basis of our reasons in the Colonial Weaving Company (L.G., 1943, p. 1492) and Rogers Majestic Limited (L.G., 1943, p. 1351) cases, we allow the appeal subject however to the application of the conditions of D.B. 17 except as they are altered by this decision.

June 26, 1944.

Re: Dominion Textile Company, Limited and Federation Nationale Catholique du Textile, Inc.

Reasons for Decision

This is an appeal by the Federation from a decision of the Quebec Regional Board dated February 15, 1944, under P.C. 5963 concerning rates for maintenance employees.

The matter is outstanding since December 9, 1942, when the Regional Board approved a schedule of wage adjustments submitted by the Company. The rates involved in this appeal were then listed as follows in the application:

Title of Job or Occupation as included in Group	Proposed Group Rate Cents
Machinists, Tinsmiths, Steamfitters, Millwrights, Bench fitters, Electricians	65
Carpenters	62½

The Federation then applied for a direction to the Company to pay these rates, because the Company had taken the position that the rates proposed were the maximum of a range starting at 50 cents and that it should be able to classify its employees within the range on the basis of skill and efficiency. The Regional Board then appears to have made a careful study of the matter and by a final decision of November 9, 1943, decided that the employees classified as maintenance men should receive the single rate of 65 cents except carpenters who would receive 62½ cents.

The Company did not implement this direction nor did it take an appeal to the National Board although it sought and obtained leave to do so as far back as September 1, 1943. It persisted with the Regional Board until by the decision now under appeal maintenance men were divided into three classes with a rate for each class and subject to the condition that 60 per cent of the employees involved were to be in class 1, 25 per cent in class 2 and 15 per cent in class 3.

We are of the view that the Company must implement the decision of November 9, 1943, and that any employee who is within the classification mentioned in the Company's original application will receive either the 65 cent or 62½ cent basic rate as the case may be. The decision will be effective from January 11, 1943, as provided in the decision of February 15, 1944.

The appeal is therefore allowed.

June 29, 1944.

Re: Canadian National Railway (Western Region) and The Order of Railroad Telegraphers System Division No. 43

Reasons for Decision

This is an application by the Union for a direction to pay cost of living bonus to employees who prior to February 15, 1944, took compensation in lieu of vacation with pay.

The application is dated 31st January, 1944, and must, therefore, be dealt with under the provisions of Wartime Wages Control Order, 1943, P.C. 9384. We find nothing in the Order which authorizes the Board to make a direction with respect to the point raised.

However, the National War Labour Board, differently constituted, under date of April 17, 1942, in Decision Bulletin No. 14 had this to say on the question involved here:

Payment in Lieu of a Vacation

This ruling shall apply only in cases in which prior to November 15, 1941, it was the established practice of an employer to grant vacations with pay, whether by agreement or on a voluntary basis, and because of war production requirements an employer finds it necessary to retain an employee in service during the usual vacation period, in which event either of the following methods may be arranged without contravening the provisions of P.C. 8253:

1. an employee may be paid, with respect to the period of such lost vacation and in addition to his regular earnings, the vacation allowance he would otherwise have received;
2. an employee may be allowed to accumulate vacation time—credit to be taken when he can be conveniently released from his duties.

We find no reason for disagreeing with the contents of D.B. 14, which it will be noted is permissive on the matter involved here.

We trust that the parties can settle the dispute under the terms of their Collective Agreement.

June 29, 1944.

Re: Western Canada Bituminous Coal Operators' Association and Drumheller Coal Operators, Limited and United Mine Workers of America, District 18

Reasons for Decision

This matter is in the form of an appeal by the operators from the Royal Commission appointed pursuant to P.C. 8020 (October 14, 1943) to investigate coal mine wages in Alberta and British Columbia and sitting as a Regional Board under the Terms of P.C. 8620 (November 10, 1943). Leave to appeal was given by the Commission.

In its interim report dated November 17, 1943, the Commission directed an increase of $1 per day to all "persons engaged in manual employment. . . . not above the rank of Foreman or comparable rank". By final report dated January 24, 1944, the Commission declined to deal with an application by the operators for permission to increase wages to non-manual employees covered by the wages control order. This application is now before this Board.

We have dealt with wage increases to clerical and other non-manual classifications in District 26 by finding and direction allowing payment not exceeding $25 per month above the rates established under P.C. 9384. There will be a similar disposal made of this matter to be effective from May 1, 1944.

June 26, 1944.

Re: King Edward Hotel Barber Shop and Service Barber Shops, Limited and Association of Journeymen Barbers of Toronto

Reasons for Decision

(Oral Decision)

We are satisfied that the Regional War Labour Board for Ontario has given this matter proper consideration and investigation. On the hearing of this appeal the appellants have not established inability to pay.

The appeals are dismissed.

June 13, 1944.

Re: Price Brothers and Company, Limited, and La Federation Nationale Catholique de l'industrie du Bois du Canada, Inc.

Reasons for Decision

(Oral)

So far as this Board is concerned, we think the application made on June 23 was a new application or a renewal of the earlier application; we are satisfied that the Regional War Labour Board for Quebec exercised its discretion properly in refusing retroactively, therefore we dismiss the appeal.

May 22, 1944.

Re: Northern Electric Company, Limited

Reasons for Decision

An appeal from a decision of the Ontario Regional Board refusing approval of an extension of an established vacation plan whereby employees having completed 21 years of service would receive 3 weeks' vacation with pay.

Although the extension has been approved by three other Regional Boards, the Ontario Board thought that the time was inopportune for an extension such as the one applied for.

We shall not interfere with the decision and the appeal will be dismissed.

July 5, 1944.

Re: Anaconda American Brass Limited and Canada Strip Mill Limited (New Toronto, Ontario.) and Industrial Union of Copper and Brass Workers, Local No. 1

Reasons for Decision

This is an appeal by the Union from a decision of the Ontario Regional Board dated January 26, 1944, refusing an application under P.C. 5963 to increase cost-of-living bonus from $3.20 to the maximum amount of $4.60. The Regional Board gave leave to appeal.

The bonus paid by the employers was calculated on the rise in the cost-of-living index number above the index number for September, 1940, when the "last general increase in wage rates" took place. The result is that the Regional Board had no power to direct an increase under section 34 (3) as it was before the amendment made by P.C. 2370.

By virtue of the amendment, the Regional Board could order an upward adjustment of the bonus, but only if it were shown that it was necessary to correct an unfair or unequal situation resulting within the industry when wage rates and bonus were combined.

The Union, we must say, have failed to make out a case within the terms of the proviso added to section 34 (3) and we must dismiss the appeal.

July 5, 1944.

Industrial Disputes and Conciliation

Introduction

THE *Industrial Disputes and Conciliation* section contains monthly articles dealing with Proceedings under the National Labour Relations Board, Conciliation Work of the Department of Labour, and Strikes and Lockouts in Canada, Great Britain and other countries.

Recent Proceedings under the Wartime Labour Relations Regulations.—Under the Wartime Labour Relations Regulations, P.C. 1003, the Government has extended its jurisdiction over employer-employee relations which are normally exclusively within the provincial field, to the extent considered necessary to cover adequately employers and employees in industries "essential to the efficient prosecution of the war", but without attempting to include other industry which has not a direct bearing on war production. In so far as these latter industries are concerned, each province can make its own decision as to whether or not they shall be brought under the regulations.

Provision is made in the regulations for an agreement between the Dominion and any province to set up suitable provincial agencies for the administration of the regulations. Such agreements were made during the month under review with the provinces of Saskatchewan, Quebec, and Nova Scotia, and were approved under the provisions of Orders in Council P.C. 3732, for Saskatchewan, P.C. 4871, for Quebec, and P.C. 5001, for Nova Scotia. (See also pages 847-56 of this issue.)

Conciliation Work of the Department of Labour.—Conciliation proceedings are carried on by the Department of Labour for the most part under the provisions of the Conciliation and Labour Act which empowers the Minister to inquire into the causes and circumstances of a dispute, to take such steps as seem expedient for the purposes of bringing the parties together, and to appoint a conciliator or an arbitrator when requested by the parties concerned. In some disputes occurring in industries coming directly under the Industrial Disputes Investigation Act, namely, mines and public utilities, and war work, preliminary inquiries and mediation by officers of the Department result in the settlement of the matters in dispute without the necessity of the establishment of Boards of Conciliation and Investigation.

Strikes and Lockouts.—The latest information concerning strikes and lockouts in Canada is published monthly in tabular form, with a summary appearing once a year. The summary of strikes and lockouts in Canada and other countries during 1943 appeared in the LABOUR GAZETTE for March, 1944.

The latest available information as to strikes and lockouts in Great Britain and other countries appears from month to month.

Recent Proceedings under the Wartime Labour Relations Regulations

DURING the month of June six applications for certification were granted by the Wartime Labour Relations Board (National). These were:

1. National Catholic Brotherhood of Transport Employees of Quebec, Inc., and Quebec Railway, Light & Power Co. (Tramways and Autobus Division) Quebec, P.Q.—Certified June 8.

2. International Union of Mine, Mill & Smelterworkers, Local 688 and Noranda Mines, Ltd., Rouyn, P.Q.—Certified June 21.

3. United Steelworkers of America and Dominion Bridge Company, Lachine, P.Q.—Certified June 26.

4. Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees and the National Harbours Board (Cold Storage) Montreal, P.Q.—Certified June 26.

5. Amalgamated Assn. of Street, Electric Railway and Motor Coach Employees of America, Div. No. 591 and the Gatineau Bus Company, Ltd., Hull, P.Q.—Certified June 26.

6. Canadian Seamen's Union, Local 5 and Dartmouth Ferry Commission, Dartmouth, N.S.—Certified June 26.

Cases Investigated and Decision Pending

At the end of the month there were eighteen cases concerning which reports of Investigating Officers had been received and the decision of the Board was pending, following preliminary consideration by the Board. These cases together with the Investigating Officer concerned are:—

1. Association of Employees "Aircraft Division" and Canadian Car and Foundry Co., Ltd., Montreal, P.Q.—B. Rose. (Referred back to applicants for proper election of bargaining representatives.)

2. Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees and the National Harbours Board (Cold Storage) Montreal, P.Q.—L. Pepin.

3. Brotherhood of Railroad Trainmen and Canadian National Railways and Canadian Pacific Railway Co. (Conductors).—C. W. Rump.

4. Employees' Welfare Board of the Hudson Bay Mining and Smelting Company, Ltd., and the Hudson Bay Mining and Smelting Company, Ltd., Flin Flon, Man.—H. S. Johnstone. (Hearing set for July 4.)

5. Deepsea and Inlandboatmen's Union of the Pacific, B.C., Division (C.C.L.) and Park Steamships Ltd., Vancouver, B.C.—G. R. Currie. (Vote of employees to be taken.)

6. United Steelworkers of America and the Steel Company of Canada (St. Henri Works), Montreal, P.Q.—R. Trepanier.

7. United Steelworkers of America and the Steel Company of Canada (Dominion Wire Works), St. Joseph St., Lachine, P.Q.—R. Trepanier.

8. United Steelworkers of America and the Steel Company of Canada (Notre Dame and Charlevoix Sts. plant), St. Henri, P.Q.—R. Trepanier.

9. Stelco Employees' Assn., and the Steel Company of Canada, Ltd., Lachine, P.Q.—R. Trepanier.

10. Stelco Employees' Assn., and the Steel Company of Canada, Ltd. (Notre Dame St. plant), Montreal, P.Q.—R. Trepanier.

11. International Union of Mine, Mill and Smelterworkers' Local 690 and Alberta Nitrogen Products Ltd., Calgary, Alta.—F. E. Harrison. (Vote of employees taken June 23 and 24 to be reported to Board.)

12. Canadian Seamen's Union and St. Lawrence Steamships Co., Buffalo, N.Y.—J. P. Nicol. (Vote to be taken July 10.)

13. Val d'Or Mine and Mill Workers' Union, Local 654 and Lamaque Mining Co., Ltd., Bourlamaque, P.Q.—F. LaFortune.

14. Val d'Or Mine and Mill Workers' Union, Local 654 and Golden Manitou Mines, Ltd., Val d'Or, P.Q.—F. LaFortune.

15. International Union of Mine, Mill and Smelterworkers' Local 688 and Beattie Mines (Quebec), Ltd., Duparquet, P.Q., and Toronto, Ont.—F. LaFortune.

16. International Union of Mine, Mill and Smelterworkers' Local 688 and Powell-Rouyn Gold Mines, Ltd., Rouyn, P.Q., and Toronto, Ont.—F. Lafortune.

17. International Union of Mine, Mill and Smelterworkers' Local 688 and Senator-Rouyn Mines, Rouyn and Hull, P.Q.—F. LaFortune.

18. International Union of Mine, Mill and Smelterworkers' Local 688 and Waite-Amulet Mines, Ltd., Rouyn, P.Q., and Toronto, Ont.—F. LaFortune.

Applications Referred to Investigating Officers

During the month thirty applications for certification were referred to departmental officers for preliminary investigation and report. These, together with the name of each investigating officer concerned are as follows:

1. United Steelworkers of America and Canadian Tube and Steel Products, Ltd., Montreal, P.Q.—F. LaFortune. (Investigation in abeyance until July 1, pending outcome of negotiations between parties.)

2. United Association of Locomotive Engineers, Firemen, Brakemen and Dispatchers and the Aluminum Company of Canada, Ltd., Arvida, P.Q.—L. Pepin.

3. National Harbours Board Employees' Association and the National Harbours Board (Mechanical Employees), Montreal, P.Q.—R. Trepanier.

4. Canadian Union of Asbestos Workers, Local No. 6 and Johnson's Company, Thetford Mines, P.Q.—B. Rose.

5. Calgary Trades and Labour Council (Building Trades Section) and Alberta Nitrogen Products, Calgary, Alta.—F. E. Harrison.

6. Canadian Brotherhood of Railway Employees and Other Transport Workers, Div. 229 and Levis Ferry Ltd., Quebec, P.Q.—F. LaFortune.

7. International Brotherhood of Electrical Workers, Local B1106, and Quebec Power Co., Quebec, P.Q.—F. LaFortune.

8. International Association of Machinists, Lodge 1288 and Anglo-Canadian Wire Rope Company, Ltd., Lachine, P.Q.—R. Trepanier.

9. International Association of Machinists, Lodge 1288 and Dominion Wire Rope Company, Ltd., Lachine, P.Q.—R. Trepanier.

10. Commercial Telegraphers' Union, Canadian System Division No. 1 and the Canadian Pacific Railway Co. (Communication Dept.)

11. Brotherhood of Railway and Steamship Clerks, Freight Handlers & Station Employees (Coal Handlers) and Canadian Pacific Railway Co., Fort William, Ont.—J. L. MacDougall.

12. Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees (Coal Handlers) and Fort William Coal Dock Company, Fort William, Ont.—J. L. MacDougall.

13. International Association of Machinists and MacDonald Bros. Aircraft Ltd. (Office and Stores Depts. of Robinson St., Division), Winnipeg, Man.—H. S. Johnstone.

14. Canadian Union of Asbestos Workers, Local No. 5 and Bell Asbestos Mines, Ltd., Thetford Mines, P.Q.—B. Rose.

15. Employees' Union of Wartime Metals Corp. (C.C.L.), and Wartime Metals Corp., Black Lake, P.Q.—B. Rose.

16. Winnipeg Electric Employees' Federated Council, One Big Union, Winnipeg, Man., and Winnipeg Electric Company, Winnipeg, Man.—H. S. Johnstone.

17. Montreal Harbour Staff Employees' Assn., and the National Harbours Board, Montreal, P.Q.—L. Pepin.

18. Canadian Union of Soapstone Workers, Local No. 1 and Mr. Oliva Cyr, Employer, Thetford Mines, P.Q.—L. Pepin.

19. National Association of Metal Workers of Three Rivers and Canada Iron Foundries, Ltd., Three Rivers, P.Q.—L. Pepin.

20. Constables and Special Agents, C.N.R. Federal Union No. 131 (T. & L.C.), and Canadian National Railways (Investigation Division), Montreal, P.Q.—R. Trepanier.

21. Bro. of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, Lodge 650 and the Superior Elevator Co., Port Arthur, Ont.—J. Lorne MacDougall.

22. Bro. of Railway and Steamship Clerks, Freight Handlers, Express & Station Employees, Lodge 650 and Northland Terminals, Ltd., Winnipeg, Man.—J. Lorne MacDougall.

23. Bro. of Railway & Steamship Clerks, Freight Handlers, Express & Station Employees and the Reliance Grain Co., Ltd., Winnipeg, Man.—J. Lorne MacDougall.

24. Deepsea and Inlandboatmen's Union of the Pacific (B.C. Division) and Gibson Bros. (Log Towing), Vancouver, B.C.—G. R. Currie.

25. National Harbours Board Employees' Federal Union No. 24 and the National Harbours Board, Saint John, N.B.—H. R. Pettigrove.

26. International Union of Mine, Mill & Smelterworkers' Local 564 and Yukon Consolidated Gold Corp., Dawson City, Yukon Territory.—G. R. Currie.

27. Deepsea & Inlandboatmen's Union of the Pacific B.C. Division and Badwater Towing Co., Vancouver, B.C.—G. R. Currie.

28. Western Canada Firebosses Assn., Dist. No. 1 and Crow's Nest Pass Coal Co., Fernie, B.C., International Coal & Coke Co., McGillvary Coal & Coke Co. of Coleman, Alta., West Canadian Collieries, Blairmore and Bellevue, Alta., Hillcrest-Mohawk Collieries, Bellevue, Alta.—F. E. Harrison.

29. International Brotherhood of Electric Workers, Local 230 and Canadian Collieries (Dunsmuir) Ltd. (Puntledge River Power House), Vancouver, B.C.—G. R. Currie.

30. International Longshoremen's Assn., Local 375 (T. & L.C.) and the Shipping Federation of Canada, Inc., Montreal, P.Q.—L. Pepin.

Application Referred to Provincial Authorities

During the month three applications were referred to provincial administration under agreements between the Dominion and Provincial governments; of these one was referred to Manitoba, one to Saskatchewan, one to Ontario.

That referred to Manitoba was:—

United Steelworkers of America, Local 3272 and Western Steel Products, Corp., St. Boniface, Man.

That referred to Saskatchewan was:—

Sodium Sulphate Workers' Union, No. 2 and Horseshoe Lake Mining Company, Ltd., Ormiston, Sask.

That referred to Ontario was:—

United Gas, Coke and Chemical Workers of America and St. Clair Processing Corp., Ltd. (Polymer Corp.), Sarnia, Ont.

Seven applications were rejected or withdrawn. These were:—

1. Chemical Workers Union, Local 23639 (A.F. of L.) and Merck and Company, Ltd., Montreal, P.Q.

2. Association of Employees (Propeller Division) and Canadian Car & Foundry Co., Ltd., Ville St. Pierre, P.Q.—Withdrawn by applicants.

3. Association of Employees and Canadian Car & Foundry Co. Ltd. (Car Division), Turcot & Dominion Works, Montreal, P.Q. —Withdrawn by applicants.

4. Coal Handlers Federal Union, Local 102 and Canadian Import Co., Montreal, P.Q.— Withdrawn by applicants.

5. Coal Handlers Federal Union, Local 102 and Dominion Coal Co., Montreal, P.Q.— Withdrawn by applicants.

6. Coal Handlers Federal Union, Local 102 and Scotch Anthracite Company, Montreal, P.Q.—Withdrawn by applicants.

7. International Union of Aluminum Workers and the Aluminum Co. of Canada, Ltd., Shawinigan Falls, P.Q.

Proceedings under Sections 12 to 14 of the Regulations

Sections 12 to 14 of the Wartime Labour Relations Regulations provide for conciliation machinery to attempt settlement of disputes where negotiations for an agreement have been unsuccessfully continued for thirty days following certification of bargaining representatives. This phase of disputes is referred to the Minister by the Wartime Labour Relations Board (National) or by the provincial administering authorities. A conciliaton officer is then appointed to investigate and report. If the conciliation officer is unable to bring about settlement of the matters in dispute and reports that in his view an agreement might be facilitated by appointment of a Conciliation Board, a Board is appointed forthwith. The duty of such a board is to endeavour to effect an agreement between the parties on the matter in dispute.

At the end of the month four cases had been referred to conciliation officers. These, together with the names of the officers concerned, are:—

1. Dominion Glass Company, Wallaceburg, Ont., and United Automobile Workers of America, Local 251.—F. J. Ainsborough.

2. C. Lloyd and Sons, Ltd., Wingham, Ont., and National Union of Woodworkers, Local No. 3 (C.C. of L.) J. Hutcheon.

3. Motor Products, Corp., Windsor, Ont., and Local 195, United Automobile, Aircraft and Agricultural Implement Workers of America, U.A.W.-C.I.O. F. J. Ainsborough.

4. Ottawa Electric Railway Company, Ottawa, Ont., and Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America, Div. No. 279. J. S. McCullagh.

At the end of the month three Boards of Conciliation had been established but not fully constituted. These are:—

1. Pedlar People, Ltd., Oshawa, Ont., and United Steelworkers of America, Local 2784.

2. Fittings, Ltd., Oshawa, Ont., and the United Steelworkers of America, Local 1817.

3. Russell Bros., Owen Sound, Ont., and United Steelworkers of America, Local 2837.

By June 30 three Boards of Conciliation were fully constituted.

Montreal Tramways Company, Montreal, Quebec.—The Board of Conciliation established to deal with a dispute between the Montreal Tramways Company, Montreal, Quebec, and its employees, members of the Canadian Brotherhood of Railway Employees and other Transport Workers, was fully constituted on May 31. The personnel of the Board is as follows: The Honourable Mr. Justice Oscar L. Boulanger, Quebec, P.Q., Chairman, appointed on the nomination of the other two members; Messrs. Walter A. Merrill and Frank R. Scott, both of Montreal, appointed on the nomination of the employer and employees respectively.

Ontario Malleable Iron Co. Limited, Oshawa, Ont.—The constitution of the Board of Conciliation to deal with a dispute between Ontario Malleable Iron Co., Ltd., Oshawa, Ont., and Local 1817 United Steelworkers of America was completed on June 29 with the appointment of the Chairman, Dr. C. A. Wright of Toronto, on the nomination of the other two members. Mr. Bora Laskin, Toronto, was appointed on the nomination of the employees and Mr. John J. Robinette, Toronto, on the nomination of the employing company.

National Machinery Company and National Shops Limited, Vancouver, B.C.—A Board of Conciliation was established to deal with a dispute between these companies and the United Steelworkers of America, Local 2765. It was fully constituted on June 28, with Mr. J. Howard Harman as Chairman, appointed by the Minister of Labour in the absence of a recommendation from the other two members. Mr. Herbert Gargrave, M.L.A., was nominated by the employees, and Mr. R. L. Norman by the employing companies. All three members reside in Vancouver.

Administration of Wartime Labour Relations Regulations, Manitoba, Saskatchewan, Nova Scotia, and Quebec

FOUR Orders in Council, approving agreements between the Dominion Government and the Provinces of Manitoba, Saskatchewan, Nova Scotia and Quebec to provide for the administration within those provinces of the Wartime Labour Relations Regulations were announced recently. They are P.C. 3491, dated May 15, 1944, concerning Manitoba; P.C. 3732, dated May 18, 1944, concerning Saskatchewan; P.C. 5001 dated June 30, 1944, concerning Nova Scotia; and P.C. 4871, dated June 26, 1944, concerning Quebec. Agreements have already been made between the Dominion and the Provinces of British Columbia, Ontario and New Brunswick (L.G., May, 1944, p. 610).

Under the agreements the Wartime Labour Relations Board (National) transfers jurisdiction over war industries but retains, in addition to industries ordinarily within the legislative authority of Parliament, jurisdiction over those industries:—

(*a*) where employees in more than one province of the same employer are affected; or

(*b*) where employees in more than one province of several employers are affected.

The provinces mentioned, with the exception of Quebec, will administer the Wartime Labour Relations Regulations in their application to all war industries and industries ordinarily within provincial jurisdiction. In the Province of Quebec the Regulations will be administered in their application to all war industries as defined in Schedule "A" of P.C. 1003.

In the provinces mentioned Wartime Labour Relations Boards have been established to administer the Regulations in industries where jurisdiction is transferred to the province. Each provincial administrative authority may determine its own procedure for the administration of the Regulations, but such procedure must not be inconsistent with the Wartime Labour Relations Regulations or the regulations made by the National Board thereunder.

Either an employer or employee or an organization of employers or employees may appeal against any decision of the provincial authority, regarding the administration of the Regulations to the Wartime Labour Relations Board (National) on leave being given by that Board, or by the provincial administering authority, within 15 days of the issue of the decision to which exception is taken.

Following are the texts of the Orders in Council concerning Saskatchewan, Nova Scotia and Quebec. The text of Order in Council P.C. 3491 concerning Manitoba will be included in the next issue of the LABOUR GAZETTE.

Text of Order in Council P.C. 3732 *re* administration within the Province of Saskatchewan of the Wartime Labour Relations Regulations

Whereas section 36 of the Wartime Labour Relations Regulations (Order in Council P.C. 1003 of February 17, 1944), provides that the Minister of Labour may, with the approval of the Governor in Council, enter into an agreement with the government of any province to provide for the administration within that province of the said Regulations or any part thereof and, that such agreement may provide for the manner in which the Minister of Labour shall exercise the powers conferred on him under the said section and for the transfer to the government of the province or persons specified by the government of the province of all or any part of the jurisdiction in respect of matters within the province conferred on the Wartime Labour Relations Board by the said Regulations, and for a procedure whereby an appeal may be had to the Wartime Labour Relations Board from a decision made in the exercise of the jurisdiction so conferred, and for the reimbursement of the province in respect of expenses so incurred;

And whereas pursuant thereto the Acting Minister of Labour submits for approval an agreement dated May 3, 1944, entered into with the Minister of Reconstruction, Labour and Public Welfare of the Province of Saskatchewan, to provide for the administration of the said Regulations in the said Province;

Therefore His Excellency the Governor General in Council, on the recommendation of the Acting Minister of Labour, is pleased to approve the said agreement, of which a copy is hereto annexed as Schedule A, and it is hereby approved accordingly.

And whereas it is deemed necessary by reason of the war, for the security, defence, peace, order and welfare of Canada and for the effective prosecution of the war that the order hereinafter set out be made;

Therefore His Excellency the Governor General in Council, on the same recommendation and under the authority of the War Measures Act, is pleased to make and doth hereby make the following Order:

ORDER

1. In this Order, unless the context otherwise requires, words and expressions have the same meaning as in the Wartime Labour Relations Regulations, Order in Council P.C. 1003 of February 17, 1944.

2. (1) There shall be a Saskatchewan Wartime Labour Relations Board for the Province of Saskatchewan (hereinafter called "the

Provincial Board") consisting of: the Minister of Reconstruction, Labour and Public Welfare for the Province of Saskatchewan who shall be Chairman of such Board; and

C. A. Scott, Director, Labour Branch, Department of Reconstruction, Labour & Public Welfare, Regina, Sask., who shall be Vice-Chairman of such Board, and the following members:—

Mr. W. E. Brunskill, Member of the Typographical Union, Saskatoon, Sask.

Mr. H. D. Davis, General Chairman, Brotherhood of Railway Carmen, Prince Albert, Sask.

Mr. Leroy Johnson, K.C., National Sodium Products Co. Ltd., Moose Jaw, Sask.

Mr. F. E. Doull, Robert Simpson Co. Ltd., Regina, Sask.

(2) Three members of the Provincial Board shall constitute a quorum, and in the absence of the Chairman, the Vice-Chairman shall act as Chairman of such Board.

(3) A decision of the majority of the members of the Provincial Board present and constituting a quorum shall be the decision of the Provincial Board and in the event of a tie, the Chairman or Acting Chairman shall have a casting vote.

(4) The Provincial Board and each member thereof shall have the powers of a Commissioner under Part I of the Inquiries Act.

(5) The Provincial Board and each member thereof may receive and accept such evidence and information on oath, affidavit or otherwise as in its or his discretion it or he may deem fit and proper whether admissible as evidence in a court of law or not.

(6) The Provincial Board shall determine its own procedure but shall in every case give an opportunity to all interested parties to present evidence and make representations.

(7) The remuneration of each member of the Provincial Board, other than the chairman and Vice-Chairman, shall be fifteen dollars per day for each day engaged in work of the Provincial Board and each member of the Board shall be paid actual living and travelling expenses when necessarily absent from his place of residence in connection with his duties as a member of such Board.

(8) Mr. A. J. Smith, Regina, Sask., shall be the Chief Executive Officer of the Provincial Board.

3. The Provincial Board may make regulations governing its procedure not inconsistent with the Wartime Labour Relations Regulations or the regulations made by the Wartime Labour Relations Board thereunder.

4. (1) Except as hereinafter provided, the jurisdiction and powers of the Wartime Labour Relations Board under the Wartime Labour Relations Regulations with respect to

(i) employees in the Province of Saskatchewan described by the provisions of paragraphs (*b*) and (*c*) of subsection one of section three of the said Regulations,

(ii) the employers of all such employees in their relations with such employees, and

(iii) trade unions, employees' organizations and employers' organizations composed of such employees or employers,

are hereby vested in the Provincial Board and all the provisions of the said Regulations relating to or referring to the Wartime Labour Relations Board shall relate and refer *mutatis mutandis* to the said Provincial Board.

(2) The provisions of subsection one of this section shall not affect nor be deemed to vest in the Provincial Board the jurisdiction of the Wartime Labour Relations Board under the Regulations with respect to

(i) any matter where employees in more than one province of a common employer are affected, or

(ii) any matter arising out of subsection three of section five of the Regulations where employees in more than one province of several employers are affected.

5. The Wartime Labour Relations Board may exercise the jurisdiction vested in it under the Wartime Labour Relations Regulations with respect to any proceeding pending before it on the date of this Order.

6. (1) Any employer, employee, employers' organization, trade union, or employees' organization interested in or affected by any decision or order of the Provincial Board made pursuant to the Wartime Labour Relations Regulations may appeal to the Wartime Labour Relations Board by leave of the Wartime Labour Relations Board or the Provincial Board if the application for such leave has been made within fifteen days of the issue of such decision or order of the Provincial Board or within such longer period as may be allowed by the Wartime Labour Relations Board.

(2) On any such appeal the Wartime Labour Relations Board may dismiss the appeal or make the decision or order which in its opinion the Provincial Board should have made.

7. The expenditures incurred by the Minister of Labour under any agreement executed under section two of this Order shall be paid out of moneys appropriated for the administration of the Wartime Labour Relations Regulations.

Certified to be a true copy.

Text of Agreement between the Dominion and the Province of Saskatchewan *re* Administration of Wartime Labour Relations Regulations

SCHEDULE "A"

This Agreement made this 3rd day of May, 1944, between His Majesty the King in the right of the Dominion of Canada, represented by the Minister of Labour of Canada, hereinafter called "the Dominion" of the One Part, and His Majesty the King in the right of the Province of Saskatchewan represented by the Minister of Labour of Saskatchewan, hereinafter called "the Province" of the Other Part.

Whereas the Province has enacted appropriate legislation to apply the Wartime Labour Relations Regulations, Order in Council P.C. 1003 of February 17, 1944, and amendments, to employees described in paragraph (*c*) of subsection one of section three of the said Regulations, to employers of all such employees in their relations with such employees and to trade unions, employees' organizations and employers' organizations composed of such employees and employers; and

Whereas under the provisions of Section thirty-six of the Wartime Labour Relations Regulations the Minister of Labour of Canada is authorized with the approval of the Governor General in Council to enter into an agreement with the Government of any province to provide for the administration within the province of such Regulations; and

Whereas the parties hereto desire to enter into such an agreement to provide for the administration within the Province of Saskatchewan of the Wartime Labour Relations Regulations;

Now therefore the parties hereto pursuant to the provisions of Section thirty-six of the aforesaid Regulations covenant and agree with each other as follows:—

1. (1) In this agreement, unless the context otherwise requires, words and expressions have the same meaning as in the Wartime Labour Relations Regulations.

(2) In this agreement

(*a*) "Dominion Minister" means the Minister of Labour of Canada,

(*b*) "Provincial Minister" means the Minister of Labour of the Province of Saskatchewan,

(*c*) "National Board" means the Wartime Labour Relations Board appointed under the Wartime Labour Relations Regulations,

(*d*) "Provincial Board" means the Board designated pursuant to the provisions of this agreement to administer the Wartime Labour Relations Regulations in the Province of Saskatchewan,

(*e*) "Regulations" means the Wartime Labour Relations Regulations, Order in Council P.C. 1003 of February 17, 1944, and amendments.

2. The Dominion, by order of the Governor General in Council, will appoint a Provincial Board to exercise the powers of the National Board under the Regulations in the Province of Saskatchewan in relation to all matters in respect of which jurisdiction is transferred to it pursuant to this agreement or otherwise, and will provide for the appointment of an executive officer who will be the Chief Executive Officer of the Provincial Board.

3. (1) The Provincial Board will consist of a Chairman and an even number of other members, not exceeding a total of six, representative of employers and employees and provision may be made for the appointment of a Vice-Chairman to preside over the Provincial Board in the absence of the Chairman.

(2) The members of the Provincial Board will be appointed after consultation by the Dominion Minister with the Provincial Minister and the remuneration payable to such members shall be fixed at the same rates as are payable to members of the Regional War Labour Board for the Province of Saskatchewan.

(3) With the concurrence of the National War Labour Board, the staff, offices and other facilities of the Regional War Labour Board for the Province of Saskatchewan will be made available for the use of the Provincial Board in the administration of the Regulations in the Province of Saskatchewan.

4. (1) Except as otherwise hereinafter provided, the jurisdiction of the National Board under the Regulations shall be transferred to the Provincial Board with respect to employees in the Province of Saskatchewan described by the provisions of paragraphs (*b*) and (*c*) of subsection one of section three of the Regulations, the employers of all such employees in their relations with such employees, and trade unions, employees' organizations and employers' organizations composed of such employees or employers.

(2) The provisions of subsection one of this section shall not be deemed to include the transfer of the jurisdiction of the National Board under the Regulations with respect to

(i) any matter where employees in more than one province of a common employer are affected, or

(ii) any matter arising out of subsection three of section five of the Regulations where employees in more than one province of several employers are affected.

5. (1) Notwithstanding the provisions of section four of this agreement, the National Board may exercise the jurisdiction vested in it under the Regulations with respect to any proceeding pending before it on the date this agreement is approved by the Governor General in Council.

(2) Nothing contained in this agreement shall be deemed to preclude the Governor General in Council from revesting in the National Board jurisdiction under the Regulations relating to any particular matter which is otherwise within the jurisdiction of the Provincial Board by virtue of this agreement and whether or not at that time pending before the Provincial Board.

6. (1) Any employer, employee, employers' organization, trade union, or employees' organization interested in or affected by any decision or order of the Provincial Board may appeal to the National Board, by leave of the National Board or the Provincial Board if the application for such leave has been made within fifteen days of the issue of such decision or order of the Provincial Board, or within such longer period as may be allowed by the National Board.

(2) On any such appeal the National Board may dismiss the appeal or make the decision or order which in its opinion the Provincial Board should have made.

7. The Provincial Board may make regulations governing its procedure not inconsistent with the Wartime Labour Relations Regulations or the regulations made by the National Board thereunder.

8. The services of the conciliation officers of the Provincial and the Dominion Departments of Labour will be utilized as required in the administration of the Regulations for the investigation of applications for certification and for conciliation purposes in accordance with such arrangements as are made from time to time between the Dominion Minister and Provincial Minister.

9. Where pursuant to section thirteen of the Regulations a conciliation officer recommends the appointment of a Conciliation Board in relation to an employer and his employees in a matter within the jurisdiction of the Provincial Board, he will transmit the same to the Provincial Minister who will forthwith

transmit the same to the Dominion Minister along with whatever recommendation he sees fit to make with reference thereto.

10. The Provincial Board will be responsible for the proper administration and enforcement of the Regulations within the province as to all matters transferred to its jurisdiction pursuant to this agreement.

11. Except to the extent that the provisions of this section are altered by subsequent agreement between the Dominion and Provincial Ministers, the following provisions in regard to the cost of administration of the Regulations in the Province of Saskatchewan shall have effect;

(1) The Province will reimburse the Dominion for one-third of its disbursements for the administration of the Regulations in the Province of Saskatchewan through the Provincial Board pursuant to this agreement, including one-third of its disbursements made for Conciliation Boards appointed under the Regulations in relation to matters in respect of which jurisdiction is transferred to the Provincial Board under this agreement.

(2) For the purposes of this section, the disbursements of the Dominion shall include the amount of the salaries and expenses of any additional staff of the Regional War Labour Board for the Province of Saskatchewan which the Chairman of that Board certifies as having been employed for the administration of the Regulations in the Province.

(3) The Dominion will reimburse the Province for two-thirds of its disbursements made in prosecution of offences under the Regulations if certified or taxed by the Attorney-General for the Province and for salaries of any provincial staff attached by arrangement with the National Board, for full time employment with the Provincial Board.

(4) The Dominion shall, in January of each year, furnish to the Province a statement of its disbursements payable by the Province pursuant to this agreement for the preceding calendar year certified by the Comptroller of the Treasury, and the Province shall reimburse the Dominion therefor within two months after the receipt of such statement.

(5) The Province will, in January of each year, furnish to the Dominion a statement of its disbursements payable by the Dominion pursuant to this agreement for the preceding calendar year certified by the Provincial Auditor and the Dominion shall reimburse the Province therefor within two months after receipt thereof.

(6) Each party shall furnish to the other such particulars of accounts rendered as may be deemed necessary by the other for payment thereof.

12. This agreement may be terminated by either party on six months notice.

13. The parties hereto will take steps to obtain any further approval of this agreement necessary to give it legal effect.

In witness whereof, the Hon. Humphrey Mitchell, Minister of Labour of Canada, has hereunto set his hand on behalf of the Dominion of Canada and Hon. James Gordon Taggart, Minister of Labour of Saskatchewan has hereunto set his hand on behalf of the Province of Saskatchewan.

Signed on behalf of the Dominion of Canada by the Hon. Humphrey Mitchell, Minister of Labour of Canada in the presence of

Text of Order in Council P.C. 5001 re administration of Wartime Labour Relations Regulations in the Province of Nova Scotia

Whereas section 36 of the Wartime Labour Relations Regulations, (Order in Council P.C. 1003 of February 17, 1944) provides that the Minister of Labour may, with the approval of the Governor in Council, enter into an agreement with the government of any province to provide for the administration within that province of the said Regulations or any part thereof and that such agreement may provide for the manner in which the Minister of Labour shall exercise the powers conferred on him under the said section and for the transfer to the government of the province or persons specified by the government of the province of all or any part of the jurisdiction in respect of matters within the province conferred on the Wartime Labour Relations Board by the said Regulations, and for a procedure whereby an appeal may be had to the Wartime Labour Relations Board from a decision made in the exercise of the jurisdiction so conferred, and for the reimbursement of the province in respect of expenses so incurred;

And whereas pursuant thereto the Minister of Labour submits for approval an agreement entered into by him on the 14th June, 1944, with the Minister of Labour of the Province of Nova Scotia to provide for the administration of the said Regulations in the said Province;

Therefore, His Excellency the Governor General in Council, on the recommendation of the Minister of Labour, is pleased to approve the said agreement, of which a copy is hereto annexed as Schedule "A", and it is hereby approved accordingly.

And whereas it is deemed necessary by reason of the war for the security, defence, peace, order and welfare of Canada and for the effective prosecution of the war that the order hereinafter set out be made;

Now, therefore, His Excellency the Governor General in Council, on the same recommendation and under the authority of the War Measures Act is pleased to make and doth hereby make the following Order:

ORDER

1. In this Order, unless the context otherwise requires, words and expressions have the same meaning as in the Wartime Labour Relations Regulations, Order in Council P.C. 1003 of February 17, 1944.

2. (1) There shall be a Nova Scotia Wartime Labour Relations Board for the Province of Nova Scotia (hereinafter called 'the Provincial Board') consisting of: the Minister of Labour for the Province of Nova Scotia who shall be the Chairman of such Board.

Mr. J. P. Bell, Halifax, N.S., who shall be Vice-Chairman of such Board, and the following members:—

Mr. Sidney C. Mifflen, Office Engineer, Dominion Coal Company Limited, Sydney, N.S.

Mr. Arthur W. Schwartz, Vice-President, Lunenburg Foundry Co. Limited, Lunenburg, N.S.

Mr. Doane Curtis, Member of Local Union 1064, United Steel Workers of America, Sydney, N.S.

Mr. Hugh Henderson, Halifax, N.S., President Local 508, Amalgamated Association of Street and Electric Railway Employees and Motor Coach Operators of America and Vice-President, Halifax District, Trades and Labour Council.

(2) Three members of the Provincial Board shall constitute a quorum, and in the absence of the Chairman, the Vice-Chairman shall act as Chairman of such Board.

(3) A decision of the majority of the members of the Provincial Board present and constituting a quorum shall be the decision of the Provincial Board and in the event of a tie, the Chairman or Acting Chairman shall have a casting vote.

(4) The Provincial Board and each member thereof shall have the powers of a Commissioner under Part I of the Inquiries Act.

(5) The Provincial Board and each member thereof may receive and accept such evidence and information on oath, affidavit or otherwise as in its or his discretion it or he may deem fit and proper whether admissible as evidence in a court of law or not.

(6) The Provincial Board shall determine its own procedure but shall in every case give an opportunity to all interested parties to present evidence and make representations.

(7) The remuneration of each member of the Provincial Board, other than the Chairman and Vice-Chairman, shall be fifteen dollars per day for each day engaged in work of the Provincial Board and each member of the Board shall be paid actual living and travelling expenses when necessarily absent from his place of residence in connection with his duties as a member of such Board.

(8) Mr. J. P. Bell, Halifax, N.S. shall also be the Chief Executive Officer of the Provincial Board.

3. The Provincial Board may make regulations governing its procedure not inconsistent with the Wartime Labour Relations Regulations or the regulations made by the Wartime Labour Relations Board thereunder.

4. (1) Except as hereinafter provided, the jurisdiction and powers of the Wartime Labour Relations Board under the Wartime Labour Relations Regulations with respect to

(i) employees in the Province of Nova Scotia described by the provisions of paragraphs (*b*) and (*c*) of subsection one of section three of the said Regulations

(ii) the employers of all such employees in their relations with such employees, and

(iii) trade unions, employees' organizations and employers' organizations composed of such employees or employers.

are hereby vested in the Provincial Board and all the provisions of the said Regulations relating to or referring to the Wartime Labour Relations Board shall relate and refer *mutatis mutandis* to the said Provincial Board.

(2) The provisions of subsection one of this section shall not affect nor be deemed to vest in the Provincial Board the jurisdiction of the Wartime Labour Relations Board under the Regulations with respect to

(i) any matter where employees in more than one province of a common employer are affected,

(ii) any matter arising out of subsection three of section five of the Regulations where employees in more than one province of several employers are affected.

5. The Wartime Labour Relations Board may exercise the jurisdiction vested in it under the Wartime Labour Relations Regulations with respect to any proceeding pending before it on the date of this Order.

6. (1) Any employer, employee, employers' organization, trade union, or employees' organization interested in or affected by any decision or order of the Provincial Board made pursuant to the Wartime Labour Relations Regulations may appeal to the Wartime Labour Relations Board by leave of the Wartime Labour Relations Board or the Provincial Board if the application for such leave has been made within fifteen days of the issue of such decision or order of the Provincial Board or within such longer period as may be allowed by the Wartime Labour Relations Board.

(2) On any such appeal the Wartime Labour Relations Board may dismiss the appeal or make the decision or order which in its opinion the Provincial Board should have made.

7. The remuneration of Mr. J. P. Bell as Vice-Chairman and Chief Executive Officer of the Provincial Board shall be at the rate of $1,000.00 per annum additional to the remuneration payable to him as Vice-Chairman and Chief Executive Officer of the Nova Scotia Regional War Labour Board, together with actual living and travelling expenses when absent from Halifax, N.S., in connection with his duties as aforesaid.

8. The expenditures incurred by the Minister of Labour under the agreement hereby approved shall be paid out of moneys appropriated for the administration of the Wartime Labour Relations Regulations.

Text of Agreement between the Dominion and the Province of Nova Scotia *re* administration of Wartime Labour Relations Regulations

SCHEDULE "A"

This Agreement made this 14th day of June, 1944, between His Majesty the King in the right of the Dominion of Canada, represented by the Minister of Labour of Canada, hereinafter called "the Dominion" of the one part and His Majesty the King in the right of the Province of Nova Scotia, represented by the Minister of Labour of Nova Scotia, hereinafter called "the Province" of the other part.

Whereas the Province has enacted appropriate legislation to apply the Wartime Labour Relations Regulations, Order in Council P.C. 1003 of February 17, 1944, and amendments, to employees described in paragraph (*c*) of subsection one of section three of the said Regulations, to employers of all such employees in their relations with such employees and to trade unions, employees' organizations and employers' organizations composed of such employees and employers; and

Whereas under the provisions of Section thirty-six of the Wartime Labour Relations Regulations the Minister of Labour of Canada is authorized with the approval of the Governor General in Council to enter into an agreement with the Government of any province to provide for the administration within the province of such Regulations; and

Whereas the parties hereto desire to enter into such an agreement to provide for the administration within the Province of Nova Scotia of the Wartime Labour Relations Regulations;

Now therefore the parties hereto pursuant to the provisions of Section thirty-six of the aforesaid Regulations covenant and agree with each other as follows:—

1. (1) In this agreement, unless the context otherwise requires, words and expressions have the same meaning as in the Wartime Labour Relations Regulations.

(2) In this agreement

(*a*) "Dominion Minister" means the Minister of Labour of Canada,

(*b*) "Provincial Minister" means the Minister of Labour of the Province of Nova Scotia,

(*c*) "National Board" means the Wartime Labour Relations Board appointed under the Wartime Labour Relations Regulations,

(*d*) "Provincial Board" means the Board designated pursuant to the provisions of this agreement to administer the Wartime Labour Relations Regulations in the Province of Nova Scotia,

(*e*) "Regulations" means the Wartime Labour Relations Regulations, Order in Council P.C. 1003 of February 17, 1944, and amendments.

2. The Dominion, by order of the Governor General in Council, will appoint a Provincial Board to exercise the powers of the National Board under the Regulations in the Province of Nova Scotia in relation to all matters in respect of which jurisdiction is transferred to it pursuant to this agreement or otherwise, and will provide for the appointment of an executive officer who will be the Chief Executive Officer of the Provincial Board.

3. (1) The Provincial Board will consist of a Chairman and an even number of other members, not exceeding a total of six, representative of employers and employees and provision may be made for the appointment of a Vice-Chairman to preside over the Provincial Board in the absence of the Chairman.

(2) The members of the Provincial Board will be appointed after consultation by the Dominion Minister with the Provincial Minister and the remuneration payable to such members shall be fixed at the same rates as are payable to members of the Regional War Labour Board for the Province of Nova Scotia.

(3) With the concurrence of the National War Labour Board, the staff, offices and other facilities of the Regional War Labour Board for the Province of Nova Scotia will be made available for the use of and will be utilized by the Provincial Board in the administration of the Regulations in the Province of Nova Scotia.

4. (1) Except as otherwise hereinafter provided the jurisdiction of the National Board under the Regulations shall be transferred to the Provincial Board with respect to employees in the Province of Nova Scotia described by the provisions of paragraphs (*b*) and (*c*) of subsection one of section three of the Regulations, the employers of all such employees in their relations with such employees, and trade unions, employees' organizations and employers' organizations composed of such employees or employers.

(2) The provisions of subsection one of this section shall not be deemed to include the transfer of the jurisdiction of the National Board under the Regulations with respect to

(i) any matter where employees in more than one province of a common employer are affected, or

(ii) any matter arising out of subsection three of section five of the Regulations where employees in more than one province of several employers are affected.

5. (1) Notwithstanding the provisions of section four of this agreement, the National Board may exercise the jurisdiction vested in it under the Regulations with respect to any proceeding pending before it on the date this agreement is approved by the Governor General in Council.

(2) Nothing contained in this agreement shall be deemed to preclude the Governor General in Council from revesting in the National Board jurisdiction under the Regulations relating to any particular matter which is otherwise within the jurisdiction of the Provincial Board by virtue of this agreement and whether or not at that time pending before the Provincial Board.

6. (1) Any employer, employee, employers' organization, trade union, or employees' organization interested in or affected by any decision or order of the Provincial Board may appeal to the National Board by leave of the National Board or the Provincial Board if the application for such leave has been made within fifteen days of the issue of such decision or order of the Provincial Board, or within such longer period as may be allowed by the National Board.

(2) On any such appeal the National Board may dismiss the appeal or make the decision or order which in its opinion the Provincial Board should have made.

7. The Provincial Board may make regulations governing its procedure not inconsistent with the Wartime Labour Relations Regulations or the regulations made by the National Board thereunder.

8. The services of the conciliation officers of the Provincial and Dominion Departments of Labour will be utilized as required in the administration of the Regulations for the investigation of application for certification and for conciliation purposes in accordance with such arrangements as are made from time to time between the Dominion Minister and Provincial Minister.

9. Where pursuant to section thirteen of the Regulations a conciliation officer recommends the appointment of a Conciliation Board in relation to an employer and his employees in a matter within the jurisdiction of the Provincial Board, he will transmit the same to the Provincial Minister who will forthwith transmit the same to the Dominion Minister along with whatever recommendation he sees fit to make with reference thereto.

10. The Provincial Board will be responsible for the proper administration and enforcement of the Regulations within the province as to all matters transferred to its jurisdiction pursuant to this agreement.

11. Except to the extent that the provisions of this section are altered by subsequent agreement between the Dominion and Provincial Ministers, the following provisions in regard to the cost of administration of the Regulations in the Province of Nova Scotia shall have effect:

(1) The Province will reimburse the Dominion for one-third of its disbursements for the administration of the Regulations in the Province of Nova Scotia through the Provincial Board pursuant to this agreement including one-third of its disbursements made for Conciliation Boards appointed under the Regulations in relation to matters in respect of which jurisdiction is transferred to the Provincial Board under this agreement.

(2) For the purposes of this section, the disbursements of the Dominion shall include the amount of the salaries and expenses of any additional staff of the Regional War Labour Board for the Province of Nova Scotia which the Chairman of that Board certifies as having been employed to provide for the administration of the Regulations in the Province.

(3) The Dominion will reimburse the Province for two-thirds of its disbursements made in the prosecution of offences under the Regulations if certified or taxed by the Attorney General for the Province and for salaries of any provincial staff attached by arrangement with the National Board, for full time employment with the Provincial Board.

(4) The Dominion shall, in January of each year furnish to the Province a statement of disbursements payable by the Province pursuant to this agreement for the preceding calendar year certified by the Comptroller of the Treasury, and the Province shall reimburse the Dominion for its share of such disbursements within two months after the receipt of such statement.

(5) The Province will, in January of each year, furnish to the Dominion a statement of disbursements payable by the Dominion pursuant to this agreement for the preceding calendar year certified by the Provincial Auditor and the Dominion shall, within two months after receipt thereof, reimburse the Province for its share of such disbursements.

(6) Each party shall furnish to the other such particulars of accounts as may be deemed necessary by the other for payment of the accounts.

12. This agreement may be terminated by either party on six months' notice.

13. The parties hereto will take steps to obtain any further approval of this agreement necessary to give it legal effect.

In witness whereof, the Hon. Humphrey Mitchell, Minister of Labour of Canada, has hereunto set his hand on behalf of the Dominion of Canada and Hon. L. D. Currie, Minister of Labour of Nova Scotia has hereunto set his hand on behalf of the Province of Nova Scotia.

Signed on behalf of the Dominion of Canada by the Hon. Humphrey Mitchell, Minister of Labour of Canada in the presence of

GEORGE GREENE.

HUMPHREY MITCHELL.

Signed on behalf of the Province of Nova Scotia by Hon. L. D. Currie in the presence of

C. M. WALL.

L. D. CURRIE.

Text of Order in Council P.C. 4871 *re* administration within the Province of Quebec of the Wartime Labour Relations Regulations

Whereas section 36 of the Wartime Labour Relations Regulations (Order in Council P.C. 1003 of February 17, 1944), provides that the Minister of Labour may, with the approval of the Governor in Council, enter into an agreement with the government of any province, to provide for the administration within that province of the said Regulations or any part thereof and that such agreement may provide for the manner in which the Minister of Labour shall exercise the powers conferred on him under the said section and for the transfer to the government of the province or persons specified by the government of the province of all or any part of the jurisdiction in respect of matters within the province conferred on the Wartime Labour Relations Board by the said Regulations, and for a procedure whereby an appeal may be had to the Wartime Labour Relations Board from a decision made in the exercise of the jurisdiction so conferred, and for the sharing by the Dominion and the Province of the expenses incurred in respect of the administration of the Regulations within the Province;

And whereas pursuant thereto the Minister of Labour submits for approval an agreement entered into by him on the 31st day of May,

1944, with the Minister of Labour of the Province of Quebec to provide for the administration of the said Regulations in the said Province;

Therefore, His Excellency the Governor General in Council, on the recommendation of the Minister of Labour, is pleased to approve the said agreement, of which a copy is hereto annexed as Schedule "A", and it is hereby approved accordingly.

And whereas it is deemed necessary by reason of the war for the security, defence, peace, order and welfare of Canada and for the effective prosecution of the war that the order hereinafter set out be made;

Now, therefore, His Excellency the Governor General in Council, on the same recommendation and under the authority of the War Measures Act is pleased to make and doth hereby make the following Order:

ORDER

1. In this Order, unless the context otherwise requires, words and expressions have the same meaning as in the Wartime Labour Relations Regulations, Order in Council P.C. 1003 of February 17, 1944.

2. (1) There shall be a Quebec Wartime Labour Relations Board (hereinafter referred to as the "Provincial Board") consisting of Judge Eudore Boivin, Quebec City, Que., who shall be Chairman thereof and the following members:

A. Martel, Esq., Executive Board Member, United Brotherhood of Carpenters and Joiners of America, Ile Bigras, Que.

A. Duquette, Esq., Amalgamated Clothing Workers of America, Montreal, Que.

E. Demers, Esq., Secretary, The National Asbestos Federation, Asbestos, Que.

J. M. Boulard, Esq., General Manager, The Stowell Screw Company Limited, Longueuil, Que.

R. Bourque, Esq., Vice-President, Mercury Press Ltd., Montreal, Que.

C. J. A. Cook, Esq., Contractor, Montreal, Que.

(2) A majority of the members of the Provincial Board shall constitute a quorum.

(3) A decision of the majority of the members of the Provincial Board present and constituting a quorum shall be the decision of the Provincial Board and in event of a tie, the Chairman shall have a casting vote.

(4) The Provincial Board and each member thereof shall have the powers of a Commissioner under Part I of the Inquiries Act.

(5) The Provincial Board and each member thereof may receive and accept such evidence and information on oath, affidavit, or otherwise as in its discretion or his discretion it or he may deem fit and proper whether admissible as evidence in a court of law or not.

(6) The Provincial Board shall determine its own procedure but shall in every case give an opportunity to all interested parties to present evidence and make representations.

(7) The remuneration and expenses of the Chairman of the Provincial Board will be provided by the Province of Quebec in accordance with the provisions of the agreement, copy of which is contained in Schedule "A", and the remuneration of each of the other members of the Provincial Board shall be at the rate of Fifteen Dollars ($15.00) per day for each day engaged in or necessarily absent from his place of residence on the business of the Board, together with necessary travelling and living expenses while absent from his place of residence on the business of the Board.

(8) Mr. J. A. Bernier, L.L.B., of Quebec City, Que., shall be the Chief Executive Officer of the Provincial Board and his salary and expenses will be provided for by the Province of Quebec in accordance with the provisions of the agreement, copy of which is contained in Schedule "A".

3. The Provincial Board may make regulations governing its procedure not inconsistent with the Wartime Labour Relations Regulations or the regulations made by the Wartime Labour Relations Board thereunder.

4. (1) Except as hereinafter provided, the jurisdiction and powers of the Wartime Labour Relations Board under the Wartime Labour Relations Regulations with respect to

(i) employees in the Province of Quebec described by the provisions of paragraph (*b*) of subsection one of section three of the said Regulations.

(ii) the employers of all such employees in their relations with such employees, and

(iii) trade unions, employees' organizations and employers' organizations composed of such employees or employers

are hereby vested in the Provincial Board and all the provisions of the said Regulations relating or referring to the Wartime Labour Relations Board shall relate and refer, *mutatis mutandis*, to the said Provincial Board.

(2) The provisions of subsection one of this section shall not affect nor be deemed to vest in the Provincial Board the jurisdiction of the Wartime Labour Relations Board under the Regulations with respect to

(i) any matter where employees in more than one province of a common employer are affected, or

(ii) any matter arising out of subsection three of section five of the Regulations where employees in more than one province of several employers are affected.

5. The Wartime Labour Relations Board may exercise the jurisdiction vested in it under the Wartime Labour Relations Regulations with respect to any proceeding pending before it on the date of this order.

6. (1) Any employer, employee, employers' organization, trade union, or employees' organization interested in or affected by any decision or order of the Provincial Board made pursuant to the Wartime Labour Relations Regulations, may appeal to the Wartime Labour Relations Board by leave of the Wartime Labour Relations Board or the Provincial Board if the application for such leave has been made within fifteen days of the issue of such decision or order of the Provincial Board, or within such longer period as may be allowed by the Wartime Labour Relations Board.

(2) On any such appeal the Wartime Labour Relations Board may dismiss the appeal or make the decision or order which in its opinion the Provincial Board should have made.

7. The expenditures incurred by the Minister of Labour under the agreement hereby approved shall be paid out of moneys appropriated for the administration of the Wartime Labour Relations Regulations.

Text of Agreement between the Dominion and the Province of Quebec *re* administration of Wartime Labour Relations Regulations

SCHEDULE "A"

This Agreement made this 31st day of May, 1944, between His Majesty the King in the right of the Dominion of Canada, represented by the Minister of Labour of Canada hereinafter called "the Dominion" of the one part and His Majesty the King in the right of the Province of Quebec, represented by the Minister of Labour of Quebec, hereinafter called "the Province" of the other part.

Whereas under the provisions of Section thirty-six of the Wartime Labour Relations Regulations, Order in Council P.C. 1003 of February 17, 1944, the Minister of Labour of Canada is authorized with the approval of the Governor General in Council to enter into an agreement with the Government of any province to provide for the administration within the province of such Regulations; and

Whereas the parties hereto desire to enter into such an agreement to provide for the administration within the Province of Quebec of the Wartime Labour Relations Regulations;

Now therefore the parties hereto pursuant to the provisions of Section thirty-six of the aforesaid Regulations covenant and agree with each other as follows:—

1. (1) In this agreement, unless the context otherwise requires, words and expressions have the same meaning as in the Wartime Labour Relations Regulations.

(2) In this agreement

(*a*) "Dominion Minister" means the Minister of Labour of Canada,

(*b*) "Provincial Minister" means the Minister of Labour of the Province of Quebec,

(*c*) "National Board" means the Wartime Labour Relations Board appointed under the Wartime Labour Relations Regulations,

(*d*) "Provincial Board" means the Board appointed by the Governor General in Council to administer the Wartime Labour Relations Regulations in the Province of Quebec pursuant to this agreement,

(*e*) "Regulations" means the Wartime Labour Relations Regulations, Order in Council P.C. 1003 of February 17, 1944.

2. The Dominion, by order of the Governor in Council, will appoint a Provincial Board to be designated as The Quebec Wartime Labour Relations Board to exercise the powers of the National Board in relation to all matters in respect of which jurisdiction is transferred to it pursuant to this agreement or otherwise, and will appoint a Chief Executive Officer who will be the Chief Executive Officer of such Provincial Board.

3. (1) The Provincial Board will consist of a Chairman and an even number of other members not exceeding a total of six, representative of employees and employers;

(2) Subject to satisfactory discharge of duties and with the approval of the Governor General in Council, the persons who are presently the Chairman and Secretary of the Labour Relations Board of the Province of Quebec, established under the Labour Relations Act, Chapter 162A, R.S.Q. 1941, will hold the same offices on or in relation to the Provincial Board;

(3) Members of the Provincial Board representative of employees and employers will be persons appointed from time to time after consultation by the Dominion Minister with the Provincial Minister, from names submitted to the Dominion Minister by appropriate labour and employer organizations respectively.

4. (1) The Province will provide, without cost to the Dominion, the necessary staff, office accommodation, equipment, supplies (other than printed forms) and other facilities for the administration of the Regulations in the Province by the Provincial Board pursuant to this agreement, and will be responsible for the payment of salaries and necessary expenses of the Chairman and the Chief Executive Officer of the Provincial Board.

(2) The Dominion will be responsible for the payment of the remuneration and travelling and living expenses of members of the Provincial Board other than the Chairman and for the remuneration and expenses of Conciliation Boards appointed under the Regulations and will provide the necessary printed forms for the use of the Board;

(3) The foregoing provisions of this section with respect to costs of administration of the Regulations within the Province may be altered by subsequent agreement between the Ministers.

5. (1) Except as otherwise hereinafter provided, the jurisdiction of the National Board under the Regulations shall be transferred to the Provincial Board with respect to employees in the Province of Quebec described by the provisions of paragraph (*b*) of subsection one of section three of the Regulations, the employers of all such employees in their relations with such employees, and trade unions, employees' organizations and employers' organizations composed of such employees or employers;

(2) The Provisions of subsection one of this section shall not be deemed to include the transfer of the jurisdiction of the National Board under the Regulations with respect to

(i) any matter where employees in more than one province of a common employer are affected, or

(ii) any matter arising out of subsection three of section five of the Regulations where employees in more than one province of several employers are affected.

6. (1) Notwithstanding the provisions of section five of this agreement, the National Board may exercise the jurisdiction vested in it under the Regulations with respect to any proceeding pending before it on the date this agreement is approved by the Governor General in Council.

(2) Nothing contained in this agreement shall be deemed to preclude the Governor General in Council, following consultation between the Minister of Labour of Canada and the Minister of Labour of the Province of Quebec, from revesting at any time in the National Board, jurisdiction under the Regulations relating to any particular matter which is otherwise within the jurisdiction of the Provincial Board by virtue of this agreement and whether or not at that time pending before the Provincial Board.

7. (1) Any employer, employee, employers' organization, trade union, or employees' organization interested in or affected by any decision or order of the Provincial Board may appeal to the National Board, by leave of the National Board or the Provincial Board if the application for such leave has been made within fifteen days of the issue of such decision or order of the Provincial Board, or within such longer period as may be allowed by the National Board.

(2) On any such appeal the National Board may dismiss the appeal or make the decision or order which in its opinion the Provincial Board should have made.

8. The Provincial Board may make regulations governing its procedure not inconsistent with the Wartime Labour Relations Regulations or the regulations made by the National Board thereunder.

9. The services of the conciliation officers of the Provincial and the Dominion Departments of Labour will be utilized as required in the administration of the Regulations for the investigation of applications for certification and conciliation purposes in accordance with such arrangements as are made from time to time between the Dominion Minister and Provincial Minister.

10. The Provincial Board will be responsible for the proper administration and enforcement of the Regulations within the Province as to all matters transferred to its jurisdiction pursuant to this agreement.

11. This agreement may be terminated by either party on six months' notice.

12. The parties hereto will take steps to obtain any further approval of this agreement necessary to give it legal effect.

13. The Province shall not, by agreeing as hereinbefore provided, be deemed to have surrendered, abandoned or given over to the Dominion any of the powers, rights, privileges or authority vested in the Province under the provisions of the British North America Act, 1867, or any subsequent Act of the Parliament of the United Kingdom, or to have otherwise impaired any of such powers, rights, privileges or authority.

In witness whereof, the Honourable Humphrey Mitchell, Minister of Labour of Canada, has hereunto set his hand on behalf of the Dominion of Canada and the Honourable Wilfrid Hamel, Minister of Labour of the Province of Quebec, ad interim has hereunto set his hand on behalf of the Province of Quebec.

Signed on behalf of the Dominion of Canada by the Honourable Humphrey Mitchell, Minister of Labour of Canada in the presence of

GEORGE GREENE,

HUMPHREY MITCHELL.

Signed on behalf of the Province of Quebec by the Honourable Wilfrid Hamel, in the presence of

GERARD TREMBLY,

W. HAMEL.

Conciliation Work of the Industrial Relations Branch during June, 1944

DURING the month of June officers of the Industrial Relations Branch were called upon to handle 26 industrial disputes or controversial situations involving 6,054 workpeople employed in 44 different establishments. Of these 20 were new disputes which originated during the month while 6 were situations which had been unterminated as at May 31 and received further attention in June. They were dealt with under the provisions of the Conciliation and Labour Act.

Industrial Relations officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal, Fredericton, N.B., and Glace Bay, N.S. The territory of the two officers resident in Vancouver comprises British Columbia and Alberta; two officers stationed in Winnipeg cover the provinces of Saskatchewan and Manitoba and Northwestern Ontario; four officers resident in Toronto confine their activities to Ontario and work in close collaboration with the Provincial Conciliation service; two officers in Montreal are assigned to the Province of Quebec and two officers resident in Fredericton, N.B. and Glace Bay, N.S., represent the Department in the Maritime Provinces. The headquarters of the Industrial Relations Branch and the Director of Industrial Relations and staff are situated in Ottawa.

Classified by industries, the disputes occurred as follows:

Mining	
Coal mining	2
Metal mining	2
Manufacturing	
Animal food products	1
Metal products	12
Pulp and paper products	1
Printing and publishing	2
Rubber products	1
Transportation	
Steam railways	3
Construction	
Buildings and structures	1
Trade	1

A statistical analysis of the nature of the disputes handled, their cause, disposition, etc., is given below:—

Nature of Dispute or Situation

Strike	7
Threatened strike	1
Controversy	8
Arbitrations	1
Requests to conduct consent elections	4
Services of Commissioners	5

Predominant Cause or Object

Increase in wages	3
Decrease in wages	1
Increased hours	1
Other causes affecting wages and working conditions	2
Recognition of Union	6
Discharge of workers for union activity or membership	8
To secure or maintain union wages and working conditions	2
Other union questions	1
Discharge of workers (*a*)	1
Unclassified	1

(*a*) (Other than in connection with Union questions).

Disposition

Strike terminated by mediation	3
Threatened strike averted by mediation	1
Controversy terminated by mediation	3
Decision rendered in arbitration	1
Election or vote conducted	4
Industrial Disputes Inquiry Commissioner appointed under P.C. 4020	5
Agreement signed	1
Dispute lapsed or called off; no further action required	5
Referred to Provincial authorities	1
Other disposition	2

Results

In favour of employees	7
In favour of employer	6
Compromise or partially successful	4
Indefinite or unterminated	7
Not known	2

Method of Settlement

Conciliation or mediation	13
Direct negotiations	2
Arbitration	1
Administrative action	2
Investigation only	3
Technical Services	4
Settlement Pending	1

Brief summaries of the cases of chief interest or importance are given below:

Metal Products Workers, Windsor, Ont.—On June 7th the Department received a request for the appointment of an Industrial Disputes Inquiry Commissioner to investigate the dismissal of an employee by Aircraft Hydraulic Supplies Company, Windsor, Ontario, allegedly on account of union membership and activity. A preliminary investigation was conducted by Mr. F. J. Ainsborough, Industrial Relations Officer, Toronto, to determine whether the circumstances warrant the appointment of a Commissioner. Following receipt of the Investigating Officer's report, the Minister of Labour on June 27th appointed Mr. J. H. Hanrahan, Police Magistrate of the City of Windsor, as an Industrial Disputes Inquiry Commissioner under the Provisions of Order in Council P.C. 4020. The case was still pending at the end of the month.

Metal Miners, Noranda, P.Q.—Early in June charges were laid with the Department of Labour that the management of Noranda Mines Limited, Noranda, P.Q. was discriminating against its employees who were members of Local No. 688 of the United Mine, Mill and Smelter Workers' Union. The late Mr. Frank Lafortune, Industrial Relations Officer, Ottawa, was assigned to make a preliminary inquiry in order to ascertain if the appointment of a Commissioner was warranted. The Investigating Officer found that the Company had been compelled by a shortage of labour to make two cuts in the tonnage of ore treated, which resulted in the shutting down of one reverberatory smelting furnace, one converter and three roasters. He also found that seniority had generally been taken into account, and that the proportion of Union members to non-union members among the employees laid off or transferred to other positions was approximately the same as the overall proportion of these groups among the working force. In the circumstances, the Department refused to comply with the request for the appointment of a Commissioner.

Metal Products Workers, Hamilton, Ont.—An allegation that Sawyer-Massey Limited, Hamilton, Ontario had dismissed an employee for the reason of his membership in and activity on behalf of the United Electrical, Radio and Machine Workers of America was filed with the Department of Labour during June. A preliminary investigation was conducted by Mr. F. J. Ainsborough, Industrial Relations Officer, Toronto, following which the Minister of Labour appointed His Honour Judge Ian M. Macdonell of Toronto as an Industrial Disputes Inquiry Commissioner to conduct an investigation under the provisions of Order in Council, P.C. 4020. At the end of the month the inquiry had not been completed.

Metal Miners, Geraldton, Ont.—On June 21, 1944, a complaint was received from a representative of the United Mine, Mill and Smelter Workers that an employee of Hard Rock Gold Mines, Limited, Geraldton, Ontario, had been dismissed because of his union membership and activity. A preliminary investigation was conducted by Mr. J. L. MacDougall, Industrial Relations Officer, Ottawa, who endeavoured to secure a mutually satisfactory settlement. When this did not prove possible, the Minister of Labour

appointed His Honour Judge J. H. MacDonald of Sault Ste. Marie, Ontario, as an Industrial Disputes Inquiry Commissioner under the terms of Order in Council P.C. 4020, to make a formal investigation. The case was still unterminated at the end of the month.

Paper Mill Workers, St. Jerome and Mont Rolland, P.Q.—On June 15 the Department was advised that a strike had been called during the morning by 342 employees in the St. Jerome plant of the Rolland Paper Company, Ltd. The strikers were members of Local No. 455 of the International Brotherhood of Paper Makers and Local No. 106 of the International Brotherhood of Pulp, Sulphite and Paper Mill Workers. The stoppage of work was reported to be in protest against the dismissal of one worker. Early in the afternoon of the same day some 200 workpeople employed in the Mont Rolland mill of the same Company ceased work in sympathy with the St. Jerome strikers and for the additional reason that one worker refused to join the union. A Conciliation Officer of the Department of Labour of the Province of Quebec was assigned to try to secure a resumption of work. Operations were resumed at the Mont Rolland plant on June 26th but the St. Jerome employees remained on strike in spite of an offer of the Company to abide by arbitration procedure. Following representations to the federal Department of Labour that the Company was engaged in the manufacture of paper stocks essential to bond issues connected with the Victory Loan and other important war work, agreement was reached with the Provincial authorities that the federal Industrial Relations Branch should intervene. The Director of Industrial Relations on June 30th persuaded the Company to re-employ the dismissed worker provided that the employees would cease picketing the plant and resume work as and when called. This offer was satisfactory to all employees and normal operations were restored on July 5th and 6th.

Union Representation Votes

Dairy Products Workers, Ottawa, Ont.—By joint consent of the parties a union representation vote was conducted on June 8 among employees of Clark Dairy Limited, Ottawa, Ont., under the supervision of Mr. D. J. Sutherland, Industrial Relations Officer, Ottawa. The vote was conducted in order to determine whether the employees desired to be represented in collective bargaining with their employer by the National Union of Dairy Workers, Local No. 3 (C.C.L.). There were 43 persons eligible to vote, of whom 35 cast their ballots. A total of 31 employees voted in favour of the union, while 4 voted in opposition.

Building Maintenance Employees, Montreal, P.Q.—A union representation vote was conducted on June 8, 1944, with the joint consent of the interested parties among maintenance and cleaning staffs employed in buildings of the Canadian National Railways in Montreal, P.Q., with Mr. R. Trepanier, Industrial Relations Officer, Montreal, acting as Returning Officer. The vote was conducted in order to determine if the employees affected desire to be represented in negotiations with their employer by the C.N.R. System Federation No. 11 of the Railways Employees' Department, A. F. of L. A total of 124 workers voted out of 143 eligible to participate. Those voting in favour of representation through the union numbered 104 as against 19 voting against the union. There was 1 spoiled ballot.

Railway Employees, Lines in Canada.—Early in March, 1944, the Department was requested to conduct a union representation vote among the yardmasters and assistant yardmasters employed by the Canadian Pacific Railway Company. The union involved was the Brotherhood of Railroad Trainmen. The ballot was conducted by mail, with Mr. Bernard Rose, K.C., of Montreal representing the Department of Labour as Returning Officer. A total of 184 employees were eligible to vote and 147 of this number took part in the balloting. The results were 127 to 20 in favour of the union.

Metal Products Workers, Montreal, P.Q.—With the joint consent of the parties, Mr. R. Trepanier, Industrial Relations Officer, Montreal, supervised the taking of a representation vote among employees of Engineering Products Limited, Montreal, P.Q., on June 15 and 20, 1944. There were 754 employees eligible to vote upon the question: "In your negotiations with your employer do you wish to be represented by the International Association of Machinists?" Out of 656 ballots polled, 294 were in favour of the union and 355 were against union representation, while 7 ballots were spoiled.

Strikes and Lockouts in Canada during June, 1944

THE number of strikes and lockouts in existence in Canada during the month of June was slightly less than that for May, but the number of workers involved and the time loss decreased sharply. There were 23 strikes in existence during the month involving 5,975 workers with a time loss of 9,491 man-working days compared with 25 strikes involving 26,043 workers and a time loss of 128,422 man-working days in May, 1944, and 59 strikes with 23,321 workers affected and a time loss of 142,917 man-working days in June, 1943.

Preliminary figures for the first six months of 1944 show a total of 110 strikes with 51,321 workers involved, and a time loss of 330,878 man-working days as compared with 208 strikes involving 100,426 workers and a resulting time loss of 515,920 man-working days for the corresponding period during 1943.

There were no strikes involving unusually large numbers of workers during June. More than 65 per cent of the time loss for the month resulted from two strikes of paper mill workers at St. Jerome and Mont Rolland, P.Q. One strike was carried over from May and 22 commenced during June. Of these 23 strikes, three resulted in favour of the workers, eight in favour of the employers, two were compromise settlements and nine were indefinite in result, work being resumed pending final settlement. At the end of the month one strike was unterminated namely, that of paper mill workers at St. Jerome, P.Q.

The record does not include minor strikes such as are defined in another paragraph nor does it include strikes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated.

STRIKES AND LOCKOUTS IN CANADA, JANUARY TO JUNE, 1943-1944

* Preliminary.

† Strikes unterminated at the end of the previous year are included in these totals.

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is seldom encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout included as such in the records of the Department is a cessation of work involving six or more employees and lasting at least one working day. Strikes of less than one day's duration and strikes involving less than six employees are not included in the published record unless ten days or more time loss is caused, bur a separate record of such strikes is maintained in the Department and the figures are given in the annual review. The records include all strikes and lockouts which come to the knowledge of the Department and the methods taken to obtain information preclude the probability of omissions of strikes of importance. Information as to a strike involving a small number of employees or for a short period of time, is frequently not received until some time after its commencement.

STRIKES AND LOCKOUTS IN CANADA DURING JUNE, 1944*

Industry, occupation, and locality	Number involved		Time loss in man-working days	Particulars†
	Establishments	Workers		
Strikes and Lockouts in Progress Prior to June, 1944				
MINING—				
Coal miners, River Hebert, N.S.	1	135	270	Commenced May 30; for re-employment of an ex-service-man at surface work; terminated June 2; conciliation, federal; in favour of workers.
Strikes and Lockouts Commencing during June, 1944				
MINING—				
Nickel miners, Copper Cliff, Ont.	1	556	556	Commenced June 1; against demotion of a shift boss; terminated June 1; return of workers pending further negotiations; (worker transferred to another mine) in favour of employer.
Coal miners, Minto, N.B.	1	44	44	Commenced June 27; for wage adjustment; terminated June 28; return of workers; indefinite.
MANUFACTURING—				
Animal Foods—				
Fish packing plant workers, Pictou, N.S.	1	*(a)* 30	20	Commenced June 5; against tax deductions from wages; terminated June 5; negotiations; in favour of employer.
Fur and Leather Products—				
Fur factory workers, Toronto, Ont.	1	9	9	Commenced June 5; against alleged signing of agreement with another union; terminated June 5; conciliation, provincial; in favour of workers.
Leather factory workers, Barrie, Ont.	1	18	50	Commenced June 22; for increased wages; terminated June 24; negotiations; compromise.
Textiles, Clothing, etc.—				
Knitting factory workers, (cutters), Marieville, P.Q.	1	6	35	Commenced June 5; against wage rates established by NWLB‡; terminated June 12; conciliation, provincial; in favour of employer.
Pulp, Paper and Paper Products—				
Paper mill workers, St. Jerome, P.Q.	1	342	4,788	Commenced June 15; for reinstatement of a worker; unterminated.
Paper mill workers, Mont Rolland, P.Q.	1	171	1,450	Commenced June 15; in sympathy with strikers at St. Jerome and refusal of a worker to join union; terminated June 24; conciliation, provincial, and reference to arbitration; indefinite.
Miscellaneous Wood Products:				
Box factory workers, Whitby, Ont.	1	38	25	Commenced June 6; against dismissal of a foreman; terminated June 7; negotiations; in favour of employer.
Metal Products—				
Freight car factory workers, Trenton, N.S.	1	185	370	Commenced June 2; against reduction in earnings of skilled workers due to inexperienced helpers; terminated June 3; return of workers pending further negotiations; indefinite.
Foundry workers (moulders), Moncton, N.B.	1	*(b)* 19	19	Commenced June 3; moulding sand alleged to be improperly re-worked; terminated June 3; return of workers; in favour of employer.
Munitions factory workers Oshawa, Ont.	1	402	125	Commenced June 9; against promotion of a female worker; terminated June 9; negotiations and return of workers pending reference to a conciliation board; indefinite.

STRIKES AND LOCKOUTS IN CANADA DURING JUNE, 1944*—*Continued*

Strikes and Lockouts in Great Britain and Other Countries

THE latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month, bringing down to date that given in the March, 1944, issue, in the review of "Strikes and Lockouts in Canada and Other Countries, 1943." The latter included a table summarizing the principal statistics as to strikes and lockouts since 1919, in the various countries for which such figures are available. Statistics given in the annual review and in this article are taken as far as possible from the government publications of the various countries concerned.

Great Britain and Northern Ireland

The British *Ministry of Labour Gazette* publishes statistics dealing with disputes involving stoppages of work and gives some details of the more important ones. An order under the Defence Regulations, effective July 25, 1940, provides for the settlement of disputes and the prevention of strikes and lockouts, as noted in the LABOUR GAZETTE, August, 1940, page 760.

The number of disputes beginning in March was 285, and 23 were still in progress from the previous month, making a total of 308 disputes in progress during the month, in which 309,400 workers were involved. The time loss in March was 1,600,000 working days.

Of the 285 disputes beginning in March, 56 arose out of demands for increased wages, 119 over other wage questions, 5 over questions as to working hours, 29 over questions respecting the employment of particular classes or persons and 76 over other questions.

Eire

The number of disputes beginning in 1943 was 81, involving 5,921 workers, with a time loss of 61,809. Of the 78 disputes ending in 1943, workers' claims were wholly admitted in 18, admitted in part in 17 and rejected in 27; employers' claims were wholly successful in 5; in 11 disputes the result was indeterminate.

British India

Revised figures for the year 1942 are 694 disputes involving 772,653 workers with a time loss of 5,779,965 working days.

United States

Preliminary figures for April show 435 strikes beginning in the month, in which 155,000 workers were involved. The time loss for all disputes in progress during the month was 580,000 working days. For May, corresponding figures are 610 strikes, involving 290,000 workers, with a time loss of 1,400,000 working days.

Canadian Railway Board of Adjustment No. 1

Summary of Decisions

REPORTS have been received covering the following cases heard by the Canadian Railway Board of Adjustment No. 1. Summaries of earlier decisions appeared in the LABOUR GAZETTE, 1942, pp. 666 and 1130, February, 1944, p. 189; April, 1944, p. 488, and the eighth report of the proceedings of the Board covering the period from October 1, 1939, to September 30, 1942, recently issued as Bulletin No. 15.

The Board was established under a voluntary agreement concluded in 1918, between the several railway companies and certain of the railway organizations. It has power to determine all differences arising between the railway companies and the members of any of the six railway brotherhoods "including the interpretation of wage schedules or agreements having due regard to the rights of the several classes of employees and of the railways respectively."

The Board consists of six representatives of the railways and six representatives of labour, one from each of the following Railway Brotherhoods: The Brotherhood of Locomotive Engineers; the Brotherhood of Locomotive Firemen and Enginemen; the Order of Railway Conductors; the Brotherhood of Railroad Trainmen; the Order of Railroad Telegraphers; and the Brotherhood of Maintenance of Way Employees and Railway Shop Labourers.

***Case No. 520*—Canadian National Railways (Western Region) and the Order of Railway Conductors, and the Brotherhood of Railroad Trainmen**

This was a claim for payment of intermediate terminal detention to train crews of a passenger train at an important Divisional point.

The Joint Statement indicated that after completion of regular station work at the passenger station, the passenger train backed down from the station a distance of approxi-

mately half a mile "where a car containing L.C.L. freight is set off (daily except Saturday and Sunday), after which the regular trip is continued". In cases where the car was set out the employees claimed that they should be compensated, in addition to pay for the trip, for approximately 30 to 50 minutes each trip. The railways denied the claim.

Representatives of both parties to the dispute appeared before the Board and presented written as well as oral argument in support of their respective claims.

The Board decided that in view of the restricted nature of the trackage in the recognized passenger terminal at this particular station "the employees contention is sustained to the extent that for the purpose of payment of intermediate terminal switching to the crews" of the specific train in question the switches where the L.C.L. freight car is set off, will be regarded as being within the passenger terminal.

Case No. 521—Canadian National Railways (Lines East) and the Brotherhood of Railroad Trainmen.—Controversy regarding assessment of discipline against a conductor

According to the joint statement of facts the conductor concerned was employed in charge of a snow train, working within yard limits and required to work under yard limit protection. The train was being pushed by the engine to the unloading point, with the conductor riding on the engine on the engineer's side, watching ahead as the train proceeded, and with the brakeman riding in the side door of the leading car.

Just as the snow train came to a full stop another train collided with it, demolishing two bunk cars, killing nine labourers, injuring sixteen others, and damaging the remaining cars.

Following an investigation the conductor, engineer, fireman and brakeman were dismissed from the service. The conductor was reinstated later with full seniority rights.

The employees contended that the conductor was wrongfully dismissed and should receive compensation for his time out of the service.

The railways claimed that the conductor should have cautioned his brakeman, who had had limited experience, to keep a sharper lookout; and that he should have ascertained before leaving the yard what trains were approaching the station. They stated that the conductor did not use good judgment in handling of the snow train and that his dismissal was justified.

The Board ruled in favour of the Railways, but suggested that the discipline administered be modified.

Case No. 522—Canadian National Railways (Lines East) and the Brotherhood of Railroad Trainmen

The dispute centred around the assessment of discipline against a yardmaster at a divisional point, following an accident in which the two rear cars of a departing passenger train while moving from one main track to another main track were sideswiped by an incoming train.

The yardmaster was held responsible for the accident and was immediately dismissed from the service. He was reinstated to his former position two months after his dismissal.

In its argument the employees claimed wrongful dismissal and asked for exoneration reinstatement and remuneration as provided in Article 56 of the schedule governing conductors, baggagemen and yardmen in effect on the Atlantic and Central Regions. The Company, in a carefully prepared abstract of its case, asserted that the accident was due to the failure of the yardman to take proper precautions to prevent it, and that the discipline was justified. In addition to their written evidence both parties to the dispute gave oral evidence to the Board.

The Board in its Decision held that the contention of the employees was sustained.

Case No. 523—Canadian National Railways (Western Region) and the Order of Railroad Telegraphers

The dispute arose concerning the cumulative service of a train despatcher to qualify him for a higher wage rate. He had worked for a considerable time on an assignment of three days per week as a despatcher and three days per week as an operator. The point at issue was whether he should have this full assignment credited to qualify him for a higher rating, or only the three days per week worked as a despatcher.

The employees in their written argument drew attention to a portion of Article 2, Clause (J) of the Telegraphers' Agreement, namely: "Swing despatchers are regular trick despatchers", also to the detailed pay schedule for despatchers, showing annual increases as set out in Article 26, and in the special agreement effective January 1, 1929. They asserted that the Company's practice had been to consider persons working such assignments as despatchers. Further, they claimed that those swing despatchers are regular trick despatchers and should be credited with the higher rates of pay.

The Company contended that the plan of graduated rates of pay for despatchers actually covers what is considered as a training period and for such purposes only the cumulative days actually worked as a despatcher should be counted in calculating the period of service necessary to qualify for a higher rate of pay, and any time worked by a swing despatcher as an operator should not be included in calculating such service.

In addition to the written submissions both parties appeared before the Board and gave further oral evidence.

The Board, in its Decision, held that "the claims of the employees are sustained for all services rendered while filling the assignment as swing despatcher."

Case No. 524—Canadian National Railways (Western Region) and Brotherhood of Locomotive Firemen and Enginemen

The disagreement was based on one phase of the discipline assessed a fireman, who was suspended for ten days and then discharged for his share in the responsibility in connection with the collision of two passenger trains. Following the hearing of two appeals to the General Regional Superintendent and to the General Superintendent of Transportation, the fireman was reinstated three and a half months after the accident. Claim was made for compensation for the time he was held out of service, but this was refused by the Railways.

The employees in their statement of claim pointed out that the fireman had drawn the attention of the engineer to the fact that the procedure the latter proposed to follow when meeting the second train would constitute a

violation of the rules. They also contended that (1) under no authority could the fireman take over control of trains; (2) the fireman was not a participant in the violation of the operating rules; (3) no degree of responsibility having been established, the fireman should be compensated as provided in Article 25 of Schedule.

In the brief presented by the Railways it was declared that "the fireman is a responsible member of the train crew, required to know and pass the prescribed examination in the Operating Rules." It was declared further, that these rules require the fullest co-operation of train crews in safeguarding their trains and, "that in the event of failure to do so all persons participating will be held responsible." While admitting that the fireman had warned the engineer of the irregularity of his procedure in handling the train he (the fireman) had not protected or taken any other action to prevent the violation of the rules, and when he saw that flag protection was not being supplied promptly he made no effort to safeguard his train."

Representatives of both the Railway and the employees appeared before the Board and presented additional oral evidence.

The Board in its Decision stated that the fireman should have remonstrated further when he observed that the engineer intended to disregard the Rules.

The claim of the employees was denied.

Case No. 525—Canadian National Railways (Atlantic Region) and Brotherhood of Locomotive Engineers.

Disagreement with respect to the assessment of discipline against a locomotive engineer.

The Joint Statement of Facts showed that the engineer was given orders to take a fast freight train of 38 loads and caboose from starting station to a divisional point about 105 miles away, following a first class train and running ahead of another second class train "until overtaken and two bulletin orders". About 52 minutes after starting, the train in charge of this engineer collided with the first class train at a small station which was partly concealed by a curve. The engineer was taken out of service at once and remained out for 18 days.

The engineer submitted a time claim to the company for the time he was held out of service. The claim was rejected and in addition he was informed he was "assessed twenty demerit marks".

It was contended by the engineer that he had begun his run 20 minutes after the first-class train he was to follow, as provided by Operating Rule No. 91; that he had kept within the speed limits set for trains on that portion of the road and that, if the first-class train had not been delayed, it would have been at a point nine miles farther on at the time of the collision. He contended further that: the accident was caused by the first-class train not being properly protected and that the Rules provided that "no engineer will be suspended, disciplined, or dismissed without first having been given a fair and impartial investigation and his responsibility established . . . . Should the investigation prove him blameless, he will be exonerated and, if held out of service, he will be reinstated and be paid 100 miles, or a day's pay for each 24 hours so held, ..."

The company contended that the statements of the engineer's fireman and that of the crew of the first-class train indicated that his train had left the starting point before the 20-minute block was up; that he ran his train faster than the schedule of the first-class train and that he failed to keep a sharp lookout when approaching the station where the accident occurred. It was also contended that by an actual test conducted within a week after the accident, the engineer, had he kept a sharp lookout, could have seen the lights of the first-class train in time to have stopped before colliding with the train in front.

Representatives of both the company and the employee appeared before the Board and presented further evidence orally. The Board in its Decision stated that "taking all circumstances into consideration, the Board feels that the responsibility for this accident does not rest with engineer". The claim of the employee was sustained.

Case No. 526—Canadian National Railways (Central Region) and the Brotherhood of Locomotive Engineers and the Brotherhood of Locomotive Firemen and Enginemen

The disagreement arose over the claim of an engineer and a fireman for a day's compensation for what they deemed an "extra trip".

According to the Joint Statement of Facts in the case the two employees in question had been assigned to a combination of switching, freight and mixed services, daily, except Sunday. The assignment had been in effect several years and while the crew was usually ordered for 7 a.m., the starting time varied according to the volume of work to be performed.

On the day in dispute the train crew was ordered for 6.30 a.m. and was required to handle a number of cars of grain to a point about four miles distant and return; time occupied one hour and five minutes. Claim was submitted for 112 miles which claim was declined and the crew compensated on the basis of continuous time from the time they reported for duty until released at the end of the day's work.

The employees contended that they were required to perform an extra trip, which was not a part of their regular assignment. They based their claim on the first paragraph of Article 7 of both engineers' and firemen's schedules which provided: "In all classes of Service covered in Article 6, one hundred miles or less, eight hours or less (straight-away or turn-around), shall constitute a day's work;..."

The railway company maintained that the assignment had been set up expressly for switching and terminal work and operating extras to points within a few miles distance of terminal. In this instance, an additional volume of work necessitated calling the crew at 6.30 a.m. This, it was asserted, did not justify the employees' claim.

Representatives of the Company and of the employees appeared before the Board and presented further evidence.

The Board in its Decision stated that "in view of exceptional circumstances on this day. the claim of the employees is sustained".

Collective Agreements and Wage Schedules

Recent Collective Agreements

COLLECTIVE agreements received in the Department are outlined in the LABOUR GAZETTE from month to month. It is not possible because of limitation of space to include all agreements received. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of the employers and workers are also included. Verbally accepted agreements are so indicated.

Agreements made obligatory under the Collective Agreement Act in Quebec are summarized in a separate article following this.

Manufacturing: Rubber Products

KITCHENER, ONTARIO.—DOMINION RUBBER COMPANY LIMITED (DOMINION TIRE FACTORY INCLUDING METAL PRODUCTS DIVISION AND RUBBER MACHINERY SHOPS) AND UNITED RUBBER WORKERS OF AMERICA, LOCAL 80.

Agreement to be in effect from May 26, 1944, to May 26, 1945, and thereafter subject to 60 days' notice. (The report of the Board of Conciliation and Investigation was published in the LABOUR GAZETTE, May, 1944, p. 621.) The company recognizes the union as the exclusive collective bargaining agency for all hourly paid employees. Checkoff: the company will deduct from wages and pay over to the union the union dues, if authorized in writing by the employee.

Hours: on day shift, 9 per day, 5 on Saturday, a 50-hour week; on night shift in the rubber machinery shops, 10-hour night, 50-hour week; for continuous operations, 8-hour day, 48-hour week. Overtime: time and one half for overtime and for all work on Sundays and holidays. A ten-minute rest period is provided for each shift. Jobs are to be evaluated and classification and time standards are to be determined by management, subject to certain regulations. Disputed standards are to be negotiated. Provision is made for the settlement of seniority rights.

Manufacturing: Printing and Publishing

HAMILTON, ONTARIO.—HAMILTON SPECTATOR LIMITED, AND INTERNATIONAL TYPOGRAPHICAL UNION, LOCAL 129.

Agreement to be in effect from January 1, 1944, to December 31, 1944, and up to 30 days thereafter for re-negotiation.

Hours and wages: $45.07 for a 46-hour week on the day shift and $46.57 for a 45-hour week on the night shift, with provision for the adoption of a five-day, 40-hour week, 75 days after the cessation of the European war. Time and one-half for overtime after 48 hours on day shift and 45 hours on night shift and double time for work on Sundays and on eight holidays. Vacation: one week's vacation with pay for those with one year's service; for substitute employees one day's vacation for each 50 days worked. Provision is made for apprenticeship conditions, seniority rights and for the settlement of grievances.

Manufacutring: Metal Products

THREE RIVERS, QUEBEC.—CANADA IRON FOUNDRIES LIMITED AND INTERNATIONAL MOULDERS AND FOUNDRY WORKERS' UNION OF NORTH AMERICA, LOCAL 101.

Agreement to be in effect May 1, 1944, to April 30, 1945, and for another year if the prescribed notice is not given in 1945. The company recognizes the union as the sole bargaining agency for all hourly employees in the plant. Preference given to union members in respect to promotions.

Hours: 9 per day, 54-hour week; night shifts, 11 per shift, 55 per week; in the casting foundry, 8 hours per day, a 48-hour week, with overtime at time and one-half. Work on Sundays and seven holidays is payable at double time. The company will continue to pay overtime in accordance with the present established practice. Vacation: Employees with one or more years service to have one week's vacation with pay; the plant will be closed for this week. Provision is made for the settlement of grievances.

WINDSOR, ONTARIO.—L. A. YOUNG INDUSTRIES OF CANADA, LIMITED AND THE INTERNATIONAL UNION, UNITED AUTOMOBILE, AIRCRAFT AND AGRICULTURAL IMPLEMENT WORKERS OF AMERICA, LOCAL 195.

Agreement to be in effect from July 23, 1943, to July 23, 1944, and thereafter from year to year, subject to notice. The company recognizes the union as the exclusive bargaining agent for piece and hourly workers who are members of the union in good standing. Employees are free to join or not to join any union or association without discrimination or coercion by the company or the union.

Hours: time and one-half paid for hours worked in excess of 45 in any week. Provision is made for seniority rights and for the settlement of grievances.

Manufacturing: Shipbuilding

SAINT JOHN, N.B.—CANADIAN COMSTOCK COMPANY LIMITED AND UNITED ASSOCIATION OF JOURNEYMEN PLUMBERS AND STEAMFITTERS, LOCAL 213.

Agreement to be in effect from January 1, 1944, to March 1, 1944, and thereafter from year to year subject to notice. The company will co-operate with the union in endeavouring to have all employees become union members.

Hours: 8 per shift, 4 on Saturdays, 44 per week. When two or three shifts are worked, ½ hour allowed for lunch. Time and one-eighth pay on second and third shifts. Time and one-half for "dirty work". Time and one-half for overtime until midnight for day shift and for 6 hours for other shifts; double time thereafter and for all work on Sundays and seven holidays. Wages to be in accordance with Findings and Directions of the National War Labour Board. (According to this Board's decision of May 2, 1944, covering employees of the shipbuilding and repairing industry in the Maritime Provinces, hourly rates are 85 cents for pipe fitter, steamfitter, plumber; 50 to 60 cents for helper.) Seniority and grievance procedure provided for.

Vacation: provisions are not in the agreement but according to Direction of National War Labour Board, November 2, 1943, 6 days' vacation with pay for all employees after one year's service, which may be forfeited for absence without leave.

SAINT JOHN, N.B. — CANADIAN COMSTOCK COMPANY LIMITED AND INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS, LOCAL B 502.

Agreement to be in effect from January 1, 1944, to March 1, 1944, and thereafter from year to year subject to notice. The agreement is similar to the one summarized above for plumbers. Double time for Sundays and nine holidays. Hourly rates: ship or maintenance electrician 85 cents; helpers 50 to 60 cents, temporary lighting man 65 cents.

SAINT JOHN, N.B.—CANADIAN COMSTOCK COMPANY LIMITED AND UNITED BROTHERHOOD OF CARPENTERS AND JOINERS OF AMERICA, LOCAL 840.

Agreement to be in effect from January 1, 1944, to March 1, 1944, and thereafter from year to year subject to notice. The agreement is similar to the one summarized above for plumbers. Double time for Sundays and nine holidays. Hourly rates: shipwright, wood caulker, joiner, carpenter, 85 cents; helpers 50 to 60 cents, stage builder 65 to 70 cents.

SAINT JOHN, N.B.—CANADIAN COMSTOCK COMPANY LIMITED AND INTERNATIONAL ASSOCIATION OF MACHINISTS.

Agreement to be in effect from January 1, 1944, to March 1, 1944, and thereafter from year to year subject to notice. The agreement is similar to the one summarized above for plumbers. Double time for Sundays and seven holidays. Hourly rates: machine operator 70 cents; machinist 85 cents; tool maker 85 cents to $1.05, helpers 50 to 60 cents.

Construction: Buildings and Structures

VICTORIA, B.C. — THE VICTORIA BUILDERS EXCHANGE LIMITED AND UNITED BROTHERHOOD OF CARPENTERS AND JOINERS OF AMERICA, LOCAL 1598.

Agreement to be in effect from June 1, 1944, to May 31, 1945, and thereafter subject to 60 days' notice. No discrimination against job stewards; business agents have access to jobs.

Hours: 8 per day, 4 on Saturday, 44 per week; for night shift, 7 hours with 8 hours' pay. Time and one-half for first four hours overtime; double time thereafter and for all work on Sundays, Saturday afternoons and on nine holidays. Wages: $1.10 per hour; carpenters in charge of work paid additional $1 per day of eight hours. Provision is made for 40-hr. week at $1.12 per hour after the cessation of hostilities.

Collective Agreement Act, Quebec

Recent Proceedings under the Act

IN Quebec, the Collective Agreement Act provides that where a collective agreement has been entered into by an organization of employees and one or more employers or associations of employers, either side may apply to the provincial Minister of Labour to have the terms of the agreement which concern wages, hours of labour, apprenticeship and certain other conditions made binding throughout the province or within a certain district on all employers and employees in the trade or industry covered by the agreement. Notice of such application is published and thirty days allowed for the filing of objections, after which an Order in Council may be passed granting the application, with or without changes as considered advisable by the Minister. The Order in Council may be amended or revoked in the same manner. Each agreement is administered and enforced by a joint committee of the parties. Further information concerning this legislation is given in the LABOUR GAZETTE, January, 1943, page 86. Proceedings under this Act and earlier legislation have been noted in the LABOUR GAZETTE monthly since June, 1934.

Recent proceedings under the Act include the extension of one new agreement and the amendment of thirteen others, all of which are summarized below. A request for the extension of a new agreement for sheet metal products industry at Montreal, was published in the *Quebec Official Gazette*, June 3; requests for amendment of the agreements for the dairy industry at Quebec; for municipal employees at Sherbrooke and for barbers at Rouyn and Noranda were also gazetted June 3. A request for amendment of the building trades agreement at Chicoutimi was gazetted June 10. Requests for the amendment of agreements for the retail fur industry at Montreal, for retail stores at Chicoutimi and for barbers and hairdressers at Quebec were gazetted June 17. Requests for amendment of agreements for uncorrugated paper box manufacturing industry for the Province,

for bakers at Quebec, for building trades at Sorel and for barbers and hairdressers at Joliette were gazetted June 23. A request for a new agreement for building materials industry for the province was published in the *Quebec Official Gazette,* June 30; a request for the amendment of the agreement for barbers and hairdressers at St. Hyacinthe was also published, June 30.

In addition Orders in Council were published during June approving or amending the constitution and by-laws of certain joint committees, and others approving the levy of assessment on the parties, or amending previous Orders in Council in this connection by certain other joint committees.

Manufacturing: Fur and Leather Products

FUR MANUFACTURING (WHOLESALE), MONTREAL

An Order in Council, dated June 19, and gazetted June 23, extends the time of the previous Orders in Council for this industry (L.G. January, 1943, p. 87; September, 1940, p. 970; May, 1944, p. 637) to August 1, 1944.

WORK GLOVE MANUFACTURING INDUSTRY, PROVINCE OF QUEBEC.

An Order in Council, dated June 16, and gazetted June 23, amends the previous Order in Council for this trade (L.G. June, 1943, p. 812). Vacation: one week with pay each year. Overtime is payable at 30 cents per hour in excess of the hourly rate of pay for males and 15 cents per hour for females. Some changes are made in the piece rates.

FINE GLOVE MANUFACTURING INDUSTRY, PROVINCE OF QUEBEC.

An Order in Council, dated June 16, and gazetted June 23, amends the previous Order in Council for this trade (L.G. June, 1943, p. 812). Vacation: one week with pay each year for all workers. Overtime is payable at 30 cents per hour in excess of the regular hourly rates for males, and 15 cents per hour for females. Certain new classes are added to the piece rate scale.

Manufacturing: Pulp, Paper and Paper Products

PAPER BOX (UNCORRUGATED PAPER) MANUFACTURING INDUSTRY, PROVINCE OF QUEBEC.

An Order in Council dated June 16, and gazetted June 23, amends the previous Orders in Council for this industry (L.G., April, 1939, p. 528, September, p. 950; May, 1940, p. 496; December, p. 1310; April, 1941, p. 473; June, p. 704; December, p. 1572; January, 1943, p. 88, July, p. 989, December, p. 1702; April, 1944, p. 495). The amendments concern the printing section of this industry in the Quebec district to conform to the changes made in the printing trades agreement for this district. Work performed in excess of 9 hours, in any one day or night, shall be considered as overtime.

Minimum wage rates: journeymen-typographers 73.4 cents per hour and journeymen-pressmen 69.5 cents per hour; apprentices from first to fourth year 15·1 to 25·9 cents; fifth year 32.4 to 38.9 cents. Vacation: three days with pay in 1944 for all journeymen with one or more years' service; one week's vacation in any subsequent year.

Manufacturing: Textiles and Clothing

MEN'S AND BOYS' HAT AND CAP INDUSTRY, PROVINCE OF QUEBEC.

An Order in Council, dated May 27, and gazetted June 3, amends the previous Orders in Council for this industry (L.G., April, 1940, p. 389; October, 1941, p. 1314, April, 1943, p. 489). Employers shall make Labour Day and Good Friday holidays with pay. Work performed on these days shall be paid for at double time.

Weekly wage rates: cutters $27.90, operators $25.70, blockers $20.14, lining makers $16.95, hand finishers $14, general hands $12. Any employee whose weekly wage rate was $24 or less before January 1, 1944, shall have an increase of $1 per week; and any whose wage rate exceeded $24 shall receive an increase of $1.50 per week.

Manufacturing: Metal Products

GARAGES AND SERVICE STATIONS, MONTREAL.

An Order in Council, dated May 27, and gazetted June 3, amends the previous Orders in Council for these trades (L.G., August, 1941, p. 1013; April, 1942, p. 483; July, p. 857; July, 1943, p. 990; April, 1944, p. 495). The cost-of-living bonus is included in the wages making an increase of 2 cents in the hourly wage rates.

Another Order in Council, dated June 16, and gazetted June 30, extends the time of the agreement to June 24, 1945.

Manufacturing: Non-Metallic Minerals, Chemicals, etc.

BUILDING MATERIALS INDUSTRY, PROVINCE OF QUEBEC.

An Order in Council, dated June 16, and published in the QUEBEC OFFICIAL GAZETTE, June 30, extends the time of this agreement (L.G., June, 1939, p. 628, September, p. 941; February, 1940, p. 172, July, 1940, p. 731; September, 1941, p. 1159; June, 1942, p. 738; September, p. 1097; July, 1943, p. 989) for 60 days from June 30, 1944.

Construction: Buildings and Structures

BUILDING TRADES, JOLIETTE.

An Order in Council, dated June 23, and gazetted June 30, amends the previous Orders in Council for these trades (L.G., May, 1940, p. 498; March, 1941, p. 334; June, 1942, p. 738, September, p. 1097; February, 1943, p. 220).

Minimum hourly wage rates (including cost-of-living bonus of 5 cents per hour): plasterers, bricklayers, masons and stone cutters on field, screen, sash, window partition and steel door erectors, weather strippers, marble setters, tile and terrazzo layers, steam shovel operators 75 cents in zones I and II; carpenter joiners, paint gilders, stationary or portable enginemen, tinsmith roofers, plumbers and steamfitters 75 cents in zone I, 65 cents in zone II; cement finishers 70 cents in zone I, 65 cents in zone II, lathers (metal) and iron brace workers 70 cents in both zones; electricians 75 cents in zone I, 70 cents in zone II; painters 60 cents in zone I and 50 cents in zone II; cement finishers 70 cents in zone I, 65 cents in zone II; common labourers 45 cents in zone I and 40 cents in zone II.

BUILDING TRADES, ST. JOHN AND IBERVILLE.

An Order in Council, dated June 3, and gazetted June 10, amends the previous Orders in Council for these trades (L.G., Nov., 1938, p. 1299; Mar., 1940, p. 283; Mar., 1941, p. 334, Aug., p. 1011, Dec., p. 1490; Feb., 1943, p. 220).

Hourly wage rates (including cost-of-living bonus of 8 cents per hour): bricklayers, plasterers, masons including cutters on the field, marble setters 78 cents; carpenter-joiners, erectors of screens (wood or metal) sashes, windows, steel partitions, joiners, concrete forms (shop or job), wood floor makers, weather-strippers, enginemen (hoist), enginemen (steam mixer), lathers (wood or metal), journeymen-roofers 63 cents; compressor operators, dry polishing terrazzo machine men 58 cents; painters, sprayers, decorators, floor varnishers, paper hangers 61 cents; journeymen plumbers, sheet metal workers, men doing installation of, or maintenance work on oil burners, gasoline pumps 68 cents; common labourers and hod carriers 48 cents.

BUILDING TRADES, MONTREAL.

An Order in Council, dated May 27, and gazetted June 3, amends the previous Order in Council for this trade (L.G., March, 1944, p. 359), by including the cost-of-living bonus of 5 cents per hour in the hourly wage rates for all classes excepting elevator construction.

Trade

WHOLESALE FOOD TRADE, QUEBEC.

An Order in Council, dated June 27, and gazetted June 30, makes obligatory the terms of an agreement between "L'Association, patronale du Commerce de Québec, inc." and "Le Syndicat Catholique des Employés de Gros de l'Alimentation de Québec, inc." and "l'Association professionnelle des Employés de Bureau de la Province de Québec, inc." Agreement to be in effect from June 30, 1944, to May 1, 1945, and year to year thereafter until notice. The decree applies to the cities of Quebec and Levis and all municipalities within a radius of twenty-five miles from their limits.

Hours: stationary enginemen and firemen other than first-class chief enginemen, 60-hour week, but from January to April 1 when there shall be a 54-hour week. Office employees male and female, a 46-hour week; occasional hands, common labourers (male and female), watchmen and boiler (not stationary) firemen, personnel and administration employees and enginemen working as first-class chief enginemen—no regular work week and no overtime rates; all other employees 53-hour week, but from January to April when there shall be a 48-hour week. Overtime is payable at time and one-half to certain specified classes.

Wages (including cost-of-living bonus): foreman or head-shipper $26, assistant foreman, assistant head-shipper and departmental manager $24, stationary enginemen and boiler firemen (enginemen's helpers) from 38 cents per hour to $50 per week, common labourers, watchmen and boiler (other than stationary engines) firemen 25 cents per hour, order employees and receiving clerks $22, butter conditioner and cheese conditioner $25, butter wrapper $15, egg grader $22, grinding mill operator $24, pork butcher $22, truck driver $22, accountants $30, book-keepers from $12 in first year to $20 during sixth year, $22 during and after seventh year, office female employees $12 to $16 after two years. Vacation: one week with pay each year for employees with at least one year's service. Employees to be paid for 11½ holidays on which their services are not required.

RETAIL STORES, COATICOOK.

An Order in Council, dated June 16, and gazetted June 30, amends the previous Order in Council for this trade (L.G., Sept., 1941, p. 1162). The amendment does not affect the summary already given.

Service: Business and Personal

BARBERS AND HAIRDRESSERS, ST. HYACINTHE.

A correction was published in the QUEBEC OFFICIAL GAZETTE, June 30, to the previous Orders in Council (L.G., Oct., 1941, p. 1426; Sept., 1942, p. 1098; Apr., 1943, p. 490, May, p. 639, Sept., p. 1253; Feb., 1944, p. 199). This correction does not affect summary already given.

Manitoba Fair Wage Act

Schedule for 1944-45

THE 1944-45 schedule of rates of wages and maximum hours prescribed each year for public and certain private construction works in Manitoba under the Fair Wage Act was gazetted June 24 and is to be in effect from June 26, 1944, to April 30, 1945.

"Private work", as defined in the Act, applies to the building, constructing, remodelling, demolition and repairing of any building or construction work within the Greater Winnipeg Water Ditsrict, or any such building in a city or town with a population exceeding two thousand, or in any part of the province to which the Lieutenant-Governor in Council may extend the provisions of this Act, provided that the total cost of such work, irrespective of the number of contracts made, exceeds $100. Maintenance work done by a regular maintenance staff on any property under the immediate control of the owner, tenant or occupant, is not included, where such work is not undertaken with a view to sale or rental.

"Public work" applies to "that authorized by the Minister of Public Works for the execution of which a contract has been entered into between the Minister of Public Works and an employer."

The new schedule increases most of the hourly rates by five cents. No increase has been added to the 55-cent basic rate fixed for the hire of trucks used on construction work prescribed in the previous schedule (L.G. 1943, p. 1134-7). A bonus of 60 cents a week has been prescribed for watchmen for whom weekly rates are fixed in the schedule. Overtime beyond the regular maximum must be paid at one and one-half times the rate and work on Sundays at double time. Painters', decorators', paperhangers' and glaziers' rates were raised by 10 cents, while labourers, teamsters, grader and tractor operators and timber men received the same increase.

FAIR WAGE SCHEDULE

The following schedule shall apply from and after June 26, 1944, on "Private Work" and on "Public Works," as described herein:

Occupation	A—Greater Winnipeg Water District Area for Private Work, and for Gov't. Work, Winnipeg and Radius of 30 Miles		B—Other than Area Described in "A" (applies to private work when population exceeds 2,000)

36. Welders and Burners (acetylene or electric)	.80			
37. Welders and Burners on Steel Erection	.90			

OVERTIME:

Time worked in excess of the maximum hours as stipulated in the schedule shall be paid at the rate of time and one-half, including Saturday afternoon. All hours worked on Sunday to be paid at the rate of double time, except in cases of emergency when time and one-half shall be paid.

RULE:

All Residents of Greater Winnipeg hired to work in the country on buildings shall be paid the Zone A rate except where other definite arrangements are made.

The Regional War Labour Board for Manitoba approved on June 19, 1944, the highest rates mentioned in any classification as the maximum to be paid.

PUBLIC ROAD AND BRIDGE WORKS

The following schedule shall apply from and after June 26, 1944, on "public works" outside of the Greater Winnipeg Water District Area in all parts of Manitoba for highway, road, bridge or drainage construction work where a contract has been entered into by the Honourable Minister of Public Works.:

Occupation	Basic Wage Rate — Minimum per Hour	Hours — Maximum per Week
	$	
Teamsters	.40 to .45	54
Labourers	.45 to .50	54
Teamsters and Two Horse Team	.70	54
Teamsters and Four Horse Team	.95	54
Grader and Tractor Operators (excepting permanent municipal employees)	.70	54
Truck Drivers (regardless of basis for payment of truck)	.50 to .55	54
Truck Only—		
(a) Hourly rate:		
When truck is hauling not more than 1 cubic yard	.55	
For each additional 1/10 cubic yard load	.04½	
Timber Men (timber work where use of hammers, saws, axes and augers only are required)	.65	48

Maintenance-of-Union-Membership in Canada

A SURVEY of 194 recent collective bargaining agreements conducted by the Department of Industrial Relations of Queen's University* disclosed that approximately 32·5 per cent contained closed shop or other union security clauses, such as union shop, maintenance-of-membership, preferential shop and check-off. Slightly more than six per cent contained maintenance-of-membership clauses.

The degrees and types of union security are defined as follows:

A *closed shop* is an arrangement whereby the company agrees to hire and retain in its employ for the duration of the agreement, only members in good standing in the signatory union.

A *union shop* requires all present employees to remain members in good standing of the signatory union and all new employees must become members in good standing within a limited time after commencement of work and continue in membership for the duration of the agreement.

Maintenance-of-membership stipulates that all employees who are members of the signatory union at the time an agreement is signed, or who subsequently become members, must retain their membership in the union for the duration of the agreement, as a condition of continued employment.

A *preferential shop* gives preference to union members in such matters as hiring, lay-offs and promotions.

The *check-off* is an agreement on the part of the employer to deduct union dues and fees from employees' pay and remit such deductions to the union treasurer. The check-off may be voluntary, in which case it applies only to those employees who authorize the deduction in writing, or it may be compulsory, in which case it includes all employees.

It is pointed out in the circular that although the survey covered a large number of the existing Canadian agreements, it has by no means covered them all. Moreover, many Canadian companies have no collective agreements with their workers. It should not be deduced from this survey, therefore, that one-third of Canadian employees are working under union security provisions, nor that only six per cent of existing collective agreements in Canada contain maintenance-of-union-membership clauses. The agreements covered by the survey are merely samples drawn from agreements set up in important industrial centres in both eastern and western Canada.

Maintenance-of-Membership Provision

The maintenance-of-membership clause in labour-management agreements was devised in efforts to reach a measure of common ground where both labour and management might agree to negotiate their differences with respect to union security. No legislation has

* Circular No. 3, Department of Industrial Relations, Queen's University, Kingston, Ontario: *Closed Shop and Other Union Security Clauses in Recent Canadian Collective Bargaining Agreements.* June 16, 1944.

been adopted in Canada giving authority to any Board or other agency to enforce the inclusion of a maintenance-of-membership clause in collective agreements, but in recent years recommendations have been made by conciliation boards in a number of instances that such provisions should be included. However, Labour and Conciliation Boards in Canada have not adopted a "standard maintenance-of-membership" clause, as was done by the National War Labour Board of the United States.

The following reports of Boards of Conciliation in which the maintenance-of-membership clause was a factor have been published in the LABOUR GAZETTE. (These cases are not included in the survey conducted by Queen's University):—

In the case of the dispute of the West Coast Shipbuilders, Limited, and Hamilton Bridge (Western) and certain of their employees (L. G., 1943, p. 1674) the majority of the Board of Conciliation, after a lengthy review of the evidence presented in connection with union security, recommended that a maintenance-of-membership clause be included in the agreement between the companies and their workers. The minority report recommended that the "closed-union shop....should be granted on written undertakings being given by the eight applicant unions....that no jurisdictional dispute will occur as between themselves and any other bona fide union during the duration of the war in the plants of the companies concerned."

The maintenance-of-membership clause was recommended by the majority of the Board of Conciliation that adjudicated in the case of Dominion Rubber Co. and its employees in January, 1944 (L.G., Feb., 1944, pp. 177-181). The minority report in this case took exception to including the clause in the agreement. The union accepted the recommendation but the company rejected it. Whereupon the union asked permission to take a strike vote, but in the negotiations that followed the company compromised by accepting a voluntary irrevocable check-off in lieu of the maintenance-of-membership provision.

In the case of the Goodyear Tire and Rubber Co. the Board was unanimous in recommending that "instead of providing for a closed shop (the agreement) should contain a maintenance-of-membership provision...." which allowed for a 30-day escape period. (L.G., Feb., 1944, pp. 181-183).

Recent voluntary agreements which contain Maintenance-of-Membership provisions

The Gaspesia Sulphite Co., Limited, and International Brotherhood of Pulp, Sulphite and Paper Mill Workers, Local 455. (L.G., 1943, p. 1251).

Chas. P. Wayman Co., Limited, and United Electrical, Radio and Machine Workers of America, Local 514. (L.G., 1943, p. 1252).

Joseph Stokes Rubber Co., Limited, and United Electrical, Radio and Machine Workers of America, Local 523. (L.G., 1943, p. 1527).

General Steel Wares, Limited, and United Steel Workers of America. (L.G., Jan., 1944, p. 68).

Courtaulds (Canada) Limited, and United Textile Workers of Canada, Local No. 3 (Rayon Factory Workers) (L.G., Feb., 1944, p. 195).

West Coast Shipbuilders, Limited, and the Boilermakers' and Iron Shipbuilders' Union of Canada, Local No. 1 (L.G., May, 1944, p. 635).

The following are listed in the report prepared at Queen's University as collective agreements which contain a maintenance-of-membership clause.

Master Bakers' Association of Vancouver and International Union of Bakery and Confectionery Workers of America, Local 468.

Toronto Engine Works, Limited, and United Electrical, Radio and Machine Workers of America, Local 514.

Jos. Stokes Rubber Co., Limited, and United Electrical, Radio and Machine Workers of America, Local 523.

Fleet Aircraft, Limited, and Fleet Aircraft Workers' Association.

Biltmore Hats, Limited, and United International Hatters, Cap and Millinery Workers' Union, Local 82.

Lever Brothers, Limited, and United Packinghouse Workers of America, Local 151.

Pacific Mills, Limited, and International Brotherhood of Papermakers, and International Brotherhood of Pulp, Sulphite and Paper Mill Workers.

Powell River Company, and International Brotherhood of Papermakers, and International Brotherhood of Pulp, Sulphite and Paper Mill Workers.

C. S. Hyman Co., Limited, and Shoe and Leather Workers' Organizing Committee, Local 25.

Hayes Steel Wares, Limited, and Steel Workers of America, Local 676.

Stamp and Enamelled Wares, Limited, and Steel Workers of America, Local 2000.

Robt. Mitchell Co., Limited, (Foundry Division), and Steel Workers of America, Local 2830.

Canadian Vocational Training

CANADIAN Vocational Training provides the following types of training:—

(1) Pre-employment classes in vocational schools for men and women about to enter war industry;

(2) Part-time classes, principally for the upgrading of persons already employed;

(3) Training in plant schools;

(4) Special classes for foremen and supervisors;

(5) Training of enlisted men as tradesmen for the Army, Navy and R.C.A.F.;

(6) Rehabilitation training for persons discharged from the Armed Forces in the present war and referred for training by the Department of Pensions and National Health;

(7) Assistance to certain categories of university students whose services are needed in connection with the war effort.

Canadian Vocational Training is carried on under agreements made by the Dominion Government with each province. The administration is decentralized with a Regional Director in each province. Training is given in technical schools, special training centres and in industrial plants. The provinces and municipalities supply the shop facilities of the technical schools to the Program free of charge. Provincial Governments also pay certain administrative costs and share with the Dominion in the cost of machinery and equipment purchased. All other costs are paid by the Dominion with funds from the War Appropriation.

From its inception up to May 30, 1944, the gross enrolment under Canadian Vocational Training has been as follows:—

Training in Industry	222,642
Army Tradesmen	41,834
Navy Tradesmen	7,904
R.C.A.F. Tradesmen	65,048
Rehabilitation (discharged persons from the forces)	3,528
Students	5,373
Total	346,329

Enrolment

During the month of May there was a further reduction in enrolment in all types of industrial training classes. The enrolment in the R.C.A.F. classes both for the technical ground trades and for the Pre-Aircrew showed a very marked reduction. All the R.C.A.F. classes are closing early in July. The enrolment in the Army tradesmen's classes which, apart from clerks, consists almost entirely of the young soldier groups, remained about the same There was a slight increase in the enrolment in the classes for the Navy and also in the number of ex-service personnel undergoing vocational training for civilian rehabilitation. At the end of May the total enrolment in all types of projects was 8,135 of whom 741 were in part-time classes. Approximately sixty per cent of this total enrolment was in classes for the armed forces.

Foremanship Training

The various units of training for foremen and supervisors have met with a growing response from employers throughout the country and reports received indicate this type of training has been followed by a marked reduction in the length of time necessary to instruct new employees and also in substantial savings and improvements through the application of job simplification following participation in Job Method Training. Up to the end of May 53,392 foremen and supervisors have received certificates in one or more units of supervisory training. Nearly 3,000 of these certificates were issued during May. Through the co-operation of the Wartime Prices and Trade Board increasing use is being made of these classes by industries engaged in civilian production. They are also being used extensively by many departments of the Dominion Civil Service through the co-operation of the Civil Service Commission.

Rehabilitation Training

As opportunities for regular employment in Canadian industry are still very plentiful, there has been no very marked increase in the number of ex-service men and women applying for vocational training. The great majority prefer to accept employment in war industries at the prevailing wage scale and will defer their training until a later period. In the meantime, steps are being taken to adapt for rehabilitation training the shops and training centres that have been used for classes for the armed forces and for industry. Negotiations have been in progress for some time for Canadian Vocational Training to take over for rehabilitation training purposes, some of the buildings and centres formerly used by the Army and the Air Force but which are now surplus to their requirements. The work of organizing and equipping these new centres is proceeding.

(Concluded on page 878)

(1) Trainees in Part-time Classes consist largely of employed persons who are being given training at the request of employers in war production who wish to up-grade their employees.

(2) Includes those graduates who, though actually placed prior to May 31, 1944, were not so reported until after May 1, 1944.

(3) The numbers shown as completed, but not reported placed, in Province of Quebec (56) includes all unplaced Trainees who have completed their courses since the commencement of the War Emergency Training Programme (Canadian Vocational Training) in that Province.

(1) Includes graduates from previous month's classes who were not reported placed until after May 1, 1944.

The small number of ex-service persons applying for training and the variety of occupations for which training is requested, has rendered it very difficult to organize and carry on separate classes in most parts of the country. Individual trainees, however, are admitted to classes being carried on under the program for the armed forces or for war industries but are given special attention and a longer period of training in order to increase their skill. Most of those desiring stenographic or commercial training are placed in private business colleges. Some are following correspondence courses which are related to the work at which they are employed and which will improve their chances of permanent rehabilitation. A growing number of both men and women are being placed for their training on the job in industrial and commercial establishments under individual arrangements made with employers setting forth the length of the training, the nature of the instruction to be given and the wages to be received by the trainee. All such cases are visited at regular intervals by field representatives to make sure that proper training is being given and that satisfactory conditions are prevailing. The greatest co-operation has been afforded by employers and organized labour.

The following list gives an idea of the variety of training being given for women: stenographic and commercial, beauty parlour, dressmaking, dress designing, X-ray technicians, retail clerks, nursing, office receptionists.

For men—the following are being trained in classes: business and commercial draughting, carpentry and cabinet making, machine shop and toolroom improvers, laboratory technicians, commercial radio operators, shoe and harness repair, motor mechanics, radio servicing and repair, instrument making, motion picture projectionists, printing, commercial art, barbering, sheet metal, electric motor repairs.

Men are also being trained in the following occupations in industry: baker, newspaper reporter, druggist, optometrist, bookkeeper and accountant, hotel clerk, tinsmith, tailor, offset pressman, lithographer, municipal clerk, postal clerk, sanitary inspector, gas service station attendant, butcher, stationary engineer, mechanical dentist, dry cleaner or presser, watch repair, electric repairs, undertaker, salesman, photographer, interior decorator, body and fender work, typewriter mechanic, machinists, auto ignition, refrigeration service.

Training in the United States

ENROLMENT in vocational training programs in the United States have totalled more than 12,000,000 during the last four years, according to the War Manpower Commission whose Bureau of Training is responsible for the co-ordination of the programs.

The number of persons in training in the various programs between July, 1940, and May, 1944, was as follows:—

Vocational training for war production workers (carried on in 2,800 schools and centres)	6,238,620
Food production war training ..	2,498,972
Engineering, science and management training	1,472,503
Training within industry	1,163,540
National Youth Administration (now discontinued)	772,756

Over the same period, the Appentrice Training Service gave assistance in the development of integrated in-plant training programs to approximately 41,450 individual plants.

These programs, which originally concentrated on pre-employment training for war jobs, have been more and more devoted to in-plant training for the upgrading of workers. Their continuing functions are described as follows:—

1. To increase the effectiveness of workers and supervisors who are employed in war industries.
2. To prepare beginning workers, including women, youths, older persons, discharged veterans and handicapped persons, for employment.
3. To retrain workers shifting from one department of a plant to another or from one industry to another.
4. To train plant supervisory personnel in short courses.
5. To provide consultative services to employers and to encourage the formation of joint management-labour training committees; to continue to organize training programs where they are necessary.
6. To provide training necessary to reach farm production goals.

Activities of Unemployment Insurance Commission

Analysis of Statistics—Regulations re Unemployment Insurance Books or Stamps which are Destroyed—Status of Students under Act—New Office Opened in Quebec City

DURING May, 4,654 claims for unemployment insurance benefit were filed at local offices throughout Canada. This represents a considerable decrease from the 6,463 claims filed during April, but remains well above May of last year when 2,027 were filed.

An indication of the number claiming and drawing benefit at the end of the month is given by those signing the live unemployment register. These numbered 7,329 (5,490 males and 1,839 females) during the last six working days of May, compared with 12,053 (9,517 males and 2,536 females) during the last six working days of April.

A total of 4,741 claims were received at insurance offices for adjudication during May, while 2,135 were received in May of last year. The adjudication of most of these, together with claims pending from the previous month, resulted in 4,421 being considered entitled to benefit during the present month compared with 1,943 during May a year ago.

A total of 5,222 persons commenced receiving benefit in May, 1944, compared with 2,167 persons in May, 1943. There were, however, 8,873 persons whose benefit payments carried over from previous months, making a total of 14,095 who received a total of $473,709 for 240,232 compensated unemployed days. This compares with 4,848 persons who received a total of $129,132 for 68,720 days of last May.

The average duration of the unemployment compensated was, then, 17·0 days in May compared with 14·2 days in May, 1943. The average amount paid per beneficiary was $33.61 during May as against $26.64 last May, while the average amount paid per compensated day of unemployment was $1.97 in May, 1944, and $1.88 in May, 1943.

Tables 3, 4 and 5 present data respecting the number of claims filed and their disposition, chief reasons for non-entitlement to benefit, employment applications by insured persons, number receiving benefit, number commencing the receipt of benefit, number of days' benefit paid and amount of benefit paid, by provinces.

Unemployment Insurance Stamps or Books Which are Destroyed

Loose unemployment insurance stamps completely destroyed by fire or other means while in the possession of an employer will not be replaced by the Dominion Government, according to instructions recently issued to all its local offices by the Unemployment Insurance Commission.

If unemployment insurance stamps are only partially destroyed, the value of stamps that can be identified will be refunded if the employer forwards the damaged remains to the Commission at Ottawa. He must also sign an affidavit stating exactly how the damage occurred.

In the case of employees' unemployment insurance books, containing cancelled or uncancelled stamps, which may be destroyed by fire or other means, the regulations vary from those covering loose stamps. Destroyed books may be replaced by the Commission upon receipt of an auditor's report and an affidavit from the employer.

Status of Students under Unemployment Insurance Act

The great majority of students employed as part-time messengers by drug stores and grocery stores, as well as students employed as pin boys in bowling alleys, where the employment is usually of such short duration that the total earnings in a week from any one employer are relatively small, will be excepted from unemployment insurance as a result of a special order passed by the Unemployment Insurance Commission.

This special order, effective from July 1, 1944, excepts "Employment of a full-time enrolled student of a day school, college or university during any week, from Sunday to Saturday, in which his earnings from any one employer do not exceed $5.40."

The special order of the Commission will apply both during school terms and vacation periods. It is pointed out, however, that if earnings from any one employer exceed the prescribed amount, the employee is insurable. It is also emphasized that the new order applies only to students.

The Commission announced that in cases where a student is excepted by this special order it will not be necessary to obtain a certificate of expected employment, or take any other action.

12558—5½

New Office Opened in Quebec City

Opening of a new District Office of the Unemployment Insurance Commission at Quebec City was announced on June 13, by Louis J. Trottier, Chief Commissioner. Establishment of the new Office results from a definite need, Mr. Trottier said. The Quebec Office of the Commission has been receiving more claims for benefit than any other of the Local Offices. Up to the present, these claims have been sent to the Regional Office at Montreal to be dealt with, resulting in a great concentration of work in the Montreal Regional Office. In future they will be handled in the Quebec District Office. It is hoped, the Chief Commissioner said, that the new Office will enable the Commission staff to give more speedy and satisfactory service to the public in respect to benefit claims.

Mr. Trottier emphasized that the opening of the new Office does not imply any change of policy on the part of the Commission. It results from the needs of the Quebec District.

Regional and District Offices of the Commission are now located at Moncton, Quebec, Montreal, Toronto, North Bay, London, Winnipeg, Saskatoon, Edmonton and Vancouver.

Insurance Registrations

Reports received from local offices of the Unemployment Insurance Commission showed that as at June 30, 1944, 2,430,108 employees have been contributors to the fund since April 1, 1944, an increase of 224,352 since the commencement of the current fiscal year. Of this increase, 144,236 represented new entrants to insurable employment and 80,116 resumed insurable employment since April 1.

As at June 30, 1944, 130,011 employers were registered as having insurable employees, an increase of 4,084 from May 31, 1944. This increase is mainly due to the opening of summer resorts and general summer seasonal business.

Registration of employers and employees as at June 30, 1944, by regions follows:

TABLE 1—REGISTRATIONS AS AT JUNE 30, 1944

Region	Employers Registered (live file)	Insured Persons Registered
Maritimes	10,406	172,124
Quebec	34,523	780,005
Ontario	49,034	947,486
Prairie	23,602	312,712
Pacific	12,446	217,781
Total for Canada	130,011	2,430,108

The column "Interest on Investments and Profit on Sale of Securities" represents:—
(a) Interest received on due dates of the various Government Bonds, with proper adjustments being made at the end of each year for interest accrued and amortization charges.
(b) Profit on sales of securities taken into account at the end of each year only.

The "Miscellaneous" column includes the following:—

Penalties	$ 2,131 78
Contributions in respect of services in the armed forces	112,956 72
Miscellaneous	1,543 91
	$ 116,632 41

Employment and Unemployment

Summary

INFORMATION in this section regarding the employment situation in Canada is based upon reports from the following sources:

The employment situation at the beginning of May, as reported by employers.—The Dominion Bureau of Statistics receives each month reports from firms employing fifteen or more employees. These firms represent practically all industries except agriculture, fishing, hunting and highly specialized business operations.

The Bureau has been receiving these reports for many years; hence, although the figures given show considerably less than the total number of persons employed in Canada, they give a valid picture of the trend of employment over a period of years.

There was a further decrease in industrial employment at the beginning of May, according to returns received from 14,539 firms whose employees numbered 1,796,340, compared with 1,819,660* at April 1. This was a reduction of 23,320 persons or 1·3 per cent.

The index number of employment (based on the 1926 average as 100) was 178·2 as compared with 180·5 in the preceding month, and was the same as at May 1, 1943.

Information is also furnished by the co-operating firms, concerning payrolls. The per capita average weekly wage of $32.26 showed a decrease from that of $32.37* at the beginning of April, while at April 1, 1943, the figure was $30.59.

Report on employment conditions for June.—A summary of employment conditions for the month of June has been prepared by the Research and Statistics Branch, Department of Labour, on the basis of reports received from Local Employment and Selective Service Offices across Canada. These reports describe employment conditions in the Maritime, Quebec, Ontario, Prairie and Pacific Regions.

Applications for employment, vacancies, and placements, May, 1944.—From the Employment and Selective Service Offices of the Unemployment Insurance Commission come reports showing the number of positions reported as vacant across the Dominion, together with the number of applications for employment and the number of placements effected.

Reports received from the Employment and Selective Service Offices of the Unemployment Insurance Commission during the five-week period April 28 to June 1, 1944, showed a slight increase in the average daily placements as compared with those of the four-week period ending April 27, and a negligible decrease in comparison with the four weeks April 30 to May 27, 1943. The most outstanding changes under the first comparison were gains in forestry and logging, manufacturing and construction. Under the second comparison there was a heavy loss in manufacturing, a smaller decrease in construction and a moderate gain in forestry and logging. Vacancies during the five weeks numbered 312,200. There were 246,306 applications for employment and 182,572 placements were effected in regular and casual employment.

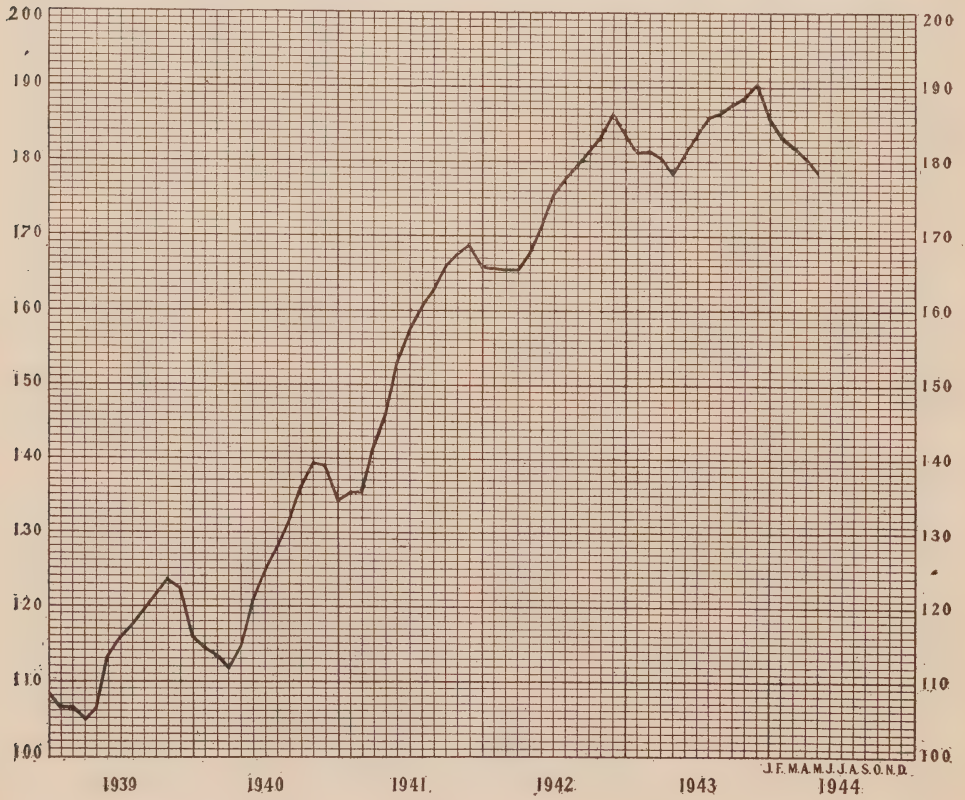
Unemployment in trade unions.—The Department of Labour receives reports from the local trade unions throughout Canada, showing the number of their members who were unemployed during the period under review.

The statistical article summing up the information contained in these reports, formerly run monthly in the LABOUR GAZETTE, is now appearing quarterly. The last quarterly article was published in the May issue.

Unemployment as reported by the Unemployment Insurance Commission.—In the article *Activities of the Unemployment Insurance Commission* appears each month a statement showing the number of claims made for unemployment insurance benefits.

During May, 1944, 4,654 persons made claim for benefits, as compared with 6,463 in April, 1944, and 2,027 in May, 1943.

* Revised.



The Employment Situation at the Beginning of May, 1944, as Reported by Employers

FOR the fifth successive month, there was a recession in industrial activity at the beginning of May, when the 14,539 establishments furnishing information to the Dominion Bureau of Statistics reported the release of 23,320 persons, reducing their staffs by 1·3 per cent to 1,796,340. This contraction, like that also indicated at May 1, 1943, was contra-seasonal, the general trend at that date in earlier years since 1920 having invariably been favourable. The number laid off was approximately the same as at the beginning of May last year. There was also an important decline in the payrolls reported at the date under review, when the weekly aggregate for the eight leading industries was lower by 1·6 per cent than at April 1. In addition to the losses in salaries and wages consequent upon the shrinkage in employment, there were decreases due to lessened overtime payments, while a strike in the automobile industry in the latter part of April and the first part of May was another important factor in reducing the indicated payrolls.

To a considerable extent, the curtailment in employment at the latest date took place in logging, in which it was seasonal; however, the decrease of 23,378 men was decidedly above-average for the time of year, doubtless reflecting the return of unusually large numbers of workers to the farms, following a winter of exceptionally great activity in the woods. There was also an important reduction of 11,400 persons in manufacturing; this decline, which was contra-seasonal, was the largest loss indicated in any month since the outbreak of war, with the exception of those at Jan. 1 of 1940 and 1944. Several factors were reported as contributing to the recession, the more important of which were the return

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

of farmers to agriculture, the military call-up of men in certain categories, completion of contracts and shortages of materials. The greatest curtailment took place in iron and steel plants, which released 10,121 employees. The number laid off in the durable manufactured goods was 10,752, as compared with 744 in the production of light manufactured goods. In the latter, textiles showed a considerable decrease exceeding the average decline at May 1. Food factories, on the other hand, afforded more employment.

Among the remaining main industrial groups, mining showed a substantial reduction, which was above-average for the beginning of May. The trend was upward in communications, transportation, construction, services and trade. The gain of 6,757 persons in construction was greatest, although it was not equal to the expansion usually indicated at May 1.

Based on the 1926 average as 100, the general index of employment at the date under review was 178·2, compared with 180·5 at April 1, 1944. The figure at May 1, 1943, was also 178·2. The seasonally-adjusted index fell from 191·2 in the preceding month, to 185·0 at the beginning of May.

Although recent wartime factors have tended to cut across normal seasonal movements, it is probable that the June 1 survey will show a resumption of the upward course of employment which was halted at December 1 of last winter. Without exception, general expansion in employment has been indicated at the first of June in the years since 1920; in manufacturing this has also been the case, with the single exception of June 1, 1931.

Payrolls

As already stated, the slackening in industrial employment at the beginning of May was accompanied by a relatively larger falling-off in the payrolls disbursed on or about that date, for services rendered in the week pre-

TABLE I—INDEX NUMBERS OF EMPLOYMENT AND PAYROLLS, BASED ON JUNE 1, 1941=100, TOGETHER WITH PER CAPITA WEEKLY EARNINGS

ceding. The latest reported aggregate of salaries and wages in the eight leading industries was $57,958,026, as compared with $58,897,682 paid at the beginning of April; this decrease of 1·6 per cent was due in part to the diminution in employment, but also resulted from lessened overtime work, while industrial disputes likewise considerably affected the situation. The per capita earnings fell from $32.37 at April 1, to $32.26 at the beginning of May. The May 1, 1943 figure had been $30.59, and that at May 1, 1942, $28.59; the former average had been substantially lowered by the observance of the Easter holidays, then falling within the period of observation. In the last 12 months, the index number of payrolls has risen by 4·7 per cent, while there has been no change, on the whole, in the number employed in the eight leading industrial divisions.

The survey shows that, including the figures for financial institutions, the total number of persons in recorded employment in the nine leading industrial groups at May 1 was 1,861,089, as compared with 1,884,382 at the beginning of April. The weekly salaries and

(1) This classification comprises the following:—iron and steel, non-ferrous metals, electrical apparatus, lumber, musical instruments and clay, glass and stone products.

wages paid at the latest date amounted to $60,069,104, as compared with $60,997,431 in the preceding period of observation. The per capita average for the nine main industries, including finance, was $32.28, as compared with $32.37 at the beginning of April, and $30.60 at May 1, 1943.

Table II summarises the latest statistics of employment and payrolls for the leading industrial groups, the provinces and economic areas, and the eight leading industrial cities, and gives comparisons as at April 1, 1944, and May 1, 1943.

In the period for which data are available, the number of persons in recorded employment in the eight leading industrial groups has shown an increase of 16·5 per cent, while the aggregate weekly earnings of these workers are higher by 46·2 per cent. Including finance, the gain in employment from June 1, 1941, to May 1, 1944, amounted to 16·1 per cent, and that in payrolls, to 45·2 per cent. The explanation previously given for the much greater rise in the salaries and wages than in employment during the period of observation may again be stated:—(1) the growing concentration of workers in the heavy manufacturing industries, where rates of pay are above the average and, in addition, there has been a considerable amount of overtime work, (2) the payment of cost-of-living bonuses to the majority of workers; the rates at which these allowances were calculated were increased on more than one occasion before their incorporation in the basic wage rates as from February 15, 1944, and (3) the progressive up-grading of employees as they gain experience in their work. In a substantial number of cases, higher wage-rates have also been granted.

The influence of the war has resulted in particularly marked expansion in employment and payrolls in factories, in which the rate of acceleration in the period of observation has been decidedly greater than in the non-manufacturing industries; the index of employment in the former has risen by 32·9 per cent from June 1, 1941, and that of payrolls by 68·1 per cent, proportions decidedly exceeding those elsewhere given for the eight leading industries. The factors stated above as influencing the general trends have had an even greater effect in the case of manufacturing.

In spite of the contraction indicated at May 1, 1944 as compared with April 1, the growth in employment and payrolls in the production of durable goods has been exceed-

[1] The relative weight shows the proportion of employees reported in the indicated industry to the total number of employees reported in Canada by the firms making returns at the date under review.

of 41 per cent in the payrolls disbursed by the co-operating establishments.

In regard to the marked variations in the average earnings of workers in the different industrial classes, it must again be pointed out that the sex distribution of such persons is an important factor, frequently associated with variations in the age groups. In general, the female workers tend to belong to the younger age classes, in which the earnings are naturally lower than among those of greater experience. The matter of short-time or overtime may also considerably influence the reported aggregate and averages, which likewise reflect variations in the extent to which casual labour is used; the degree of skill generally required of workers in the industry is of course also an extremely important factor.

Report on Employment Conditions for June, 1944

The following summary of employment conditions for the month of June has been prepared by the Research and Statistics Branch, Department of Labour, on the basis of reports received from Local Employment and Selective Service Offices across Canada.

Maritime Region

Agriculture.—Although some districts need more warm weather to realize their anticipation of an exceptionally large harvest, crops on the whole are progressing favourably throughout the region. The question of adequate labour supply for the haying and harvesting activities is at present the subject of careful planning, but the prevailing lack of experienced farm helpers will undoubtedly increase as the season advances.

Many farmers in the Bridgewater area of Nova Scotia are taking time between planting and haying for employment in the bush, or in local cooperage plants and sawmills. Sussex and Sydney are still short of the necessary agricultural aid. In the Truro neighbourhood all N.R.M.A. rejects with farm experience are being directed to work on highly productive farms. Farther north, in New Brunswick, Moncton reports that outstanding orders for farm helpers are gradually being filled, but Fredericton records a steadily mounting demand, chiefly for the haying season.

Logging.—Further heavy rains are essential to completion of the logging drives in New Brunswick, but the greatest need is now for pulp cutters for summer bush operations. One operator has placed orders with the Bathurst office for 500 men for this work, and this number will be very difficult to find on account of fishing and other seasonal activities in the district. Fredericton has similar demands, and at Edmundston the call is still insistent. A great shortage of choppers persists in the Halifax area, and the local office reports that few men are coming in on clearance orders.

Sawmills.—New Brunswick's sawmills are operating at full capacity in spite of the labour shortage. At Minto the shortage of workers is being temporarily relieved by the referral of army rejects, but in the vicinity of Newcastle the requisite labour is increasingly difficult to procure, and operations are further curtailed by the delay in the river drives.

Fish Processing.—While the fishing industry has made little or no demand on the regional labour force, fish processing is pressing in its needs. The most disastrous storm in years seriously affected the lobster catch recently, but other catches are giving the plants all the fish that they can handle. The only fresh fish processing plant in Lunenburg county is experiencing great difficulty in securing enough men for the summer work, and as a result will have to lay up its fishing schooners during the forthcoming herring run. By adopting this measure, and by employing a large number of high school boys during vacation, the company hopes to handle this season's run.

Coal Mines.—Although all collieries are working steadily, the coal mines are still short-staffed. The local office at Minto, in co-operation with the Enforcement Division, is making a concerted drive to improve the absentee situation in and about the mines in the vicinity, and according to reports received from coal operators this effort is resulting in a slight increase in the number of man-days worked. A small number of soldier miners has arrived in the Minto area since the last summary, but this addition has been counterbalanced by separations for health reasons. Daily production in the Sydney collieries is also lower than it should be, but as many employees are starting their vacations, it is not anticipated that there will be any increase in the near future.

Manufacturing.—No great improvement in the labour situation of the manufacturing industry is apparent during the past month. On the contrary, man-power needs have increased in the ship-building yards of the Bridgewater area. One employer, to meet his requirements, has recruited 52 carpenters and painters in

Newfoundland. The Halifax Shipyards are calling for 115 skilled workmen of various types, and H.M.C. Dockyard, also at Halifax, requires 150 skilled tradesmen of all kinds, as well as 50 unskilled labourers.

The Sydney steel plant is still suffering from a lack of heavy labour, and industries in Amherst are similarly handicapped. Amherst's local shell manufacturing requirements have been met, but two Trenton factories, preparing for similar shell orders, will require some 500 workers within two weeks' time.

Construction.—The call for construction labour is persistent. A considerable number of carpenters and bricklayers are still required for work on the Provincial Sanitarium in Charlottetown, and in addition to this project, the contractors are undertaking the erection of a hospital in Souris. Some difficulty is being encountered in finding board and lodging for workmen moving into the area for this construction job, but the greater part of the labour will be provided by local and district men.

All Halifax vacancies for carpenters in high priority construction have been filled recently, and a number sent on clearance to other localities as well. One local company requires some 24 carpenters to work on local housing projects, and orders are on hand for a further 64 in low priority construction. Moncton and Fredericton are continuingly short of carpenters and labourers, and at Newcastle it has been necessary to depend on unskilled employees in place of skilled tradesmen, with even the untrained workers hard to obtain.

Quebec Region

Agriculture.—While helpers are wanted in the southerly parts of the province, such as Coaticook, Ste. Anne de Bellevue and Valleyfield, in the north and east men are busying themselves for the most part in bush work until the opening of the haying season. Matane and Chicoutimi farmers will remain in the logging camps until their temporary permits expire on July 15, and Port Alfred men are still engaged on the river drives.

Logging.—Operators in all sections are complaining of incomplete river drives resulting from lack of rain and consequent low water. Causapscal estimated that about 10 per cent of the logs cut could not be floated, and Dolbeau, with almost 400 men still on the drive and another 75 to 100 engaged in pulpwood cutting, requires a further 150 bushmen. Rouyn could utilize the services of another 150 bushmen, and Ste. Agathe is calling for 500 to fill existing vacancies.

The drive in the Chicoutimi district is progressing slowly. About 1,100 men are still in the bush, and another 1,000 would be hired for forestry operations if they could be found. Val d'Or will require some 300 to 400 for woods operations, when summer work begins, and Quebec's current orders for woodcutters total almost 1,800. In the Sherbrooke area no bushmen are available to meet the heavy demand.

Sawmills.—Some of the region's sawmills have already completed their seasonal run, and others will be finishing about July 15. In most sections no difficulty is encountered in filling any remaining vacancies, but other districts are less fortunate. The mills at Campbell's Bay have been forced to close down, owing both to man-power and log shortage, and the operations in Joliette are handicapped by a scarcity of labour.

Fishing.—More than usual interest is being displayed in the fishing industry this season, owing to the prevailing good prices for the catch. Some 400 more fishermen are engaged in the operations than last year, and no lack of man-power has been reported.

Mines.—The manpower needs of the mines continue unabated. Base metal operations in the Rouyn field require some 460 workers of all sorts, while the producing gold mines are calling only for a few machine runners and helpers, in addition to a few labourers. Diamond drill crews engaged in prospecting and new development work need 185 altogether. In the Val d'Or area all the gold mines share an urgent demand, and all mines in the temporary "B" priority bracket are below their labour quota. Prospecting and diamond drilling in that district, also, are proceeding on a wide scale.

Manufacturing.—During the latter half of the month lay-offs assumed more prominence in the manufacturing industry of Quebec. In Montreal itself, the destruction by fire of two large plants released some 400 workers. These were readily absorbed in similar establishments. Other lay-offs at city plants involved a further 500, all of whom have been placed in kindred industries.

In Hull the shortage of pulpwood has caused the temporary stoppage of one paper mill machine, and the consequent lay-off of some 40 workmen. At Brownsburg, the C.I.L. plant has almost completely terminated its war production contract. The men and women released have been transferred to different parts of the province, as well as to Ontario and New Brunswick.

However, lay-offs are small compared with the over-all demand for manufacturing labour of various sorts. At Chicoutimi the aluminum company has large orders for potmen and general labourers. During the past week 128 have beeen referred by the local office and in response to regional clearance, but the outlook is still grave, although the reduction of labour turnover in the plant is encouraging. Aluminum operations at Shawinigan Falls require an additional 50 potmen, and at La Tuque they are also seriously handicapped by shortage of such workers.

The labour pool formed in Montreal from the direction of army rejects has not yet reached any appreciable size. The great majority of those reporting to the local office so far are already working in essential industry. Obtaining woodworkers for the aircraft industry in Montreal has presented a very serious problem. The situation in the children's garment industry in the city continues to cause concern, but it is hoped that an appeal for assistance to the unions will be of benefit.

The Quebec office reports comparative success in its advertising campaign for the tobacco factories, which has resulted in 50 per cent of requirements being satisfied. The campaign has been discontinued, to be replaced by a similar one for the locla arsenal, which has placed an order for 250 workers. Additional shipbuilding orders will also necessitate the absorption of new employees steadily for some weeks to come by the Quebec shipyards.

No labour relief is in view for the region's hard-pressed foundries and equally urgent are the calls of the textile and garment plants in all parts of the province. Factories at Drummondville and Magog are requesting male labour, youths of 16 years and day labourers alike, as well as married women. Richmond and Valleyfield report that production is suffering through lack of skilled operators, with little prospect of filling requirements in the near future. Sherbrooke's textile and hosiery plants are in like need. Vacancies for skilled sewing machine operators in high priority industries have in many plants to be filled by unskilled workers.

Construction.—Activity in construction has been increasing steadily throughout the past month, with the result that to-day no labour is available except the very young or the old, and many orders for carpenters remain unfilled. Private projects are absorbing the services of building tradesmen in every district. There has been little new development in the larger construction program during the month and no acute shortage of labour is reported, but workmen are needed for 100 houses to be erected in Hull by Wartime Housing, and in the Montreal area some 200 small firms require more than 500 carpenters, of whom few are available.

Ontario Region

Agriculture—As the haying season draws on, the tempo of agricultural activity is quickening. From every part of the province comes an urgent call for helpers, and there are many inquiries with reference to the temporary transfer of farm workers from the West. Owen Sound, for instance, reports that of unfilled orders, 25 have designated western farm help, and of Stratford's 100 orders more than 50 are for westerners. Goderich, with many requests for haying and harvesting, also is receiving calls for western farmers daily. At Woodstock, too, arrangements have been made with the nearby Canadian Driving and Maintenance School to provide men for evening work on farms during haying and harvesting.

The region's fruit farms present a special labour problem. With the exception of a meagre strawberry crop, all signs point to an excellent fruit season. Favourable weather conditions for the next two weeks will mean a bumper pea crop, and it is hoped that high school students will help out with the picking. In the Welland area, the cherry growers alone require at least 60 pickers, and between 500 and 800 casual workers will be needed for the peak fruit demand in July. Here again, students of the Farm Service Force will be extensively used.

Canneries—An exceptionally heavy fruit crop is increasing the Ontario canneries' demands on the labour force, and plans to meet the mounting need are being made. At Cobourg, while unskilled labour requirements have lessened during the past two weeks, extra helpers will be needed for the pea canning to start within the next 10 days. The majority of high school boys in the area are being referred to the factory, provided that they are of the necessary physique. There is adequate help for the pea pack at the Port Hope cannery, and there again most of the helpers will be high school youths.

In the Trenton area, where the largest pea crop in years is indicated, all available students are being directed to the work, and considerable assistance is also expected from the R.C.A.F. men at the local station, free to lend a hand after their regular duties. The Whitby cannery, while it has already procured a large number of part time helpers for the pea pack, and has further lightened the

work by the installation of much labour-saving equipment, is faced with a continuing heavy shortage due to acreage double that of a year ago, and there, too, as many students as possible will be used to supplement the present personnel.

Logging—Fair progress is being made in the summer logging camps, and jobbers and pulpwood companies report that cutting is making good headway. The labour situation in the Kapuskasing section is fairly satisfactory, as bushmen in considerable numbers continue to arrive from Quebec. In the vicinity of Sault Ste. Marie (where 50 river drivers are still required) another 500 pulpwood cutters could be utilized, and the Timmins office reports that camps opening for lumbering and pulpwood operations in that area could employ an additional 2,000 bushworkers. The call for drivers has materially lessened as the season advances, but Pembroke still requires a large number of experienced men, and no applicants are presently available to complete the work.

Mining—There has been no change in the serious manpower situation in the region's mines. Operations in the Sudbury section continue to be short of labour, and Timmins reports that the shortage of experienced miners is steadily increasing.

Manufacturing—While the manpower needs of the manufacturing industry mount steadily, some temporary relief for industries is in view. The annual week's vacation will at least postpone the labour problems of a number of employers. In Cornwall, three of the larger industries are closing up for the next three weeks for holidays and overhauling, and it is felt that quite a few employees on holidays without pay will help to relieve local shortages during the period. Renfrew and Prescott are planning similar holidays, and Port Hope industries also are shutting down for summer vacation and repairs. Many war industries at Woodstock are arranging for a week's holiday with pay, and the majority of Oshawa's plants are closing for the first week in July.

The engagement of collegiate and university students is also proving an important factor in Ontario's immediate manpower problems. Industries in every part of the province are taking advantage of this temporary addition to the labour force. Hamilton alone reports that to date approximately 750 high school students have been placed in industry since the close of term, and there is still an urgent call for husky youths for heavy labour. In London between 300 and 350 students have been referred, not less than 70 per cent of these to A and B priority factories. Windsor, too, has placed some hundreds, and in the Toronto office students are being accepted in priority industries at the rate of several hundred daily.

A number of lay-offs are helping in some slight degree to solve the problem of manufacturing labour shortage. At Goderich, men being laid off from No. 12 E.F.T.S. are being satisfactorily placed locally and on regional clearance ,priority orders, and little difficulty has been experienced in persuading married men to accept employment away from home. Small lay-offs have also occurred in the three abrasive plants in the Niagara Falls area, and all those released have been absorbed by local chemical works.

In spite of such alleviating factors, the region's over-all manufacturing labour demands continue to cause concern. In Toronto, the demands of essential industry for skilled and semi-skilled workers remain unsatisfied. New Toronto's call for general factory workers, both male and female, similarly continues to increase, and the immediate demand in that area is for approximately 1,400 men and 600 women.

The over-all picture in the region's foundries remains unchanged. The demand for heavy labour is insistent in all industrial centres, and in places where orders have been received to step up war production, the shortage is acute. Compulsory transfer orders and the utilization of older high school students is meeting the general need to some extent.

Immediate, and still far from satisfied, are the labour needs of the shell plants. There is a call for a large number of women for the D.I.L. plant at Ajax, and the company's Nobel plant also requires some 700 male production workers. St. Catharines munitions factories will require about 700 men and 300 women within the next two weeks, and while the greater part of the female quota should be secured locally, no men are available, and other local war industries are already short of all types of male labour.

The labour requirements of the Collingwood shipyards are for unskilled workers for the most part, but skilled tradesmen are in demand for steel and wooden shipbuilding at Midland, and with no suitable applicants in the vicinity the order has been placed in clearance.

While high school students are helping out in the textile plants of Ontario, the lack of workers persists, and in some cases, is slowing down production and retarding the completion of important war contracts. In Galt, 270 of the district's 1,100 unfilled vacancies are for the textile trades, and 200 of this number call for male workers. Brantford, with requirements

totalling 59 men and 211 women in various factories, has been using part time workers wherever available, and Stratford reports the initiation of a twilight shift from 7 to 11 p.m. at one of its local plants, utilizing the services of a number of married women, in order to fulfill its war contracts.

Construction.—There has been little new development in construction during the month. Increasing difficulty is noted in securing general construction workers for projects now under way, and there are apparently few skilled tradesmen unemployed at present.

Prairie Region

Agriculture.—Despite heavy rainfall in most sections since seeding was completed, crop conditions in the prairie region are favourable. Summer fallowing is in full swing in the central section, with a consequent increasing demand for workers, but farther west no great demand is anticipated until the harvesting season.

Haying will soon begin, and many farmers are placing orders for extra help to handle the heavy crop now in sight. Such workers will be kept on through the later harvest, and already further orders for that season are being placed in all parts of the region. From all sections come reports of unfilled vacancies, and Saskatoon in particular is suffering from a definite shortage, with a considerable turnover from smaller to larger farms needing help for the summer fallowing. Some students are being used on prairie farms, and some fruit pickers have been sent to the Okanagan for the berry harvest.

Throughout the region, farmers in a considerable number are temporarily engaged in various essential industries. In the Lethbridge area many Japanese beet workers are already being released to work in the canning factories, opening early in July. Only a light movement of workers to Ontario farms has so far taken place, but it is expected that a greater number will follow later.

Logging.—Throughout the region there is a decided shortage of all types of logging labour for year-round operations. About 100 prisoners of war have eased the situation in the Fort Frances area, but an additional 250 workers could be used, and farmers are being referred to the bush for the interval before haying begins. At Kenora many smaller operators have closed down for the season, but the larger companies are endeavouring to carry on, and the demand for bush-workers of all kinds continues. Several camps in the Thunder Bay area have not opened as a result of the decrease in supply, and some 300 bushworkers are urgently needed to maintain production at the low 1943 level.

Further west, most of the Edmonton camps are carrying on, although understaffed, but at Edson all operations have been closed down for the past two weeks on account of the excessive rains and washouts. One or two of these are now reopening.

Coal Mining.—Although suffering from considerable labour shortage, most of Alberta's coal mines are operating full time. Many orders for certificated miners remain unfilled, and directional notices are being sent out calling for the return of miners to the collieries. Drumheller mines also are in full production, with those in the East Coules again facing the greatest labour shortage. Some 200 miners are needed at Blairmore, where operators have sufficient orders on hand to guarantee steady work: at present, time is being lost through lack of rail transportation for the coal.

Base Metal Mining.—Labour requirements in the region's base metal mines continue to be heavy, with very few miners coming in to relieve the shortage. University students are accepting this work for the summer months but the real need at the moment is for underground labour. Kenora reports that many Indians have been taken on the staff of the northern mines during the past two weeks, somewhat easing the tight labour situation: several new companies have prospecting crews out in the area and diamond drill outfits are busy. The gold mines in the Red Lake and Geraldton districts are suffering from the lack of underground labour, and orders in the Port Arthur office total 227.

Manufacturing.—The demand for male labour in all branches of manufacturing far exceeds the supply, although the packing plants are well supplied as a result of the recent referrals from agriculture. Calgary plants have been taken care of so far as ordinary demands are concerned, and Edmonton is also fairly well supplied with packing plant labour, although expert knifemen can always be absorbed.

Kenora's flour mills are in improved labour circumstances through the relief afforded by student labour, but in North Battleford, where the situation eased for a time, the mills are again calling for workers and no applicants suitable for the work are obtainable. In Lethbridge the canning industry needs a large number of men and women: the demand for female workers will be met locally, for the most part, but for the male quota it will be necessary to depend upon the Japanese beet workers available for the next two months.

A gradual lay-off of staff is going on at Edmonton aircraft plants, and quite a few

of those released are being transferred to war industries in eastern Canada. Skilled workmen from Moose Jaw are proceeding to Fort William and New Westminster as they are released from local establishments, 100 workers released in Regina should be readily absorbed.

The majority of orders on file from the aircraft factory at Fort William are for experienced aircraft workers, and these are not obtainable locally. The company's labour requirements have been reduced to 200, and many are being referred both from the vicinity and from outside. Castings have arrived at the company's shell plant, and orders are on file for 150 trainees for the new shell production program. So far, the local office has been successful in supplying the requisite number of women but men are not so plentiful.

Students from local schools have furnished the Port Arthur shipbuilding yards with sufficient manpower to meet their demands for light unskilled labour, and their immediate needs stand at about 90 skilled and semi-skilled workers. Student labour is also helping out in the paper mill at Fort Frances and in many industrial plants of Saskatoon and Winnipeg, but throughout the region the lack of skilled workers and heavy labour shows no sign of abatement.

Construction.—Construction continues fairly active all over the region, and the erection of new private dwellings is underlining the demand for carpenters, bricklayers, painters, etc. The heaviest call is for construction labourers, and the failure to procure these is resulting in a general slowing up of work wherever new jobs are undertaken. Calgary records a heavy demand for building tradesmen equally for high and low priority projects. Edmonton is short some 200 men for maintenance work, and may get relief by the employment of high school students. Port Arthur's heavy labour requirement stands at 584.

Grain Elevators.—The labour needs of the grain elevators at Fort William are not so pressing as a month ago, partly due to the extra labour secured in the interval, and partly due to the fact that less grain is going through. At Port Arthur, however, despite all efforts, the manpower situation in the elevators has not improved, and 80 grain shovellers are still required.

Pacific Region

Agriculture.—The general agricultural situation is easy in spite of the fact that there are few applicants for farm work. Dairy farmers on the lower mainland still have orders on file which there is little prospect of filling, and Victoria is suffering from a similar lack of dairy helpers.

Plans for handling the province's fruit crop are going forward. This is besoins supervised by the Farm Labour Service of the region, with the assistance of women, students ,and in some cases, workers in other industries from nearby towns. Soldiers from the Sardis camp, as well as the townspeople, will help out in the Chilliwack area, while in the neighbourhood of Kelowna the labour demand is being met by high school pupils and workers from Alberta. The Cranbrook office is forming a labour pool under the Farm Labour Emergency arrangement to provide helpers in the Creston Valley area when the need arises. Fruit growers in the Vernon section are making use of all available labour for apple thinning, and high school children are being taken out by trucks in the morning and delivered back to town at night.

The Nanaimo office has completed arrangements with the Emergency Farm Labour Service for the handling of berry pickers proceeding to outside points, and Victoria is planning for its supply of fruit pickers. More students could be used to advantage, but the majority prefer to apply for work in war industries.

Logging.—The logging industry in British Columbia is the hardest hit by the labour shortage. Experienced loggers, chokermen, riggers, boommen and fallers continue to be in great demand in practically every office area, and a shutdown at Courtenay due to wet weather has only served to emphasize the lack of experienced bushmen in that district. Nelson reports that the situation is well in hand at present, with shortage in a few camps gradually being overcome by local supply, but the larger operators will be taking on more men in the near future. In the Cranbrook neighbourhood, orders for loggers and sawmill workers run between 60 and 70, principally fallers: many men are being used in a dual role, logging part time, and when sufficient logs are cut, operating the mills.

Sawmills.—The labour shortage in the sawmills appears to be almost as great as in logging itself. The use of students and women has been increased by many mills in an effort to keep in production, but the situation throughout the region is serious. New Westminster in particular is hard hit by the lack of millhands. During the past two weeks, some 200 high school boys have been placed in the local mills, and this move has afforded temporary relief, but the arrangement is not entirely satisfactory, as young boys are not always suitable to the heavy work involved. Vernon, too, reports a great shortage, and while it is possible to keep one mill on the edge of town well supplied, the district opera-

tors are operating under a considerable handicap.

On Vancouver Island the sawmills are similarly shortstaffed. Victoria notes a continuing upward trend in labour demand, with all mills working to capacity.

Coal Mining.—On the whole, the coal mines are in easier position with regard to miners at the moment. However, the Sullivan mine at Kimberley still needs at least 160 underground workers, or men capable of such duties, and hopes to relieve this shortage by employing students over 18. The Crow's Nest Pass Coal Company in the Fernie area also needs underground workers, as well as haulage and underground labourers.

Base Metal Mining.—The base metal mines show no improvement in labour position. Men of all types, both surface and underground labourers, are needed to maintain production. While the mines in the Princeton area are in better position than a couple of months ago, the local smelting company is still short of underground workers, and its endeavour to carry on development work is strictly limited by the lack of manpower.

Manufacturing.—The placing of 225 female and 795 male university students in high priority industries of the region has been of benefit to the manufacturing industry, which shares in the over-all shortage of skilled and unskilled labour of all kinds. In Vancouver foundry workers are in demand, and heavy industries in general are suffering from a dearth of highly skilled mechanics, especially machinists. The city's aircraft plants have their needs satisfactorily met for the time being, but the shipbuilding yards are in immediate need of reinforcements. One of the leading yards is pressing in its demands for carpenters and joiners, particularly for insulation and refrigeration work aboard ship. It is believed, however, that the shipwright supply has been stabilized for some time to come, and the call for electricians has been alleviated to some extent through a lay-off from a fitting-out yard within the industry. Vacancies for common labourers in the shipyards are hard to fill, and there is a persistent call for women workers in this industry as in all others.

Victoria's shipyards have slackened in their labour demand. A new departure in shipbuilding labour is the employment of women in the magazines of the R.C.N. Dockyard. The Prince Rupert shipyard reports a small net loss of labour during the period, and this will be made up by the employment of some 50 or 60 university students for the summer months.

At New Westminster the persistent shortage of skilled mechanics has been greatly relieved by the transfer of about 40 workmen from Moose Jaw to the C.P. Airlines plant, thus making local tradesmen available for other needy manufacturing establishments. The local advisory committee of New Westminster has circularized some 75 firms in all industries, asking them to use part time workers and high school boys as far as possible, thus relieving the current grave manpower situation. The mills and woodworking plants of the city have responded very well, but so far other calls for part-time workers have been very few. The woodworking plants have also extended the use of women's services, absorbing 40 during the period.

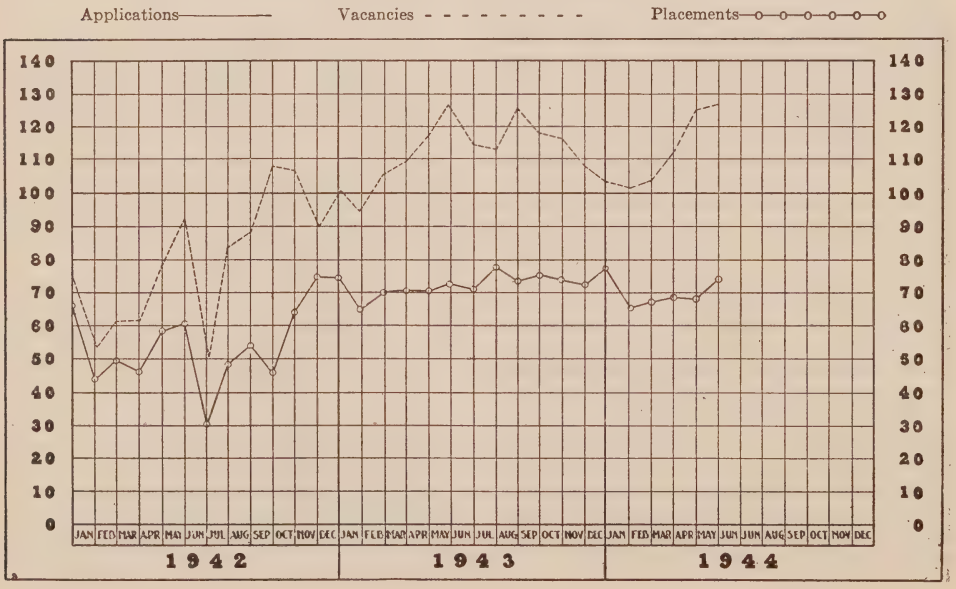
The smelter at Trail has had very slight success in lessening its unfilled vacancies during the past month. Despite the extensive employment of women, students and teachers, the plant is in need of a further 200 workers.

Construction—The province's construction program as a whole continues to consist of home building, alterations, repairs and extensions, with but a few National Defence contracts presently under way, and the completion of these delayed by the lack of finishing carpenters. At Prince Rupert one contractor is calling for carpenters and labourers for the erection of a new Y.M.C.A. and Civic Centre, and the dearth of building labour in the vicinity will make it hard to fill this demand. There is, however, a lessened need for labour on the Rupert-Terrace Highway, which should be completed within six weeks or two months.

Dominion

Transportation—Students on vacation have greatly relieved the demands of transportation on the Dominion's labour force, so far as boat crews are concerned, but there has been no alleviation of the situation in respect to the needs of the railways. Train crews are still shorthanded, but the greatest need is for track maintenance workers, who are not available in any great number.

Services—The summer holiday season has rendered even more difficult the labour problems of the services. With the opening of resort hotels from coast to coast, the demand for extra staff has been greatly accentuated. Students and teachers on vacation are being employed in many summer hostelries, but many more are needed everywhere to satisfy pressing seasonal needs. The manpower situation in restaurants and laundries shows no sign of amelioration, and the outlook is even more serious in hospitals and sanitoria, which are everywhere understaffed.



Applications for Employment; Vacancies and Placements; May, 1944

REPORTS of the Employment and Selective Service offices during the five-week period April 28 to June 1, 1944, inclusive, showed an increase in the average daily placements as compared with those of the preceding period of four weeks duration ending April 27, and a decrease in comparison with those of the four weeks April 30 to May 27, 1943, the changes being slight in both instances. With the exception of small decreases in trade and public utilities, all industrial divisions showed increases in placements over the preceding four weeks, the gains in forestry and logging, manufacturing and construction being most noteworthy. When comparison is made with the period ending May 27, a year ago, apart from a fairly substantial gain in forestry and logging and moderate increases in agriculture and trade, all industrial groups showed losses, the most pronounced being in manufacturing and construction.

The accompanying chart shows the trend of employment since January, 1942, as represented by the ratios of vacancies notified and of placements effected for each 100 applications for work registered at Employment and Selective Service offices throughout Canada. It will be seen from the graph that the curves of vacancies and placements in relation to applications followed upward courses. The ratio of vacancies to each 100 applications being 126·7 during the five weeks ending June 1, in contrast with 125·4 during the previous four weeks and 126·8 during the four weeks ending May 27, last year. The ratio of placements to each 100 applications during the period under review was 74·1 compared with 68·9 for the period March 31 to April 27, 1944, and 72·2 during the four weeks April 30 to May 27, 1943.

The average number of vacancies reported daily by employers to the Employment and Selective Service offices throughout Canada during the five weeks April 28 to June 1, 1944, was 10,407 as compared with 9,810 during the preceding four weeks and with 11,801 during the four weeks April 30 to May 27, 1943. The average number of applications for employment received daily by the offices for the period under review was 8,210 in comparison with 7,822 during the previous period and 9,304 in the four-week period a year ago. The average number of placements made daily by the offices during the five weeks ending June 1, 1944, was 6,086, of which 5,935 were in regular employment and 151 in work of one week's duration or less, as compared with a total daily average of 5,436 during the preceding four weeks. Placements during the period April 30 to May 27, 1943, averaged 6,718 daily, consisting of 6,539 placements in regular and 179 in casual employment.

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

During the period April 28 to June 1, 1944, the offices referred 239,453 persons to vacancies and effected a total of 182,572 placements. Of these, the placements in regular employment were 178,043 comprised of 118,951 males and 59,092 females, while placements in casual work totalled 4,529. The number of vacancies reported by employers was 207,858 for males and 104,342 for females, a total of 312,200, while applications for work numbered 246,306, of which 161,098 were from males and 85,208 from females. Reports for the previous four weeks, March 31 to April 27, 1944, showed 225,624 positions available, 179,911 applications made and 125,026 placements effected, while from April 30 to May 27, 1943, there were recorded 283,247 vacancies, 223,312 applications for work and 161,245 placements in regular and casual employment.

The following table gives the placements effected by the offices, each year from January, 1934, to date:—

Year	Placements		
	Regular	Casual	Totals
1934	223,564	182,527	406,091
1935	226,345	127,457	353,802
1936	217,931	113,519	331,450
1937	275,300	114,236	389,536
1938	256,134	126,161	382,295
1939	242,962	141,920	384,882
1940	320,090	155,016	475,106
1941	316,168	191,595	507,763
1942	809,983	85,638	895,621
1943	1,890,408	53,618	1,944,026
1944 (22 weeks)	685,869	21,091	706,960

Nova Scotia and Prince Edward Island

Opportunities for employment at Employment and Selective Service Offices in Nova Scotia and Prince Edward Island during the five weeks ending June 1, 1944, numbered 349 daily compared with 295 in the period ending April 27, and 542 during the four weeks ending May 27, 1943. The average number of placements effected daily was 249 during the period under review, in comparison with 213 in the preceding four weeks and 291 during the period ending May 27, last year. The reduction in the daily average of placements from the four weeks ending May 27, 1943, was greatest in construction, with moderate losses in manufacturing and services. Of the changes in all other groups, a moderate gain in public utilities operation was the most important. Placements by industrial divisions included: manufacturing 2,901; services 1,343; public utilities operation 1,180; trade 1,042; construction 668 and mining 169. There were 5,016 men and 2,306 women placed in regular employment.

New Brunswick

Orders listed at Employment Offices in New Brunswick during the period under review, called for a daily average of 324 workers, in contrast with 209 in the previous four weeks and 428 during the period ending May 27, last year. There was a daily average of 174 placements compared with 143 in the preceding period and 187 during the four weeks ending May 27, 1943. The decrease in placements from the period ending May 27, last year, was not large for the province as a whole under this comparison. The only changes of importance were declines in construction, manufacturing and services, and an increase in logging. Industrial divisions in which the majority of placements were effected were: manufacturing 1,588; services 897; trade 712; logging 676; public utilities operation 620; construction 482 and mining 166. Placements in regular employment numbered 3,732 of men and 1,403 of women.

Quebec

Positions offered through Employment Offices in the Province of Quebec during the five weeks ending June 1, 1944, averaged 3,585 daily compared with 2,761 in the preceding period and 4,069 during the four weeks ending May 27, 1943. Placements showed a higher average during the period under review, being 2,020 daily in contrast with 1,401 in the previous four weeks and 1,935 during the period ending May 27, last year. A substantial gain in placements in forestry and logging augmented by smaller advances in agriculture, public utilities operation, trade and services accounted for the increase over the period ending May 27, 1943, although a substantial loss in manufacturing and a somewhat smaller decline in construction were recorded. Placements by industries included: manufacturing 23,228; forestry and logging 11,065; services 7,549; construction 6,223; public utilities operation 5,018; trade 4,004; agriculture 1,904 and mining 1,016. Regular placements numbered 45,743 of men and 14,702 of women.

Ontario

The demand for workers on a daily average as indicated by orders listed at Employment Offices in Ontario during the period ending June 1, 1944, was 4,114, as compared with 3,919 in the previous four weeks and 4,191 during the period ending May 27, last year. The average number of placements effected daily was 2,255, in comparison with 2,117 in the preceding period and 2,652 during the four weeks ending May 27, 1943. The large reduction in the daily average of placements from

the period ending May 27, last year, was mainly due to a marked decrease in manufacturing, although fairly large losses occurred in construction and public utilities operation. Moderate declines in services, trade and agriculture were partly offset by gains in forestry and logging, and mining. Industrial divisions in which the largest number of placements were effected included: manufacturing 30,622; services 13,354; trade 6,945; public utilities operation 6,192; construction 4,620; forestry and logging 2,840; mining 1,319, finance and insurance 1,116. There were 39,905 men and 26,312 women placed in regular employment.

Manitoba

Employment opportunities as indicated by orders received at Offices in Manitoba during the five weeks under review, showed a daily average of 433, compared with 431 in the preceding period and 568 during the four weeks ending May 27, 1943. The average number of placements reported daily was 289, in contrast with 263 during the four weeks ending April 27, and 392 in the period ending May 27, last year. All industrial divisions recorded declines in placements when compared with the four weeks ending May 27, 1943, the largest decreases being in services, manufacturing, public utilities operation, construction and trade. Placements by industrial groups included: manufacturing 2,873; services 2,324; trade 1,471; public utilities operation 1,034 and construction 498. Placements in regular employment numbered 4,234 of men and 3,366 of women.

Saskatchewan

Orders received at Employment Offices in Saskatchewan during the period ending June 1, 1944, called for an average of 217 workers daily, compared with 289 in the previous four weeks and 310 during the period ending May 27, last year. Placements showed decreases under both comparisons, the daily average being 159 during the period under review, as compared with 161 in the preceding four weeks and 196 during the period ending May 27, 1943. With the exception of a slight gain in manufacturing, all industrial divisions reported declines in the daily average of placements from the four weeks ending May 27, last year. The most important were moderate decreases in services, construction and trade. Industrial groups in which most of the placements were effected were: services 1,620; manufacturing 976; trade 858; public utilities operation 623; construction 306 and agriculture 256. Regular placements numbered 2,468 of men, 1,849 of women.

Alberta

There was a decrease in the average number of positions available daily at Employment Offices in Alberta during the five weeks ending June 1, 1944, there being 452, in comparison with 498 in the preceding period and 514 during the four weeks ending May 27, 1943. There was a daily average of 293 placements compared with 290 in the previous four weeks and 326 during the period ending May 27, last year. Moderate losses in public utilties operation, services, agriculture, manufacturing, and trade accounted for the decrease in placements from the four weeks ending May 27, 1943. Improvement of moderate proportions was noted in mining and construction, while the changes in all other groups were unimportant. Placements by industrial groups numbered: services 2,385; manufacturing 1,599; construction 1,392; trade 1,351; public utilities operation 1,034; mining 591 and agriculture 269. There were 5,147 men and 3,162 women placed in regular employment.

British Columbia

During the period ending June 1, 1944, the daily average of positions offered through Employment Offices in British Columbia was 933, compared with 999 in the previous four weeks and 1,180 during the period ending May 27, last year. The average number of placements registered daily was 646 during the five weeks under review, in comparison with 622 in the preceding period and 738 during the four weeks ending May 27, 1943. A fairly large decrease in manufacturing and a smaller loss in construction accounted for the reduction in the daily average of placements when compared with the period ending May 27, last year. A decline in mining and increases in trade, services and public utilities operation were the most important changes of all other groups. Industries in which employment was found for more than 500 workers included: manufacturing 5,750; services 4,184; trade 2,318; forestry and logging 2,240; construction 2,001 and public utilities operation 1,984. Placements in regular employment numbered 12,706 of men and 5,992 of women.

Annual Review of Employment in Canada, 1943

IN its annual review of employment in Canada, 1943, the Dominion Bureau of Statistics reports that the expansion in industrial employment during 1943 was generally on a limited scale in comparison with that reported in the earlier years of the war. It is pointed out that this development was to be expected in view of the tremendous expansion, not only in the field of production but also in the strength of the armed forces.

In spite of the severe drains upon the reserves of manpower in the fourth year of war, industrial activity, on the whole, reached a new all-time maximum in the Dominion during 1943. There was an increase of six per cent, as compared with the preceding year, in the index of employment and 12·9 per cent in the index of payrolls. The number in recorded employment rose between 1939 and 1943 by well over 700,000 workers, or 61·6 per cent, but of the number added to the working forces, some 600,000 were absorbed into industry in the years 1940, 1941 and 1942.

The continued slackening in the rate of gain, it is stated, resulted from increasingly acute shortages of labour and materials, affecting particularly the production of commodities for civilian consumption. In the field of war production, the situation was also influenced to some degree by such shortages, but to a greater extent it responded to changes in production requirements in a program closely associated with those of the United Kingdom and the United States, as well as upon developments in the actual theatres of war.

Another indication of the increasingly difficult labour situation resulting from wartime demands on available manpower lay in the fact that in 1943, the increase shown in the 12 months' comparison took place very largely among women workers. The approaching depletion of the reservoir of male wage-earners was shown by the virtual stabilization of the number of men in recorded employment at October 1, 1943, as compared with the same date in 1942.

Although the monthly surveys of employment upon which the annual review is based are limited in the main to establishments having 15 employees and over, "they cover extremely large proportions of the wage-earners engaged in most industries, the more important exceptions being agriculture and domestic and professional services; the latter include governmental and education workers . . . However, in general the shortage of men workers was equally felt among the industries of whose employment there is no current record, as it was among those furnishing monthly data". It may thus be assumed that the first four years of the war served practically to exhaust the Dominion's supply of adult males, who were absorbed in varying proportions by the armed forces and industrial employment. The growing labour stringency in 1943 had accordingly to be met by the diversion of workers from non-essential to essential industries, by the entry of large numbers of women and older persons and of adolescents into gainful employment and, finally, by the employment of large numbers of part-time workers in establishments where they could be utilized.

In compiling its annual review of employment for 1943, the Dominion Bureau of Statistics tabulated a total of 165,072 returns on employment in the eight leading industries, namely; manufacturing, logging, mining, transportation, communications, construction, services and trade. In 1942, the 13,081 employers whose statistics were received reported a monthly average of 1,738,848, varying from 1,651,067 at March 1, to 1,867,597 at December 1. Based on the 1926 average as 100, the latest annual index was 184·1, exceeding by six per cent the previous maximum of 173·7 in 1942.

Payrolls

Several important factors combined during 1943 to produce a relatively greater advance in the payrolls than in the personnel. The weekly salaries and wages distributed in the eight leading industries already enumerated, in one week in each month averaged $56,903,978, or a total for the year of approximately $2,959,006,850 by the larger employers in the eight leading industries. The amounts reported represented an average earned income of $30.78 per week for the typical individual in recorded employment, as compared with $28.56 in 1942, and $26.17 in the seven months of 1941 for which data are available.

In addition to the returns from the eight leading industries, information was furnished by 754 financial institutions and their branches with staffs averaging 63,892 per month. The payrolls of these institutions averaged $1,994,764, a mean of $31.19 per employee per week in 1943, as compared with $30.20 in 1942.

By including these figures with those of the eight leading industries, the total labour force of whose employment there is current record was 1,912,426 as compared with the 1942 average of 1,802,320. The gross weekly payrolls in 1943 averaged $58,898,742, or an annual aggregate of approximately $3,062,734,600 disbursed in salaries and wages by the co-operating establishments. The average per employee

in the nine groups—in 1943 was $30.79, and in 1942, $28.61 per week. The latest annual index of aggregate payrolls was 12·7 per cent higher than in 1942, while the per capita earnings rose on the average by $2.18 per week, or 7·6 per cent in the 12 months. These gains are noteworthy, especially in view of the degree of labour dilution necessitated by war conditions. The factors contributing to the gains were, in the main: (1) The growing concentration of workers in the heavy manufacturing industries where rates of pay were above the average and, in addition, a good deal of overtime work; (2) the payment of cost-of-living allowances to the majority of workers, prior to the absorption of the allowances in the basic wage rates in February, 1944; (3) The progressive upgrading of employees as they gained experience; (4) the payment of higher wage rates in a number of cases.

Employment in Provinces

In the Maritime area, particularly in Nova Scotia, the weekly earnings of the typical individual in recorded employment generally showed a greater increase in 1943, as compared with 1942, than was reported in any other province except British Columbia. Nevertheless, the average continued below the Dominion figure, because of loss of time resulting from industrial disputes. The fact that many of the industries reporting are situated in comparatively small centres may also have been a contributing factor.

The manufacturing industries in Quebec were very active during 1943. The most noteworthy gains were in iron and steel plants. Employment in the pulp and paper and textile industries, on the other hand was quieter and no general change occurred in lumber. Among the non-manufacturing industries, logging, communications, and construction showed reduced activity, but transportation, mining, services and trade afforded greater employment.

Employment in manufacturing in Ontario was 5·6 per cent higher than in 1942. On the whole comparatively little change in the situation was shown from month to month during 1943, employment at its maximum on December 1, being only 2·5 per cent higher than at its low point on May 1.

Industrial activity in the Prairie area was generally at a high level in 1943. Considerably greater activity was shown in manufacturing. Employment in animal food, iron and steel and certain other manufacturing establishments showed improvement, but lumber, pulp and paper and textiles were quieter. Some curtailment was reported among such non-manufacturing industries, as logging, mining and construction, but transportation, communications and services provided more employment than in 1942.

Particularly large advances were made in manufacturing in British Columbia. Shipyards were especially active, raising the index in the iron and steel group from 725·4 in 1942 to 1057·9 in 1943. Textiles and certain other branches of manufacturing showed moderate gains in 1943, but over the year there was a decline in pulp and paper and lumber mills. Of the non-manufacturing industries, logging, communications, transportation, construction and maintenance and services showed improvement in 1943, while mining and trade were not quite so active. A feature of the year in logging in parts of British Columbia was the payment of a special bonus to men completing specified periods of service with the same employers. This and other factors resulted in much higher rates of earnings in the industry in that province than in any of the other provinces.

Employment in Eight Largest Cities

As in former years the Bureau of Statistics segregated the data obtained from the eight Canadian cities having a population in excess of 100,000. The index numbers of employment in these cities indicate that in general the fluctuations over a period of years, were more marked than those for the remainder of the country. The effect of the war was at first to reduce the disparity in the index of employment for the larger cities and that for the remaining centres. Thus, in 1941 the difference was six points in favour of the latter, but in 1942, the situation was reversed, the cities' index being seven points higher. By 1943, the cities' index at 196·0 was 20·8 points above that for other portions of the Dominion. The explanation is to be found in the unprecedentedly high level of activity in manufacturing in the larger industrial centres, despite efforts to disperse war industries. The concentration of female wage earners in the eight largest cities is particularly marked. Of the total number of women in recorded employment at October 1, 1943, 60 per cent were employed in the eight largest cities. Approximately 41 per cent of the total males were employed in the larger cities at the same date. The weekly earnings of the persons in recorded employment in the centres of 100,000 population and over averaged $31.38 in 1943, exceeding the 1942 average by $2.11. The per capita figure for Canada as a whole was $30.78, which was $2.22 higher than the average in 1942. Firms in the eight leading cities

reported 45·9 per cent of the Dominion total of employees and disbursed 46·8 per cent of the aggregate weekly payroll.

Sex Distribution of Persons in Recorded Employment at October 1, 1943

Of the total of 1,950,131 persons on the staffs of the firms reporting in the nine leading industrial groups at October 1, 1943, 1,439,416 were men and boys and 510,715 were women or girls. The latter number constituted 262 per thousand workers of both sexes, a ratio which considerably exceeded that of 235 as at October 1, 1942. The expansion in employment reported over the twelve months was almost entirely among women workers, whose numbers increased by about 15 per cent, whereas the males declined very slightly. The general gain in recorded employment in the year amounted to just under 3·5 per cent.

Over the 12 months, further large numbers of men were withdrawn from industry to serve in the armed forces and the reserve of women was also affected to some extent by enlistments. The number of men in recorded employment, remained virtually stationary, notwithstanding the demands of the armed forces. This may be attributed to the following factors: (1) The transfer from the less essential to the more essential industries; (2) the continued movement from small employer classes to employment in industry; (3) the substitution of increasingly large numbers of boys of pre-enlistment ages, and to a lesser extent, of older and physically handicapped men; (4) the absorption in industry of men discharged from the armed forces.

Of the 510,715 women in recorded employment in the nine leading industrial divisions at October 1, 1943, 337,251, or 66 per cent, were engaged in manufacturing, including electric light and power. The proportion at October 1, 1942 was 66·4 per cent. The next largest groups of female employees were those of 80,238 in trade; 32,958 in finance; and 25,819 in services. The females engaged in plants turning out heavy manufactured goods constituted 25·6 per cent of the total number of women workers at October 1, 1943 as compared with 20·9 per cent in 1942. On the other hand, the proportion reported by manufacturers of light goods declined from 45 per cent to a little more than 40 per cent.

The highest proportions of female workers were in Ontario and Manitoba. During the year, the ratio in the former had risen from 267 per thousand employees to 302 and in the latter from 212 per thousand to 269. On the other hand, the number of male employees in Ontario fell by 3·3 per cent and that in Manitoba by 4·9 per cent in the year. In British Columbia there was an impressive increase of 34·5 per cent in the number of women in recorded employment and male workers gained by 2·6 per cent. The Maritime and Prairie provinces also showed important advances in the employment of females.

Slightly more than three-fifths of all females reported in manufacturing in the Dominion at October 1, 1943, were employed in the eight leading cities, where the male employees constituted over one-half of the total in manufacturing. Firms in Toronto indicated the employment of a larger number and a higher proportion of female workers than any other city; 107,903 or rather more than 21 per cent of the total employed by the employers reporting throughout the Dominion were in the Toronto metropolitan area. Montreal took second place with slightly less than 20 per cent. The lowest ratios were in Windsor, Vancouver and Hamilton, in all of which, however, the proportions were considerably higher than at October 1, 1942.

Labour Law

Labour Legislation in Ontario and Saskatchewan in 1944

Ontario

DURING the Ontario Legislative session which opened on February 22 and closed on April 5, statutes were enacted to authorize the application of the Dominion Wartime Labour Relations Regulations to employer-employee relations which are ordinarily within provincial jurisdiction, to repeal the Collective Bargaining Act, 1943, and to continue in effect certain provisions of that Act protecting trade unions from Court actions in certain cases. Other measures provide for an eight-hour day and holidays wth pay in industrial undertakings, enable municipalities to establish health services, set up a Department of Planning and Development and amend laws relating to factories, shops, and office buildings, apprenticeship, workmen's compensation and hours of labour of municipal fire departments.

Collective Bargaining

The Labour Relations Board Act, 1944, which came into force on proclamation April 12, 1944, enables the Lieutenant-Governor in Council to provide for the application to employer-employee relations within the exclusive legislative jurisdiction of the Province, of the Dominion Wartime Labour Relations Regulations (P.C. 1003, Feb. 17, 1944), the Dominion regulations providing for Industrial Disputes Inquiry Commissions (P.C. 4020, June 6, 1941, as amended), any amendment to these regulations and any other regulations made by the Dominion under the War Measures Act (Canada). Regulations or amendments made applicable in Ontario under the above provisions are to continue in force notwithstanding their termination under the War Measures Act, subject only to any Order of the Lieutenant-Governor in Council. With the approval of the Lieutenant-Governor in Council, the Ontario Minister of Labour may enter into an agreement with the Dominion Minister of Labour for the purposes of the Act and for the administration in the Province of the Wartime Labour Relations Regulations.

The Labour Relations Board Act does not apply to farming, domestic service, the members of any police force, nor to any municipal corporation, school board, or board or commission created by a municipal corporation under statutory authority unless such corporation, board or commission has declared the Act to apply.

Provision is made for the establishment of an Ontario Labour Relations Board, consisting of a chairman and not more than six other members, who are to be appointed by the Lieutenant-Governor in Council on the recommendation of the Minister of Labour and to hold office during pleasure. The Board's powers and duties are to be those vested in or imposed on it by this or any other Act of the Legislature, by the War Measures Act (Canada), or by any regulation or agreement under any of these Acts. The Board is to have its head office in Toronto, but may sit at any place it considers expedient. A majority of the members is to constitute a quorum. A decision of a majority of the members present and constituting a quorum is to be the decison of the Board, and in the event of a tie the Chairman has a casting vote. The Board or any member of it is to have the powers of a Commissioner under the Inquiries Act, and may receive evidence and information on oath, affidavit or otherwise, whether admissible as evidence in a court of law or not. Subject to the approval of the Lieutenant-Governor in Council, the Board may make rules to govern its procedure provided they are not inconsistent with the Wartime Labour Relations Regulations or rules made under them.

Regulations may be made by the Lieutenant-Governor in Council vesting further powers in, and imposing further duties on, the Board or the Minister for the carrying out of the Act; or providing that, for purposes of administration, the term "Minister" when used in the regulations or amendments shall mean Minister of Labour for Canada or Minister of Labour for Ontario, as the Lieutenant-Governor in Council may consider advisable; or giving right of appeal from the Ontario Labour Relations Board to the Wartime Labour Relations Board and prescribing procedure upon appeals; and generally, for carrying out the provisions of the Act.

Subject to the right of appeal to the Wartime Labour Relations Board as may be provided by the Regulations, the decisions of the Ontario Board are final.

The Collective Bargaining Act, 1943, is repealed but any collective bargaining agency certified under that Act is to be deemed to have been certified under the Labour Relations Regulations as from the date of such certification as far as it is within the competence of the Legislature to prescribe with reference to an Act of the Parliament of Canada or Regulations made under it. The 1943 amendment in the Judicature Act setting up the Labour Court is also repealed but, for the purpose of continuing any proceedings pending in the Labour Court on March 20, 1944, this measure and the Collective Bargaining Act are to continue in effect. All records belonging to or in possession of the Labour Court are to be transferred to the Ontario Labour Relations Board.

The Act authorizes the Lieutenant-Governor in Council, by Proclamation, to suspend the operation of the Ontario Act enabling the application in Ontario of the Dominion Industrial Disputes Investigation Act. The latter Act, however, was suspended by the Dominion Wartime Labour Relations Regulations.

Trade Unions

The Rights of Labour Act, which came into effect on Proclamation April 12, 1944, preserves certain provisions of the repealed Collective Bargaining Act. The new Act defines a "trade union" as

> "a combination, whether temporary or permanent, having among its objects the regulating of relations between employers and employees, between employers and employers or between employees and employees",

and declares that a trade union and its acts shall not be deemed unlawful by reason only that one or more of its objects are in restraint of trade. Further, an act done by two or more members of a trade union, if done in contemplation or furtherance of a trade dispute, is declared not to be actionable unless such act would be actionable if done without agreement or combination. Trade unions are thus freed from the disabilities of an association in restraint of trade and, where there is a labour dispute, from the civil law of conspiracy. The Act also stipulates that a trade union may not be made a party to an action in any Court nor a collective agreement be made the subject of such an action unless this could be done irrespective of the provisions of the Act or of the Labour Relations Board Act. The provisions of the Reinstatement in Civil Employment Act, 1942 (Canada), are to have effect in Ontario notwithstanding the termination of the war or the repeal of the Act by the Parliament of Canada.

Hours of Work and Holidays with Pay

The Hours of Work and Vacations with Pay Act, 1944, applies to every "industrial undertaking", which is defined to include every establishment and undertaking and all work in or about any industry and also any establishment, undertaking or work in or about any business, trade or occupation which may be prescribed by the Regulations. Maximum working hours for employees in industrial undertakings are to be eight per day and 48 per week and employees must be given a holiday of at least one week with pay in every year. The maximum hours provision does not apply to a person holding a position of supervision or management or employed in a confidential capacity, so long as his duties are confined to work of that nature. Any dispute as to the character of the work is to be decided by the Industry and Labour Board.

The Board may authorize longer daily or weekly hours than those fixed by the Act or regulations if such hours are agreed upon in writing by the organizations or representatives of the employers and employees concerned and are approved by the Board. In the case of war industries the Board may suspend, for any undertaking or branch or class of workpeople, the maximum hours provisions and regulations, where it is not feasible to apply them, on such conditions as the Board considers advisable and for as long as the undertaking continues to be a war industry. The limit of hours may also be exceeded in case of accident or urgent work or force majeure, but only so far as may be necessary to avoid serious interference with the ordinary working of the undertaking.

The Board is authorized to investigate any alleged partnership, association or scheme which it considers is being used to defeat the purpose of the Act and to make any Order it deems proper declaring any person or class or group of persons to be employers or employees for the purposes of the Act.

Employers must produce records relating to hours of work of their employees on demand of the Board or of any person having its written authority. The Board may by written notice require any employer to provide for the correct recording of working hours, with respect to starting and stopping time and rest intervals, by means of time-clocks or in such other manner as the Board directs.

The Board or a Board member or any person authorized in writing by the Chairman may inspect all books, payrolls and records of any employer which in any way relate to hours of work, may take extracts from them and require the employer to furnish a statement verified by statutory declaration. Workers may also be required to furnish the Board with records and documents and to give evidence on oath or otherwise.

The Board, with the approval of the Lieutenant-Governor in Council, may make regulations: (1) declaring any establishment or undertaking in or about any business, trade or occupation to be an industrial undertaking for purposes of the Act; (2) prescribing the undertakings or branches of undertakings in which the hours fixed by the Act may be exceeded either by specified times or under specified conditions or generally, prescribing in each case the maximum and imposing conditions; (3) for the purpose of requiring holidays with pay, prescribing the working year in any industry in terms of weeks, days, or hours, with reasonable allowance for overtime work, seasonal employment, or other special conditions and, where the working year is less than eight months of work at normal hours, providing for a holiday of proportionate length; (4) making provision for holidays in cases of absence from work owing to illness or other unavoidable cause and making such other regulations concerning holidays as may be considered necessary; (5) requiring employers to notify employees of the provisions of the Act and regulations, particulars of hours of work, including hours of beginning and ending work, hours at which shifts change, rest periods and such other information as may be required; and (6) prescribing the records to be kept and returns to be made by employers.

An employer who employs any person or permits an employee to work contrary to the Act or regulations is liable to a penalty of not less than $25 and not more than $5 for each employee for each day of such contravention. An employer failing to comply with any provision of the Act or regulations or any order of the Board, for the violation of which no other penalty is provided, is liable to a fine of from $25 to $100. An employee failing to comply with the Act or any regulation or order is liable to a fine ranging from $10 to $25.

Where there is conflict between the provisions of the Act or regulations and the provisions of any other Ontario Act or regulations, the provision fixing shorter working hours is to prevail, and where there is any doubt or dispute the Board is to decide the matter.

The Act was to come into force on July 1, 1944, but, on application, made either before or after that date, by an employer or employers or by any representative group of employees engaged in any industrial undertaking or branch of such undertaking, the Board, in order to provide an opportunity for making an application under other provisions of the Act, was given power to exempt such undertaking or branch or any group or class of employees upon such terms as it may prescribe. No such order, however, was to continue in force after December 31, 1944.

The Ontario Minister of Labour has announced that the maximum hours provision of the Act will not be applied to war industries at the present time. "War industries" includes agriculture, horticulture, fishing and production of foods and farm products, dairy industries, building and upkeep of roads, construction, transport, textiles and other industries essential to the war effort.

Factories

A number of amendments were made in the Factory, Shop and Office Building Act. The definition of "factory" was extended to include places where goods are stored, cleaned and washed and also plants which are used for the maintenance of aircraft, locomotives and other transport vehicles. The term "shop" now covers bowling-alleys, pool-rooms and billiard-parlours. Shops where no baking is done were excluded from the definition of "bakeshop".

A new clause defining "bodily injury" to include injury to health was added to the Act and the section which required notice to be sent to the Chief Inspector of any absence from work exceeding six days due to bodily injury from fire or accident was extended to include absence caused by industrial disease. This section was also made applicable to any absence exceeding six days whether or not such days were consecutive or were the days next after the injury was sustained.

The section of the Act requiring the approval of plans for the erection or alteration of buildings was revised to require such plans to be submitted to the Chief Inspector and to take the form of drawings and specifications sufficient to give full information as to the extent and character of the work. For violation of this provision a fine of from $20 to $200 may be imposed and in default of payment a prison term of not more than 12 months. Specific power is given to the Lieutenant-Governor in Council to make regulations prescribing the nature of the drawings and specifications to be submitted, the fees payable on their approval and for the protection of the health, safety and welfare of persons employed

in a factory, shop, bakeshop, restaurant or office building.

The provisions relating to places where employees may take their meals are now applicable to all employees instead of applying only to youths, young girls and women. The inspector may prohibit any person taking meals in a room where a manufacturing process is being carried on. Where 35 or more females are employed or if the inspector gives a written order, the employer must provide and equip a satisfactory lunch-room for the employees, free of cost to them. No person may take food into a room where paint, varnish, dye, white lead, arsenic or other poisonous substance is exposed or where deleterious fumes, dust or gases are present. In a factory, shop, bakeshop, restaurant, or office where ten or more females are employed, the employer must now provide, to the satisfaction of the inspector, a rest room or other space affording reasonable privacy with one or more couches or cots, and chairs. The section requiring a matron to be placed in charge of dressing and eating-rooms in a factory or shop where 35 or more females are employed was changed to apply also to bakeshops, restaurants and office buildings employing that number and also to any such establishments where the inspector considers it necessary regardless of the number employed, the matron to have charge of the general welfare of female employees. As formerly, the inspector may grant written exemption from any of these provisions.

The section requiring the owner of buildings used as a factory, shop, bakeshop, restaurant or office building to provide toilets with separate approaches and sufficient in number for each sex was revised to accord with modern conditions. Where there is no municipal water supply, sanitary privies, chemical or other types of closets satisfactory to the inspector must be provided. Separate wash-rooms for male and female employees must now be provided, equipped with hot and cold water and wash basins in the ratio of one for every 15 employees.

The requirements as to cleanliness, heating, ventilation, etc., were made applicable to bakeshops and new provisions added. Accumulations of dirt and refuse must be removed at least daily, and windows and sky-lights kept clean and free from obstruction. The employer must provide suitable accommodation for clothing not worn during working hours and for work-clothes which must be dried or cleaned or kept separate from street clothes on account of poisonous, infectious or irritating materials. The section requiring shower baths to be installed in foundries was replaced by a provision that in every foundry and other factory where the inspector considers that the health of employees may be injured by poisonous, irritating or infectious material or gases or by extremes of temperature or humidity, the employer must provide such shower baths and additional wash basins as the inspector deems necessary.

The Lieutenant-Governor in Council may make regulations requiring employers in factories, shops, bakeshops, restaurants and offices to provide a suitable room with adequate supplies for rendering first-aid and for the supervision of the general health of employees during working hours.

Girls and women in a factory are now required to wear a close-fitting cap or other suitable head gear during working hours.

Other new safety provisions forbid the employer to allow such young persons or women to work at any machine without having first received adequate instruction upon its operation and any dangers connected with it, or without adequate supervision by a person having thorough knowledge of, and experience with, the machine. Where there is a contravention of this section the employer is liable to a penalty of from $50 to $500.

New sections forbid any person under the influence of, or having in his possession, any intoxicating liquor to enter or be in any factory, and provide for protection against dangerous fumes and dusts. Under the latter provision no person may be allowed to enter a tank, chamber, pit, pipe, flue or other confined space in which dangerous fumes, dusts or extreme temperatures are liable to be present in any factory unless such place has a manhole or other means of easy egress and has been thoroughly ventilated and tested and unless such person is wearing suitable breathing apparatus and a belt to which there is securely attached a rope with the free end held by a person outside the space. When considered necessary by the inspector, there must be conveniently available suitable reviving apparatus and a person trained in its operation. The belt, rope and other apparatus used for this purpose must be periodically inspected by the employer and kept in good working order.

The section requiring means of fire-prevention and protection in factories, shops, restaurants and office buildings was revised and extended to cover bakeshops. Such lighting and legible signs to facilitate egress as the chief inspector may direct must be installed. An amendment was made in the section requiring that in establishments employing 15 or more persons the main doors used by employees must open automatically and that such doors and those leading to tower-stair-

ways or fire-escapes must not be obstructed, barred or locked during the usual working hours. This section now requires that in such establishments all doors used by employees must open automatically and no door leading outside or to any passageway, tower-stairway or fire-escape shall be obstructed, barred or locked when employees are in the building. Power is given the inspector to extend these provisions to any establishment if he considers the business carried on to be dangerous to the employees.

An amendment in Part II of the Act, which enables municipalities to pass by-laws for early closing of shops, extends the definition of "shop" to include shoe-shine shops and hat-cleaning businesses.

Apprenticeship

The Apprenticeship Act was amended to enable employees to petition to have a trade designated under the Act. Previously, such petitions might only be presented by employers. The number of signatories must be twenty-five. A new section permits the Industry and Labour Board, with the approval of the Lieutenant-Governor in Council, to make regulations prohibiting employment in a designated trade of persons other than registered apprentices and holders of certificates of qualification. No such regulation is to affect any person who, within two years of the date when the regulation comes into force, satisfies the Provincial Advisory Committee that at that date he had been employed in the trade for a period equal to the apprenticeship period.

Workmen's Compensation

A number of changes were made in the Workmen's Compensation Act. The provisions of Part I of the Act were made applicable to the Crown in right of the Province, to permanent provincial boards and commissions and, also, to municipal corporations, public utilities and other municipal commissions, trustees of police villages, and to school boards other than rural boards. Previously, the Crown was not expressly included and the Act applied only to such part of the business of municipal corporations and school boards as would be covered by the Act if it were the business of a private company. Any farming industry may now be brought within Part I on application of the employer. It is made clear that the Board may exclude any particular occupation or employment from an industry which is under or is brought under Part I without excluding the whole industry.

Where a workman or his dependent brings an action against some person other than the employer and providing the workman or dependant is entitled to compensation under the Act, an amendment stipulates that if an action is brought and it is found that the employer or any employer within the Act or any workman of such an employer, is at fault, no damages or contribution may be recovered for the portion of the damage caused by such fault or negligence. The Court is to determine the portion of the damage so caused although the person at fault is not a party to the action. Thus, employers who pay assessment or who, individually, pay compensation under the Act are protected against liability in third party actions. A further change makes it clear that the provisions of the Act are in lieu of all rights of action against an employer for industrial diseases as well as for accidents.

The Board is now empowered to supply, in respect of an accident happening on and after April 6, 1944, such services and attendance as may be necessary in cases where the workman is rendered helpless by permanent total disability.

The Board is authorized to invest its funds in securities issued or guaranteed by the Dominion Government, as well as in those issued or guaranteed by the Province of Ontario.

A reduction from five years to two years was made in the period of exposure to silica dust necessary to enable a workman to claim compensation for silicosis and the provision requiring a workman to establish his claim to compensation for silicosis within five years of leaving his employment was repealed. These two amendments apply only to cases arising on and after April 6, 1944.

The provision, added in 1943, permitting the Board to continue compensation payments in order to furnish better education to a child "approaching the age of 16 years . . . but in no case beyond the age of 18 years" was amended to make clear that it applies to children between the ages of 16 and 18 years. This amendment applies to all cases without regard to the date of the accident.

A private member's Bill which failed to pass would have made the increased rates of compensation provided under the 1943 amendment to the Act apply to all accidents without regard to date. The Bill would also have abolished the time-limit of five years for making claims for compensation for silicosis, which was done under the amending Act noted above, and repealed the section requiring five years' exposure to silica dust in such cases, which period was reduced to two years under the amending Act.

Fire Departments—Hours of Labour

The Fire-Departments Act which formerly applied only to cities and towns with a population of 10,000 or more was extended to other types of municipalities in the same population class. The term "permanent fire-department" was defined as any fire-department established by a municipality under the Municipal Act where the officers and employees, or any of them, are regularly employed by the municipality on a full-time salaried basis. A person who voluntarily acts as fireman for a nominal consideration or honorarium is not to be deemed to be an employee of a permanent fire-department. An amendment in the section under which two platoons alternate every seventh day between 10 hours' day duty and 14 hours' night duty makes it clear that each daily period of duty must be followed immediately by consecutive hours off duty, 14 or 10 as the case may be.

Safety of Window Cleaners

A provision was added to the Municipal Act to enable the councils of urban municipalities to pass by-laws requiring the installation and maintenance of safety devices for window-cleaners, providing for inspection of such devices, and prohibiting any person cleaning the outside windows of buildings on which such devices are installed unless the devices are used.

Post-War Reconstruction

An amendment was made in the provision added to the Municipal Act in 1943 to enable municipal councils, with the approval of the Department of Municipal Affairs, to provide in their estimates each year during the war for the establishment of a reserve fund for use after the war in necessary replacements of, or improvements in, public works. This provision is now extended to enable all local boards as well as municipalities to establish such funds, but where the approval of the council is required by law for a capital expenditure or the issue of debentures of a local board, such approval must be obtained for the provision of the reserve fund.

The Vocational Education Act and the High Schools Act were amended to enable the Advisory Committee or school board, as the case may be, to set up a fund for future capital expenditures.

The Department of Planning and Development Act provides for the establishment of such a Department to collaborate with other Departments of the public service of Ontario and of the Dominion and the other Provinces and with municipal councils, agricultural, industrial, labour, and other associations, and with public and private enterprise, with a view to making plans to create, assist and maintain productive employment and develop the human and material resources of the Province.

Old Age Pensions

A further change in the Municipal Act repeals the provision requiring a petition signed by 75 per cent of municipal employees or any class of them before a pension scheme is established. Such a scheme may be set up either by agreement with the Dominion under the Government Annuities Act (Canada) or with an insurer licensed under the Insurance Act or with both. The definition of "employee" was extended to cover any person designated as an employee by the Department of Municipal Affairs, including part-time employees. As before, persons covered by the Teachers' and Inspectors' Superannuation Act and the Power Commission Insurance Act are excluded. The repeal or amendment of a pension by-law, as well as its enactment, must now be approved by the Department. Initial payments or contributions made by a municipality to a pension fund are not to be deemed to be current expenditures.

An amendment in the Old Age Pensions Act, which is retrospective to April 1, 1942, enables the Lieutenant-Governor in Council to provide for a cost-of-living bonus and for the whole or part of the cost of medical services to persons in receipt of old age or blind persons' pensions. A further change, retrospective to November 1, 1943, enables agreements relating to old age pensions to be made by the Government of the Province with the Government of the Dominion under any Dominion Act, thus validating an agreement of that date under the War Measures Act.

School Attendance

Under the Adolescent School Attendance Act the penalty for any person who employs an adolescent contrary to the Act or who, being a parent or guardian, conduces to or connives at the failure of an adolescent to comply with the Act now ranges from $1 to $20 instead of, as formerly, $5 for a first offence and $25 for a subsequent offence. The School Attendance Act was amended to fix the same penalty for a parent or guardian neglecting or refusing to cause a child to attend school. The minimum penalty in this case was formerly $5.

Municipal Health Services

The Municipal Health Services Act enables municipalities or groups of municipalities to

enter into an agreement for establishment, by by-law, of a plan for health services. No agreement may be made or by-law introduced, however, until the plan is approved by the Lieutenant-Governor in Council. By-laws must be approved by a majority vote of the qualified electors.

The Lieutenant-Governor in Council may appoint an Ontario Municipal Health Services Board of from seven to ten members which, subject to the approval of the Lieutenant-Governor in Council, may make agreements with municipalities adopting health services plans and with medical, hospital or other associations for the provision of such services, and may perform other duties to be defined in the Regulations issued under the Act.

A plan is to be financed by a property tax or by a personal tax on residents 17 years of age and over, or by both, the money thus raised being paid by the municipality to the Board. The Lieutenant-Governor in Council may provide for annual or other contributions to any municipality where a plan has been put in force.

The assessor of the municipality may require employers to furnish lists of employees and the dates upon which they are paid and the municipal treasurer may require any employer, whether his business is within the municipality or not, to deduct from the salary or wages of his employees and pay to the municipality the amounts payable under a health services plan. If the employer fails to make such deduction, he is personally liable for the amount.

Plans and by-laws under the Act may be altered or terminated only with the like vote or approval as is required for putting it in force. The Lieutenant-Governor in Council may, however, terminate any plan. A plan must be voted on at the end of three years to determine whether it is to be continued in force.

The Minister, with the approval of the Lieutenant-Governor in Council, may make regulations defining "municipal health services" and prescribing the type of service and the maximum services to be provided under any plan; governing the amount and conditions of payment of provincial contributions; providing for the exemption from taxation of any class of persons who are wholly or partly dependent on public funds; for the cancellation of the taxes of any person who, from sickness or extreme poverty is unable to pay them; and generally for carrying out the provisions of the Act.

Housing

The Wartime Housing Act, 1944, enables a municipality in which Wartime Housing Ltd. has erected houses to accept compensation in lieu of the taxes which would otherwise be payable by tenants of Wartime Housing Ltd.

Filing and Publication of Regulations

The Regulations Act which is to come into force on July 1, 1944, requires the filing with the Registrar of Regulations appointed under the Act, of two certified copies of every "regulation", which is defined to include any regulation, rule, order, or by-law of a legislative nature made or approved, under any Act of the Legislature, by the Lieutenant-Governor in Council, a Minister of the Crown, a Department of the Public Service or a Board or Commission whose members are appointed by the Lieutenant-Governor in Council. By-laws of a municipality or local board are not included. Unless otherwise stated, a regulation is to come into force on and after the date of filing, but in no case before that date and a regulation which is not filed is to have no effect, notwithstanding the provisions of any other Act. Every regulation must be published in the Ontario *Gazette* within one month of filing unless the time is extended by the Minister in charge of the Act. A regulation which is not published is not valid as against a person who has not had actual notice of it. Regulations made prior to the coming into force of the Act are to remain in effect until December 31, 1944, but mut be filed on or before that date. This provision is not to affect any legal proceeding begun before December 31, 1944. The filing or publication of a regulation is not to have the effect of validating or correcting it if it is otherwise invalid or defective.

Credit Unions

Among changes made in the Credit Unions Act was the amendment of the section requiring every union to set aside 20 per cent of its yearly net profits as a guarantee fund to meet losses, so that it is now stipulated that this need not be done if at the close of any fiscal year the guarantee fund equals ten per cent of the amount received from members on deposit and as payment for shares, and if the annual meeting, by a two-thirds vote, directs that no moneys be set aside for that year. A credit committee may authorize the treasurer or manager of a credit union to make loans to members up to $25 without obtaining approval of the committee. A member of a credit union having on deposit and as payment for shares an amount not exceeding $500 may, by written notice deposited with the credit union, nominate any person to receive the money at his death. If such member dies intestate the amount may be paid to the per-

12558—7½

son who appears to be entitled to it and in such case the payment is valid with respect to demands from any other person as next of kin or lawful representative but such next of kin or representative may recover the amount from the person who received it.

Saskatchewan

The Saskatchewan Legislature, in session from February 8 until April 1, passed a statute setting up a Department of Reconstruction, Labour and Public Welfare, and Acts relating to collective bargaining, apprenticeship, health insurance and physical fitness. The laws governing firemen's hours of work, minimum age for employment in coal mines, closing of shops, labour contracts, workmen's compensation, relief, credit unions and co-operative associations were amended.

Department of Reconstruction, Labour and Public Welfare

This new Department brings together the work of the Bureau of Labour and Public Welfare, the Child Protection Bureau and the Old Age Pension Bureau. In addition to administering the laws relating to labour, the new Department is to have charge of the Child Welfare Act, the Old Age and Blind Persons' Pensions Act, the Education of Blind and Deaf Children Act, and the Direct Relief Act. These Acts and the others formerly under the Bureau of Labour have all been amended to this effect. Other powers in the field of public welfare include the collection and dissemination of information relating to public welfare, and the right to investigate and report upon all organizations concerned with the social welfare of adults or children in Saskatchewan, provided that they are not under the control of any other Government Department.

In the field of reconstruction, the Department is to administer those matters which the Lieutenant-Governor in Council may assign to it, as well as taking measures to rehabilitate discharged members of the armed forces and co-operating with the Federal Government in the furtherance of its reconstruction plans.

Collective Bargaining

The Labour Relations Act applies the Dominion Wartime Labour Relations Regulations (P.C. 1003) to Saskatchewan, in so far as relations between employers and employees are "within or ordinarily within the exclusive legislative jurisdiction of the province". The Regulations require employers to bargain with organizations of employees, provide for compulsory arbitration of disputes arising out of a collective agreement and for conciliation machinery to settle disputes where there is no agreement (L.G., 1944, p. 135). The Saskatchewan Act stipulates that any amendments in the Regulations and any regulations made under their authority may be declared by the Lieutenant-Governor in Council to have the force of law for the purposes of the Act. Thus, these changes will apply also to those employers, employees and their respective organizations whose relations in such matters are under provincial jurisdiction.

The Provincial Government is authorized to make an agreement with the Dominion Minister of Labour regarding the administration of the regulations within Saskatchewan. This agreement may provide for the appointment of officers or the constitution of administrative agencies and the delegation to them of such of the Minister's powers as may be necessary to carry out the Regulations in Saskatchewan. In addition, the agreement may provide for the transfer to the province of all or part of the powers conferred on the Wartime Labour Relations Board by the Regulations with respect to matters within the province, and for procedure for an appeal from a decision of the provincial authority so established. The agreement may stipulate that the province is to be reimbursed for expenses incurred in carrying out the agreement.

The Labour Relations Act suspends for the period of its operation the Freedom of Trade Union Association Act and the Industrial Disputes Investigation Act which makes effective within Saskatchewan the provisions of the Dominion Act of that title.

Apprenticeship

The Apprenticeship Act, which is to come into force on proclamation, enables the Lieutenant-Governor in Council to enter into an agreement with the Minister of Labour regarding the extension and operation of apprenticeship in the province. The Act is generally similar to, though different in detail from Apprenticeship Acts already existing in Ontario, British Columbia and Nova Scotia and those passed this year in New Brunswick, Manitoba and Prince Edward Island.

It prohibits any person entering into a contract of apprenticeship in any designated trade except in accordance with the Act. The thirteen trades specified are those of masonry, plastering, carpentry, painting, bricklaying, the electrical trade, plumbing, steamfitting, sheet

metal working, motor mechanics, motor vehicle repairs, watchmaking and blacksmithing. Others may be added by the Lieutenant-Governor in Council.

A plan for apprenticeship in any trade must provide for a contract in writing with an agreed scale of wages with increases at fixed intervals; for a period of apprenticeship of at least 4,000 hours with time credits for trade training in vocational schools or in the armed services and for previous experience in the trade; for a probationary period of at least three months; for a definite program of practical experience and instruction in related technical subjects; for tests and a final examination before the diploma is given certifying improver's or journeyman's status; for the transfer of an apprentice to another employer and the cancellation of a contract for cause; for inspection of training; and finally, for determination by the Lieutenant-Governor in Council, after consultation with employers and workers, of the ratio of apprentices to journeymen in any trade.

The contract must be signed by the apprentice, who must not be less than 16 years of age, the employer, and either the parent, guardian, or a district court judge. It may be terminated if all three parties consent or it may be cancelled for good cause. In addition to apprenticeship under individual contracts, the Act also applies to apprenticeship entered into under a collective agreement between an employer and a trade union or under an approved private plan carried on by an industry. Where rates of wages have been determined by a collective agreement, these rates are to apply to apprentices if they are not less than the minimum rates for the trades in question under any Act.

A Director of Apprenticeship is to be appointed in the Department of Reconstruction, Labour and Public Welfare to administer the Act, and supervise all apprenticeship plans. No contract, nor any termination, transfer or cancellation of a contract of apprenticeship, is to be of any effect until it has been registered by the Director, although this registration is no guarantee of the contract's validity. The Director's duties include collaborating with educational authorities in regard to training, assisting in establishing a system of training for any industry, and seeing that the provisions of the Act are being observed. There is also to be a Provincial Apprenticeship Board of five or more members including equal representation of employers and workmen and one or more persons from the Department of Reconstruction, Labour and Public Welfare and from the Department of Education. The members are to hold office during pleasure and will advise the Director.

The Lieutenant-Governor in Council may make regulations under the Act prescribing qualifications, courses of training, credits to be allowed for previous training and experience, hours of labour and rates of wages, fees, the various forms to be used, the proportion of employees that may be apprentices in any designated trade. The regulations may also provide for inspection of training; for tests to be given for the issue of certificates of qualification, both to those who complete their apprenticeship and to those who are already qualified at the time a trade is added to the designated list; for the payment of bonuses to employers of apprentices; and for the registration of employers in designated trades.

A maximum penalty of $100 is provided for any person who enters into a contract of apprenticeship in respect of any designated trade except in accordance with the provisions of the Act, who employs a larger number of apprentices than is prescribed by the regulations, or who violates any of the provisions of the Act and the regulations made under it. For each day during which the offence continues the fine is $10.

Workmen's Compensation

Benefits under the Workmen's Compensation (Accident Fund) Act were increased. In the case of death of a workman, the dependent children will receive $12 monthly instead of $10 if they have one surviving parent, and $20 monthly instead of $15 if they are orphans. The maximum compensation which may be paid in case of death has been raised from 66⅔ per cent of the average monthly earnings to average monthly earnings. The increased compensation applies to all payments accruing after May 1, regardless of the date of the accident.

The limitation has been removed that clinical hernia must be of recent primary demonstrability before compensation can be paid.

The Workmen's Compensation Act, which was passed in 1910-11 and which still applies to men in train and engine service, has been amended to apply not only to manual workers and to others earning less than $3,000 but also to non-manual workers earning up to $3,500.

Employment of Young Persons

An amendment in the Coal Miners' Safety and Welfare Act raises from 14 to 16 years the minimum age at which a boy may be employed or permitted to be in the workings of a mine.

A new paragraph added to the Cities Act permits a city council to pass a by-law prescribing the minimum age at which a minor

may be allowed to enter or be employed in a place where billiard, pool or bagatelle tables or bowling alleys are kept for hire. The by-law may also lay down the conditions under which a minor may be permitted to enter or be employed in such a place.

Labour Contract

An amendment to the Masters and Servants Act restricts to police magistrates the power to hear certain charges under the Act.

Hours of Work in Fire Departments

In fire departments of cities of over 10,000 provision is made for three platoons, each working on consecutive eight-hour shifts. Under an amendment in the Fire Departments Two-Platoon Act, the title of which is changed to the Fire Departments Platoon Act, a petition signed by at least one-tenth of the resident electors may be submitted to the city council before October 15 in any year requesting that a by-law setting up the three-platoon system be voted on at the next annual election. If such a by-law is assented to by a majority of the electors, the council must pass it within four weeks. In every city in which the three-platoon system is in operation, the employees will be entitled to whatever periods of rest are prescribed by by-law. Although the amending Act is not to come into force until it is proclaimed, a by-law may be passed at an earlier date and become effective as soon as the Act is proclaimed.

Early Closing of Shops

An amendment to the Rural Municipalities Act authorizes the municipal council to require by by-law that any class of shops must be closed between 5 p.m. and 5 a.m. on any or every day in the week, or between 12 noon and 5 a.m. on any day of the week. Thus the Act does not specify that shops must be closed within certain hours as do the City and the Town Acts. A shop is defined as meaning barber shops and any place where goods are exposed or offered for retail sale, but not where the only trade or business carried on is that of a hotel, inn, victualling or refreshment house.

Within six weeks of receipt of a petition for an early closing by-law which has been signed by three-fourths of the occupiers of the class or classes of shops to which it relates, the council is to pass such a by-law. Also, if two-thirds of all the shop-occupiers in the hamlet petition for a weekly half-holiday, the council must pass a by-law to this effect. Also, the council may, of its own motion without petition, pass these by-laws. Before a by-law may be repealed, it must appear to the council that more than one-half the occupiers of the stores affected are opposed to it. No shopkeeper will have committed an offence if he sells after closing hours medicines, drugs and medical appliances, or anything else required in an emergency resulting from sickness or death.

An amendment in the Town Act adds blacksmiths' shops to the list of places covered by the definition of "shops". The new restrictions imposed on blacksmiths' shops require them to be closed, except for emergency services, from Monday to Friday between 7 p.m. and 5 a.m., and on Saturdays, unless Saturday falls on December 24, and on each of the four weekdays before December 24, between 10 p.m. and 5 a.m. The council is authorized to prescribe by by-law conditions on which blacksmiths may give services during the time when their shops are closed.

Physical Fitness

The Physical Fitness Act which came into force on April 1 enables the Department of Public Health to promote the physical fitness of the people, in particular by co-operating with the National Council on Physical Fitness established by the Dominion National Physical Fitness Act, 1943. In carrying out the purpose of the Act, the Department may organize, encourage and correlate activities and provide facilities for physical welfare. It may co-operate with organizations, and provide for training the necessary staff.

The Act also provides for a Saskatchewan Council of Physical Fitness of not less than 10 nor more than 20 members, to be appointed by the Lieutenant-Governor in Council and to hold office during pleasure. The Deputy Minister of Health is to be chairman. The members are to receive travelling and hotel expenses while attending meetings and a daily allowance to be determined by the Lieutenant-Governor in Council. A secretary and assistants may be appointed subject to the approval of the Lieutenant-Governor in Council. The Council is to consider proposals of the National Council regarding a physical fitness program and to recommend to the Minister means of implementing these proposals in Saskatchewan. It will also recommend other activities which are considered desirable, and suitable persons who may be trained as instructors. The Council will advise concerning proposals submitted to it by the Minister and perform any other duties which he may assign to it. Regulations may be made by the Lieutenant-Governor in Council to carry out the provisions of the Act.

Expenses of administration are to be paid from money appropriated by the Legislature. This year $20,000 was set aside for this purpose.

Health Insurance

Legislation was enacted enabling Saskatchewan to bring into operation any national health insurance scheme adopted by the Federal Government. The Saskatchewan Health Insurance Act is to be administered by the Health Insurance Commission, a corporate body consisting of an indefinite number of members to be appointed by the Lieutenant-Governor in Council. The Deputy Minister of Health is to be an ex-officio member. One member will be appointed as chairman to hold office for as long as the Lieutenant-Governor in Council determines but not for more than 10 years. The other members will hold office for six years after the first term which shall be of two, four or six years' duration as may be determined by the Lieutenant-Governor in Council, but arranged so that, as nearly as possible, an equal number will complete their term of office at the end of either two, four or six years. A member is eligible for re-appointment when his term has expired. The direction of the work of the Commission is to be a full-time job for a salaried chairman. The other members will receive remuneration and travelling expenses. Other necessary personnel will be appointed by the Public Service Commission.

The Health Insurance Commission may require every person 16 years of age and over to file a return containing the prescribed information. For failure to furnish the required information a fine of $50 may be imposed or imprisonment for 30 days or both fine and imprisonment. Inquiry may be made to find out the correctness of any return, but the Commission is not to be bound by any information thus obtained. The Commission will report to the Minister on the manner in which health insurance benefits can best be supplied, the estimated cost and the most advantageous method of financing the scheme. It will make tentative arrangements with hospital boards and professional bodies for the purposes of the Act, and consider conditions in the province with relation to the benefits to be provided.

The province is to be divided into "Public Health Regions" and "Health Insurance Regions" for effective administration of public health services under the Department of Public Health and of health insurance under the Commission, with co-operation between the two in each region. The Commission is to make the inquiries necessary for the establishment of these regions. The Commission may establish regional offices and may divide each region into as many divisions, each with a divisional office, as are necessary. Regional and assistant regional medical officers may be employed on a full- or part-time basis as the circumstances require. The regional medical officer will advise practitioners in the discharge of their duties; keep in touch with them in order to raise the standards of service; investigate cases of alleged excessive prescribing of drugs, medicines or appliances by any practitioner; examine the records of practitioners with reference to their accuracy and efficiency, and perform any other duties the Commission may prescribe.

The benefits, available to all who normally live in Saskatchewan and who have complied with the requirements of the Act, include preventive measures and all necessary diagnostic and curative services, including medical, surgical, and obstetrical, dental, pharmaceutical, hospital and nursing benefits, as well as any auxiliary services necessary to render the benefits effective. Those who are most urgently in need of the benefits are to receive them if there is insufficient personnel or equipment in an emergency or other circumstances. Adjustments may be made in cases where complete benefits cannot be made available to all in any region.

The Commission may, subject to the approval of the Lieutenant-Governor in Council, make whatever regulations it considers necessary to carry out the provisions of the Act.

Relief

A new subsection added to the Relief Act empowers the Lieutenant-Governor in Council to institute and carry out, either alone or in conjunction with any city, town, village, rural municipality or with any person, such measures as may be deemed requisite for the relief of persons in necessitous circumstances. A similar subsection has been added to the Direct Relief Act stipulating that the Lieutenant-Governor in Council may carry out measures for the relief of persons in necessitous circumstances and is to be considered as always having had power to do so. Another new section added to the Relief Act, the Direct Relief Act and to the Local Improvement Districts Relief Act permits the council of any municipality to cancel or reduce the amount which any person owes to it for advances of aid or relief, regardless of when they were made or whether they were made under the present Acts.

Co-operation

Changes in the Credit Union Act permit greater latitude in financial arrangements of

credit unions. The registrar's permission is no longer required for the deposit of money with trust companies, with post office savings banks or with the Saskatchewan Co-operative Credit Society. The limit of 25 per cent of the union's total deposits no longer applies to deposits made with the Society. After a union's reserve amounts to 10 per cent of its assets, the union is not required to set aside each year 20 per cent of its net earnings before declaring a dividend, provided the income from the reserve, which is to be deposited in a chartered bank or invested in Government bonds, forms part of the general revenue of the credit union. Full membership rights may now be held at the age of 18 instead of 21 but a member may not vote until he is 16 years of age.

Amendments in the Co-operative Associations Act enlarge the objects for which an association may be incorporated, provide for federations of associations to be incorporated upon fulfilling certain requirements, lay down conditions concerning the amendment of the memorandum of association and the distribution of the surplus in the form of a reserve fund and dividends to members.

Old Age Pensions

An amendment in the Old Age and Blind Persons' Pensions Act provides that the Lieutenant-Governor in Council may pay a supplementary allowance not exceeding $1.25 a month to pensioners. The amendment also ratifies the supplementary agreement made in September, 1943, between the Governor-General in Council of Canada and the Lieutenant-Governor in Council of Saskatchewan to pay to the province out of the War Appropriation additional amounts based on a maximum pension of $300 yearly.

Miscellaneous

The Municipal Medical and Hospital Services Act has been amended regarding the paying of the tax. The rules are clarified concerning payment by those who become residents after October 31, provision made for a refund to those who leave before the end of the fiscal year, and for cancelling taxes which are uncollectable because a person moves out of the municipality.

Amendments in the Workmen's Compensation Board Superannuation Act, the Public Service Superannuation Act and the Telephone Department Superannuation Act provide that where allowances or other sums are payable under any of these Acts to a child, the allowance shall be paid to the child's guardian or, when there is no guardian, to someone appointed by the proper administrative body on the child's behalf.

The City and Town Acts have been amended to require the paying of a poll tax by those who have been residents of the city for at least three months instead of for six months. The council may provide by by-law that a person whose name appears on the householders' list, and the husband and wife of such a person, is not to be liable for the tax.

Amendments in the Town, City, Village and Rural Municipalities Acts permit the council to set up a fund for post-war reconstruction purposes.

Resolutions

A resolution agreed to on March 24 was concerned with further measures to re-establish the Armed Forces in civil life. It was resolved that they be kept on army pay until suitable employment has been offered to them, or until a disability pension and opportunity for re-establishment have been granted; that veterans be put on land suitable to the type of farming in which they expect to engage; that soil surveys be made of all lands purchased for veterans' settlement; that every contract to purchase a home or farm from the Government by a veteran contain a clause preventing the increase of his debt under the contract in years of crop failure or unemployment; that the Federal Government be urged to take over at a fair price all suitable farm land required for veterans' settlement in order to ensure protection from inflated prices; that preference be given ex-servicemen in all reconstruction projects and Government employment; that consideration be given to schemes for re-establishing the Armed Forces in primary industries other than farming; and that adjustment claims of present soldier settlers be individually reconsidered after examining these recommendations.

Prices

Prices, Retail and Wholesale, in Canada, June, 1944

Cost of Living, Prices of Staple Articles, and Index Numbers, as Reported by the Dominion Bureau of Statistics

ON the five-year base 1935-39=100 the Dominion Bureau of Statistics official cost-of-living index recorded a decline of 0·2 to 119·0 between May 1 and June 1, 1944. A contraseasonal drop of 0·6 points to 131·1 in the food index was mainly responsible and reflected lower quotations for potatoes, butter, eggs and onions. Higher prices in this series were noted for cabbage, carrots and lemons. Home furnishings and services, the only other group to record a change, dipped 0·1 to 118·4. Index levels for other groups as at June 1 were rentals 111·9; fuel and lighting 112·5; clothing 121·5 and miscellaneous items 109·0.

On the base August 1939=100 movements in cost-of-living indexes for eight regional cities were varied between April 1 and June 1, 1944. Montreal recorded the greatest change, with a decline of 0·5 to 120·7 reflecting lower subgroup indexes for foods and fuel and lighting. Lower prices for foods and fuel and lighting were also responsible for a drop of 0·2 to 115·5 in the Winnipeg index while the Toronto index at 117·1 and Saskatoon at 119·3 were each down 0·1 due to lower foods for the former and weakness in fuel and lighting for the latter. A gain of 0·2 to 117·4 for the Vancouver series reflected upturns for foods. Halifax and Saint John were 0·1 higher at 118·3 and 118·8 respectively with the increase for the former due to higher food quotations and for the latter upturns in rentals. Edmonton remained unchanged at 115·7 as fractional drops in foods, fuel and lighting were offset by increases in the clothing and miscellaneous series.

COST OF LIVING AND WHOLESALE PRICES IN CANADA 1914-1922 AND 1939-1943

(b) The basis of these figures is the record of rents collected in the 1941 census of housing. The movement since then has been determined from reports from real estate agents, the census averages being adjusted in accordance with the changes indicated by these reports.

(c) Rents marked (c) are for apartments or flats. Other rent figures are for single houses. Apartment and flat rents have been shown where this type of dwelling is more common than single houses.

Retail Prices

The accompanying table on retail prices of staple foods, coal and rentals (Table IV) is prepared each month by the Dominion Bureau of Statistics. It shows the prices of these commodities in 64 cities across Canada at the date under review.

The prices of the staple food items included in the table are all used in the calculation of the index of the food group in the official cost-of-living index, and give a reasonably complete picture of prices throughout Canada as used in the calculation of the index of this particular group. They are the averages of prices of goods reported to the Bureau by independent stores. They do not include prices from chain stores. As the movement of chain store prices agrees closely with the movement of independent store prices it was considered that the extra work and cost involved in compiling and printing a separate table for chain store prices were not warranted although chain store prices are used in the calculation of the index.

The coal and rental figures given are also used in the official cost-of-living index. Quotations are shown for anthracite coal in the provinces of Ontario and Quebec, and for bituminous coal in the rest of Canada, where this type of coal is more generally used.

Rental figures given in the table are typical of rents being paid by tenant households in each city. In some cities, flats and apartments are more numerous than single houses; in such cases rents for flats and apartments are shown while figures for other cities represent single-house rentals. In all cases figures represent rents being paid, not the rent asked for vacant dwellings. The basis of these figures is the record of rents for every tenth tenant-occupied dwelling collected in the 1941 census of housing. The movement of rents since that time has been determined from reports submitted by real estate agents. The 1941 census averages have been adjusted in accordance with the change indicated by these reports, and the printed figures show a $4 spread centred around each city average.

Table III is designed to show the variation in the retail prices of commodities since the beginning of the war. Taking the Dominion average retail price of each of the commodities at August, 1939, as 100, the table shows the percentage changes in prices since that date; also the actual price on the first of the current month.

The Dominion Bureau of Statistics issues an index number of retail prices of commodities included in the cost-of-living index excluding rents and services. This index is now being included in Table I.

The accompanying chart shows the trend of the cost of living and wholesale prices since the beginning of the present war compared with the trend in the period of 1914-1922.

Explanatory Note as to Cost-of-Living Index

The index number of the cost of living was constructed on the basis of a survey of expenditure by 1,439 families of wage-earners and salaried workers with earnings between $600 and $2,800 in 1938. The average expenditure was $1,413.90, divided as follows: food (31·3 per cent, $443; shelter (19·1 per cent), $269.50; fuel and light (6·4 per cent), $90.50; clothing (11·7 per cent), $165.80; home furnishings (8·9 per cent), $125.70; miscellaneous (22·6 per cent), $319.40.

The last-named group includes health (4·3 per cent), $60.80; personal care (1·7 per cent), $23.90; transportation (5·6 per cent), $79.30; recreation (5·8 per cent), $82.10; life insurance (5·2 per cent), $73.30. Other expenditure not directly represented in the index brought the total family living expenditure to $1,453.80.

A description of the cost-of-living index, how it is calculated, and the complete list of items included in each of the principal groups, food, fuel, rent, clothing, home furnishings, etc., with their weights, was published in the Labour Gazette for July, 1943, page 1057.

The control of prices under an Order in Council of November 1, 1941, P.C. 8527, became effective on December 1, 1941 (L.G., 1941, page 1371). The order provided that no person should sell any goods or supply services at prices higher than during the period September 15 to October 11, 1941, except under the regulations of the Wartime Prices and Trade Board. The activities of the Board in the operation of the price control policy are summarized from time to time in the Labour Gazette under the title, *Price Control in Canada.*

Wholesale Prices, June, 1944

On the base 1926=100 wholesale prices remained steady in June at an index of 102·5. Among sub-groups non-metallic minerals recorded the greatest change with a loss of 0·3 to 102·5 due to lower prices for bituminous coal, crushed stone and gravel. In the animal products section a decline of 0·2 to 106·1 reflected weakness for calves, butter, lard and

(a) First of month. (b) Middle of month. (c) Last week of month. (d) Quarterly. (e) New Wartime price series on base December 1942=1000, computed quarterly beginning March, 1943. (f) Yearly averages are for period from July of preceding year to June of year specified. (g) July. (h) June.

eggs. These outweighed higher prices for steers and lambs. Higher quotations for lemons, potatoes, raw leaf tobacco and rosin overbalanced price declines for rye and oranges to advance the vegetable products group 0·1 to 95·0 while chemicals and allied products moved up 0·2 to 100·1.

Canadian farm product prices recorded a gain of 0·2 to 102·0 in June due to firmer quotations for live stock, raw leaf tobacco and hay outweighing lower prices for rye and eggs. Sub-group changes showed animal products 0·6 higher at 120·2 while field products were off 0·1 at 91·1.

Price Movements in Canada and other Countries

Wholesale price movements for the second quarter of 1944 were mixed. The Canadian series recorded a decline of 0·5 to 102·5 (1926=100) between March and June. On the same base the United States index advanced 0·2 to 104·0 between March and May, while the United Kingdom series at 166·1 (1930=100) in May recorded an increase of 1·2 points over March due to firmer prices for cotton and wool. Among other countries for which wholesale indexes were available the Australian index on the base 1936-39=1,000 was 1,394 in April, while a similar series for New Zealand stood at 1,558 (1926-1930=1,000) on the same date. The Switzerland index continued to gain slowly during 1944 to reach a level of 223·1 (July, 1914=100) by April.

Fluctuations in cost-of-living indexes in the second quarter of 1944 were small. The Canadian series at 119·0 (1935-39=100) recorded no net change between March and June, while the United Kingdom index at 200 (July, 1914=100) remained steady also. On the other hand the United States index registered a gain of 1·2 to 125·0 between March and May due principally to higher quotations for foods and homefurnishings. Quarterly indexes for Australia and New Zealand were slightly higher in March at 1,268 (1936-39=1,000) and 1,005 (1926-1930=1,000) respectively.

Manpower and Labour Relations Conference of Canadian Manufacturers' Association

AT the conference of the Canadian Manufacturers' Association held in Toronto, from June 12 to 14, there was a special conference on manpower and labour relations.

The conference received a comprehensive review of the situation, from an administrative stand-point, by Mr. Arthur MacNamara, Dominion Deputy Minister of Labour, and Director of National Selective Service (which is given elsewhere in this issue). From the Department of Labour also were the following officers who were present as observers and to give information relative to special phases of administration:—

Hon. Justice G. B. O'Connor, Chairman, Wartime Labour Relations Board.

A. J. Hills, Chairman, National Joint Conference Board of the Construction Industry.

Allan Mitchell, Director, Employment Service and Unemployment Insurance Branch.

Mrs. Rex Eaton, Assistant Director, National Selective Service.

T. R. Walsh, Chief, Legal and Enforcement Division, Unemployment Insurance Branch.

The employers' point of view was expressed by Mr. H. Taylor, Canadian National Carbon Company, and a member of the National Labour Relations Board; Mr. W. A. Osbourne, General Manager of Babcock-Wilcox and Goldie McCulloch, Limited. It was also emphasized in the address of the retiring president, Mr. F. P. Lane (an extract of which is given subsequently in this article).

Representing the Ontario Department of Labour in the discussion were Mr. James F. Marsh, Deputy Minister, and J. Finkelman, Chairman, Ontario Labour Relations Board, who outlined the functions of that body.

Collective Bargaining and Related Problems

Leading off in the discussion, Mr. Taylor addressed the conference under the title "Collective Bargaining and Related Problems".

After outlining the coverage of P.C. 1003, Mr. Taylor stated that "for all practical purposes perhaps we can say Canada has compulsory collective bargaining". Its significance he defined as "recognition by Government, both Provincial and Federal, that collective bargaining is part of our economic and social system . . .

"It is an indication that if democracy and the system of private enterprise are to be retained, there must be a place reserved in the system for collective bargaining. If this, even

in part, is an appraisal of the significance of this kind of legislation, collective bargaining is here to stay, and employers must not only become reconciled to it, but must learn to live with it. They must learn to live with it because the survival of management in its present form may be dependent upon how well they do live with it.

"It seems to me legislation of this kind is significant because it injects Government into labour relations. It implies that if management and labour cannot settle their differences, then Government will take authority to step in and settle such differences for them."

Defining collective bargaining he described it as "a process through which employers and organized employees determined conditions of employment and create machinery for the amicable and business-like conduct of labour relations."

Continuing, he said:

"The terms agreed upon are usually the result of a give and take attitude on the part of both parties. Stripped of all the verbiage what does this mean from the point of view of the employer? In plain language it means 'transferring of authority.' It mean certain authority, heretofore possessed by management, is transferred to organized employees or unions.

"War conditions necessarily impose many restrictions on manufacturers. It is not for me to say whether there are too many or too few such restrictions, or whether they are the right or wrong kind. I believe I can say that arising out of these restrictions some authority has, by orders in council, regulations, or otherwise, been transferred from manufacturers to Government, and, in some cases at least, further transferred from Government to trade unions, either directly or indirectly. How much of this transferred authority will be restored in the post-war period, I have no way of knowing. I believe, however, the authority transferred to unions is likely to be retained by unions.

"Authority in wise hands may well be constructive, but in unwise hands it may be destructive, not only to the war effort as such, but also because it will leave its mark during the post-war period. This implies there must be responsible leadership in management and responsible leadership in trade unions.

"If you accept the definition that 'collective bargaining is the transferring of authority,' it is obvious that it requires the serious attention of all concerned, not just during the negotiation of a contract, because bargaining does not cease when the contract is signed. It is a continuing process."

Maintaining Amicable Relationships

Stressing the necessity of maintaining amicable relationships, Mr. Taylor observed:

"I believe it goes without saying, there must be amicable relationships between employers and employees, particularly during the war period. I am not so sure that this can be accomplished simply by developing a mathematical formula which vests some agency or board with authority to write agreements. Contracts written this way are neither collective bargaining nor agreements. They are directives of the agency or board.

"Generally speaking, if collective bargaining is to be a necessary part of our economic and social system, then collective bargaining should be reserved to the parties involved to work out their problems themselves. It should not be replaced by directives of Government or agencies of Government. On the other hand, nothing must be permitted to interfere with the war effort and if differences cannot be resolved by the parties themselves, Government is bound to intervene, public opinion will demand that.

"If Government is to be forced out of active participation in our industrial relations, it will be only when management and labour have each demonstrated their ability to settle their differences without having to call upon Government to act as a policeman or umpire.

"It cannot be denied that many business firms have found satisfactory relationships with unions, in fact with closed shop or union shop conditions. On the other hand, many firms seem to have more disturbed conditions when they entered into contractual relationships with their employees. Much of this arises out of unreasonable demands on the part of one or both parties involved.

"It seems to me, a business and a trade union is as good as its leadership and no better. If collective bargaining implies transferring authority to unions, there must be responsible union leadership, otherwise the risk is greater that the authority so transferred will not be wisely used. On the other hand, if a business lacks responsible leadership, authority is very often transferred more quickly, more completely, and perhaps without regard to the best interests of the employees, the public and the business itself.

"If collective bargaining is here to stay, employers should recognize its importance. They must learn to use collective bargaining machinery. They should become better acquainted with the terms of reference and the language used by trade unions. They should know what is meant by union security and a host of other terms. They should understand that intelligent negotiations require facts, not just a lot of generalizations. They should understand that back of all negotiations is always the potential use of force. Therefore, there should be a clear appreciation of the economic power possessed by each side.

"In other words, I believe it is becoming increasingly more difficult for a company to follow a policy of isolation in the matter of its labour relations policies and practices. Employers must know what the other fellow is doing, and must learn as much as they can about what unions are doing.

Guarantee of Rights

"The Wartime Labour Relations Regulations guarantee certain rights to employees. They also guarantee certain rights to employers. There are a great many points in between, which are not established as rights, but which are left to either the Boards to determine or to employees and employers to work out themselves.

"Employers should know what their rights are under the regulations, but they should remember that the rights are much like the right of free speech, which is not an absolute or unqualified right, and never has been so considered, rather it has been regarded as a limited right. Freedom of speech is subject to such reasonable regulations as are necessary to preserve the public welfare. In my opinion, the Regulations do deny to employers the right to

exercise their freedom of speech in such a manner as to constitute interference with, or coercion of employees in the exercising of employees' rights, guaranteed under the Regulations. The point I want to make is that the employer's and the employees' rights provided for in the Regulations are all limited rights.

"There are bound to be situations where it is necessay for employers to appear before Government boards, either the War Labour Boards or the Labour Relations Boards. It is my experience that too many employers do not take this matter seriously enough, especially at the Regional level. Employers should realize that they must win their cases in the Regional Boards. They must not depend upon appeals. It is true there is the right to appeal to the National Boards, but this right of appeal was not intended to be a second chance just because a union or an employer does not happen to like the decision. The right of appeal was established mainly to maintain some degree of uniformity throughout Canada in the matter of interpretation and application of the regulations.

"When employers present cases before the Boards, they should present their claims clearly, stating what they want and why they want it. They should avoid generalizations. It is not enough to say certain classifications are confidential and therefore should be excluded from the bargaining unit. The employer must make out a case as it applies to him, because occupational classifications may be the same in name but frequently they cover quite different functions. In other words, what do the employees do that makes them confidential?

"One of the most difficult problems for employers and Labour Relations Boards to unravel is the attempt to reconcile the rights conferred upon 'employees' because of their employee status and the duties imposed upon them and other parts of management, because of their concurrent 'employer' status.

"The Regulations refer to confidential and/or the right to hire and discharge as tests for exclusion from employee status. In practice, the right to hire and discharge is usually centralized in an employment or personnel department, or is vested in a member of management sometimes one to three levels above the foreman. It would appear then, that confidential will, in the majority of cases, be the basis of determining what, if any, levels of supervision are to be included in the bargaining unit, since the right to hire and discharge is rarely vested in the lower levels of supervision.

"There is a great deal of pulling and hauling between management and unions, on the issue of foremen's unions, or foremen being included in a common union with the workmen. It seems to me this is a major problem for employers. Many foremen claim they are squeezed between management and the union of workers. They claim they are orphans, not recognized as part of management, and not fully accepted as employees in their relationship with respect to unions. In consequence of this, foremen's unions are taking root.

"The question that springs from this is, what should the employers do about it? I believe the answer may be found by giving foremen and other segments of management a place in the sun. If you are not prepared to accept foremen and others as part of management, then such people will look to the unions for help. In my judgment, the answer is largely in the hands of the employers.

Future of Collective Bargaining

Dealing with the future of collective bargaining, Mr. Taylor expressed himself as follows:

"I have been asked on a number of occasions to express an opinion as to where we are going with collective bargaining. My answer is always the same, 'I don't know.' There are experiments going on around us. There are developments which may be straws in the wind. Perhaps you can draw your own conclusions. For example, the trade union movement, particularly in the United States, appears to have three main stages, apart from the industrial vs. craft form of organization.

(1) The fight for union recognition.
(2) Union security.
(3) Industry-wide bargaining (including master contracts in large organizations).

"The fight for recognition, generally speaking, appears to be won by reason of legislation, the Wagner Act in the United States and the War-time Labour Relations Regulations in Canada, which under certain conditions guarantees recognition. The union security issue is well advanced in the United States, with some 6,000,000 workers covered by closed or union shop contracts, and many others under maintenance of membership provisions, which is practically an established policy of the United States National War Labour Board. Industry-wide bargaining has taken root, as have master contracts covering all establishments of a particular organization. The three stages overlap each other, in that all three are going on to some extent simultaneously.

"In Canada, the union security issue has not been made a matter of law, in the sense that any Board or agency can order it. On the other hand, it is not unlawful if mutually agreed upon.

"The inclusion of sanctions in recent labour legislation in the United States and Canada may be an indication that Government now recognizes that authority cannot be separated from responsibility.

"On the employer's side there is a recognizable trend toward employers' associations, organized for purposes of collective bargaining.

"The straws in the wind indicate that perhaps the pendulum is starting to swing in the opposite direction. Possibly the leaders of Government are beginning to realize that if satisfactory industrial relations are to prevail labour monopolies are not the answer. Full consideration must be given to 'management security' and the protection this phrase implies.

"In closing, I want to leave this thought with you, which in fact repeats what I said earlier. If cases are presented to the administrative boards in a manner which does not state the issues clearly, which contain loose statements, or statements not supported by facts, or which introduce a lot of irrelevant material, the work of the boards is not only increased but the real issues may be lost in the maze of irrelevant material. Under these circumstances, neither the union representatives nor the employer representatives on the boards can do as good a job as you and they would like to have done."

Foremen's Unions

Mr. W. A. Osbourne, General Manager, Babcock-Wilcox and Goldie-McCulloch Lim-

ited in referring to collective bargaining and foremen's unions stated in part:

"I don't think P.C. 1003 was ahead of its time. I think manufacturers generally are fully prepared to accept, in principle, collective bargaining, but I can quite visualize circumstances in which they may have something to say about the method as distinct from the principle, and I think that they may have something to say, and should be allowed to say it, about the indiscriminate extension of collective bargaining to any and all of their employees who may qualify under the definition of employees under the Order.

"I was very glad indeed to hear Mr. Taylor refer to foremen's unions. Under the definition of an employee, if a foreman has not got the right to hire and fire, and if he is not employed in a confidential capacity, whatever that may be, then he is an employee within the meaning of P.C. 1003, and he is entitled to join a trade union. At the present time there are influences and activities under way to form and to promote foremen's unions, which shall be actively connected with the international trade unions, and therefore in certain definitions of employee, the foreman should have the right to join such a union.

"I am one who believes that a foreman is part of management, that a foreman is responsible for interpreting information, transmitting the policy of management to his employees, and I believe, therefore, that he should be considered as part of management and not as an employee.

"We cannot ignore the implications of the Detroit strike of foremen recently, but I think it should be said in favour of certain foremen, just as Mr. Taylor has said it, that if we surrounded the foreman with specialists and with functionaries who do most of his thinking for him—specialists in personnel, in time study, and in all other things pertaining to the running of a factory—if we permit these men to bypass the foreman and leave him little or no say or share in management, then I think we can expect him to take the attitude he sometimes does and to feel that he is caught between the devil and the deep blue sea. The cure for that rests with management.

"But supposing that in spite of every effort to build up the foreman's prestige he is still open to persuasive influences and propaganda of outside interests that are perhaps not entirely disinterested, then are we, under P.C. 1003, to sit quietly by and just let that go on without discussing it with the foreman? Or can we sit down with him and indulge in freedom of speech and tell the foreman how we feel about it without intimidation, without interference, without influence, but still pointing out to him that he is an essential part of management and that if he forms himself into trade unions he is inevitably going into a system under which there must be divided allegiance between employer and union?

"These are days in which any remarks on free enterprise on the right of the individual are liable to be misinterpreted or criticized but I respectfully submit to these gentlemen who are here, and who have done us the honour of coming here, that if this Order in Council on collective bargaining is to achieve its objectives, which are set out in the preamble, then one of the cornerstones of that Order in Council and of its administration must be freedom of speech, not only for the employee but for the employer in the matter of collective bargaining."

Wartime Wages Control

In introducing for discussion the Wartime Wages Control Orders, Mr. J. F. Marsh, Deputy Minister of Labour for Ontario, pointed out in a brief review of the legislation that the objective underlying the several wage control Orders in Council was "to control wage rates in all wartime industrial and business enterprises throughout Canada." By this means, he said, it was intended to gain a measure of control of commodity process and thus hamper the development of any inflationary movement.

He pointed out that Canada was pioneering in wage control and outlined the process of administration through one national labour board and nine regional labour boards, one for each province. Without attempting "either to approve or condemn wage control", the Ontario deputy minister left the subject open for discussion.

The chairman of the session, Mr. C. W. Findlow, quoted figures, in which he indicated that there were now some 660,000 trade unions who were under the jurisdiction of two labour organizations—the C.C.L. and the T. and L.C. of Canada. He doubted if employers had a counterpart.

"In suggesting that a counter organization is necessary," he said, "I am not submitting that its policy should be militant or that it should be organized to combat the other counterpart. But if we are to bring organized economy out of this complicated picture that we are now in the midst of, it is necessary that these first-line organizations be got under way now so that we can effect proper dealings with Congress, meet them, deal with the problems and reach a solution as to the future current problems as they arise."

Mr. C. B. C. Scott of the Massey-Harris Company, and a former member of the Ontario Regional War Labour Board, urged employers not to "pass the buck" to the Regional War Labour Board when labour disputes occurred in their plants. Employers should refer disputes to the Board only after they had made earnest efforts to find solutions themselves.

Following Mr. Scott's address, members raised a number of questions relative to the operation of wartime wages legislation.

One questioner asked whether an industry must make application to the Ontario Regional War Labour Board for permission to establish a vacation with pay under the Ontario (1944) Hours of Work and Holidays With Pay Act.

Mr. J. F. Marsh, Deputy Minister of Labour for Ontario, replied that the Federal Government had taken cognizance of the Provincial

Act and by implication recognized it as not ultra vires. He stated further, that the inference followed from this that no application to the Ontario Regional War Labour Board would be necessary if an employer followed the Ontario law exactly.

Another questioner wanted to know if there was a way without giving names whereby information as to the rates approved by the Board could be made known to manufacturers. To this, Mr. Marsh replied that the Board felt it had no right to divulge the wage schedule of any employer to another employer without the consent of the first employer. However, the Board could disclose the rates currently paid in a locality for the various occupations without divulging names.

Still another questioner referred to the position of an employer who could not afford to grant holidays with pay and asked to what penalty would such an employer be subjected.

Mr. Marsh in his reply stated that there was no penalty written in the Act which would apply to anyone violating provisions for holidays with pay. The penalty is left entirely to the courts in case of prosecution.

Brigadier James Mess, Deputy Adjutant General, addressed the conference on what he termed "the most vital problem of the moment" recruiting for the armed services. He outlined the task he had undertaken of obtaining volunteers for overseas service from among civilians, the N.R.M.A. personnel, and, for women, from the C.W.A.C. He urged industrialists to re-assess their labour situations, to see if deferments could be further reduced and to make sure that all employees had cleared themselves with the armed services.

President Lane on Manpower

In his annual review of the activities of the Association, the retiring President, Mr. F. P. L. Lane, commented on the manpower situation as follows:

"At the close of his address in the House of Commons on April 28, 1944, the Hon. Humphrey Mitchell, Minister of Labour, said that the task of National Selective Service will be:

"'First, to provide the required men for the armed services; second, to meet the labour needs of agriculture; third, to place in employment men discharged from the armed forces; fourth, to meet, as they develop, the urgent needs of certain key industries; fifth, to place men laid off as a result of changes in munition production schedules as quickly and efficiently as possible.

"'Over the next year it appears that the general shortage of manpower will continue, yet there will be in certain localities at certain periods areas of local, though temporary unemployment. This is inevitable in a changing war economy.'

Collective Bargaining, Conciliation and Arbitration of Disputes

"The industrial relations question uppermost in the minds of employers in wartime is how to ensure employer-employee relations that will keep production at a maximum. To this end, it is all-important that strikes, stoppages, slowdowns and disturbances of all kinds should be eliminated. Now that a Dominion labour code, the Wartime Labour Relations Regulations, has been promulgated, employers are doing their utmost to make the new system work, that is, the new system of collective bargaining through representatives chosen by the employees concerned, whether trade unions or independent organizations, and the complementary system of conciliation and arbitration of disputes. Manufacturers naturally hope that the new system will work better than its predecessor; they feel, however, that it can hardly be expected to do so unless firmness and consistency are shown in its administration, and the prescribed penalties are applied, regardless of which side to the dispute is at fault.

Wage, Salary and Price Control

"Manufacturers are as convinced as ever of the wisdom of the Government's policy of preventing disastrous inflation by maintaining ceilings on prices and on wages and salaries. They realize that these two ceilings stand or fall together, and that they can only be maintained by the co-operation of government, employers and employees, producers and consumers, in fact all the elements in the community. This question assumes increasing importance as we get nearer the end of the war, for the reason that inflationary prices in the post-war period would have a very disturbing effect on the whole population, as they would tend greatly to restrict employment at a time when, from every point of view, it is essential that employment should be kept at a maximum.

Manufacturers and Social Security

"Manufacturers have taken note of the far-reaching proposals that have been put forward in recent months for a very elaborate extension of our existing social security measures. These new proposals are sometimes spoken of as designed to provide social security or protection against sickness, accident, unemployment and old age. In considering these far-reaching proposals, manufacturers have in mind that we already have in Canada well-established systems of workmen's compensation and unemployment insurance. We have also had for some seventeen years a system of old age pensions, which, it is true, cannot be regarded as very satisfactory, since it is based on the non-contributory, deserving-poor principle, instead of the contributory, 'all-in' principle which has long been recognized as the sounder of the two. As regards the proposed new system of health insurance, manufacturers are very much interested; many of the larger firms have instituted private health insurance schemes; and manufacturers generally are sympathetic to the idea of steps being taken to improve the health of the community at large by proper preventive and curative measures. The question in their minds, however, is whether the only national scheme put forward up to the present is not out of line in respect of cost with their experience in connection with their

private schemes, and whether there is available anything approaching the hospital facilities or the number of doctors or nurses that would be required, if the proposed scheme were inaugurated in the near future.

"As regards the new social security program generally, the question is whether we in Canada should not build on what we have already, which in certain fields, for example, workmen's compensation, unemployment insurance, child welfare, is as good as anything in the world, and add to it, in the light of our special Canadian conditions, instead of trying to transplant to Canadian soil systems which have been built up in response to the needs of countries where conditions are different from ours."

Social Security

"Social Security" was the general theme considered at the final session of the Conference. Mr. E. R. Complin presided and the first speaker was the Hon. Dr. R. P. Vivian, Minister of Health for Ontario. He discussed the question of "Health as Part of the Social Security Program". He stated that many Canadian industrialists were keenly interested in the health of their employees, pointing out that more than 300 doctors are employed either as full or part time physicians in industrial plants in Canada, and that over 60 physicians are conducting physical examinations of workers on a fee basis for those in plants of less than 1,000 employees. However, in 70 per cent of the factories with over 200 employees there were 200,000 men and 74,000 women with no organized health service, other than first aid for accidents.

In developing a program for the prevention of illness the first consideration must be in the public health field, Dr. Vivian asserted. Recent amendments to the Ontario Public Health Act provided for a full time community health service through the medium of municipalities. He claimed that much effective work had been done in industry by the inspectors under the Factory Act who work with the Division of Industrial Hygiene but that this awaits further development. The speaker emphasized that no amount of inspection can take the place of active interest in health measures by both employees and employers.

Dr. Harris McPhedran, President of the Canadian Medical Association, spoke on the attitude of the Association towards health insurance. He indicated that the Association went on record at its January meeting "as in favour of the principle of contributory health insurance" with two stipulations:

(1) that the plan secure the development and provision of the highest standards of health services, both preventive and curative, and

(2) that it be fair both to the insured and those rendering the service.

Other subjects and speakers were as follows:

"Social Protection of the People"—Dr. Charlotte Whitton, M.A., O.B.E.;

"Rehabilitation Program for Men in the Forces"—W. S. Woods, Associate Deputy Minister, Department of Pensions and National Health;

The International Labour Conference on Demobilization and Rehabilitation—P. Waelbroeck, Assistant Director, International Labour Office;

"Actuarial Basis of the Proposed National Health Act"—H. H. Wolfenden, Consulting Actuary and Statistician;

"Canada and Immigration"—Watson Kirkconnel, Professor of English, McMaster University;

"Budgeting the Cost of Medical Care on a Non-Profit Basis"—Dr. J. A. Hannah, Director, Associated Medical Services.

Notes of Current Interest

Study of international trade combinations

The undertaking of a study of international trade combinations and their relationship to Canadian interests, was announced by the Minister of Labour, Honourable Humphrey Mitchell, in the House of Commons on July 24.

The study is being made under the direction of Mr. F. A. McGregor, Commissioner of the Combines Investigation Act, in consultation with members of the Advisory Committee on Economic Policy.

Discussing the study, the Minister quoted a letter he had written to Mr. McGregor on May 22, as follows:

Problems relating to international trade combinations such as international cartels and international patent arrangements have assumed great significance because of the possible effect of such arrangements on employment and domestic and foreign trade. Already international discussions on the expert level have brought forward proposals on which we are not as yet in a position to give an informed judgment.

No comprehensive study has been made in Canada of the various aspects of the problems involved and no steps have been taken to assemble information which will be necessary before sound conclusions can be reached. Questions in regard to international trade combinations are continually being raised and no time should be lost in gathering adequate information as to the character and activities of international trade combinations and in considering possible measures of control.

As there is no legislation in Canada which applies to international cartels as such it is highly desirable that study be given in advance to existing Canadian legislation in regard to trade combinations in their general aspects and to what further measures might be adopted to deal specifically with international trade combinations.

Preliminary discussions on the relationship of cartel problems to other post-war economic problems have already taken place with officers of the Department of External Affairs, members of the Advisory Committee on Economic Policy and others . . .

What is here suggested is a study rather than a public inquiry. Its objective should be to secure basic information on which suitable government policy might later be based and in this respect would be in contrast to specific investigations to secure evidence of alleged offences. At various stages in the course of the inquiry it would be desirable to discuss with members of the Economic Advisory Committee the information obtained and recommendations suggested. In general I suggest that the study might proceed along the following lines:—

Study the nature and operations of international trade combinations in relation to Canadian interests and the measures which exist for their control. Such a study would include international patent arrangements. The committee should endeavour to find out to what extent policies followed by such trade combinations have affected employment or the operations of business enterprises in Canada or may affect them in the future. Attention should also be given to the effects of such arrangements on Canadian import and export trade and possible effects in the post-war period.

Study the extent to which activities of such international trade combinations are affected by existing Canadian legislation and what further measures may be necessary to safeguard the public interest. In this phase of the study consideration should be given to the possibilities of international collaboration in the control of cartels.

Study the relationships that may exist between international and domestic trade combinations, and make recommendations of necessary changes in existing legislation affecting combinations of either type.

Employment and industrial statistics

The table below shows the latest statistics available reflecting industrial conditions in Canada.

After five months of decline, the figures of the Dominion Bureau of Statistics show at June 1 an increase in industrial employment. The increase was decidedly below-average for June 1 in the years since 1920. The index was 180·5 at June 1 and 178·2 at May 1 as compared with 181·2 at June 1, 1943, and 113·1 at June 1, 1939. The 14,603 establishments reporting to the Bureau showed a total working force of 1,821,490 at June 1 which was 1·3 per cent greater than at May 1. The total weekly wages and salaries paid to these employees declined from the previous month by 0·1 per cent to $57,950,073 for the pay-

* Many of the figures in this table with an analysis are included in the Monthly Review of Business Statistics issued by the Dominion Bureau of Statistics, price $1.00 per year.

† Week ended July 27, 1944.

(1) Base, 1926=100. (2) Figures are for the end of the preceding month. (3) Base, June, 1941=100. (4) Base, 1935-1939=100. (5) Adjusted, where necessary, for seasonal variation. (6) Notes in the hands of the public (7) Figure for four weeks ended July 29, 1944 and corresponding previous periods. (8) Maclean's Building Review.

week ending June 1. The decline is due largely to the loss of working time occasioned by the observance of Victoria Day and partly to the seasonal increase in the employment of casual workers at lower rates of pay. Per capita weekly earnings receded from $32.26 at May 1 to $31.81 at June 1.

There was a further but smaller contraction in employment in manufacturing as a whole, most of which took place in iron and steel, non-ferrous metals and textiles. Mining declined also while logging, communications, transportation, services and trade increased. The greatest gain took place in construction, with highway construction increasing considerably more than building and railway construction.

The index of the physical volume of business receded in June to 238·8 from the relatively high level of 241·8 in the preceding month. This compares with 232·4 in June, 1943. Mineral production, manufacturing and electric power production averaged lower in June. The indexes for construction and for the distribution of goods recorded increases.

The index of the physical volume of business for the first six months of 1944 averaged 5·1 per cent higher than for the similar period in 1943. In the same comparison, the index of industrial production averaged 2·8 per cent higher and the index of employment 0·3 per cent higher; mineral production was 3·1 per cent higher and mining employment 1·9 per cent lower; manufacturing production 3·3 per cent higher and manufacturing employment 1·1 per cent higher; construction contracts awarded and building permits issued were 49·6 and 75·2 per cent higher, respectively, and construction employment 25·5 per cent lower. Also in the same comparison, export trade increased 38·4 per cent, import trade 2·9 per cent, carloadings 9·7 per cent, wholesale prices 4·4 per cent and the cost of living 1·2 per cent. Bank debits expanded 17·5 per cent and the circulating media 21·9 per cent.

Employment in Canadian coal mines for the first half of this year averaged 25,720 as compared with 24,293 for the first half of 1943. In comparison, production for the first six months averaged 1,397,782 tons in 1944 and 1,482,858 tons in 1943.

Revision of Post-Discharge Re-establishment Order

A revision has been made of the Post-Discharge Re-establishment Order. This Order sets forth the benefits payable to discharged members of the Armed Forces to facilitate their re-establishment in civil life. (L.G., June, 1944, p. 698; May, 1943, p. 587.)

The revision is made by Order in Council P.C. 5210, July 13, 1944. It brings together recent amendments, and re-words the provisions of the Order in simpler language. The revised text is available from the Department of Pensions and National Health, Ottawa.

On page 1019 of this issue appears an article describing the actual procedure through which veterans in Canada are being assisted in re-establishing themselves in civilian life.

Alternate Chairman of National War Labour Board appointed

By a recent Order in Council, Judge J. C. A. Cameron of Belleville, Ontario, has been appointed Alternate Chairman of the National War Labour Board.

The Order provides that the Alternate Chairman "shall preside over the National War Labour Board in the absence of the Chairman and for such purpose shall be a member of the said Board and shall have the voting rights of the Chairman thereof", but that he shall not have a vote at any meeting of the Board when the Chairman is present.

The Order in Council in its preamble explains that the appointment of an Alternate Chairman is for the purpose of expediting the business of the Board when the Chairman is absent.

The same Order in Council provides that the Vice-Chairman of the Wartime Labour Relations Board shall not have a vote at any meeting of that Board when the Chairman is present.

Strike of employees of Montreal Tramways Company

A recent strike of the employees of the Montreal Tramways Company ended when an Order in Council was passed appointing two controllers to take over the properties of the company for a sixty-day period and making it the duty of the employees to return to work. An account of the background of this dispute, including the reports of the Board of Conciliation and the text of the Order, appears on page 971 of this issue.

Commenting on the Order in the House of Commons, the Minister of Labour declared:

"I need scarcely say that the Government has taken this action in the public interest. A continuation of the strike might well result in grave injury in two ways: further great inconvenience to the population of the district of Montreal in not having local transportation facilities, and, war production, already seriously threatened, increasingly impaired if the strike continued.

"The interests of employees and employer involved in the strike are decidedly secondary to the public welfare and convenience. The issue is not of sufficient importance to warrant a strike in wartime.

"I want to make this point clear: the action of the Government is not to be understood as lending support to the proposition that it intends to compel any worker to relinquish freedom of choice as to the union which he wishes to join, nor should the action be construed as any departure whatever from the principles laid down in the Wartime Labour Relations Regulations, which provide that employees and employer have freedom of contractual collective bargaining.

"The public of Montreal are to be congratulated on the calm way in which they have accepted the inconvenience due to the strike and for readily accommodating themselves to the situation resulting therefrom."

Threshing outfits given special border crossing arrangements

Reciprocal arrangements have been made between the United States and Canada, permitting grain threshing outfits of each country to cross the border freely and to work in the other country, according to an announcement made by the Honourable Humphrey Mitchell, Minister of Labour, on July 2.

Under the special arrangements certain border crossing formalities were temporarily suspended from July 7, to permit the exchange of threshing equipment and crews between Canada's Prairie Provinces and adjacent western States of the United States.

Canadian threshing outfits may remain in the United States until September 15 under this season's arrangement. United States machines and crews may enter Canada when their services are required, but may not remain longer than December 31. In their announcement of the plan, the Governments of both countries point out that similar arrangements were in operation during the last two years, and will continue for the duration.

The agreement takes account of the fact that the grain harvesting in the United States is earlier, as a rule, than in Canada, and that not only will the Canadian crews be back here for harvesting, but that American crews will also be entering Canada when needed.

The Minister explained that the negotiations had involved the co-operation of the Immigration Branch and the Dominion and Provincial Departments of Agriculture.

Index of cost of living unchanged

The Dominion Bureau of Statistics cost-of-living index for July 3, 1944, remained unchanged at 119·0. Price increases within the food group were balanced by declines in the fuel and lighting, and the homefurnishings and services groups. Substantial advances in quotations for potatoes, lamb and the higher quality cuts of beef, and lesser ones for carrots and eggs were mainly responsible for a rise in the food index from 131·1 in June to 132·0 in July. Poorer quality cuts of beef and prices of cabbage averaged lower. The fuel and lighting index dropped from 112·5 to 108·9 following general reductions in domestic electricity rates within the Province of Quebec and scattered decreases in Prince Edward Island, New Brunswick, and Ontario. Minor declines for cleaning supplies reduced the homefurnishings and services index from 118·4 to 118·3. Other group indexes remained unchanged, rentals at 111·9, clothing at 121·5, and miscellaneous items at 109·0. After adjustment to the base August, 1939 as 100·0 the index was 118·1 at July 3.

Centenary of the co-operative movement

British co-operators are celebrating this year the centenary of the founding of the "Rochdale Equitable Pioneers Co-operative Society"—generally regarded as the founders of consumers' co-operation in its modern form.

The New Statesman and Nation in its issue of June 24 points out that from this humble origin, "over the past century, consumers' co-operation has spread around the world, establishing itself strongly in almost every developed country."

It is recalled that "a world survey recently published by the International Labour Office* recorded a total of 143,000,000 co-operators in the five continents, organized into 810,000 societies". Of this total, 9,000,000 are members of co-operative stores in the British Isles —"well over one-quarter of the total consuming public in Great Britain". From the point of view of the number of societies and total membership in any one country, Russia takes the lead with 286,595 societies and a membership of 60,380,000. Prior to the war, the co-operatives had made extensive progress in most of the other leading countries of Europe, as well as in Asia, America, and to a lesser degree in Oceania and Africa. However, Germany has in recent years discountenanced the movement, not only at

* *Co-operative Organizations and Post-War Relief*, Montreal, 1944.

home, but in all the occupied countries, and their present status is to some extent problematical.

It is stated in the I.L.O. report that certain leaders in British public life have "urged study of co-operatives as a possible pattern of post-war reconstruction". In trade union circles also, "the opinion has been expressed that the co-operative movement is well adapted to play a useful part in the tasks of post-war reconstruction". It is noteworthy too, that the National Rural Life Conference, held in June, 1943, in the United States, "proposed the rehabilitation of the co-operatives of all countries of the world," with a view to organizing post-war relief programs "on a co-operative basis, so that relief will not pauperize, but will contribute to self-help activities on the part of those so assisted."

Joint industrial council in British printing industry

Reorganization of the Joint Industrial Council of the printing industry was put forward in a report on post-war planning by the Printing and Allied Trades Federation. Formed in 1919, incorporating features of both the Whitley Report of 1917 and of a "betterment scheme" proposed by a committee of employers and workers in the trade, the Joint Industrial Council has 70 members, 35 from the British Federation of Master Printers and the Newspaper Society and 35 from trade unions affiliated to the Printing and Kindred Trades Federation. It considers a wide range of subjects of mutual interest but negotiation of wages is carried on by the unions and employers' associations as before. Committees established by the council deal with such matters as finance, organization, conciliation, health, fair prices, unemployment and apprenticeship. District committees have executive power only over their particular area. In case of a local dispute, no strike or lockout may take place until the dispute has been referred to the district committee or to a conciliation committee of the Joint Industrial Council. One factor which has contributed to the success of the council is that national agreements on wages and hours had been made before the council was formed.

As a measure to strengthen the J. I. C. the report suggests that all collective agreements should be submitted to the committee of the J. I. C. and registered as standard agreements. All employers and employees would be registered with the council and no union or union member would try to impede production in a registered firm so long as this relationship continued. Employers would be able to select their own registered employees while registered employees would be required to withdraw their labour from a deregistered firm. Standard selling prices and wages would be subject to the approval of an independent board. These proposals have been advanced by the union for the council's consideration.

New factory orders in Britain

Two new Orders providing for increased safety, health and welfare in certain types of factories have been made recently by the British Minister of Labour and National Service under the authority of the Defence (General) Regulations, 1939.

The Factories (Testing of Aircraft Engines, Carburettors and Other Accessories) Order, made on April 25, 1944, and to come into operation on August 1, applies to all factories in which the testing of aircraft engines, carburettors or other accessories is carried on. It imposes on the occupiers of factories, and on other persons where appropriate, requirements for minimizing the risk of fire and explosions, including provision of proper drainage arrangements for the escape of gasoline fumes, the use of flame-proof electrical apparatus and fire-proof protection in testing rooms, means of escape in case of fire, fire-extinguishing equipment and prohibition of smoking and the use of open flames.

The Patent Fuel Manufacture (Health and Welfare) Order of April 27, provides for the observance in patent fuel works of certain requirements with respect to ventilation, suppression of dust, washing facilities and clothing accommodation, eating-places, medical supervision and examination, and the protection of the employees' eyes and skin. It came into operation on May 1 except for the provisions necessitating structural changes which will not come into force until August 1.

Report on British herring industry

The Committee on the Herring Industry in Britain, appointed in 1942 to review the position of the industry, has published a report which includes a section on labour conditions in the industry and plans for improving them.

While the first necessity is for a minimum wage, a scheme of social insurance should also be worked out to cover fishermen and shore workers. The appointment of a joint industrial council is recommended to carry out these proposals. It is suggested that levies on the industry may also be necessary to obtain funds to finance these projects.

Women's equal pay laws in New York and Illinois

Laws prohibiting discrimination in the rate of pay because of sex became effective in Illinois and New York on July 1, making a total of five States with such legislation.

The New York law applies to all women in any industry or employment except domestic servants, farm labourers or employees in non-profit institutions which are operated exclusively for religious, charitable, scientific, literary or educational purposes. The measure specifies that "a differential in pay between employees based on a factor or factors other than sex shall not constitute discrimination within the meaning of this section". This provision, according to the law's sponsor, was designed to cover situations where a woman replaces a man whose value was based on knowledge acquired during long service. The State Commissioner of Labour has set up an Advisory Equal Pay Committee, consisting of representatives of labour, industry and the public, to consider the problems involved in relation to job analysis, standards and the education of employers and employees on the subject.

The Illinois law was passed a year ago. It prohibits the payment by any employer employing six or more males and females in the manufacture of any article of different rates to men and women except when based on a difference of seniority, experience, training, skill, services performed (whether regularly or occasionally), availability for other operation, or any other reasonable classification except difference in sex.

Effects of long working hours in U.S.A.

The Bureau of Labour Statistics at Washington has recently completed the first part of a study on the effects of the lengthened work-week in six metal-working plants operating in wartime under two or more different schedules of hours. One of the case studies has been completed and the findings, together with tentative conclusions on the other cases, are covered in the June issue of the *Monthly Labour Review*.

So far the Bureau's study shows that when the work schedule is lengthened absenteeism tends immediately to shoot up. In one case the absentee rate varied little under a five-day and six-day week, so long as the work day was only eight hours. But when the daily hours were increased to nine and a half, even though the five-day week was restored, absenteeism nearly doubled.

On the relation of accidents to hours of work, the data collected thus far are fragmentary. One case, however, showed that injuries under a fifty-eight hour week were twice as great as those under a forty-eight hour week.

With regard to production, the study finds that over an extended period hourly production dropped on a schedule of more than forty hours. This result may be explained in part by the fact that when daily hours go beyond eight, the mid-week production peak is usually eliminated. Under the eight-hour, five-day week, the hourly output of employees actually at work was found highest on Wednesdays and Thursdays. When hours were raised to ten a day, but the five-day week retained, one day's production was about the same as another. When a sixth day was added, the entire level of production dropped.

Federal control of homework in United States

Persons employed in their own homes on articles to be shipped across State boundaries are, with respect to wage rates, within the scope of the minimum ratio fixed under the Fair Labour Standards Act, 1938.

The Administrator of the Act is directed to stipulate any conditions he considers necessary in order to prevent the circumvention or evasion of the minimum rate or other provisions of the Act, or of any wage-order. Under this authority he may place restrictions on home-work on articles covered by a wage-order. Up to the end of June, 1944, six orders prohibiting home-work in certain industries, with some exceptions, were issued after public hearings. These were: the manufacture of jewelry, knitted outerwear, women's apparel, gloves and mittens, buckles and buttons, and handkerchiefs. By an order of June 26 the embroideries industry was added.

An article in the June issue of the United States *Monthly Labour Review* outlining the history of home-work legislation in the United States, points out that a sharp distinction is made between work at home based on skill in a particular handicraft, and hand or machine-work which can be done equally well or better in a factory. In addition, the orders permit, by certificate, work at home by any person who is unable to take up factory work because of age or physical or mental infirmity, or because he is needed at home to attend to an invalid.

Threat of employer to withhold benefits ruled illegal

The U.S. Court of Appeals for the District of Columbia distinguished in a recent ruling between statements an employer may legitimately make in the period before a National Labour Relations Board election among his employees and statements

that are "coercive in nature, constituting interference."

The question arose in connection with an appeal from a decision of the N.L.R.B., by which a company was held to be guilty of interference with the self-organization of its employees, because of its conduct in the pre-election period.

As a means of convincing the employees that the union was unnecessary, the company had issued a letter listing the benefits it offered the employees and appealing to their gratitude for these benefits. Such a letter, the court held, was legitimate on the part of the company, but efforts made, with the help of supervisors, to suggest that the liberal labour policy would be lost if the union was organized, were ruled by the court as definitely coercive.

The court differed with the N.L.R.B., however, in its contention that the company was guilty of an unfair labour practice in granting a general wage increase during the organizing campaign in order to forestall union success. Such conduct, the court held, cannot be deemed interference.

A.F.L. and C.I.O. agree on seniority formula for war veterans in United States

According to articles in the New York *Herald Tribune* for July 20 and 25, the American Federation of Labour and the Congress of Industrial Organizations, after negotiating with the Veterans of Foreign Wars, have concluded an agreement concerning preferential treatment for veterans of the present war upon their return to civilian life.

The agreement is embodied in a general statement of policy of the labour groups on post-war relations with veterans, and while it will not be binding on individual unions, the A.F.L. and C.I.O. will recommend its adoption by their member unions.

The policy agreed upon is reported to cover the following points:—

(1) Seniority rights should be granted to returning veterans on the basis of one month's seniority credit for each month in the armed services since September 1, 1940. Applicable in unions where work assignments are based on length of service, seniority should be extended to cover men who were not employed before entering military service and those who worked, but were not union members.

(2) Qualified, skilled veterans should be entitled to union membership at pre-war initiation fees and current dues rates.

(3) Disabled veterans unable to take over their former jobs should be given consideration for any other work by their old employer.

Under this policy it would be possible for a young man who served in the army or navy of the United States and who has had no previous experience or union membership, to receive full credit for his military service after September 1, 1940, in connection with obtaining a job in a unionized plant.

"Go-to-school" drive in United States

A "go-to-school" drive to persuade those under 18 to give up their jobs and return to school in the fall has been undertaken by the U.S. Office of Education and the Children's Bureau of the Department of Labour. The War Manpower Commission has endorsed the program and the Office of War Information is lending full co-operation.

The Government agencies sponsoring the scheme realize that in some areas vital war work must be done by students, and in these cases, where it is possible, a combination of work and school is advocated. Since 1940-41 when the all-time high was reached of almost 7½ million high school students in the United States, a drop of 1,000,000 has taken place in enrolment. A simultaneous increase of 300 per cent in the number of youth of high-school age at work has occurred. Last October half of the school-age youth who had been working in the summer were still at work although school had started. The Government considers that these figures indicate the need for an organized effort to induce young persons to return to school.

Since young persons are more susceptible to local influence, several communities have already planned to hold their own "go-to-school" drives. The Government urges that local committees should be formed with representatives of every section of the population—teachers, employers, unions, civic, churches, and young peoples' groups.

Education for Victory, issued by the U.S. Office of Education, contains ten suggestions for action, including the establishment of a policy regarding credit for work experience; arrangement with employers of schedules of work that do not conflict with school where student part-time labour is essential; the writing of a letter by the high school principal to each student who was registered in the spring, pointing out the importance of returning to school; communication by parent-teacher committees with parents of working children through telephone calls, home visits and letters.

Labour-Management Committees in Nova Scotia Coal Mining Industry

WITH the assistance of the Industrial Production Co-operation Board, some twenty labour-management committees have been set up to improve production in the coal mines of Nova Scotia. These committees each consist of three representatives of the company and three of the workers. To co-ordinate their work, six regional production committees have been set up, composed of one representative of management and one of labour from each local committee.

The committees are working to promote fuller understanding between labour and management; the reduction of absenteeism; the efficient transportation of materials, personnel and products; the elimination of waste effort; changing of obsolete practices; the elimination of unnecessary planning or routine; and other production problems.

Recently Mr. H. Carl Goldenberg, Chairman of the Industrial Production Co-operation Board, and Mr. M. M. Maclean, Board member, attended a series of conferences with officers of the Dominion Steel and Coal Corporation and of District Number 26 of the United Mine Workers of America to discuss problems of the coal mining industry.

A statement concerning these conferences was made in the House of Commons recently by Mr. Paul Martin, Parliamentary Assistant to the Minister of Labour, in reply to a question by Mr. Clarence Gillis, Member for Cape Breton South.

Mr. Martin declared:

"In May and June, 1944, the Industrial Production Co-operation Board concluded agreements between the coal operators of Nova Scotia and District Number 26 of the United Mine Workers of America for the formation of joint labour-management production committees in each mine and for the purpose of discussing all possibilities of improving and increasing coal production.

"Following these agreements, Mr. H. Carl Goldenberg, Chairman of the Board, summoned a conference of the coal operators and of the miners to be held in Sydney, Nova Scotia, on July 12 and 13, with a view to inaugurating the joint production committee and to discuss all aspects of the problems responsible for the decline in coal output, as well as possible means of increasing output.

"Mr. Goldenberg and Mr. M. M. Maclean, a member of the Board, proceeded to Sydney for these conferences. The conferences were attended by a large representation of both operators and miners. The conferences were marked by a full and frank discussion of the problems facing both operators and miners in the Nova Scotia coal mining industry. The discussions led to a clarification of a number of issues, and to a better understanding of mutual grievances.

"The principal agreement reached at the conference was that both operators and miners undertook immediately to consider all causes, such as absenteeism, presently interfering with maximum coal production, at meetings of the joint production committees, the first of the series being held on Monday of this week, July 17. It was further agreed that meetings of these committees are to be held twice every month at each mine, and that the operators and the miners would submit for consideration to each meeting problems affecting coal production as each side sees them, together with recommendations for solutions or improvements. Each side also undertook to give immediate consideration to all recommendations, the operators to put such recommendations as are acceptable and feasible into effect as soon as possible, and the union to urge its members to act accordingly. Reports of these meetings and of the progress made are to be submitted regularly to the Industrial Production Co-operation Board, which will continue to assist in the operations of the committee in so far as is necessary.

"The conference also discussed the recent closing down on Saturday morning of the two mines, number 4 and 11. The company advised that it was considering reopening these mines on Saturdays if the rate of absenteeism was reduced. Before the termination of the meetings the miners were advised by the Dominion Coal Company that these two mines would be open on Saturday, July 15, and on that day they were open for work.

"It is anticipated as a result of these conferences, and more particularly of the functioning of the joint production committee, that coal production problems will receive more immediate, more careful and more serious consideration. They will be considered both at the level of the mine production committee and of the district production committee, the latter covering a number of

mines. If both parties show the good will and co-operation which they showed at the conferences attended by Messrs. Goldenberg and Maclean, there should be an improvement in the coal situation. The Industrial Production Co-operation Board now has this matter in hand, and will follow up on the conferences as the situation requires it.

"I may say the conferences in Nova Scotia are in accordance with the policy laid down by the government sponsoring the formation of labour-management production committees in industry. A large number of these committees are now functioning across Canada, and the staff of the Industrial Production Co-operation Board is constantly engaged in setting up more of these committees. Not only in the coal mines, but in all industry, joint production committees should constitute effective machinery for the discussion and solution of production problems by labour and management on a democratic basis."

Recent Manpower Control Measures

THREE Orders in Council relating to manpower were passed during July. Of these, two provided for the postponement from military training of two essential classes of workers, coal mine workers, and coal delivery-men. The third revises the regulations concerning conscientious objectors.

Coal Mine Workers

An Order of July 14 (P.C. 5419) sets August 1, 1945, as the date up until which no coal mine worker is to be accepted for enlistment in any branch of the armed forces without the permission of a Selective Service Officer. Previously the date had been August 1, 1944 (L.G., Feb., 1944, p. 157).

Coal Delivery Men

As a measure to provide for the retail delivery of needed coal supplies for the coming winter an Order has been passed (P.C. 5771, July 27) providing for temporary postponement from military training of "persons engaged or employed in the actual delivery of coal." Postponement is until February 1, 1945. Voluntary enlistment of such persons is also restricted. A similar Order was passed last September (L.G., Oct., 1943, p. 1334).

Conscientious Objectors

The regulations concerning conscientious objectors (Part II A of National Selective Service Civilian Regulations) have been revised and consolidated to include recent amendments (L.G., April, 1944, p. 450). Certain minor alterations have been made in the text to facilitate administration. The Order in Council affecting the revision is P.C. 5130, dated July 6.

Trade Union Membership in Canada

ACCORDING to the annual survey of the Research and Statistics Branch of the Department of Labour, trade union membership in Canada at December 31, 1943, was 664,282* as compared with 578,380 at the end of 1942.

The estimate of trade union membership in Canada at June 30, 1944, is 690,000.

Since the outbreak of war in 1939 union membership has almost doubled. A similar growth occurred in the war of 1914-18, according to records kept in the Department of Labour.

The following figures show trade union membership at certain periods during the last 30 years:—

1914	166,163
1918	248,887
1919	378,047
1922	276,621
1924	260,643
1927	290,282
1930	322,449
1931	310,544
1935	280,648
1937	383,492

The annual report of the Labour Department on *Labour Organization in Canada* covering the calendar year 1943 is in process of preparation.

* Subject to revision.

Reconstruction and Social Security

Employment Policy in Great Britain

Government Accepts Responsibility for Maintaining High Level of Employment After War

A DOCUMENT that has aroused keen interest both in Great Britain and abroad is the British Government's White Paper on *Employment Policy*. In it the British Government accepts responsibility for the maintenance of a "high and stable level of employment" after the war. In view of the importance of this declaration, the LABOUR GAZETTE presents herewith a summary of the principal means by which the British Government intends to accomplish its policy.

In its war on unemployment, the Government contemplates as little interference as possible with private ownership of industry. The Paper contains a chart showing that during the past 80 years the level of employment has been constantly varying from low to high levels, approximately ten booms and ten depressions having occurred during the period. It is the Government's intention to wipe out these cycles by taking action whenever unemployment threatens.

Cause of Unemployment

The main reason why workers lose their employment, the Paper declares, is a decline in the amount of money spent on the goods and services which they produce. If more money is spent on goods and services, then more money will be paid out as wages, and more people will be employed. "Thus, the first step in a policy of maintaining general employment must be to prevent total expenditure from falling away," the Paper states. The Paper points out also that a small decline is capable of rapidly gathering momentum and taking on the proportions of a major depression.

> If, for example, there is a decline in the demand for steel for the erection of new buildings, unemployment will first appear among steel workers. The steel workers, in consequence, will have less to spend on food and other consumer goods, so that the demand for consumer goods will fall. This leads to unemployment among the workers in the consumer goods industries who, in turn, find their purchasing power reduced. As a result of this general loss of purchasing power in the community, the demand for new building is still further reduced and the demand for constructional steel falls once again. The original decline in expenditure produces secondary reactions which themselves aggravate the source of the trouble. This is an over-simplified illustration, but it is sufficient to make it clear that the crucial moment for intervention is at the first onset of the depression. A corrective applied then may arrest the whole decline; once the decline has spread and gathered momentum, interventions on a much greater scale would be required—and at that stage might not be effective.

"The Government," the Paper continues, "are prepared to accept in future the responsibility for taking action at the earliest possible stage to arrest a threatened slump.

> This involves a new approach and a new responsibility for the State. It was at one time believed that every trade depression would automatically bring its own corrective, since prices and wages would fall, the fall in prices would bring about an increase in demand, and employment would thus be restored. Experience has shown, however, that under modern conditions this process of self-recovery, if effective at all, is likely to be extremely prolonged and to be accompanied by widespread distress, particularly in a complex industrial society like our own.

Total Expenditure

The methods by which the Government proposes to maintain total expenditure are described below.

Total expenditure in a country, the Paper states, is made up of five items, as follows:

(*a*) *Private consumption expenditure*

Spending by individuals on food, clothing, rent, amusements, etc.

(*b*) *Public expenditure on current services*

Expenditure by public authorities on education, medical services, maintenance of the armed forces, etc.

(*c*) *Private investment expenditure*

Capital expenditure by private industry on buildings, machinery and other durable equipment and on additions to goods in stock.

(*d*) *Public investment expenditure*

Capital expenditure on buildings, machinery, roads and other durable equipment by the central Government, local authorities or public utilities.

(*e*) *The foreign balance*

The money that a country spends on imports does not directly lead to employment at home; on the other hand some employment at home arises out of goods sold abroad. The difference between exports and imports constitutes the fifth item (sometimes a minus quantity) in the list of the constituents of total expenditure.

Under conditions of full employment, it is considered that spending by individuals (item (*a*)) would remain reasonably stable; and it is within the power of the Government to control the rate of expenditure under items (*c*) and (*d*).

Of the five items it is private investment expenditure which, through its instability, is the most to blame for causing unemployment in the majority of industrialized countries. At the same time, the Paper points out, it is very difficult to control.

> A business man deciding whether it is worth his while to sink more capital into his business will be influenced by a very wide range of considerations: whether his market is likely to grow or decline; what his competitors are doing; whether prices are likely to go up or down; whether the latest type of machinery is much superior to his own, and so on. It is in practice impossible to foresee with any certainty what decisions business managements will reach on these matters: the prevailing atmosphere of optimism or pessimism, particularly in periods of rapid industrial change, probably has as much influence on them as any independent analysis of the facts.

International trade is also subject to considerable variations which affect employment; and this item is particularly important to Great Britain whose export trade before the war provided employment for about one and three-quarter million persons.

Guiding Principles in Maintaining Total Expenditure

The Paper lists the guiding principles of the Government's policy in maintaining total expenditure as follows:

> "(*a*) To avoid an unfavourable foreign balance, we must export much more than we did before the war.
>
> "(*b*) Everything possible must be done to limit dangerous swings in expenditure on private investment—though success in this field may be particularly difficult to achieve.
>
> "(*c*) Public investment, both in timing and in volume, must be carefully planned to offset unavoidable fluctuations in private investment.
>
> "(*d*) We must be ready to check and reverse the decline in expenditure on consumers' goods which normally follows as a secondary reaction to a falling off in private investment."

The successful application of the first of these principles, and the achievement of the goal of increased exports will depend on prosperity in overseas markets, the Paper states. Great Britain therefore intends to pursue a policy of co-operation with other nations to re-establish general economic stability after the war and for the general expansion of trade. However the "responsibility and initiative" for developing export markets must rest with industry. The Government will endeavour to give what help it can at home through its taxation policy and other special measures, part of its policy of maintaining total expenditure, described below.

Government Action to Maintain Total Expenditure

The Paper discusses six measures by which the Government proposes to maintain the volume of expenditure within Great Britain whenever a decline in employment threatens.

1. *Interest rate*

"The possibility of influencing private capital expenditure by the variation of interest rates will be kept in view," the Paper states. However, monetary policy alone

> will not be sufficient to defeat the inherent instability of capital expenditure. High interest rates are more effective in preventing excessive investment in periods of prosperity than are low interest rates in encouraging investment in periods of depression.

2. *Long-range planning by business*

The Government intends to encourage privately-owned enterprises to plan their capital expenditure in conformity with a general stabilization policy. Each business will be asked to estimate its capital expenditure over a period of years, and to carry out such spending as much as possible in periods of threatening depression.

The Paper remarks, on this point:

> To a strong and well-established business, confident of its long-run earning powers, there are obvious attractions in executing plans for expansion or for the replacement of obsolete plant at times when costs are low. And a wider understanding of the social importance of the aims of employment policy should inform and reinforce the interest which business men as a whole undoubtedly have in evening out fluctuations in capital expenditure.

A further inducement would be provided, the Paper adds, if it were found practicable to adopt a device of deferred tax credits to stimulate spending at the onset of a depression.

3. *Long-range planning by government*

In co-operation with local authorities and public utilities the Government intends to undertake similar long-range planning in regard to public capital expenditure. In the past, the Paper points out, capital expenditure by the various public authorities has followed the same trend as private expenditure—falling in times of slump, and rising in times of boom —and has tended therefore to accentuate the peaks and depressions of the trade cycle.

"In the future," the Paper states:

> Government policy will be directed to correcting this sympathetic movement. It should be possible for the Government to maintain the stability of public investment when private investment is beginning to fall off at the onset of a depression. But this may not be enough: for the purpose of maintaining general employment it is desirable that public investment should actually expand when private investment is declining and should contract in periods of boom.

Under the policy, all local authorities will submit annually to the appropriate Government department their tentative program of capital expenditure for the next five years. These programs will then be assembled, and will be adjusted upward or downward in the light of the latest information on the prospective employment situation. The Government will thus be able to set each year a target for the whole volume of public works in the succeeding year.

This policy does not mean, however, that public needs which are urgent will be postponed.

"In the past," the Paper observes,

> the power of public expenditure, skilfully applied, to check the onset of a depression has been underestimated. The whole notion of pressing forward quickly with public expenditure when incomes were falling and the outlook was dark has, naturally enough, encountered strong resistance from persons who are accustomed, with good reason, to conduct their private affairs according to the very opposite principle. Such resistance can, however, be overcome if public opinion is brought to the view that periods of trade recession provide an opportunity to improve the permanent equipment of society by the provision of better housing, public buildings, means of communication, power and water supplies, etc.

In regard to the financing of public works, the Paper asserts that while the policies proposed may prevent the balancing of the budget in a particular year, "they certainly do not contemplate any departure from the principle that the budget must be balanced over a longer period."

4. *Variation in rate of social insurance contributions*

The British Government has in mind the establishment of a system of social insurance, to be financed partly by contributions from employers and employees. It is proposed to vary the rate of contribution to this system, in sympathy with the state of employment. A standard rate would be established, such as would keep the fund in balance over a period of years. At times when unemployment threatened, this rate would be lowered; in good times it would be raised.

The effect of this scheme would be that each rise in the country's unemployment percentage over a certain level would decrease the total of workers' social insurance contributions; the additional money thus left in the hands of millions of people would help to maintain the demand for consumers' goods throughout the country, and thereby help to offset the decline in spending of those who had lost their employment.

5. *Variations in rates of taxation*

The Government has under consideration as another device for influencing the volume of consumption a scheme for adjusting the rate of income tax. Under this scheme, rather more taxation would be raised in prosperous times than was required to balance the budget. The excess would be treated as a credit repayable to the taxpayers in bad times.

6. *Government purchasing of consumer goods*

The Government purchases large quantities of certain types of consumer goods, such as boots, clothing and furniture. According to the Paper, all public authorities might adopt a policy of buying for stock when employment was flagging, and allowing their stocks to run down when trade was brisk.

Analysis and Prediction of Business Trends

It is proposed to set up a small central staff, qualified to measure and analyze economic trends and submit appreciations of them to the Government. Such a staff would obtain statistics on employment and unemployment; statements by industry on employment prospects; figures of production, consumption and stocks; information on savings and projected capital expenditure; and estimates of foreign capital movements and balance of foreign payments.

Particular importance is laid on the work of this staff, for the Government's employment policy will depend on quick and accurate diagnosis.

> A slump may develop with fearful rapidity; in 1920-21 unemployment rose from 5 to 15 per cent in four months. Again, it is essential that we should not mistake the disease and so apply the wrong remedy. If, for example, we were to try to cure by means of stimulating total expenditure an outbreak of unemployment which was really due to a temporary maldistribution of the labour force, we might create a dangerous inflation.

Stability of Prices and Wages

"Action taken by the Government to maintain expenditure will be fruitless unless wages and prices are kept reasonably stable," the Paper asserts. Employers and workers are asked to "exercise moderation in wages matters," in order that the increased expenditure provided by Government action at the onset of a depression may go to increase the volume of employment, rather than wages. Similarly there is the danger that additional money made available by the Government might be absorbed in higher prices and increased profit margins rather than going to increase output and employment.

The Government is aiming at stability in the cost of lviing. An increase in wages, under such a policy, would be justifiable if it were related to increased productivity. Otherwise changes in wages should only be brought about to correct anomalies, the Paper indicates.

Mobility of Labour

"In an economy which aims at keeping employment at its highest level, change will always be going on; new industries will be starting up, new processes replacing old; new ways of meeting consumers' demand will be under experiment," the Paper declares. In sympathy with these changes, stress is laid on the necessity of workers being able and willing to move to places and occupations where they are needed.

Balanced Distribution of Industry and Labour

A type of long-term unemployment which was persistent in Great Britain in the between-wars period was that which developed in particular industries, and was caused by "technical change, the trend of fashion, or the growth of foreign competition." The industries affected were mainly export trades, such as cotton and coal, and some of the heavy industries which had been greatly expanded during the last war.

Areas which were largely dependent upon such depressed industries showed heavy unemployment percentages, not only in the basic industries, but in subsidiary trades and occupations as well.

"The suffering in these areas," the Paper states, "was enhanced by their lack of a proper industrial balance."

At the present time these special areas are not depressed. To protect them after the war, the Government proposes to encourage the establishment of new enterprises in these areas, so as to diversify their industrial composition. Industrialists contemplating the establishment of new factories will be required to notify the Government, which will take steps to influence the choice of location.

It is intended also that obstacles to the transfer of workers from one area to another and from one occupation to another be removed. The Government will take steps to see that a substantial number of low-rent houses is erected, so that workers moving to new areas may secure accommodation, and will provide resettlement allowances for workers transferring under approved schemes. To facilitate desirable changes in occupation detailed attention will be paid to training programs, both within industry and under governmental auspices.

> The allowances granted to the trainees will be completely divorced from payment of unemployment benefit. The worker entering upon a course of training must be made to feel that he has left unemployment and unemployment benefit behind him and has started on a new job. Training allowances will be fixed on a higher scale than unemployment benefit, subject to the principle that they should not be so high as to provide a higher income than the general run of wages likely to be received by trainees in their first subsequent employment.

With the creation of conditions designed to produce full employment, the Government hopes that "all parties in industry will agree that existing rules and practices may safely be modified to allow the ready admission of trainees, provided that proper steps are taken to train them to a standard which will justify the payment of the recognized rate of wages". Care will also be taken that too many workers are not trained for any particular occupation.

Immediate Problems of the Transition Period

The Paper anticipates that there will be no problem of general unemployment in Great Britain in the years immediately after the end of the war in Europe.

> Government expenditure on aircraft, warships and munitions will naturally contract, though the needs of the Armed Forces are likely to remain high for a considerable time; on the other hand, the pent-up demand for civilian goods of all kinds will be released. There will be an immense need for all the things we have had to go short of during the war. There will be houses to be built, shops to be filled, factories to be transformed, plant and rolling-stock to be replaced and export trade to be renewed and extended.

However three dangers are anticipated.

1. *Patches of Unemployment*

In spite of the great demand for goods that is anticipated, the problem of transferring men and women from the armed forces and from war jobs into peacetime production will be tremendous. In many cases the transfer will not involve any change in employment, for workers in a munitions industry may be re-employed by the same firm as soon as its plant is converted to civilian production. However, "patches of unemployment may develop where the industrial system fails to adapt itself quickly enough to peacetime production."

The Government plans to reduce this type of unemployment to a minimum:

(*a*) by assisting firms to prepare to switch over their capacity to peacetime production as quickly as possible;

(*b*) by finding out in advance where the skilled labour which will gradually become available for civilian work will be most urgently required;

(*c*) by arranging, so far as war conditions permit, that labour and raw materials will be forthcoming for urgent civilian work and ensuring that the machinery of allocation devised in wartime will be adaptable to the special conditions likely to obtain after the end of the war in Europe;

(*d*) by aranging, so far as possible, that curtailments of munitions production shall take place in areas where the capacity and labour can be used for civilian products of high priority;

(*e*) by arranging that the disposal of surplus Government stocks shall not prejudice the re-establishment and development of the normal trade channels for producing and distributing similar goods;

(*f*) by regulating the disposal of Government factories in such a way as to help towards the early restoration of employment.

2. *Inflationary rise in prices*

A further danger will come, the Paper points out:

> when people relax from the discipline and strain of war, and look around for opportunities to spend the money they have saved and to make up for their years of self-denial. If there were then a scramble to buy, while there was still a shortage of goods, prices would rise. This would mean an inflationary boom —bringing with it the social injustice and economic disturbance which inevitably accompany inflation.

To avoid this danger, the Government asks for public support along the following lines:

(*a*) The Government will continue rationing and a measure of price control for some time, easing these restrictions as supplies of goods increase.

(*b*) The Government will attempt to provide a stable general level of costs. In this connection it asks for the co-operation of all sections of the public, and while pointing out that the cost of imports will be unpredictable, undertakes to continue its present policy of providing subsidies to prevent sharp rises in the cost of living.

(*c*) The habit of saving must still be encouraged. If, instead of saving, people spend too much on consumption goods, the Paper states, "labour and capacity which is needed for schemes of post-war reconstruction and social development will have to be diverted to incresing the supplies of consumption goods."

(*d*) "The use of capital will have to be controlled to the extent necessary to regulate the flow and direction of investment," the Paper states, without detailing the techniques considered appropriate for this purpose.

3. *Production of essential goods before luxuries*

In order to prevent the production of unessential goods from interfering with the production of essentials, certain broad priorities will be established and enforced "by means of the issue of licences, the allocation of raw materials, and some measure of control over the labour and staff required for industry."

Before luxury goods are produced, the Paper indicates, the country's resources must be applied to producing goods for the export trade, necessary civilian goods, and the capital equipment needed to bring industry to its highest pitch of efficiency.

Application of Policy

The Government recognizes that in extending state control over the volume of employment it is "entering a field where theory can be applied to practical issues with confidence and certainty only as experience accumulates and experiment extends over untried ground," the Paper states. "The whole of the measures here proposed have never yet been systematically applied as part of the official economic policy of any Government. In these matters we shall be pioneers. We must determine, therefore, to learn from experience; to invent and improve the instruments of our new policy as we move forward to its goal."

Progress of Health Insurance Measure

REFERENCE has previously been made in the LABOUR GAZETTE to the draft bill on health insurance that has been studied by the House of Commons Special Committee on Social Security (L.G., April, 1944, p. 441; 1943, pp. 433, 1082).

The Committee has completed its study of the draft bill, and has presented it to the House of Commons with the recommendation that it be now referred to the forthcoming Dominion-Provincial Conference "for consideration of its general principles as expressed in its various clauses, and of the financial arrangements involved."

The draft bill envisages the payment of grants by the Dominion to provinces which pass health insurance measures along prescribed lines. A model provincial health insurance act is annexed to the draft Dominion bill. To become eligible for Dominion assistance, a province would also be obliged to maintain certain specified public health services.

In presenting the draft bill on health insurance, the Committee on Social Security made reference to other topics coming within its consideration as follows:—

"Your Committee heard evidence and received briefs on other phases of social security, but they were unable to give detailed or adequate study to the whole subject, which involves also intricate financial and constitutional problems. Your Committee recommends that when possible, consideration be given to the extension of unemployment insurance, sickness cash benefits, funeral benefits and other measures which will help to provide protection against old age, illness and economic misfortune, and to the establishment of greater co-ordination, and the elimination of overlapping or duplication of existing measures of social welfare under Dominion and Provincial Governments."

Social Security in Saskatchewan

Final Report of Committee

THE Committee appointed in 1943 by the Legislative Assembly of Saskatchewan to study social welfare legislation and further measures of social security and health services (L.G., 1943, p. 857) made its final report on March 30.

Since the Committee considered that the social and health services desired by the people could not be financed wholly by the Province, it had to take into consideration the plans of the Dominion Government. It was assumed that a national program of social security developing certain of the suggestions contained in the Marsh Report would eventually be established. The Committee favoured such a national scheme. As a Draft Bill embodying a scheme of national health insurance was being considered by a Select Committee on Social Security of the House of Commons, the Saskatchewan Committee recommended that steps be taken so that the benefits of the Dominion Bill should be available in Saskatchewan as soon as Federal legislation is passed. The Saskatchewan Health Insurance Act passed by the 1944 Legislature (L.G., July 8, 1944, p. 915) provided for the administration of a provincial health insurance scheme.

Alternative recommendations were also made by the Committee for interim measures, or in case wider national schemes are not forthcoming. It was agreed that consideration should be given to making municipal medical schemes compulsory in all municipalities and local improvement districts. The Committee endorsed the steps already taken towards establishing a medical college in the University of Saskatchewan.

With regard to old age pensions, it was recommended that the Federal Government be requested to set up a contributory State-aided plan of superannuation, payable without a means test and with a disability provision. Pending this measure the Committee agreed that the present pension should be raised to $30 a month payable at 70 years of age for men and 65 for women with an income allowed of $500 per year; that the age requirement for pensions to the blind be reduced to 18 with $10 a month paid for each dependent child.

The increase in mothers' allowances granted last year after the recommendation of the 1943 Committee was approved but further increases were urged. As a result of this an Order in Council gazetted May 31 provided for increased payments up to $15 for the first child, $10 for the second and $5 for each additional child. Family allowances, the cost to be borne by the Federal Government, were

favoured. It was felt that all matters relating to child welfare and public welfare generally, contained in the briefs and representations submitted to both the 1943 and 1944 Committees, should be referred to the new Department of Reconstruction, Labour and Public Welfare for consideration and appropriate action.

Dealing with ways to meet the costs of these services, $7,200,000 annually as the provincial contribution to the proposed Health Insurance Fund and $1,300,000 for other expenditures entailed by their recommendations, the Committee proposed increases in the Public Revenue Tax and the Retail Sales (Education) Tax, and the imposition of a Poll Tax. It was felt that Saskatchewan, owing to circumstances peculiar to it, was entitled to seek special federal financial assistance to meet commitments of a health insurance and social security program. Also, since payment of doctors' bills would be guaranteed, the Committee was of the opinion that a substantial reduction in the schedule of fees as authorized by the College of Physicians and Surgeons should be obtained.

Recruitment and Training of Teachers in Great Britain

THE committee, appointed in 1942 by the Board of Education of England and Wales to study the supply, recruitment, and training of teachers and youth leaders, issued its report in April, 1944. The committee, of which the Chairman was Sir Arnold McNair, gives a comprehensive survey of the whole educational field and contains 40 recommendations dealing with recruiting, conditions of service, organization and content of training, staffing of training institutions, youth service and young people's colleges, technical schools, educational research and teaching aids.

With regard to the future supply of teachers the recommendations are based on three principles: that the field of recruitment must be widened, that conditions of service which deter people from becoming teachers must be abolished, and the standing of education improved so that it will be an attractive profession. Salaries must be substantially increased with one basic rate for the qualified teacher and additions for special qualifications and experience. Only the qualified teacher, that is one who has satisfactorily completed an approved course of education and training, should be recognized. Bad buildings, large classes and the narrow life sometimes imposed on teachers are all deterrents which must be removed. Teachers should be allowed to participate in public affairs with more generous staffing arrangements making this feasible. A maintenance allowance should be offered to men and women of mature years who desire to be trained for the teaching profession, and to pupils in secondary schools to prevent their premature withdrawal on economic grounds. The marriage bar should be lifted and suitable arrangements made to meet the needs of married women. Adult education authorities could give parents and others the opportunity of discussing the function of education in a community.

To organize the training of teachers, the Committee suggests that the President of the Board of Education appoint a central training council for England and Wales to advise the Board on the creation of regional training services. Two area training schemes were suggested, one with a university as the main authority, and the other utilizing the existing Joint Board, a co-operative arrangement formed by each university and the training schools grouped around it. The area authority would approve curricula and syllabi and be responsible for the final assessment of the student's work. The report recommends that the course in training colleges should be extended from two to three years, followed by one year's probation before full recognition is granted as a qualified teacher. The salaries of teachers in training colleges must approximate university levels. "Education Fellowships" would permit these teachers to give up teaching for a year or two to study education. The regulations should not debar technical teachers from research or the necessary contacts with industry or commerce. It is recommended that the Board invite suitable professional institutions to establish standing committees to promote co-operation between technical colleges and industry, enabling teachers to return periodically to industry and commerce and thus to keep abreast of their subjects.

Emergency training courses for youth leaders undertaken by the Government during the war should be examined with a view to deciding the nature and scope of such post-war courses for men and women youth leaders. The course should be three years of combined study and practice for those without special qualifications. The salaries of youth leaders should be comparable with those of teachers and their services pensionable.

Decisions of National War Labour Board.

DURING the month of July, the National War Labour Board issued decisions in the following cases:—

General Motors of Canada, Limited, and U.A.W.-C.I.O., Local 222.

William Kennedy and Sons, Limited, and United Steelworkers of America, Local 2469.

Exolon Company, Limited, and Federal Labour Local 22689.

Consolidated Mining and Smelting Company of Canada, Limited, and its employees working at or near Kimberley, B.C., and the International Union of Mine, Mill and Smelterworkers, Local 651.

Edmonton General Contractors' Association and United Brotherhood of Carpenters and Joiners of America, Local 1325.

Aluminum Company of Canada, Limited, and Le Syndicat National des Employes de l'Aluminium d'Arvida, Inc.

Canadian National Institute for the Blind (Vancouver, B.C.).

Tavern-Keepers Association of the Island of Montreal and Province of Quebec Hotel Association Inc. and Tavern Employees International Union, Local 200.

Naugatuck Chemicals, Limited (Elmira, Ont.).

Dominion Rubber Company, Limited (St. Jerome, P.Q.), and Rubber Workers' Federal Union, Local 144.

Aluminum Company of Canada Limited (Kingston Works), and Employees' Council Aluminum Company of Canada, Limited.

Atlas Coal Company, Limited, Murray Collieries Limited, Empire Collieries Limited, Maple Leaf Collieries Limited (all of East Coulee, Alta.), and United Mine Workers of America, District 18.

Hendrie and Company, Limited (Toronto), and Canadian Brotherhood of Railway Employees and Other Transport Workers.

Ste. Anne Paper Company, Limited (Beaupre, P.Q.), and International Brotherhood of Paper Makers and International Brotherhood of Pulp, Sulphite and Paper Mill Workers.

Lever Brothers Limited (Winnipeg, Man.).

Master Painters' Association of Saint John, N.B., and Brotherhood of Painters, Decorators and Paperhangers of America, Local 1151.

Fairchild Aircraft Limited (Longueuil, Que.), and Hotel and Restaurant Employees' Union, Local 382.

Bendix-Eclipse of Canada, Limited (Windsor, Ont.), and U.A.W.-C.I.O., Local 195.

Le Nouvelliste, Limitée; La Tribune, Limitée; L'Association des Hebdomadaires Canadiens-Francais, Inc. and other employers and La Federation des metiers de l'imprimerie du Canada Enrg., and International Typographical Union, Locals 672 and 856.

Kingston City Coach Company, Limited, and Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America, Local 1151.

The Royal Trust Company (Vancouver, B.C.).

The McKinnon Industries Limited (St. Catharines, Ont.), and U.A.W.-C.I.O., Local 199.

B.C. Motor Transportation Limited (Vancouver) and Amalgamated Association of Street, Electric Railway and Motor Coach Employees, Division 101.

John Inglis Company, Limited (Toronto) and United Steel Workers of America, Local 2900.

Various Railway Organizations and their Employers.

Brotherhood of Maintenance-of-Way Employees and Railway Association of Canada.

Canadian Brotherhood of Railway Employees and Other Transport Workers and Canadian National Railways.

John Inglis Company, Limited (Toronto) and United Steelworkers of America, Local 2900.

Dominion Bridge Company, Limited (Toronto) and United Steelworkers of America, Local 2808.

Vancouver Masonic Cemetery Association.

Canadian Pacific Railway Company and Brotherhood of Railroad Trainmen on behalf of dining car employees.

Re: General Motors of Canada, Limited and U.A.W.-C.I.O. Local 222

Reasons for Decision

(Oral Decision)

This application was made pursuant to Order in Council P.C. 9384 and it is evident to the members of the Board that the Regional Board gave consideration to all the circumstances, and after making an investigation and considering the facts, it came to the conclusion that no gross inequality or gross injustice was established by the party to the application. There has been no additional information submitted to this Board that would justify us in interfering with the decision of the Regional Board.

This appeal will be dismissed.

July 6, 1944.

Re: William Kennedy and Sons, Limited and United Steelworkers of America, Local 2469

Reasons for Decision

(Oral Decision)

It is not necessary for the Board to defer its decision in this matter. The discussion has been very interesting.

The application concerned in this appeal was brought under Order in Council P.C. 5963, and that Order in Council does not enable this Board to set up any minimum standard of living wages.

There is no evidence before this Board to indicate that the Regional Board erred in principle, or erred in the exercise of its discretionary rights in making the comparisons as to wages in the proper comparable localities.

The appeal will be dismissed.

July 6, 1944.

Re: Exolon Company Limited and Federal Labour Local 22689

Reasons for Decision

(Oral Decision)

It is apparent that the parties to the application under appeal in this case should have sought the solution for their problem in the provisions of Section 26 of Order in Council P.C. 9384 instead of making an application pursuant to Section 20 of that Order.

This appeal will be dismissed.

July 6, 1944.

Re: Consolidated Mining and Smelting Company of Canada, Limited, and its employees working at or near Kimberley, B.C., and the International Union of Mine, Mill and Smelterworkers, Local 651

Reasons for Decision

This is an application by the International Union of Mine, Mill and Smelterworkers, Local 651, for stabilization of miners' basic wage rates, holidays with pay and overtime for certain employees of the Consolidated Mining and Smelting Company of Canada, Limited, employed by that Company in its mine and mill at or near Kimberley in the Province of British Columbia. The application is made pursuant to the provisions of Order in Council P.C. 9384.

The Union seeks the following:

I. The basic rate of wages paid to miners employed by the Company in its Sullivan Mine at Kimberley, British Columbia, be stabilized at the rate of $7.25 per shift exclusive of any cost of living bonus required by Federal Legislation or Order in Council, and exclusive of any gift by way of Christmas Bonus which the Company may decide to pay;

II. Overtime rates (presumably for all employees of the Company engaged in its operations at Kimberley and Chapman Camp, British Columbia) be established on the basis:

(*a*) that overtime be paid at the rate of one and one-half times the regular rate for time required to be worked in excess of eight hours per day or in excess of 48 hours per week; and

(*b*) that the minimum of the wage for one-half shift be paid when the employee is called out for work between regular shifts; and

(*c*) that double time be paid for Public Holidays as set out in Order in Council, P.C. 4671; namely New Year's Day, Good Friday, Dominion Day, Thanksgiving Day, Labour Day, and Christmas Day;

III. Vacations with pay be granted to all day-pay employees under the following conditions: after one year's continuous employment from the date of entering the service of the Company, each employee shall be entitled to six days' holiday, with pay, and thereafter the following scale shall apply: after three years' service—

seven days; after four years' service—eight days; after five years' service—nine days; after six years' service—ten days; after seven years service—eleven days; after eight years' service or more—twelve days;

IV. That a "shift work bonus" of ·05 cents per hour be paid to all day-pay employees of the Company engaged at the Sullivan Mine and Mill who actually work on afternoon and night shifts, that is, those employees who commence work between the hours of 3 p.m. and the following 7 a.m.

It will be convenient to consider these requests in the order above stated.

I.

The written briefs and the oral arguments from both the Union and the Company were largely devoted to this part of the application. The total number of employees affected is about 1450 and of these 360 are miners of whom more than 90 per cent are contract miners. From the evidence submitted to us it is apparent that for many years the wages of the employees have been based on a "pay roll" rate plus the number of fluctuating bonuses. At the date of application the miners were in receipt of a "pay roll" rate of $4.50 per shift, to which has now been added the cost of living bonus of ·77 cents making in all the sum of $5.27 per shift which is referred to as the "base rate". To this amount is added the "metal", "silver" and "efficiency" bonuses for the day-pay miners, and the "metal" and "silver" bonuses and "one-half the pay roll rate" for the contract miners. The amount of the "metal" and "silver" bonuses fluctuate from month to month and vary in accordance with the market prices of metals and are dependent upon the rate of exchange and other factors. The "efficiency" bonuses are regarded by the Company as an incentive payment to the employees who do not work on contract, and the basis is to pay the employees one-half the savings they can make by their own efforts. This bonus is corrected for all increased costs for which the workmen are not responsible, including increase in wages, cost of supplies, etc. Admittedly, the method of calculating the bonuses is a complicated one. The Union complains that the bonus system is too complex, that it is administered arbitrarily by the Company and that it does not provide the employees with reasonable assurance of lasting economic stability. The Board understands well this complaint by the Union and it is not particularly impressed with the argument that, the method having been in effect for upwards of twenty-five years, the employees should be content that it continue. Mr. Blaylock, the President and General Manager of the Company, intimated that he had hoped before this date to have had a simpler method of calculating the bonuses in operation but that due to war time conditions with abnormal fluctuation in the range of prices and demand for the Company's products and great variations in the rates of exchange, he had felt it desirable to postpone any change in the system until after the termination of the war.

At the same time, however, it is apparent that the present system of bonuses is one which has worked to the advantage of the employees and particularly so from 1938 to 1943. For example, the average daily earnings of contract miners have risen from $6.98 per shift in 1938 to $7.36 in 1943, exclusive of cost of living bonus. If cost of living bonus is added the average daily earnings of these employees in 1943 would be 8·078. The day-pay miners, as well as all other employees affected by this application, have enjoyed a similar degree of improvement in their daily earnings during the past five years.

The Union asks that there now be substituted for the "pay roll" rate plus bonuses, a basic rate of $7.25 per shift (exclusive of cost of living bonus) for the miners, and that the wages of all other employees be expressed in terms of the present differentials of the proposed basic rate of $7.25. A somewhat similar application on behalf of the employees has already been considered by this Board. In the earlier application the employees requested that in lieu of the bonuses received from the Company there be added to the base rate the sum of $1.25. This would have resulted in a new basic rate much less than the $7.25 per shift rate now applied for. The Union and the Company differ greatly as to the overall increase which would result if the present application were granted. The Union admits that such increase would amount to $180,000. The Company suggests that it would exceed $500,000. In any event, it is apparent that the granting of this application would involve substantial wage increases to the great majority of all employees affected by the application.

In its Finding and Direction dated April 6, 1943, this Board said:

"(*d*) existing scale of basic wage rates (including guaranteed daily rates and amounts of 'metal', 'silver', and 'efficiency' bonuses) paid by the Company to its occupational classifications generally equals or exceeds the scale of basic wage rates (including guaranteed daily rates and equivalent bonuses) paid comparable occupational classifications by comparable employers in the comparable locality;

(*e*) adjustment of the scale of basic wage rates of the Company's occupational classifications, as requested by the application, would result in an 'enhanced' scale of basic wage rates for such occupational classifications compared

with the basic scale of wage rates paid substantially similar occupational classifications by comparable employers in the comparable locality.

(*f*) in the circumstances, it would not be fair and reasonable to direct the Company to discontinue payment of 'metal', 'silver', and 'efficiency' bonuses and in lieu thereof to establish new basic wage rates for its occupational classifications employed at its Sullivan Mine and Sullivan Concentrator, incorporating a fixed amount of one dollar and twenty-five ($1.25) cents per shift in excess of established guaranteed rates for respective occupational classifications."

At the hearing of the present application the Union did not furnish the Board with any information or argument which would justify the Board in coming to a conclusion different from that expressed in the foregoing quotation from the finding and direction of the Board. Moreover, Mr. Stanton at the hearing argued that the present method of combining a basic rate with fluctuating bonuses in the payment of wages to the employees affected by this application constituted a "gross injustice" under Section 20, Sub-section 1, Clause (*a*) of P.C. 9384, as amended by P.C. 1727. In the opinion of this Board the Union has failed to show that any gross injustice or gross inequality existed for this reason and the Union, while complaining that a gross inequality and gross injustice prevail, completely failed to demonstrate their existence.

The Union also suggested that it was entitled to the relief asked for by virtue of the sub-paragraphs 3 and 4 of Clause (*c*) of said Section 20, Sub-section 1. The Board, however, is of opinion that the two sub-paragraphs, 3 and 4, do not afford reason for granting this application.

The Union further argued that a gross injustice existed when comparison is made of the amount of wage increases sought with the dividends and profits which are enjoyed by the Company at the present time. This argument, however, was not developed and it is sufficient for the Board to say that no gross inequality or gross injustice was established in this regard.

The request sought in this part of the application must therefore be refused.

II

In considering this part of the application it is useful to refer to the Finding and Direction dated November 25, 1943, on an application by Independent Smelter Workers Union, on behalf of certain classes of employees of the Consolidated Mining and Smelting Company of Canada, Limited, at Trail, B.C. The Board in that Finding and Direction directed the Company to pay to its occupational classifications covered by the application a rate of time and one-half for work required to be performed on six statutory holidays, and to pay a rate of time and one-half to employees required to work on their regularly assigned seventh day off duty under conditions as stated in the Finding and Direction.

The Board is of opinion that similar provisions with respect to overtime pay should be made applicable to the operations of the Company at Kimberley and should apply to the employees affected by this application.

It was indicated at the hearing that it is already an established practice of the Company to pay a minimum of the wage for one-half shift to employees called out for work between regular shifts.

III

The established practice of the Company with respect to granting holidays with pay is set out in Exhibit No. 8 of the Company's Brief as follows:

"5 (*a*) Any General Payroll employee who, on the January 15th immediately prior to, or on July 15th during any holiday period as defined in item 4 (*a*) below, has completed at least two years' service with the Company shall be entitled, during such holiday period, to holidays with pay as follows:

2	years'	service	but	less	than	3	yrs.—	2	days
3	"	"	"	"	"	4	" —	3	days
4	"	"	"	"	"	5	" —	4	days
5	"	"	"	"	"	6	" —	5	days
6	"	"	"	"	"	7	" —	6	days
7	"	"	"	"	"	8	" —	7	days
8	"	"	"	"	"	9	" —	8	days
9	"	"	"	"	"	10	" —	9	days
10	"	"	"	"	"	11	" —	10	days
11	"	"	"	"	"	12	" —	11	days
12	"	"	and over					12	days"

The general conditions of the Board's Supplementary Decision Bulletin No. D.B. 17 provides a week's vacation with pay after a qualifying period of one year's service or a minimum of 300 days actual work have been completed. To bring the conditions of the Company's vacation with pay plan into general conformity with the provisions of Supplementary Decision Bulletin D.B. 17 and yet maintain the more favourable conditions already established by the Company for its employees of long service, it is suggested that the vacation with pay plan might be modified to allow vacations with pay being granted to employees as follows:

After one year's service but less than 7 years' service										.....	6 days
After 7	"	"	"	"	"	8	"	"	.....	7	"
After 8	"	"	"	"	"	9	"	"	.....	8	"
After 9	"	"	"	"	"	10	"	"	.....	9	"
After 10	"	"	"	"	"	11	"	"	.....	10	"
After 11	"	"	"	"	"	12	"	"	.....	11	"
After 12	"	"	and over						.....	12	"

In all other respects the conditions of the Company's existing vacation with pay plan might be maintained with the proviso that, the condition authorized by the National War Labour Board's letter dated March 19, 1943, (copy attached) will be maintained in respect of the future operations of the Company, i.e.:

"It is understood that should your Company revert to a five day week during the duration of the war the conditions of service applicable to your vacations with pay plan will be reviewed."

IV

One of the items covered by the Board's Finding and Direction dated November 25, 1943, was payment of a differential of five (5c.) cents per hour to employees engaged in the Company's Tadanac and Warfield Plants working on rotating shifts other than the recognized day shift. The application in respect of this item was denied as it was found that it would not be fair and reasonable to direct the Company to pay shift differential as requested by the application as it is not an established practice in comparable continuous operation industries for employees working on rotating shifts to be paid a differential over basic wage rates; for working on shifts other than a recognized day shift.

No additional information was furnished the Board at the hearing of this application to indicate that it would be justified in directing payment of a night differential of five (5c.) cents per hour to the employees affected by the application. This request is, therefore, refused.

July 11, 1944.

Annex

March 19, 1943.

Mr. C. W. Guillaume,
Supervisor,
The Consolidated Mining and Smelting Company of Canada, Ltd.,
Trail, B.C.

Dear Sir,—

The National Board has had under consideration your letter of February 17th and March 6th and understands that your proposals in regard to vacations with pay involve merely a minor change in the regulations governing your established vacations with pay plan, that any extension of time proposed to be allowed to employees is to be based on length of service and that such amendment to your vacation plan arises from the necessity of equalizing conditions consequent upon the change from a five-day to a six-day working week.

In the circumstances, the National Board has no objection to your proposal to amend your present plan of vacations with pay as follows:

(*a*) employees with eleven years' service to be entitled to eleven days' holidays with pay;

(*b*) employees with twelve years' service or more to be entitled to twelve days' holidays with pay.

It is understood that should your Company revert to a five day week during the duration of the war the conditions of service applicable to your vacations with pay plan will be reviewed.

Yours very truly,
R. H. NEILSON,
Chief Executive Officer.

Re: Edmonton General Contractors' Association and United Brotherhood of Carpenters and Joiners of America, Local 1325

Reasons for Decision

This is an application by the Brotherhood for leave to appeal from a decision of the Regional War Labour Board for Alberta dated May 1, 1944, refusing to increase the rate for carpenters in Edmonton from $1.03 to $1.10½ per hour. Leave to appeal was not sought below.

The appellant bases its case upon a plea for restoration of the 1929 rate of $1.00 plus full cost of living bonus, urging that section 3 of P.C. 7440 should be considered still as the guiding principle of the wage control policy.

War Labour Boards are now governed exclusively by the provisions of P.C. 9384 and to raise rates it must first be found that the increase is "necessary to rectify a gross inequality or gross injustice." The Regional Board have found nothing of the kind in the case and, having carefully considered the material submitted, we must say that a reversal of the finding would be unwarranted and the appeal must fail.

July 12, 1944.

Re: Aluminum Company of Canada, Limited and Le Syndicat National des Employes de l'Aluminium d'Arvida, Inc.

Reasons for Decision

This is an appeal by the Company from a ruling of the Quebec Regional Board dated March 10, 1944, with respect to establishment of rates pursuant to section 15 and Schedule "A" of P.C. 9384 for certain classifications at the Arvida plant receiving time and incentive rates simultaneously.

The Company agrees to establish the new time rate by adding 8 cents to its previous rate. This figure represents the previous authorized cost of living bonus to the nearest cent. The incentive rate was calculated as a percentage, roughly 20 per cent of the former basic rate. The question is: should the percentage be made to apply to the 8 cents. On the 20 per cent basis, there would be an increase of 1·6 cents per hour in the incentive wage.

It seems clear from rules 5 and 6 of Schedule "A" that no such increase in wages "for equal service performed during normal working hours" is contemplated by the Order. Nor was it intended by the memorandum on procedures issued by the Board. (L.G., 1944, p. 170).

Consequently there should be a finding and direction effective for the first payroll period commencing on or after February 15, 1944 directing the addition of 8 cents to the time rate of all hourly employees and the adjustment of the incentive bonus so that the same amount of bonus will be paid per pay period as was paid prior to the effective date for the same output.

July 12, 1944.

Re: Canadian National Institute for the Blind (Vancouver, B.C.)

Reasons for Decision

This is an appeal from a decision of the British Columbia Regional Board which held the Institute to be an "employer" required to pay the mandatory cost of living bonus under P.C. 5963 to sighted employees employed in canteens operated by the Institute in the shipyards.

Undoubtedly the appellant by virtue of the general character and nature of the purposes for which it was established was exempted from the provisions of P.C. 5963 under the terms of section 11 (1) (v), (now section 13 (1) (d) (v) of P.C. 9384). The question arises in this appeal whether the employees here concerned are, to paraphrase section 11 (2) of the former order (now section 13 (4) of P.C. 9384), engaged in employment other than that of a corporation operating a charitable or educational association not for purposes of gain.

The canteens are operated by the Institute for the purpose of realizing a profit, but they are in no different position than its many other revenue-producing departments which we understand are all encompassed within the scope of the general activity of the Institute as an educational and charitable association.

We are informed also that these operations are exempt from Selective Service and Unemployment Insurance regulations and we are of the view that the line should not be drawn for wage control purposes. We would allow the appeal.

July 13, 1944.

Re: Tavern-Keepers Association of the Island of Montreal and Province of Quebec Hotel Association Inc. and Tavern Employees International Union Local 200

Reasons for Decision

An appeal by the Union from a decision of the Quebec Regional Board dated January 20, 1944 refusing an application under P.C. 5963 for the full cost of living bonus for tavern employees on the island of Montreal.

We have on a number of occasions indicated that a war labour board's power to increase the bonus above the mandatory amount was to be found only in section 34 (3) of the former control order and in the proviso added by P.C. 2370. We must say that the appellant has not made out a case to meet the terms of this legislation.

The appellant also argued its case to this Board on the alternative basis of a wage increase. If we were to accede, we would be rewriting the wage rate clauses of Ordinance No. 23 of the Quebec Minimum Wage Commission and assuming a function which we do not believe was intended to be exercised in the first instance by this Board or any Regional Board.

The appeal must be dismissed.

July 13, 1944.

Re: Naugatuck Chemicals, Limited (Elmira, Ontario)

Reasons for Decision

This is an appeal from a decision of the Regional Board for Ontario dated February 15, 1944, authorizing certain overtime rates from September 23, 1943.

The Company had paid these rates since January 1, 1943. It appears that the appellant, which is a wholly owned subsidiary of the Dominion Rubber Company, Limited, had paid these overtime rates for the period in question on the assumption that the authorization granted by the Regional Board to the Dominion Rubber Company (the parent Company) to pay overtime rates to its employees covered also those employees who were employed at the plant owned and operated by the subsidiary. The relationship between the parent company and the appellant was brought to the attention of the Regional Board.

This Board is reluctant to interfere with the discretion exercised by a Regional Board in a matter which in essence is one related to the enforcement of the provisions of the order.

The appeal should be dismissed.

July 13, 1944.

Re: Dominion Rubber Company, Limited (St. Jerome, P.Q.) and Rubber Workers' Federal Union, Local 144

Reasons for Decision

This is an appeal from a decision of the Regional War Labour Board for Quebec dated April 18, 1944 directing that overtime be paid at the rate of time and one-half after nine hours in a day and after fifty hours in a week and that the effective date be March 6, 1944.

In our opinion the appeal should be dismissed as to the overtime. On the information submitted to this Board on the appeal it is apparent that the Regional Board took into consideration all the relevant facts and circumstances and its decision should not be disturbed.

On the question as to retroactivity, however, we are of opinion that the decision of the Regional Board should be varied and that the effective date should be April 10, 1944. Under the provisions of Section 30, Sub-Section 2, of P.C. 9384, a Board has discretion in prescribing the effective date. Heretofore the general practice has been to make the date of application the effective date for the finding and direction. The date of the application in this case is April 17, 1944. It was apparent, however, in the representations before us that the Company had undertaken to make the wage increases effective from April 10, 1944, and in fact at the hearing counsel for the Company intimated that the Company was still agreeable to this date. However, there is nothing on the record and there was not sufficient in the evidence submitted to us to justify March 6 as the effective date.

July 13, 1944.

Re: Aluminum Company of Canada Limited (Kingston Works) and Employees' Council Aluminum Company of Canada Limited

Reasons for Decision

This is a joint appeal by the two parties from a decision of the Ontario Regional War Labour Board dated May 19, 1944 in which it declined to authorize the alteration in the terms of the agreement to permit the payment for six statutory holidays in lieu of the present four.

Notwithstanding the fact that the Ontario Regional War Labour Board in 1943 permitted the Company to pay its hourly rated employees for four statutory holidays when such employees are not working, that Board as now constituted does not favour the practice, even when considered as a substitute for an overtime rule, and it has refused the present request.

We are not disposed to say that the Regional Board took a wrong view in the circumstances and we think the appeal should be dismissed.

July 12, 1944.

Re: Atlas Coal Company Limited, Murray Collieries Limited, Empire Collieries Limited, Maple Leaf Collieries Limited (all of East Coulee, Alberta) and United Mine Workers of America, District 18

Reasons for Decision

This is an application by the Union to make effective a recommendation of the Royal Commission appointed pursuant to P.C. 8020 to investigate coal mine wages in Alberta and British Columbia and to make recommendations to the Minister of Labour and the Chairman of the National War Labour Board. On November 10, 1943, the said Royal Commission was clothed with the powers and authority of a Regional War Labour Board under P.C. 5963. What is involved in the application is the differential in certain contract rates between the East Coulee and Drumheller coal fields.

The Royal Commission, in its final report dated the 24th day of January, 1944, recommended *inter alia*—

". . . that the National War Labour Board reduce the contract rate differential from the present 9 cents in rooms and 18 cents in entries to 5 cents in rooms and 10 cents in entries so that the rates will be as follows: viz.,

	East Coulee Mines
Loaders in rooms.....	71 cents per ton
Loaders in narrow places and entries.....	85 " " "

On June 19, 1944, the Secretary-Treasurer of District 18 requested this Board to make effective this recommendation. After hearing the parties on the 27th day of June, 1944, and after perusal and consideration of the briefs and other documents submitted by the parties, this Board is of opinion that the request dated June 19, 1944, should not be dealt with as a new application under P.C. 9384, but as one, arising out of, and part of the proceedings commenced under P.C. 5963.

In addition to the above recommendation, we have the opinion to the same effect of a Board of Conciliation and Investigation under the chairmanship of Mr. H. A. Dyde in 1938. Mr. Steer made an exhaustive argument in behalf of the Companies against acceptance of the recommendation, but it would be difficult for this Board to do otherwise than accept the recommendation of two fact-finding bodies who have had the benefit of information on the ground.

Therefore, Finding and Direction will issue by this Board to give effect to the above quoted recommendation of the Royal Commission.

July 14, 1944.

Re: Hendrie & Company, Limited (Toronto) and Canadian Brotherhood of Railway Employees and Other Transport Workers

Reasons for Decision

This is an appeal by the Company from a decision of the Ontario Regional Board dated December 17, 1943, directing under P.C. 5963 a substantial increase in basic rates of pay and a reduction of working hours from 53 to 48 per week. The result of the direction was to increase the total hourly rate, i.e. basic rate plus cost of living bonus, by 17·76 cents, bringing it up to 72 cents. The Company operates a cartage service and is employed as to a large portion of its business by the C.N.R.

Under section 25 of the Order which must govern this case, the Regional Board could increase the rates only if it found them to be low on a proper comparison. The appellant company says that the railways are the comparable employers, while the Brotherhood suggests that we should look at the rates paid to truck drivers employed by industries generally. In our opinion, neither basis is entirely correct. These employees, although they are engaged largely in the same kind of work as the cartage employees of the railways, have none of the pension and other benefits which are enjoyed by railway employees. On the other hand they are not entirely comparable to employees who drive trucks in industry and the higher rates of the latter do not constitute a proper basis.

Our conclusion is that the truck driver of this employer should receive after 6 months an hourly rate (inclusive of cost of living bonus) of 65 cents. On the basis of 208 hours, the monthly rate will be $135 (bonus included). Rates for beginners and for the other classifications involved will be adjusted accordingly.

July 14, 1944.

Re: Ste. Anne Paper Company, Limited (Beaupré, P.Q.) and International Brotherhood of Paper Makers and International Brotherhood of Pulp, Sulphite and Paper Mill Workers

Reasons for Decision

This is an appeal by the Unions from a decision of the Quebec Regional Board dated February 15, 1944, for re-establishment of the one cent differential that prevailed prior to the establishment of a common rate in all paper mills arising out of an application by the Unions for a rate comparable to mills in Ontario.

The Regional Board did not bring the rate up to the Ontario rate and generally gave a 5-cent increase. In the mill here in question the increase was 4 cents, which was sufficient to increase the base labour rate up to the 50 cents (exclusive of cost of living bonus) adopted for all of the mills. In fact the Regional Board found that the differential was not justified.

It has not been shown that the Regional Board has erred in principle; neither has it been shown that this mill should get a rate one cent above the generally prevailing rate.

The appeal is dismissed.

July 17, 1944.

Re: Lever Brothers Limited (Winnipeg, Man.)

Reasons for Decision

An application for leave to appeal from a decision of the Manitoba Regional War Labour Board dated January 19, 1944, refusing to approve the Company's application for permission to pay an overtime rate to office employees.

From the terms of the decision under appeal and the material filed by the Regional Board it would appear that it was considered that the plan submitted was not sufficiently in operation in Manitoba to warrant approval. It also felt that there was no abnormal amount of overtime required by wartime conditions in the appellant's Winnipeg plant.

The Regional Board have also on the facts distinguished this case from the McKinnon Industries decision (L.G., 1943, p. 1345).

Under these circumstances, we do not think we should interfere and leave to appeal must be refused.

July 13, 1944.

Re: Master Painters' Association of Saint John, N.B., and Brotherhood of Painters, Decorators and Paperhangers of America, Local 1151

Reasons for Decision

By leave granted below, this appeal is brought by the Brotherhood from a decision of the New Brunswick Regional Board dated March 14, 1944 denying an application under P.C. 9384 to increase the hourly wage rate for painters from 76 to 80 cents.

The Regional Board having come to the conclusion that there was no gross inequality or gross injustice to be rectified in the circumstances of the case, we must say that it has not been shown to this Board that there was an error in the decision. Consequently, we will have to dismiss the appeal.

July, 17, 1944.

Re: Fairchild Aircraft Limited (Longueuil, Que.) and Hotel & Restaurant Employees Union, Local 382

Reasons for Decision

This is an appeal by the Union from a decision of the Quebec Regional Board dated March 16, 1944.

The Company in March, 1943 took over the management of a restaurant from an employer who was not then paying the 60 cents cost of living bonus under the Board's general order dated August 4, 1942. The question now is to determine the amount of "previous authorized bonus" for the purpose of establishing the rates on February 15, 1944 pursuant to section 15 and schedule "A" of P.C. 9384.

We are of opinion that the bonus to be merged should have included both the 60 and the 35 cents ordered by the Board by its general orders.

We think the appeal should be allowed.

July 13, 1944.

Re: Bendix-Eclipse of Canada Limited (Windsor, Ontario) and U.A.W.-C.I.O., Local 195

Reasons for Decision

This is an appeal by the Union from a decision of the Ontario Regional War Labour Board dated February 24, 1944. An application was made on August 3, 1943, asking for the establishment of certain classifications and approval of certain wage rates. The Ontario Board on November 22, 1943, granted an Order authorizing certain classifications and stipulating certain rates. This schedule of classifications and rates seems to have been unsatisfactory to both the Union and the Company and finally on February 22, 1944, the Ontario Board approved a new schedule of classifications and wage rates. The Union seeks in this appeal to vary this schedule with respect to production operator (semi-skilled), production operator (skilled) and the rates for janitors. It also asks that the company be directed to pay the rates from August 3, 1943.

This Board is of opinion after considering all the evidence submitted to it that the Ontario Regional War Labour Board studied carefully the matter of classifications and rates and adopted the proper basis of comparability. We see no reason why the decision of the Ontario Regional War Labour Board should be disturbed in this respect.

We think, however, that the decision of the Ontario Regional Board should be varied to make it a direction effective from August 3, 1943, the date of the application.

The application to this Board that periodic increases of five cents per hour over the minimum rate after thirty days and after ninety days employment, with the top rate after six months, cannot be entertained because it was not submitted to the Ontario Regional War Labour Board.

July 13, 1944.

Re: Le Nouvelliste, Limitée; La Tribune, Limitée; L'Association des Hebdomadaires Canadiens-Français, Inc. and other employers and La Fédération des métiers de l'imprimerie du Canada Enrg., and International Typographical Union, Locals 672 and 856

Reasons for Decision

This appeal by the Unions is from a decision of the Quebec Regional Board dated January 11, 1944, refusing to increase under P.C. 5963 the cost of living bonus payable by employers in Zones 2, 2A, 3 and 3A designated in the collective labour agreement relating to the printing trades in the Montreal district. This agreement was adopted and extended to non-parties by Order in Council No. 987 pursuant to the provisions of the Quebec Collective Agreement Act.

The application requested that the minimum mandatory bonus be raised from 95 cents to $2.75. Having regard to the decision of this Board (L.G., 1943, p. 1353) with respect to the printing trades in Zone 1, it would seem reasonable to maintain the differentials set out in the agreement and to grant in this case the cost of living bonus asked for.

Consequently, we would allow the appeal as from February 15, 1944.

July 18, 1944.

Re: Kingston City Coach Company Limited and Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America, Local 1151

Reasons for Decision

This is an appeal by the employer from decisions of the Ontario Regional Board dated December 4, 1943, granting under P.C. 5963 increased rates to driving and maintenance employees, overtime provisions and holidays with pay.

The Regional Board appear to have reached their conclusion upon consideration of total remuneration (basic rate and cost of living bonus) paid to these classifications in comparable localities. We have found no reason to disturb the decisions in the matter of rates, except that in the case of the drivers there should be periodic increases as specified in the union's application so that the top 68-cent rate will be reached after the fifth year.

On the matter of overtime, the provision should be restricted to the holidays requested in the application. There will be Finding and Direction accordingly.

July 18, 1944.

Re: The Royal Trust Company (Vancouver, B.C.)

Reasons for Decision

The Company appeals from decisions of the British Columbia Regional Board dated December 10, 1943, and December 15, 1943, fixing wage rates for janitors and cleaners under P.C. 5963.

In so far as the appeal raises questions of fact as to the nature of the work performed by the employees concerned and the basis of comparison used by the Regional Board, we are not prepared to say that the decisions are wrong and should be reversed.

However, counsel for appellant developed a legal argument of considerable force relative to the interpretation of section 25. His submission was that a finding that wage rates are low must be related to the basic date of November 15, 1941, and the Regional Board having granted an increase under section 25 on October 17, 1942, must be presumed to have exhausted its jurisdiction. The Board appreciates the force of this argument and referred to it in part in the Victoria Carpenters' case (L.G., 1944, p. 282) when in commenting on the comparisons there adopted it said (p. 283):

> "This case affords a typical illustration of the ineffectiveness of section 25 as a wage control measure when the comparative formula is cut loose from the anchor date (November 15, 1941)."

Nevertheless we do not believe that our intervention would be justified at this date and in the circumstances of this particular case and our opinion is that the appeal must be dismissed.

July 20, 1944.

Re: The McKinnon Industries Limited (St. Catharines, Ontario) and U.A.W.-C.I.O. Local 199

Reasons for Decision

This is an appeal by the Union from a decision of the Ontario Regional Board dated February 15, 1944, refusing an application under P.C. 9384 for a direction ordering payment of a "five cents per hour premium for all hourly rated employees starting work after 2 p.m. and before 5 a.m." The Company opposes the request.

It appears from the evidence that payment of a premium for night work is not a prevailing practice in St. Catharines and, although the premium figured in the negotiations leading to the current agreement between the parties, that no provision was made therein for its inauguration.

In addition to these considerations, the formula requested is much broader than what this Board is prepared to say is warranted under the terms of the relevant Order in Council.

This Board therefore confirms the decision of the Regional Board.

July 20, 1944.

Re: B.C. Motor Transportation Limited (Vancouver) and Amalgamated Association of Street, Electric Railway and Motor Coach Employees, Division 101

Reasons for Decision

This is an appeal by the Union from a decision dated November 22, 1943, of the Regional War Labour Board for British Columbia refusing to order under section 25 of P.C. 5963 an increase in basic rates for certain classifications of garage employees. The decision directed payment of increases to some classifications including the mechanics.

The Regional Board rested that part of the decision which is under appeal upon the following finding of fact:

> "The Regional War Labour Board for British Columbia finds that certain of the wage rates presently being paid in respect of certain of the occupations listed in the said application are not 'low' compared with wage rates generally prevailing for the same or substantially similar occupational classifications in the comparable locality."

Having perused all of the material filed by the parties and by the Regional Board, it appears to us that the Board have carefully considered the nature of the work performed by the classifications now concerned and made what they thought were the proper comparisons. There is no evidence before us that they erred in concluding as they did. The Union urges, however, that by refusing to increase certain rates the decision upsets the differentials established in 1940 following the report of a Conciliation Board acting under provincial legislation. While the argument is one which has a good deal of merit, our view is that in this type of employment the maintenance of wage relationships is not perhaps as important as it would be in other kinds of operations. At all events, the circumstances are not such as to justifiy an intervention on the part of this Board.

Consequently, the appeal must fail.

July 24, 1944.

Re: John Inglis Company Limited (Toronto) and United Steel Workers of America, Local 2900

Reasons for Decision

This is an appeal by the Company from a decision of the Ontario Regional Board dated February 4, 1944, directing under P.C. 5963 payment of a premium of 5 cents per hour to employees on the second shift (3 p.m. to 11 p.m.). Leave to appeal was given by the Regional Board.

This is the second time the matter of shift premium in this company has been before this Board. On October 8, 1943, the parties jointly and successfully appealed a decision refusing the premium to workers who came on the third shift (11 p.m. to 8 a.m.) by rotation (L.G., 1943, p. 1490). Following the decision allowing the appeal in that case, the Union on November 10, 1943, applied for an extension of the premium to the second shift. That application was opposed by the Company and is the matter now under appeal.

The Union bases its case upon the Ford Motor decision (L.G., 1943, p. 1342). The Ford case is distinguishable in important respects from the one now before us as is indicated by the foregoing sequence of events in this case. The circumstances and conditions here present do not justify an order to extend the premium to an afternon shift.

The appeal must be allowed.

July 27, 1944.

Various Railway Organizations and their Employers

Re: *Brotherhood of Locomotive Engineers; Brotherhood of Locomotive Firemen & Enginemen; Order of Railway Conductors; Brotherhood of Railroad Trainmen; The Order of Railroad Telegraphers; Commercial Telegraphers' Union; Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees; Brotherhood of Railway Carmen of America; Brotherhood of Maintenance of Way Employees; International Association of Machinists; International Brotherhood of Boilermakers, Iron Ship Builders and Helpers of America; Sheet Metal Workers' International Association; International Moulders' Union of North America; United Association of Journeymen Plumbers and Steamfitters of the United States and Canada; International Brotherhood of Blacksmiths, Drop Forgers and Helpers; International Brotherhood of Firemen and Oilers; International Brotherhood of Electrical Workers; Brotherhood of Railroad Signalmen; and Canadian National Railways and subsidiaries; Canadian Pacific Railway Company and subsidiaries; Dominion Atlantic Railway; Quebec Central Railway; Esquimalt and Nanaimo Railway; Northern Alberta Railway; Algoma Central & Hudson Bay Railway; The Essex Terminal Railway Company; Pacific Great Eastern Railway Company; Sydney & Louisburg Railway Company; Temiscouata Railway Company; Temiskaming & Northern Ontario Railway Commission; The Toronto, Hamilton & Buffalo Railway Company; Toronto Terminals Railway.*

Reasons for Decision

This application is made pursuant to Order in Council P.C. 5963 by the Standard Railway Organizations listed in the heading on behalf of the employees represented by them for increases in wage rates. The employers are the Railway Companies listed in the heading. The employees on whose behalf this application is made number approximately 100,000 and are resident at various places in all provinces of Canada. Their duties require varying degrees of skill, and, in the main, require also a high sense of responsibility. In addition to these employes there are a large number of other railway employees who are not parties to this application but on whose behalf separate applications have been made for wage increases.

This application was filed with this Board on September 16, 1943. The brief in support of the application, however, was not filed with the Board until the 11th day of December, 1943. The reply on behalf of the employers was filed on the 16th day of March, 1944, and the rebuttal on behalf of the employees was filed on the 13th day of April, 1944. The application was heard by this Board on the 4th, 5th and 6th days of May, 1944.

The increases requested by the employees as stated in the notices attached to the application are as follows:

1. "That effective September 1st, 1943, all existing basic wage rates be increased in all classes of service to the extent necessary to equalize with rates paid for comparable service in the Eastern United States, plus the amount which such rates may be increased as a result of negotiations now being conducted in the United States on behalf of the employees represented by these Organizations. Existing differentials, special allowances, arbitraries, etc., to be retained, and a percentage increase applied to same equivalent to the amount by which the basic wage rates are increased."

2. "That effective September 1st, 1943, all existing basic wage rates be increased twenty-three cents (.23c) per hour."

Objection was raised by the employers that the request of the employees should not be entertained by the Board by reason of an agreement made between the parties on the 29th day of July, 1941. Paragraph 3 of this Agreement reads as follows:

> "3. This agreement is entered into between the respective railways and the individual organizations representing their respective classes and it is intended between the parties hereto that, subject to any legislation or other governmental action which may alter the bases upon which this agreement has been reached, and subject to mutual agreement in the applications of the third and succeeding adjustments in bonus payments, it will remain in effect for one year from the date of proclamation of peace and thereafter subject to termination by thirty days notice by either party."

It is not necessary in considering this application to deal with the argument as to whether or not this agreement had been affected by Orders in Council passed subsequent to the date of the Agreement and which indicated substantial changes in Government policy with respect to wage control, because on June 4, 1943, this Board in its Reasons for Decision in the case entitled Division No. 4, Railway Employees Department (A.F. of L.) and the Railway Association of Canada (L.G., 1943, p. 752) in considering the effect of the Agreement of July 29, 1941, stated:

> ". . . . it is quite within the Board's power to deal with questions within its jurisdiction under P.C. 5963 in spite of any term provided for in such an agreement and also regardless of any other special covenants as to wages and working conditions. There can be no doubt that a covenant to accept wage rates and working conditions without change for the period of collective agreement is a very important factor to be taken into consideration but does not create an absolute bar to any relief authorized by the general Order in Council."

No arguments were submitted to the Board at the hearing of this application which would justify the Board in departing from the position it took on June 4, 1943.

The written and oral submissions on behalf of the employees were almost entirely directed to the argument that Section 25 of Order in Council P.C. 5963 permitted and required the Board to make a comparison between the wage rates paid to employees in the railway service in the Eastern Territory, United States, with the wage rates paid to employees in similar classifications in the railway service in Canada. The voluminous written submissions and exhibits elaborated at great length on the historical development of the relationship in the wage rates paid to the employees in the railway service in the two countries, on the similarity of their duties, on the similarity of traffic and other railway problems and on the many other features and factors common to the railway service of these two countries.

In like manner, the written submissions and oral arguments presented by Counsel on behalf of the Railway Companies were largely devoted to examination and rebuttal of the arguments of the employees in this regard. On behalf of the Railways, it was also urged that the adoption by this Board of the wage rates prevailing in the railway service in the Eastern Territory, United States, would mean annual additional costs to the railways operating in Canada in the sum of $119,898,084, and that the addition of such a sum to the cost of operation of railway service could be met by the railways only by seeking an increase in freight rates or by seeking some form of Government assistance. On behalf of the employees it was argued that this sum was excessive and greatly overestimated. According to their argument, the annual increase in cost to the employers, after due allowance had been made for the cost of living bonus which, since February 15, 1944, has been incorporated in basic wage rates, would be the sum of $53,884,111.50, and this sum it was urged could be paid in wage increases without the necessity of the Railways seeking either increase in freight rates or some form of Government assistance.

Holding the view we do, it is unnecessary to examine in detail the arguments in this regard and which were presented with great skill and force on behalf of both the employees and the employers because this Board is of opinion that under the Wages Control Order, P.C. 5963, the comparisons authorized to be made by Section 25 of that Order must be restricted to industries in Canada. In order to make proper comparisons with wage rates paid in similar jobs, positions or occupational classifications in countries other than Canada there would be required an involved and detailed study and examination of and inquiry and investigation into very many factors and conditions which were never contemplated by the Order. The whole policy of control of wages and prices in this country is entirely distinct and unrelated to the economy of the United States. This Board is satisfied that comparison of wage rates paid in the two countries is neither permitted nor required in the administration of P.C. 5963. In fact this Board is of opinion that for the purposes of interpretation and administration of all relevant Orders in Council comparisons must be restricted to industries in Canada.

This is not the first occasion on which this question has come before the Board. In its

decision in *re* National Maritime Federation, National Seamen's Association of Canada and Various Shipping Companies, (L.G., 1943, p. 1347) this Board said:

> ". . ., the applicant unions did not even try to put the case on a comparative basis as required by Section 25 of P.C. 5963. The only comparison offered was that with American rates, which, under P.C. 5963, is irrelevant."

Again in considering the British Columbia Electric Railway Company Case (L.G., 1944, p. 274), this Board said:

> "Now, the union has sought to make a comparison with Seattle, pointing out that the Order in Council is silent with respect to points of comparison outside of Canada. We have already intimated in a case—I think it was the National Maritime Federation case, I have forgotten the reference in the LABOUR GAZETTE and other publications—that we were rather of the opinion that such a contention cannot prevail, because primarily the purpose of the Order in Council was to stabilize wages as they existed in Canada."

With these pronouncements this Board is completely in accord. The many arguments submitted to it on the hearing of this application failed to convince the Board that said Section 25 enabled or permitted comparison of wage rates prevailing in any industry in Canada with wage rates paid to employees in a similar industry in United States.

The Board is further of opinion that Section 62 of Order in Council P.C. 5963 is not applicable to this case. Any effort to demonstrate that under Section 62 the employees in railway service in Canada are entitled to receive wages at the same rate as those paid to similar employees of railways in the United States completely failed.

It was also urged on behalf of the Employees that there existed unfair and unjust disparities between railway wage rates in Canada and those enjoyed by employees in other industries in Canada. This argument was not developed, and it is unfortunate that no submission, verbal or written, was made to us to show by proper analyses and comparisons the relationship between wage increases received by the employees of the railways and those received by employees in the same or reasonably comparable classifications of employees in other industries in Canada. It has, therefore, been necessary for the Board itself to have such analyses and comparisons made, and in making them much time, study and research have been required. As a consequence the decision with respect to this application has been delayed.

The Board caused an examination and study to be made of the wage rates received immediately prior to the war by employees in a large and representative group of industrial and other establishments in all parts of Canada. In making the examination and study we were careful that the establishments under review were not only representative of all parts of Canada but also of the various types of industry in the country, and care was also taken to make sure that the establishments examined and studied had in their employ a wide enough range of classifications to embrace classifications reasonably similar or comparable to as large a number of Railway classifications as possible. Similar information was obtained with respect to wage rates received by employees in these same establishments at the date of this application and comparisons were made with wage rates received by Railway employees at the same dates. The figures used for comparison in all instances included the cost of living bonus then being paid. This comparison showed that employees in other industries in Canada had received wage increases in excess of those received by employees in the railway service. It was apparent that the wages paid in some of the classifications in the railway service at the commencement of the war were low as compared with those paid in other industries. In other classifications, however, they were high, and, therefore, it was necessary that this fact receive proper consideration when comparisons were made. Due allowance had to be made for the security and pension rights enjoyed by employees in the railway service as compared with those enjoyed by employees in other industry. It was necessary to keep in mind also that among the many classifications considered a higher degree of skill is generally required for employees in the railway service. In considering the results of the study and examination made, the Board also kept in mind the fact that large wage increases in some classifications in other industries in part at least reflected the wartime demand for skilled labour. After due consideration of all these factors, we are of opinion that following the broad and liberal interpretation which has been given by this Board to Section 25 of Order in Council P.C. 5963, all employees represented in this application are entitled as and from the date of said application, namely September 15, 1943, to increases in their basic wage rates as follows:

1. Six cents per hour to all hourly paid employees;
2. Forty-eight cents per day to all daily paid employees;
3. Two dollars and eight-eight ($2.88) cents per week to all weekly paid employees;
4. Twelve dollars and forty-eight ($12.48) cents per month to all monthly paid employees.

Finding and Direction will issue accordingly.

July 31, 1944.

Re: Brotherhood of Maintenance-of-Way Employees and Railway Association of Canada

Reasons for Decision

This application made pursuant to Order in Council P.C. 5963 was heard by this Board on October 7, 1943. An interim decision was given on November 24, 1943, determining all matters under consideration excepting the question of wage increases. This question was retained pending determination of the application N-1300 made on September 15, 1943, on behalf of certain other railway employees.

This Board has on this date filed its decision with respect to that application and adopts that decision for the question of wage increases in this application.

Therefore, the employees represented on the hearing of this application, as and from the date of said application, viz., March 3, 1943, are entitled to increases in their basic rates as follows:—

1. Six cents (6c) per hour to all hourly paid employees.

2. Forty-eight cents (48c) per day to all daily paid employees.

3. Two dollars and eighty-eight cents ($2.88) per week to all weekly paid employees.

4. Twelve dollars and forty-eight cents ($12.48) per month to all monthly paid employees.

Finding and Direction will issue accordingly.

July 31, 1944.

Re: Canadian Brotherhood of Railway Employees and Other Transport Workers and Canadian National Railways

Reasons for Decision

This application made pursuant to Order in Council P.C. 5963 was heard by this Board on September 30, 1943. An interim decision was given on November 24, 1943, determining all matters under consideration excepting the question of wage increases. This question was retained pending determination of the application N-1300 made on September 15, 1943, on behalf of certain other railway employees.

This Board has on this date filed its decision with respect to that application and adopts that decision for the question of wage increases in this application.

Therefore, the employees represented on the hearing of this application, as and from the date of said application, viz., May 25, 1943, are entitled to increases in their basic rates as follows:—

1. Six cents (6c) per hour to all hourly paid employees.

2. Forty-eight cents (48c) per day to all daily paid employees.

3. Two dollars and eighty-eight cents ($2.88) per week to all weekly paid employees.

4. Twelve dollars and forty-eight cents ($12.48) per month to all monthly paid employees.

Finding and Direction will issue accordingly.

July 31, 1944.

Re: John Inglis Company Limited (Toronto) and United Steelworkers of America, Local 2900

Reasons for Decision

This is an appeal by the Company from a decision of the Ontario Regional Board dated February 5, 1944, directing under P.C. 5963 a normal work week of 42¾ hours for office employees, overtime at pro rata rates for work in excess of 44 hours and at time and one half for work in excess of 48 hours, and an extra day's pay "where office workers are required to work on statutory holidays."

The evidence is that salaries were increased in 1940 by one-sixth to compensate for the 7-day work week then inaugurated in the war emergency. The work week was reduced to 6 days in 1941 and 5½ days in March, 1943, without corresponding salary adjustments. At present the normal work week is 45¾ hours with no overtime provisions.

The appellant's contention is that by directing a reduction in hours for office employees the Regional Board encroached upon new ground and went beyond what was indicated by the last paragraph of the decision in the McKinnon Industries case (L.G., 1943, p. 1345). Our opinion is that that contention must prevail in this case. We think it is unwise for a government authority to interfere with the discretion exercised by the management of this large war plant in the matter of working hours for office and clerical employees, when from the evidence it appears to have pursued a fairly liberal policy.

However, we are prepared to give effect to the McKinnon decision and to direct payment of overtime at straight pro rata time for work required to be performed after 46 hours and at time and one-half after 48 hours and on statutory holidays.

Finding and Direction accordingly.

July 28, 1944.

Re: Dominion Bridge Company Limited (Toronto) and United Steelworkers of America, Local 2808

Reasons for Decision

An appeal by the Company from a decision of the Ontario Regional Board dated May 22, 1944, directing payment of "a night premium of 5 cents per hour to all hourly rated employees working on the afternoon and night shifts effective from April 1, 1944," at the Company's Sorauren Avenue munitions plant. Leave to appeal was granted below.

The Company's production schedule has called for a 3 shift operation. The afternoon shift works from 4 p.m. to 12 p.m. and the night shift from 12.01 a.m. to 8 a.m., and employees change shifts weekly. Premium for night work has been recognized by this Board as a fair and reasonable condition of employment both in the interest of production and to compensate the worker for the special hardship. In certain cases other considerations, however, must sometimes prevail as in Electro-Metallurgical Company of Canada Ltd. (L.G., 1944, p. 470.)

Under the Order in Council (P.C. 9384) by which we must govern our decisions it is necessary for us to find that the condition is consistent with the purposes of the Order, one of which is to stabilize the wage structure (section 20 (1) (*c*) and section 14 (*b*)). On a rotating 3-shift operation, the extension of the premium to the second or afternoon shift is more of a straight wage increase than a premium for night work and becomes an unstabilizing factor in wage control.

Our conclusion is that in this case the premium must be restricted to the midnight shift. Also it must not be included in the base rate for the purpose of computing overtime.

The Regional Board's decision is therefore varied accordingly.

July 31, 1944.

Re: Vancouver Masonic Cemetery Association

Reasons for Decision

This appeal is from a decision of the Regional War Labour Board for British Columbia dated June 1, 1944, which held the Association to be an "employer" under the wages control orders P.C. 5963 and P.C. 9384 and as a consequence compelled to pay the cost-of-living bonus (now merged into basic rates) made mandatory by this Board's general orders.

The Association is a non-profit organization incorporated under the Benevolent Societies' Act of British Columbia, but that is insufficient by itself to bring it within the terms of the exemption provided by paragraph (v) of section 13 (1) (*d*) of the current Order. The association must be either "religious, charitable or educational" to claim the exemption. We are of the view taken by the Regional Board and find that the exemption does not apply. Nor do we think that there is ground for exemption under paragraph (vi).

The appeal must therefore fail.

July 31, 1944.

Re: Canadian Pacific Railway Company and Brotherhood of Railroad Trainmen on behalf of dining car employees

Reasons for Decision

On March 8, 1944, this Board issued the following directive to the Company:

> "On those assignments in which the time in transit exceeds 24 hours, if an employee is not relieved from duty for at least 9 hours between the serving of dinner and breakfast, any time between the actual time of release from duty and 9 hours shall be paid for as overtime at the rate of time and one-half on the minute basis to the nearest 15 minutes. For the purpose of calculating overtime rate the working month is to be considered one of 240 hours." (see Reasons for Decision, L.G., 1944, p. 467.)

In its application the Brotherhood had asked for "a 208-hour basic month with time and one-half for all service in excess." This was refused and the foregoing was advanced by the Board as a measure to alleviate the situation from the point of view of overtime.

The Board was aware that negotiations had been conducted by the parties and the reasons contained the following:

> "Just how the above directive may be complicated by other conditions of work tentatively agreed to we are not sure. If there is any such complication which the parties cannot agree to solve the matter may be spoken to."

Under this passage, the Brotherhood now requests that we direct the company to inaugurate the following rule in addition to the rule for overtime on the daily basis provided in our decision of March 8, 1944:

> "Two hundred and forty hours' service, or less, in assigned service, shall constitute a basic month's work. All time work in excess of two hundred and forty hours will be paid for as overtime on the actual minute basis at *pro rata* rate."

It appears that this was one of the conditions tentatively agreed to until the Brotherhood decided to come to the Board on its original application.

We are of opinion that there should be a direction effective from March 15, 1944, covering the last-mentioned rule. It should be understood, however, that no employee shall be paid overtime under both rules for the same period of time worked. July 19, 1944.

Industrial Disputes and Conciliation

Introduction

THE *Industrial Disputes and Conciliation* section contains monthly articles dealing with proceedings under the National Wartime Labour Relations Regulations, Conciliation Work of the Department of Labour, and Strikes and Lockouts in Canada, Great Britain and other countries.

Recent Proceedings under the Wartime Labour Relations Regulations.—Under the Wartime Labour Relations Regulations, P.C. 1003, the Government has extended its jurisdiction over employer-employee relations which are normally exclusively within the provincial field, to the extent considered necessary to cover adequately employers and employees in industries "essential to he efficient prosecution of the war", but without attempting to include other industry which has not a direct bearing on war production. In so far as these latter industries are concerned, each province can make its own decision as to whether or not they shall be brought under the Regulations.

Agreements have been made under the Regulations between the Dominion and every province except Alberta and Prince Edward Island providing for the setting up of provincial agencies for the administration of the Regulations.

The work of the Wartime Labour Relations Board (National) is here described in two separate articles. The first deals with applications made by unions for certification and their disposition by the Board; the second describes conciliation proceedings under the Regulations and includes the reports of Boards of Conciliation.

Conciliation Work of the Industrial Relations Branch.—Conciliation proceedings are carried on by the Industrial Relations Branch of the Department of Labour under the provisions of the Conciliation and Labour Act which empowers the Minister to inquire into the causes and circumstances of a dispute, to take such steps as seem expedient for the purpose of bringing the parties together, and to appoint a conciliator or an arbitrator when requested by the parties concerned.

Strikes and Lockouts.—The latest information concerning strikes and lockouts in Canada is published monthly in tabular form, with a summary appearing once a year. The summary of strikes and lockouts in Canada and other countries during 1943 appeared in the LABOUR GAZETTE for March, 1944.

The latest available information as to strikes and lockouts in Great Britain and other countries appears from month to month.

Applications for Certification under the Wartime Labour Relations Regulations

THE Wartime Labour Relations Board (National) met for four days during the month of July. During this period the Board received eighteen applications for certification, held eleven public hearings, ordered eleven representation votes, issued twelve certificates designating bargaining representatives and rejected two applications for certification. Details of these proceedings and activities are given below:—

Certificates Issued

(1) International Union of Mine, Mill and Smelter Workers, Local 690 and Alberta Nitrogen Products, Limited, Calgary, Alberta. Following a preliminary investigation of the application, the Board ordered that a representation vote of the employees be taken. Out of 272 eligible voters, 186 voted in favour of the applicant union and 54 against. The local union and Messrs. William Longridge, V. H. Johnston, G. Lydsman, W. Wright, J. Bennet, F. Calow, C. Armstrong, C. Hughes and R. Lee were certified as the bargaining representatives of the employees of the Company with the exception of office and professional workers, supervisors and others having the right to hire and discharge, electricians, carpenters, painters, security guards and two groups of part-time labourers comprised of students employed after school hours and on holidays and members of the armed forces working on week-ends.

(2) Val d'Or Mine and Mill Workers' Union, Local 654 of the International Mine, Mill and

14828—3½

Smelter Workers and Golden Manitou Mines, Limited, Val d'Or, P.Q. Following a preliminary investigation the application, and a subsequent public hearing, the Board ordered that a representation vote of the employees be taken. Out of 274 eligible voters, 218 voted in favour of the applicant union and 18 against. Subsequently the union and Messrs. Thomas McGuire, R. H. Carlin, J. J. Billoki, George Zapotoski, Leo Belisle, Robert Joseph, Leo Allard, Henry Chandonnet and Lorenzo Bourassa were certified as bargaining representatives for all the hourly-rated employees of the company, except employees engaged in surface mechanical transportation, the refinery and assay office or those in a supervisory capacity.

(3) International Union of Mine, Mill and Smelter Workers, Local 688, and Beattie Mines (Quebec), Limited, Duparquet, P.Q. The Board, following a preliminary investigation of this application, and a public hearing, ordered that a representation vote be taken. Out of 430 eligible voters, 338 voted in favour of the applicant union and 14 against. The union and Messrs. R. H. Carlin, Thomas McGuire, David Cote, Leo. A. Behie, D. Richard, R. Rivard, N. Vugnovich, J. J. McCann, E. Johnson and A. Little were certified as bargaining representatives for all the hourly-rated employees, except office staff and those employees holding a position higher than that of sub-foreman or mucker boss.

(4) International Union of Mine, Mill and Smelter Workers, Local 688, and Powell Rouyn Gold Mines, Limited, Rouyn, P.Q. Following a preliminary investigation of this application, a public hearing was held and the Board ordered that a representation vote be taken. Out of 229 eligible voters, 147 voted in favour of the applicant union and 26 voted against. The union and Messrs. R. H. Carlin, Thomas McGuire, David Cote, Leo. A. Behie, J. Burdages, A. Doucet and A. Renaud were certified as bargaining representatives for all the hourly-rated employees of the company except clerical staff and those employees holding a position higher than that of sub-foreman or mucker boss.

(5) International Union of Mine, Mill and Smelter Workers, Local 688 and Senator-Rouyn Mines, Limited, Rouyn, P.Q. Following a preliminary investigation of this application and a public hearing, the Board ordered a representation vote. Out of 129 eligible voters, 87 voted in favour of the applicant union and 6 against. The Union and Messrs. R. H. Carlin, Thomas McGuire, David Cote, Leo. A. Behie, R. Rainville, J. R. Foysy, and L. Belleau, were certified as bargaining representatives for all the employees of the company except clerical staff and employees holding a position higher than that of sub-foreman and mucker boss.

(6) International Union of Mine, Mill and Smelter Workers, Local 688, and Waite-Amulet Mines, Limited, Rouyn, P.Q. Following a preliminary investigation of this application and a public hearing the Board ordered a representation vote. Out of 395 eligible voters, 242 voted in favour of the applicant union and 25 for the Waite-Amulet Employees Committee, intervener. The Union and Messrs. R. H. Carlin, Thomas McGuire, David Cote, Leo. A. Behie, Leonard Desabrias, H. Poutvin, A. Lafrete and U. Lemay were certified as bargaining representatives for all the hourly-rated employees of the company except supervisory and clerical staff, guards, technicians, laboratory employees or employees holding position higher than that of sub-foreman or mucker boss.

(7) International Brotherhood of Electrical Workers, Local B1106, and the Quebec Power Company, Quebec, P.Q. Following an examination of the Union's membership records by an officer of the Board, the Board certified the Union and Messrs. Rene Michaud, and Jean Louis Ouellet as the bargaining representatives for all the employees of the company except the clerical staff and supervisory technicians.

(8) International Association of Machinists, Lodge 1288, and the Anglo-Canadian Wire, Rope Company, Limited, Lachine, P.Q. Following an examination of the Union's membership records by an officer of the Board, the Board certified the Union and Messrs. Oliva Schanck, Mike Horniak, Roger St. Onge and Mike Gulyck as the bargaining representatives for all hourly-rated employees of the company except clerical staff, watchmen and foremen and those in higher positions.

(9) International Association of Machinists, Lodge 1288, and the Dominion Wire, Rope and Cable Company, Limited, Lachine, P.Q. Following an examination of the Union's membership records by an officer of the Board, the Board certified the Union and Messrs. George Moore, Antonio Lebell, and Dick Pape as bargaining representatives for all the employees of the company except clerical staff, storekeepers, testers, shippers, watchmen and foremen.

(10) The Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station employees and Fort William Coal Dock Company, Limited, Fort William, Ontario. Following an examination of the Union's

membership records by an officer of the Board, the Board certified the Union and Messrs. J. L. Pateman, and T. Johnson, as the bargaining representatives for all the employees of the company except the weighman, foreman, office staff and supervisory employees.

(11) Canadian Seamen's Union and Saint Lawrence Steamships, Limited, Buffalo, N.Y. Following an investigation of union membership records and a public hearing on the application the Board ordered a representation vote. Out of 33 eligible voters, 27 voted in favour of the applicant union and 5 against. The Union and Messrs J. A. Sullivan, D. Ferguson, and C. L. Lenton were certified as bargaining representatives for all the unlicensed personnel of the company on the S.S. *Sioux,* S.S. *Algonquin,* and S.S. *Cheyenne.*

(12) National Harbours Board Employees, Federal Union No. 24, and the National Harbours Board, Saint John, N.B. Following an examination of the Union's membership records by an officer of the Board, the Board certified the Union and Messrs. Harry Truswell, Frank Byron, Frank Burchill, Ralph Shephard, and James A. Whitebone as bargaining representatives for all the employees (including patrolmen) of the National Harbours Board, Saint John, N.B., except the superintendent, general foreman and office staff.

Applications for Certification Rejected

(1) The United Association of Locomotive Engineers, Firemen, Brakemen and Dispatchers, Federal Union 22022 (A.F. of L.) and Aluminum Company of Canada, Limited, Arvida, P.Q. Following an investigation of the application and a public hearing the Board ruled that since the employees affected were covered by a collective agreement between the National Catholic Syndicate of Aluminum Workers of Arvida, Inc., and the company, the terms of which had been automatically extended until December 31, 1944, the application could not be entertained until the expiry of ten months from the renewal date of the agreement (January 1, 1944) as provided in Section 9 of the Wartime Labour Relations Regulations.

(2) Canadian Union of Asbestos Workers, Local 6 (C.C.L.), and Johnson's Company, Thetford Mines. This application was investigated and later a public hearing was held, following which the Board rejected the application on the grounds that it was premature, the ten-month period of the existing collective agreement not having expired as required by Section 9 of the Regulations.

Representation Votes Ordered

Representation votes were ordered by the Board on the following applications:

(1) Employees' Welfare Board of the Hudson Bay Mining and Smelting Company, Limited, and the Hudson Bay Mining and Smelting Company, Limited, Flin Flon, Manitoba, and subsidiaries. Representatives of the applicants and the Company appeared before the Board. The eligible voters are the plant unit or units exclusive of shift bosses, foremen, superintendents, confidential employees and those having the right to hire and discharge.

(2) Canadian Brotherhood of Railway Employees and Other Transport Workers and Levis Ferry, Limited, Quebec, P.Q. Representations were made before the Board by the applicant union, the company and the National Catholic Syndicate of Ferry Employees of Levis, as intervener. Captains, second captains and management staff were excluded from the vote.

(3) Brotherhood of Railroad Trainmen and Canadian National Railways and Canadian Pacific Railway Company, Montreal, P.Q., with the Order of Railway Conductors as intervener. Representatives of both organizations and the companies appeared before the Board. Those eligible to vote are all regularly assigned conductors, those regularly assigned to conductors' spare board as of April 5, 1944, and part time conductors, who during the period April, 1943, to April, 1944, worked a preponderance of their time as conductors.

(4) Commercial Telegraphers' Union, Canadian Pacific System Division No. 1, and the Canadian Pacific Railway Company (Communications Department). Representatives of both parties appeared before the Board. The eligible voters were mechanical staffs, broadcaster chiefs and attendants, repeater chiefs, supervisors and attendants, installers and assistants. Those excluded and therefore not eligible to vote are chief operators, assistant chief operators, night chief operators, all night chief operators, morse traffic supervisors, printer traffic supervisors, R.S. traffic chiefs (Montreal and Winnipeg) and managers of branch offices.

(5) Canadian Union of Soapstone Workers (C.C.L.) and the Broughton Soapstone and Quarry Company, Limited, Leeds Station, P.Q. Representatives of the applicants and the company appeared before the Board. Those eligible to vote are: hoistmen, millwrights, signalmen, stonecutters, stone crushers, and quarry labourers. The foremen and senior

supervisory members of the staff are excluded from voting.

(6) Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees and Superior Elevator Company, Port Arthur, Ontario. The eligible voters are: shovellers, labourers, experienced labour inside the elevator, foremen, watchmen and all monthly rated employees engaged in the operation of the elevator. Excluded from the vote are the clerical office staff and the supervisory employees above the rank of foreman.

(7) Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees and National Grain Company, Limited, Fort William, Ontario. Those eligible to vote are: shovellers, labourers, experienced labour inside the elevator, foremen, watchmen and all monthly rated employes engaged in the operation of the elevator. The general foremen, clerical office staff and the supervisory employees above the rank of foreman are excluded from the vote.

(8) Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees and Northland Terminals, Limited, Fort William, Ontario. The eligible voters are: shovellers, labourers, experienced labourers inside the elevator, foremen, watchmen and all monthly rated employees engaged in the opeation of the elevator. Excluded from the vote are the clerical office staff and the supervisory employees above the rank of foreman.

(9) Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees and Reliance Grain Company, Limited, Fort William, Ontario. Those eligible to vote are: shovellers, labourers, experienced labour inside the elevator, foremen, watchmen, one guard and all monthly rated employees engaged in the operation of the elevator. The clerical office staff and the supervisory employees above the rank of foreman are excluded from the vote.

(10) Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees and Canadian Pacific Railway Company (Island Terminal Coal Dock), Fort William, Ontario. The eligible voters are: weighmen, coalmen, watchmen, machine operators, repairmen, car loaders and oilers. Those excluded from voting are: foremen and other supervisory employees and employees in the power house such as blacksmiths, electricians, etc.

(11) Val d'Or Mine and Mill Workers' Union, International Union of Mine, Mill and Smelter Workers and Lamaque Mining Company, Limited, Bourlamaque, P.Q. Those eligible to vote are all the hourly-rated employees of the company except the clerical and supervisory employees, guards, technicians, laboratory employees and employees holding positions higher than that of sub-foreman and mucker boss.

Applications Referred to Provincial Jurisdiction

International Association of Machinists and MacDonald Brothers Aircraft, Limited (office and stores departments, Robinson Street Division), Winnipeg, Man. This application was referred to the Manitoba Wartime Labour Relations Board.

Rules of Procedure of Board Amended

ON June 7, 1944, the Wartime Labour Relations Board (National) approved rules of procedure with respect to the making of various types of applications (L.G., June, 1944, p. 737). These rules were amended on July 19, by:—

(1) adding a Subsection (3) to Section 1, providing that "The following rules in Sections 2 to 6 inclusive shall apply to proceedings before the National Board and also to proceedings before a Provincial Board unless and until such Provincial Board adopts its own rules of procedure";

(2) deleting the first sentence of Subsection (1) of Section 3;

(3) extending the period of time (fifteen days) in Section 7 (1) (*a*) and (2) to thirty days.

These amendments have been consolidated in the Regulations given below.

Wartime Labour Relations Board (National) Board Regulations

1. (1) In these Regulations, unless the context otherwise requires,

(*a*) "National Board" means the Wartime Labour Relations Board;

(*b*) "Provincial Board" means a Labour Relations Board exercising any of the powers of the Wartime Labour Relations Board in any province;

(*c*) "Person" includes firm, corporation, trade union, employees' organization or employers' organization.

(2) Other words and expressions used in these Regulations shall, unless the context otherwise requires, have the same meaning as in the Wartime Labour Relations Order (Order in Council P.C. 1003 of February 17, 1944 and any amendments thereto).

(3) The following rules in Sections 2 to 6 inclusive shall apply to proceedings before the National Board and also to proceedings before a Provincial Board unless and until such Provincial Board adopts its own rules of procedure.

PROCEDURE

Applications for Certification of Bargaining Representatives

2. Any application for certification of bargaining representatives shall be required to be submitted in writing duly verified by statutory declaration.

3. (1) The Board shall give notice in such manner, as, in the circumstances, it deems sufficient to any person having an immediate interest in the matter in respect of which application is made and shall furnish a copy of the application to him and shall give an opportunity for representations to be made and evidence adduced by or on behalf of every such person with regard thereto.

(2) Every person shall within seven days of the receipt by him of such notice and copy of application notify the Chief Executive Officer of the Board in writing whether he wishes to contest the application and in such case he shall within fourteen days of the receipt by him of such notice and copy of application file in the office of the Board his reply and the reply shall be verified by statutory declaration in the same manner as in the case of an application.

(3) The reply shall contain a concise statement of the material facts upon which the person replying intends to rely and shall specifically admit, deny or explain each of the statements made in the application. The name and address of the person replying shall be stated in the said reply.

(4) If any person shall fail within seven days of the receipt by him of a copy of the application to notify the Chief Executive Officer that he wishes to contest the application or, having so notified the Chief Executive Officer, shall neglect to file his reply in the office of the Board within the time hereinbefore limited or to give his name and address in such reply he shall not be entitled to any further notice of the proceedings commenced by the application and relief under the said application may be granted without giving any further opportunity for representations to be made or

evidence adduced by or on his behalf with regard thereto, but nothing herein contained shall prevent the Board from hearing further representations or evidence from any such person.

(5) Upon the filing of a reply the Chief Executive Officer shall forthwith send a copy of the reply to the applicant and shall give notice to the applicant at the address stated in the application and to all parties filing replies at the address set out in the said replies respectively fixing a time and place for the hearing of the application. If necessary, this notice may be given by telegraph or telephone.

(6) The Board shall make such inquiries and investigations into the matter in respect of which such application is made as it deems necessary for the proper disposal thereof.

Applications for Intervention of a Board Pursuant to Section 11 of the Wartime Labour Relations Regulations

4. An application by a person for the intervention of a Board pursuant to Section 11 of the Wartime Labour Relations Regulations may be made by letter or telegram to the Chief Executive Officer of the Board.

(1) The application shall set forth the time spent and the efforts made by the parties to negotiate an agreement and state the grounds for the belief that an agreement will not be completed in a reasonable time.

(2) Upon receipt of the application for intervention, the Chief Executive Officer may request such additional information as may be necessary from the applicant and a statement from the other interested party or parties concerned, or may request the parties to appear before the Board for a hearing of the application prior to reference of the matter to the Minister as specified in Section 12 (1) of the Regulations.

Applications for the Establishment of an Appropriate Procedure for the Consideration and Settlement of Disputes, Pursuant to Section 18 (2) of the Wartime Labour Relations Regulations

5. An application for the establishment by a Board of an appropriate procedure for consideration and settlement of disputes concerning the interpretation or violation of a collective agreement pursuant to Section 18 (2) of the Wartime Labour Relations Regulations may be made by letter or telegram to the Chief Executive Officer of the Board.

(1) The application shall set forth the names and addresses of the parties to the dispute, the date of the execution of the collective agreement, and a statement that the agreement contains no appropriate procedure for consideration and settlement of disputes concerning its interpretation or violation. If the applicant claims that the procedure contained in the agreement is inappropriate, the reasons for so claiming must be given.

(2) The applicant shall also file a copy of the collective agreement in connection with which it is desired that an appropriate procedure be established.

(3) On receipt of the application for the establishment of an appropriate procedure, the Chief Executive Officer may request such additional information as may be necessary from the applicant and a statement from the other interested party or parties concerned, or may request the parties to appear before the Board for a hearing of the application, or may instruct an officer to investigate the application and report thereon to the Board.

Applications for Leave to Institute Prosecutions Under the Wartime Labour Relations Regulations

6. An application to a Board for leave to institute a prosecution under the Regulations may be made by letter or telegram to the Chief Executive Officer of the Board.

(1) The application shall specify the provision of the Regulations alleged to have been violated and material facts regarding such violation.

(2) On receipt of an application for leave to institute a prosecution, the Chief Executive Officer may request such additional information as may be necessary from the applicant and a statement from the other interested party or parties concerned, or may request the parties to appear before the Board for a hearing of the application, or may instruct an officer to investigate the application and report thereon to the Board.

Appeals

7. (1) Any person directly affected by any decision or order of a Provincial Board may appeal to the National Board, if

(*a*) The Provincial Board making such decision or order grants leave so to appeal and the request for such leave to appeal has been made within thirty days of the announcement of the decision or order of such Provincial Board; or

(*b*) The National Board grants leave so to appeal and the request for such leave to appeal has been made within sixty days of such announcement.

(2) Within thirty days after the granting of such leave to appeal the appellant shall appear before the National Board and present the said appeal provided, however, that the National Board may for good cause adjourn the hearing of the said appeal from time to time.

(3) On any such appeal, the decision or order of the National Board shall constitute the decision or order of the Provincial Board as if originally made by it.

General

8. The National Board may from time to time amend these Regulations.

Made pursuant to Section 27 of the Wartime Labour Relations Regulations of February 17, 1944, P.C. 1003, this 7th day of June, A.D. 1944.

G. B. O'Connor,
Chairman.

Bernard Wilson,
Secretary.

Conciliation Proceedings Under the Wartime Labour Relations Regulations

SECTIONS 12 to 14 of the Wartime Labour Relations Regulations provide for conciliation machinery to attempt settlement of disputes where negotiations for an agreement have been unsuccessfully continued for thirty days following certification of bargaining representatives. Disputes of this nature are referred to the Minister of Labour by the Wartime Labour Relations Board (National) or by the provincial boards. A conciliation officer is then appointed to confer with the parties and attempt to effect an agreement. If the conciliation officer is unable to bring about settlement of the matters in dispute and reports that in his view an agreement might be facilitated by appointment of a conciliation board, a board is appointed by the Minister of labour forthwith. The duty of such a board is to endeavour to effect an agreement between the parties on the matters in dispute and to report its findings and recommendations to the Minister.

Montreal Tramways Company, Montreal, Quebec

During the month of July two reports had been received from the Board of Conciliation established to deal with a dispute between the Montreal Tramways Company, Montreal, Quebec, and its employees, members of the Canadian Brotherhood of Railway Employees and Other Transport Workers.

The personnel of the Board was as follows: Hon. Mr. Justice Oscar L. Boulanger, Quebec, P.Q., chairman appointed on the nomination of the other two members; Mr. Walter A. Merrill and Mr. F. R. Scott, both of Montreal, appointed on the nomination of the company and the employees respectively.

The dispute arose over the union's request for the inclusion of certain clauses, including the closed shop and check-off of union dues, in a collective labour agreement. The union, whose bargaining representatives had been certified by the Wartime Labour Relations Board (National), notified the Board on April 14 that negotiations had been proceeding for thirty days and that an agreement would not be completed in a reasonable time. Pursuant to section 12 (1) of P.C. 1003 the Board referred the matter to the Minister of Labour who forthwith appointed Mr. J. S. McCullagh, Ottawa, Ontario, to act as a conciliation officer to confer with the parties in an attempt to effect an agreement.

The report of the Conciliation officer, which was received by the Minister of Labour on May 5, stated that there had been no indication of agreement on the closed shop and check-off questions, and that out of 117 clauses in the proposed contract, agreement was reached on only 27 relatively unimportant points. In view of such circumstances the conciliation officer recommended the establishment of a board of conciliation. The Board was subsequently established on May 11 and, with the appointment of the Chairman, it was fully constituted on May 30.

The report of the Board was received on July 8. It reported that agreement had been reached on a number of points. On the question of the check-off the Board unanimously agreed that union dues should be deducted from the last pay of each month and detailed the form of written authorization for this purpose. With respect to the question of a closed shop, a majority of the Board consisting of the Chairman and Mr. Merrill recommended against a "union shop". The Chairman's concurrence in this majority finding was modified, however, in his statement that he would be in favour of including in the contract a union shop clause applicable to all future personnel, but he would not be in favour of a union shop clause applying to the present employees of the Company who are not members of the Brotherhood. With respect to such employees he said he would favour a maintenance of membership provision. In a minority finding on this point, Mr. F. R. Scott outlined the Brotherhood's reason for requesting a union shop, and advised the adopting of a union shop clause, maintaining that the denial of such would take away completely the freedom of the majority to include such a provision in the collective bargaining agreement.

In an addendum, Mr. Scott pointed out that he and the Chairman favoured some kind of union shop, there thus being a majority of the Board in support of the principle, although there is a majority against the particular form proposed by the Brotherhood.

On July 24 the Board reconvened on the request of the Minister of Labour for the purpose of clarifying certain of its recommendations and to make a further effort to mediate the main items in dispute. In its supplementary report, received by the Minister of Labour on July 27, the Board declared that it was its intention that the check-off should apply to the Brotherhood only, while the contract was in effect, and that no organization should be authorized or permitted, to collect union dues on the company's premises.

With respect to the closed shop the supplementary report stated that, inasmuch as the company and the union had submitted no new proposals which would lead the members of the Board to modify their original findings and notwithstanding the efforts of the Board to induce the parties to reach some common ground of agreement, all efforts at reconciling the parties were unsuccessful. The Board therefore made no change in its original findings with regard to the union shop.

The text of both reports of the Board of Conciliation are included on page 976 of this issue.

On July 31 a strike vote conducted by the Brotherhood was held among the workers to ascertain whether or not they favoured going on strike with a view to forcing the company to agree to the union shop provision in the proposed agreement. The result of the vote was 3,520 to 78 in favour of a strike. The Brotherhood then announced that a strike would take place at midnight August 2. At that time transport operations ceased. By August 11 there seemed to be no indication of a negotiation settlement being reached.

On August 11 the Dominion Government by Order in Council P.C. 6416 appointed two controllers to have custody and control of the property of the Montreal Tramways Company in so far as it relates to the operations of its transportation system, for a period commencing August 14 and ending at such time as the order is revoked. The controllers are E. L. Cousins of Halifax, Wartime Administrator of Canadian Atlantic Ports, and J. E. St. Laurent of Ottawa, Vice-Chairman of the National Harbours Board. It was stated in the Order that every employee of the Company must return to work on August 14 and to perform his duties under the conditions prevailing at the time the strike occurred until the authority of the controllers is revoked.

The Order makes it an offence for any person to refuse to resume work or to recommend to any person that work be not resumed, and also makes it an offence should the Company refuse to place its properties at the disposal of the controllers.

The disputing parties were directed to recommence negotiations for a settlement with the controllers to remain in charge pending an agreement. If at the end of sixty days the controllers report to the Minister of Labour that there is no prospect of settlement, the matter will further be reviewed by the Government.

Work was resumed on August 14.

The text of Order in Council P.C. 6416 is as follows:

Whereas a strike of the employees of the Montreal Tramways Company has been in progress since the third day of August, 1944, arising out of the failure of negotiations between the Company and the bargaining representatives of the employees appointed under the Wartime Labour Relations Regulations to settle the terms of a collective agreement;

And whereas as a result of the strike the entire transportation system of the Montreal Tramways Company has ceased to operate with most serious consequences to both civilian and military pursuits in that locality and consequential dimunition in the production of essential war supplies;

And whereas in view of the foregoing it is advisable for the security, defence, peace, order and welfare of Canada and the efficient prosecution of the war that Controllers be appointed to manage and control the operations of the Company and that employees be required to return to work immediately pending settlement of the dispute aforesaid;

Therefore, His Excellency the Governor General in Council, on the recommendation of the Minister of Munitions and Supply and the Minister of Labour and under and by virtue of the powers conferred by the War Measures Act, being Chapter 206 of the Revised Statutes of Canada, 1927, is pleased to order and doth hereby order as follows:—

1. E. L. Cousins, Esquire, of the City of Halifax, Wartime Administrator of Canadian Atlantic Ports and J. E. St. Laurent, Esquire, of the City of Ottawa, Vice-Chairman of the National Harbours Board, are hereby appointed Controllers of the business, undertaking, affairs and operations of the Montreal Tramways Company;

2. The said Controllers shall have the custody and control of the undertaking and all the property and assets of the Company insofar as the same relate to or are connected with the operations of its transportation system, and shall have the power and authority in the name of and on behalf of the Company to manage, operate and carry on the transportation business, undertaking, affairs and operations of the said Company, and for such purpose shall exercise the powers, authorities and rights which but for the provisions of this Order would have been exercisable by the board of directors of the Company.

3. The Controllers shall exercise the foregoing powers and authorities subject always to existing contracts with the municipalities in which the company operates and subject to such instructions and directions, if any, as may from time to time be approved by the Governor in Council.

4. The authority of the Controllers shall commence at the first moment of the fourteenth day of August, 1944, and shall continue until the same is revoked by Order in Council which shall be published in the CANADA GAZETTE.

5. The authority of the board of directors and the shareholders in respect of the management, operation and carrying on of the transportation business, undertaking, affairs, and operations of the Company is, subject to paragraph nine, suspended from the last moment of the thirteenth day of August, 1944, until the authority of the Controllers is revoked.

6. The said Controllers and any persons acting for or on behalf of or under the authority of

the said Controllers shall not be or become liable to any person (including the Company, its creditors or shareholders) for anything done or omitted in the exercise or purported exercise of any power or authority from time to time vested in or conferred upon the said Controllers.

7. It shall be the duty of every person who was in the employ of the Company immediately before the aforesaid strike to resume work on the fourteenth day of August, 1944, at the hour he should normally have resumed work on the fourth day of August, 1944, and to perform the duties of his employment until the authority of the Controllers is revoked; and every person who fails to resume work and perform his duties as aforesaid as herein required without lawful excuse, the onus of proof of which is upon him, is guilty of an offence and liable upon summary conviction to a fine of twenty dollars for each day or part of a day on which he fails so to perform his duties.

8. It is hereby provided that all the terms of employment which were in force between the Company and its employees immediately before the aforesaid strike are applicable to employment under this order.

9. The bargaining representatives of the employees and the Company shall enter into negotiations immediately with a view to the completion of a collective agreement, and shall negotiate in good faith with one another and make every reasonable effort to conclude a collective agreement.

10. If the Controllers at the end of sixty days following the date of their appointment report to the Minister of Labour that the bargaining representatives of the employees and the Company are unable to negotiate a collective agreement, the Minister of Labour shall report the same to the Governor in Council for his further consideration as to what further measures may be taken for settlement of the matters in dispute.

11. Any person who (*a*) interferes with the exercise by the Controllers of any of the powers, authorities and rights conferred upon them or (*b*) interferes with any employee or other person seeking to comply with the terms of this order or (*c*) counsels or procures any person to violate this order shall be liable upon summary conviction to a fine not exceeding in the case of (*a*) five thousand dollars or imprisonment for a term not exceeding five years or to both such fine and such imprisonment and in the case of (*b*) or (*c*) to a fine not exceeding five hundred dollars or imprisonment for a term not exceeding six months or to both such fine and such imprisonment.

12. In this order "Company" means the Montreal Tramways Company and all the tramway companies that the Montreal Tramways Company controls or whose powers, franchises, privileges or other rights it exercises either under its own name or any other name.

Boards Fully Constituted

During July three Boards of Conciliation were fully constituted.

Russel Bros., Owen Sound, Ontario.—The Board of Conciliation established to deal with a dispute between Russell Bros., Owen Sound, Ontario, and its employees, members of Local 2837, United Steelworkers of America, was fully constituted on July 11. On June 16, Mr. J. P. Nicol, Industrial Relations Officer, Dominion Department of Labour, Toronto, Ont., who was appointed Conciliation Officer to investigate the dispute, recommended that a Board of Conciliation be established, as he had been unable to bring about a satisfactory settlement of the dispute. The personnel of the Board is as follows: Dr. Cecil A. Wright, Toronto, Ontario, Chairman, appointed on the joint recommendation of the other two members; Mr. John J. Robinette, employer's nominee; and Mr. F. A. Brewin, employees' nominee, all of Toronto.

Pedlar People, Limited, Oshawa, Ontario.—With the appointment of the Chairman on July 18, the Board of Conciliation established to deal with a dispute between the Pedlar People Limited, Oshawa, Ontario, and the United Steelworkers of America, Local 2784, was fully constituted. The establishment of a Board had been recommended by Mr. J. P. Nicol, Industrial Relations Officer, Toronto, Ontario, who had investigated the dispute as a Conciliation Officer. Dr. Cecil A. Wright of Toronto, is the Chairman of the Board, appointed by the Minister of Labour in the absence of a joint recommendation from the other two members. Mr. J. S. D. Tory, of Toronto, was appointed on the nomination of the employing company and Mr. Bora Laskin of Toronto was appointed on the recommendation of the employees concerned.

Fittings Limited, Oshawa, Ontario.—The Board of Conciliation established to deal with a dispute between Fittings Limited, Oshawa, Ontario, and Local 1817, United Steelworkers of America was fully constituted on July 18. Mr. F. J. Ainsborough had investigated the dispute as Conciliation Officer, and in his report of June 10, he recommended the establishment of a Conciliation Board, in view of the fact that no agreement had been reached on any of the matters in dispute. The personnel of the Board is as follows: Dr. Cecil A. Wright, Toronto, appointed by the Minister of Labour in the absence of a joint recommendation from the other two members; Messrs. J. S. D. Tory and Bora Laskin, Toronto, appointed on the recommendation of the company and the employees respectively.

Boards Established

During the month, seven Boards of Conciliation were established.

Dominion Glass Company, Wallaceburg, Ontario.—The Minister of Labour established a Board of Conciliation to deal with a dispute between Dominion Glass Company, Wallace-

burg, Ont., and Local 251, United Automobile Workers of America. The establishment of the Board was recommended by Mr. F. J. Ainsborough, Industrial Relations Officer, Toronto, in his report of June 24, as Conciliation Officer.

Mr. F. P. Dawson, K.C., Sarnia, Ontario, was appointed a member of the Board on the nomination of the employing company and Mr. Bora Laskin of Toronto, Ontario, was appointed on behalf of the employees concerned. At the end of the month the two members were conferring on the nomination of a Chairman and third member of the Board.

C. Lloyd & Son Limited, Wingham, Ontario.—On July 14, the Minister of Labour established a Board of Conciliation to deal with a dispute between C. Lloyd & Son, Limited, Wingham, Ontario, and Local No. 3, National Union of Woodworkers (C.C.L.). On June 28, Mr. James Hutcheon of the Ontario Department of Labour had been appointed a Conciliation Officer to confer with the parties and attempt to effect an agreement. In his report of July 12, Mr. Hutcheon reported that he had been unable to bring about an agreement between the parties and recommended the establishment of a Conciliation Board.

The Company nominee on the Board is Mr. Norman L. Mathews, K.C., of Toronto, and the nominee of the Union is Mr. Herbert Orliffe of Toronto. At the end of the month, Mr. Mathews and Mr. Orliffe were conferring on the recommendation of a Chairman and third member of the Board.

Fairchild Aircraft Limited; Noorduyn Aviation Limited; and Canadian Vickers Limited (Aircraft Division), Montreal, Quebec.—The Minister of Labour, on July 19, established a Board of Conciliation to endeavour to effect an agreement between Lodge 712 International Association of Machinists and three companies: Fairchild Aircraft Limited; Noorduyn Aviation Limited, and Canadian Vickers Limited (Aircraft Division), Montreal, Quebec. Mr. Bernard Rose, K.C., of Montreal was the Conciliation Officer who investigated this matter. Mr. Rose reported that the parties were unable to reach a satisfactory settlement of the principal matters at issue and recommended the establishment of a Board.

Mr. D. A. Paterson was appointed on the recommendation of the employing companies and Mr. Drummond Wren was appointed on behalf of employees concerned. On July 26, Mr. Wren and Mr. Paterson were requested to confer on the nomination of a Chairman and third member of the Board.

Ottawa Electric Railway Company, Ottawa, Ontario.—On April 17, 1944, Division No. 279, Amalgamated Association of Street, Electric Railway, and Motor Coach Employees, of America made application for certification to the Wartime Labour Relations Board (National). Certification was granted on April 27. Subsequently the Board was advised pursuant to Section 11 of the Wartime Labour Relations Regulations that the parties had negotiated for thirty days and that there was no prospect of the completion of an agreement within a reasonable time. The Board then referred the matter to the Minister of Labour, under Section 12 (1) of the Regulations. Subsequently Mr. J. S. McCullagh of the Department of Labour was appointed as Conciliation Officer to confer with the parties and attempt to effect an agreement. On July 18, Mr. McCullagh reported that he had been unable to bring about an agreement and recommended the appointment of a Conciliation Board. The Minister of Labour thereupon established the Board on July 19. Colonel John T. C. Thompson, K.C., Ottawa, was appointed on the recommendation of the employing company and Mr. John Munroe, Toronto, was appointed on behalf of the employees concerned. At the end of the month, Colonel Thompson and Mr. Munroe were conferring on the nomination of a Chairman and third member of the Board.

Aluminum Power Company, Limited, Shipshaw, P.Q.—After having been certified on May 10, 1944, the National Syndicate of Electric Power Employees of Shipshaw, P.Q. negotiated with the Aluminum Power Company of Shipshaw, P.Q., with a view to the completion of a collective agreement. On July 6, the Business Agent of the Union notified the Wartime Labour Relations Board (National) that it was impossible for the parties to come to an understanding. The Board then referred the matter to the Minister of Labour who requested Mr. L. Pepin, Industrial Relations Officer, Montreal, to investigate as Conciliation Officer. Mr. Pepin reported on July 15 that he considered that it was necessary to establish a Conciliation Board. The Board was established on July 18 and Messrs. Philippe Boily of Jonquiere, P.Q., and D. A. Paterson of Montreal, were appointed as members on the nomination of the employees and employing company respectively. On August 1st, Mr. Paterson and Mr. Boily were requested to confer on the nomination of a Chairman and third member of the Board.

Aluminum Company of Canada, Limited, Ile Maligne, P.Q.—On May 12, 1944, the National Syndicate of Aluminum Workers of St. Joseph d'Alma, Inc., were certified as the bargaining agency for the employees of the

Aluminum Company of Canada, Limited, Ile Maligne, P.Q. Representatives of the Company and the Union negotiated for thirty days with a view to the completion of a collective agreement. On July 7, the Wartime Labour Relations Board (National) was notified by the Union that negotiations had broken down. The matter was then referred to the Minister of Labour who subsequently appointed Mr. L. Pepin of Montreal, as Conciliation Officer to confer with the parties and attempt to effect an agreement. Mr. Pepin reported on July 15, that he had been unable to bring about a settlement and recommended the establishment of a Board of Conciliation. Mr. Philippe Boily of Jonquiere, P.Q., was appointed on the nomination of the employees concerned and Mr. D. A. Paterson was appointed on the recommendation of the Company. At the end of the month, the two members were conferring on the appointment of a Chairman and third member of the Board.

Breithaupt Leather Company Limited, Penetang, Ontario.—On July 24, the Minister of Labour established a Board of Conciliation to deal with a dispute between the Breithaupt Leather Company Limited, of Penetang, Ontario, and National Union of Shoe and Leather Workers, Local No. 24. The appointment of a Board had been recommended by Mr. J. P. Nicol, Industrial Relations Officer, Toronto, who had investigated the case, as Conciliation Officer. At the end of the month the parties concerned had been requested to submit nominations for membership to the Board.

Investigation by Conciliation Officers

Page-Hersey Tubes, Limited, Welland, Ontario.—On July 10, the Minister of Labour was notified by the Ontario Labour Relations Board that negotiations had continued for thirty days between the Page-Hersey Tubes, Limited, Welland, Ontario, and Local 523, United Electrical, Radio, and Machine Workers of America, and that there was no indication of a completion of an agreement within a reasonable time. The Minister of Labour then appointed Mr. Harold Perkins, Industrial Relations Officer, Toronto, as Conciliation Officer to confer with the parties. On July 21, Mr. Perkins reported that there was no possibility of mutual agreement on the questions involved and recommended the establishment of a Board of Conciliation. On July 26, the parties concerned were notified of the result of Mr. Perkin's investigation and requested to make nominations for membership to the Board.

Electro-Metallurgical Company Limited, Welland, Ontario.—On July 10, the Minister of Labour was notified by the Ontario Labour Relations Board that negotiations had been proceeding for thirty days between the Electro-Metallurgical Company Limited, Welland, Ontario, and Local 523, United Electrical Radio and Machine Workers of America, and that there was no indication of the completion of an agreement within a reasonable time. The Minister then instructed Mr. Harold Perkins, Industrial Relations Officer of Toronto, to investigate the situation as Conciliation officer. On July 24, Mr. Perkins reported that there was no possibility of an agreement on the questions involved and recommended that a Board of Conciliation be established. On July 26, the parties were notified of the Conciliation Officer's recommendation and were requested to nominate persons for membership to the Board.

Canadian Oil Companies Limited, Petrolia, Ontario.—On July 6, the Minister of Labour was informed by the Ontario Labour Relations Board that negotiations had been proceeding for thirty days between the Canadian Oil Companies Limited, Petrolia, Ontario, and Local No. 1, National Union of Petroleum Workers (C.C.L.). The Minister of Labour then appointed Mr. F. J. Ainsborough, Industrial Relations Officer, Toronto, a Conciliation Officer to investigate the matter. On July 25, Mr. Ainsborough reported that there was reason to believe that a recommendation of a Board of Conciliation and Investigation would be accepted by the parties and he, therefore, recommended the establishment of a Board. On July 28, the parties were notified of Mr. Ainsborough's recommendation and were requested to submit nominations for membership to the Board.

Motor Products Corporation, Windsor, Ontario.—On June 16, the Minister of Labour was notified by the Ontario Labour Relations Board that negotiations had been proceeding for thirty days between Motor Products Corporation, Windsor, Ontario, and Local No. 195, United Automobile, Aircraft, and Agricultural Implement Workers of America (U.A.W.-C.I.O.). The Minister subsequently appointed Mr. F. J. Ainsborough of Toronto as Conciliation Officer to deal with the case. On July 4, the Department of Labour was notified by the Company that it had made an application to the Ontario Labour Relations Board requesting leave from that Board to appeal a previous decision to the Wartime Labour Relations Board. At the end of the month, Mr. Ainsborough's investigation was post-

poned pending the decision of the Ontario Labour Relations Board.

Corporation of the Township of York Hydro System, Toronto, Ontario.—On July 10, the Minister of Labour was notified by the Ontario Labour Relations Board that negotiations had been proceeding for thirty days between the Corporation of the Township of York Hydro System, Toronto, Ontario, and the Canadian Electrical Trades Union (Branch No. 1), and that there was no indication of the completion of an agreement. On July 14, Mr. F. J. Ainsborough of Toronto was appointed Conciliation Officer to investigate the dispute. On July 25, Mr. Ainsborough reported that the parties had agreed to again enter into direct negotiations and that there appeared every reason to believe that an agreement would be concluded by the parties in the very near future.

John Inglis Company Limited, Toronto, Ontario.—On July 20 the Minister of Labour was notified by the Ontario Labour Relations Board that negotiations had been proceeding for thirty days between the John Inglis Company, Limited, Toronto, Ontario, and the United Steel Workers of America. The Minister thereupon appointed, on July 29, Mr. F. J. Ainsborough as Conciliation Officer to confer with the parties and endeavour to effect an agreement.

Report of Board in Dispute between Montreal Tramways Company, Montreal, and its Employees

During the month of July two reports were received from the Board of Conciliation established to deal with a dispute between the Montreal Tramways Company, Montreal, Quebec, and its employees, members of the Canadian Brotherhood of Railway Employees and other Transport Workers.

The personnel of the Board was as follows: Hon. Mr. Justice Oscar L. Boulanger, Quebec, P.Q., chairman, appointed on the nomination of the other two members; Mr. Walter A. Merrill and Mr. F. R. Scott, both of Montreal, appointed on the nomination of the company and the employees respectively.

The first report was received by the Minister of Labour on July 8; the supplementary report on July 27.

The texts of the two reports follow:—

Report of Board

To:
The Honourable Humphrey Mitchell, M.P.,
Minister of Labour,
Ottawa, Ont.

Re: Wartime Labour Relations Regulations, P.C. 1003, and re dispute between The Montreal Tramways Company, Montreal, P.Q., and employees, members of the Canadian Brotherhood of Railway Employees and Other Transport Workers.

Sir:

At the hearing before the Board, it was agreed that, in view of the instructions to the Conciliation Board with respect to basic wage rates and in view of the exclusive jurisdiction over such matters possessed by the National War Labour Board, all the articles of the contract in dispute which related either directly or indirectly to wage rates and wage increases should be referred to the National War Labour Board.

In addition, the parties themselves during the course of the hearings—at the suggestion of the Board—re-opened negotiations on a great many questions which had been in dispute and on which no agreement had been reached, and the goodwill and co-operation of the respective parties were such that when the Board resumed its hearings, it was found that the number of matters remaining to be dealt with by the Board had been materially reduced.

The Board unanimously wishes to take this opportunity of expressing its appreciation to all the parties who appeared before it, for the friendly spirit which prevailed throughout and for the dignified and able manner in which both sides presented their case and their willingness to find, wherever possible, some mutual ground of agreement in the interest of industrial harmony.

The matters which remained to be dealt with by this Board concerned only the following articles in the original contract of July 24, 1940, namely:

Nos. 25, 97 (*d*), 98, 99, 100, 102 (*a*), 102 (*b*), 102 (*c*), 107, 108 and 109.

Unanimous Findings:

ARTICLE 25

With respect to Article 25, it was unanimously decided that this matter be re-considered by the parties in the light of the decision by the National War Labour Board, as it appears to be closely related to the question of wages and is dependent upon the decision to be rendered by the National War Labour Board on Article 1.

ARTICLE 97 (*d*)

With respect to Article 97(*d*), it was unanimously agreed that a similar procedure be followed in this matter, namely: that it be reconsidered by the parties in the light of the decision to be rendered by the National War Labour Board.

ARTICLE 100

With regard to Article 100, it was unanimously agreed that the proposal submitted by the Brotherhood should be accepted.

ARTICLE 102(*a*)

With respect to Article 102(*a*), the Board was unanimously of the opinion that the proposal of the Brotherhood be replaced by the following:—

"The Company agreed to deduct and remit from the earnings of each employee, who so authorizes it in writing, such amount as the employee may specify, such deduction to be made from the last pay of each month; the written authorization shall be in the following terms:—

'To the Montreal Tramways Company, Montreal.

'Gentlemen:—

'I,..... hereby authorize and direct Montreal Tramways Company to deduct, monthly, from any earnings accumulated to my credit, $..... this being the amount of my monthly dues to the Canadian Brotherhood of Railway Employees and Other Transport Workers, Local.....

'I further authorize Montreal Tramways Company to pay the said earnings so deducted to the Secretary-Treasurer of Local .....of the Canadian Brotherhood of Railway Employees and Other Transport Workers, whose receipt therefor shall be considered as a discharge to Montreal Tramways Company for the amounts deducted from my earnings.

'I agree that the Montreal Tramways Company shall be held harmless for all deductions and payments so made.

'I reserve the right to cancel this authority at any time on 30 days' notice to the Company.'

"The Brotherhood undertakes to pay to the Company on demand all cost and expense of the Company incurred by reason of the foregoing provision."

ARTICLE 109

With respect to Article 109, the Board was unanimously of the opinion that Article 109 should be deleted, it now being obsolete.

(Sgd.) OSCAR L. BOULANGER,
Chairman.

WALTER A. MERRILL,
Member of the Board.

F. R. SCOTT,
Member of the Board.

Majority Findings:

ARTICLE 98

With respect to Article 98, a majority of the Board—consisting of the Honourable Mr. Justice Oscar L. Boulanger and Mr. Frank Scott—were of the opinion that the amendment proposed by the Brotherhood should be adopted for the reason that the right to "leave of absence" for work on behalf of the Union is a natural right belonging to whichever agency has been certified as the sole bargaining agency.

ARTICLE 99

With respect to Article 99, a majority of the Board—consisting of the Honourable Mr. Justice Oscar L. Boulanger and Mr. Frank Scott—were of the opinion that Article 99 should be amended by replacing the words "a Union" and "Union" in the said paragraph by the words "a Brotherhood" and "Brotherhood."

(Sgd.) OSCAR L. BOULANGER,
Chairman.

F. R. SCOTT,
Member of the Board.

Minority Finding:

ARTICLES 98 AND 99

Mr. Walter A. Merrill, K.C., does not agree with the aforesaid majority of the Board in their findings relative to Articles 98 and 99, inasmuch as any change or amendment to the said Articles would impinge upon acquired legal rights under the existing contract of Tramways Employees other than members of the Brotherhood.

If the recommendation of the majority of the Board were followed, it would mean that the status and privileges enjoyed under the existing contract by certain employees would be taken from them, which it is submitted cannot be accomplished legally unless mutually agreed upon by all the parties who might be affected. Mr. Merrill's finding, therefore, is that the original Articles 98 and 99 should remain in the contract.

(Sgd.) WALTER A. MERRILL,
Member of the Board.

Majority Findings:

ARTICLES 102(B) AND 102(C)

With respect to Articles 102(*b*) and 102 (*c*), a majority of the Board, consisting of the Honourable Mr. Justice Oscar L. Boulanger and Mr. Walter A. Merrill, K.C., recommend that the said Articles 102(*b*) and 102(*c*), dealing with "Union Shop" be not included in the amended contract, and in view of his former decision in the United Shipyards matter, the

Chairman, Mr. Justice Oscar L. Boulanger, wishes to make the following observations:—

Although he is in favour of the majority ruling the minority, he is not in favour of the majority completely eliminating the minority. He would be in favour of inserting in the contract a union shop clause applicable to all future engagements of personnel, but he would not be in favour of a union shop clause applying to the present employees of the Company, who are not members of the Brotherhood. He considers that the application of a union shop clause to the present employees of the Company, who are not members of the Brotherhood, violates the right that every workman has under the law to join the union of his choice, because it would put the employees, who are not members of the Brotherhood, in the position of having to give up their lifelong occupation or of joining the Brotherhood against their will. On the other hand, if the union shop clause were to apply only to future engagements of personnel, the violation of the principle of freedom of association would not be so drastic, because those applying for positions with the Montreal Tramways would know the conditions beforehand and would be free either to join the Brotherhood and be employed by the Montreal Tramways or not to join the Brotherhood and seek employment somewhere else.

Inasmuch as the Brotherhood insists upon the insertion in the amended contract of a union shop clause having retroactive effect and applying to the present employees of the Company who are not members of the Brotherhood, the Chairman, therefore, cannot do otherwise but join Mr. Walter A. Merrill, K.C., in recommending the exclusion from the amended contract of the union shop clause proposed by the Brotherhood. The Chairman wishes to state that he would be in favour of placing more responsibility on the shoulders of the Brotherhood to ensure the proper execution of the contract by obliging the members of the Brotherhood to maintain their membership during the existence of the contract.

(Sgd.) Oscar L. Boulanger,
Chairman.
Walter A. Merrill,
Member of the Board.

Minority Finding:

Articles 102(b) and 102(c)

With regard to the question of the union shop clause, which is one of the most important matters in dispute between the parties, the following considerations seem to be relevant and compel me to dissent from the opinion of the majority. There is a fundamental principle at stake here which affects the whole future of collective bargaining in Canada.

The Brotherhood won control of the Tramway workers in March, 1943, and under the Goldenberg agreement of March 31, 1943, the Company agreed to discuss with the Brotherhood representatives "any changes in the existing contract". The union shop clause is such a change, and is, therefore, a proper matter for discussion under the agreement.

Ever since the Goldenberg agreement, the Brotherhood has attempted to secure changes in the old contract, but without success. This delay, now of 16 months' duration, has itself been a cause of dissatisfaction to the employees. All this time there have existed small remnants of the defeated unions, namely: the Catholic Syndicates Tramways Union and the Montreal Tramways Union (A.F. of L.) Local 790, whose presence has been a constant source of irritation to the members of the Brotherhood. The Company continued to grant leave of absence privileges to the officers of these unions, even after the Brotherhood had been certified as the sole bargaining agency under P.C. 1003, and has contended that the rights possessed by them under the old contract cannot be taken away. So long as this situation continues, there are groups within the employees not subject to the control of the Brotherhood and seeking always to gain back what they have lost by various means. To establish harmonious relations in the industry on a firm foundation, and to prevent the Company from utilizing these groups as counterweights to the Brotherhood, it is necessary that the majority will of the employees should prevail over the whole working force of the Company. That majority will demands the union shop.

It is to end this condition of affairs and to establish order and discipline in the industry that the Brotherhood proposes the union shop. The Chairman's suggestion of a union shop clause covering only members of the Brotherhood and future employees would not meet the situation. The status of the dissident minorities, and their opportunities for undisciplined action, would not be impaired.

Two main arguments are advanced against the union shop clause. The first is that it is prohibited by law. The Company cites Clause 88 of its statutory contract with the City of Montreal, as well as the Quebec Labour Relations Act (R.S.Q. 1941, Chap. 162A), Article 502 (*a*) of the Criminal Code, and even P.C. 1003 itself.

As to the contract with the City of Montreal, this deals merely with the right to join a union and says nothing about the conditions which may be included in a negotiated contract; in any case, it is superseded by P.C. 1003, which deals with that question specifically. The latter argument holds also for the

Quebec Labour Relations Act. The Quebec Law can have no application to a war industry governed now by federal war regulations. The Criminal Code, Section 502(*a*), and P.C. 1003, Sections 19 and 20, dealing with intimidation, are surely not intended to eliminate and render unlawful a union shop or closed shop clause which is established practice in many Canadian industries. Such a contention violates the very purpose of those laws, which is precisely the guarantee and makes secure the freedom of workers to select their own unions and through them to establish the working conditions they desire. If P.C. 1003 is capable of such an interpretation, then it badly needs amendment.

The other principal reason advanced against the union shop is that it interferes with the principle that every worker may join the union of his choice. This contention is more subtle, since it has the appearance of being in defence of workers' rights, and is sincerely put forward by many people who dislike any deprivation of individual liberty. One might observe in passing that no section of organized labour in Canada, who represent the most interested people, oppose the union shop in principle. Even the Catholic Syndicates have written contracts containing the clause. But the fundamental question we must ask is this: What does the principle mean, and when does it apply?

It seems clear to me that it means that workers in any industry may decide, by majority vote, to choose any union they wish (Catholic Syndicate, A.F. of L, or C.C. of L.). That is their freedom. This they have done in the Tramways Company. By an overwhelming majority, they have selected the Brotherhood. Having done this, what does the principle mean? Does it mean that the minority who lost the vote do not have to pay any attention to the majority? Obviously not. The minority have no right, for example to choose a separate bargaining agency under P.C. 1003. The Brotherhood has already been certified as the exclusive agency for the Tramways. So a certain freedom of choice is restricted and must be restricted in order to allow the majority will to prevail. After all, majorities have just as much right to freedom of choice as have minorities. We cannot perpetuate the freedom of the minority not to join the majority union, without taking away from the majority their right to determine by collective bargaining the conditions of employment which shall prevail in that industry. I repeat, that a union shop and a closed shop are both well known aspects of labour contracts. To force a minority to conform to the working conditions established by the majority is not a denial of freedom but a guarantee of it, otherwise the majority loses its freedom.

Moreover, and this is important, the union shop clause does not take away the right of the minority to belong to a union not recognized as the bargaining agency. It merely insists that all employees shall belong to the union chosen by the majority. Any employee who wishes can also maintain his connection with and his membership in another union of his choice. He cannot expect this other union, however, to have any rights under the contract until it has established that it is a majority by a new vote. This it can do under P.C. 1003, Section 9. This section specifically provides for the substitution of new bargaining representatives for old ones after any agreement has been in force 10 months. Hence, if a union shop were granted to the Brotherhood in Montreal Tramways, the handful of existing members remaining in the Catholic Syndicates or A.F. of L. unions would have to join the Brotherhood as a condition of employment, but they would be free to maintain membership in their own unions and to try to persuade their fellow-workers to join with them. The only infringement on their liberty is the obligation to pay two sets of union dues instead of one. Then they can apply under P.C. 1003, Section 9, for their new vote. In other words, their freedom to choose periodically is not totally destroyed by the union shop clause. On the other hand, a denial of the union shop clause does take away completely and forever the freedom of the majority to include the provision in the collective bargaining agreement. Granting the union shop clause, therefore, secures and guarantees much more freedom than it takes away. And without such a clause, the particular difficulty in the Montreal Tramways, resulting from dissident minorities, cannot be controlled and ended, nor can the full responsibility of the Brotherhood for the behaviour of the employees be expected. I, therefore, strongly advise the adoption of the union shop clause as proposed by the Brotherhod.

(Sgd.) F. R. Scott,
Member of the Board.

Addendum to Minority Opinion

In conclusion, I wish to emphasize that both the Chairman and I favour some kind of union shop for the Tramways. There is thus a majority of this Board in support of the principle of the union shop, although there is a majority against the particular form of it proposed by the Brotherhood. The only

difference between the Chairman and myself is as to the coverage of the existing employees, and the Chairman goes so far as to recommend the maintenance of membership clause. It is important that this point be appreciated and I would hope that the Company, in view of these opinions, would work out with the Brotherhood officials the manner in which the union shop principle should be applied.

(Sgd.) F. R. S.

Majority Findings:

ARTICLE 107

With respect to Article 107, a majority of the Board— consisting of the Honourable Mr. Justice Oscar L. Boulanger and Mr. Walter A. Merrill, K.C., were of the opinion that the proposal of the Company should be accepted.

(Sgd.) OSCAR L. BOULANGER,
Chairman.
WALTER A. MERRILL,
Member of the Board.

Minority Finding:

ARTICLE 107

Mr. Frank Scott disagreed with the majority finding with respect to Article 107. In his opinion, the duration of the contract should be settled in accordance with the provisions of Article 15 of P.C. 1003, which, whether or not it covers pre-existing contracts, clearly indicates a policy of annual revision of collective labour agreements for all industries covered by the order. He suggests that the Brotherhood's proposal is reasonable and should be adopted.

(Sgd.) F. R. SCOTT,
Member of the Board.

Majority Finding:

ARTICLE 108

With respect to Article 108, a majority of the Board—consisting of the Honourable Mr. Justice Oscar L. Boulanger and Mr. Frank Scott—recommend that this article be excluded from the amended contract.

(Sgd.) OSCAR L. BOULANGER,
Chairman.
F. R. SCOTT,
Member of the Board.

Minority Finding:

ARTICLE 108

Mr. Walter A. Merrill, K.C., disagrees with the aforesaid majority finding that Article 108 should not be included in the amended contract, because in his opinion the article deals with wages and holidays, which are matters within the exclusive jurisdiction of the War Labour Board. Furthermore, the exclusion of this article would neither constitute an amendment such as contemplated by Section 89 of the agreement or such changes as contemplated even in the Goldenberg agreement.

(Sgd.) WALTER A. MERRILL,
Member of the Board.

Dated at Quebec, this 6th day of July, 1944.

Supplementary Report of Board of Conciliation

Re: Wartime Labour Relations Regulations P.C. 1003 and re Dispute between Montreal Tramways Company, Montreal, P.Q., and Employees Members of the Canadian Brotherhood of Railway Employees and Other Transport Workers.

To The Honourable Humphrey Mitchell, M.P.,
Minister of Labour,
Ottawa, Ontario.

Sir:

In accordance with instructions from the Director of Industrial Relations, Mr. M. M. Maclean, the Conciliation Board, under the Chairmanship of the Honourable Mr. Justice Oscar L. Boulanger, reconvened in Room 24 of the Court House at Montreal at ten a.m. on the 24th of July, 1944, and further continued its hearing at two p.m. in the afternoon.

We have the following further recommendations to make in regard to the matters in dispute, in accordance with the instructions contained in the letter to the Chairman from Mr. Maclean, dated the 20th of July, 1944.

ARTICLES 98 AND 99

Majority Findings:

With regard to these articles, a majority of the Board, consisting of the Honourable Mr. Justice Oscar L. Boulanger and Mr. Frank Scott, were of the opinion that the rights referred to in these articles should be the exclusive privilege of the Brotherhood as being the duly certified bargaining agency. We feel that the name of the Brotherhood should be designated in these articles rather than to substitute for them the terms suggested by the Company in its letter of July 17, 1944, namely, "the union, lawfully certified as the bargaining agency." This would mean that the Company should discontinue granting these privileges to the representatives of any other organizations or unions.

(Sgd.) OSCAR BOULANGER,
Chairman.
F. R. SCOTT,
Member of the Board.

ARTICLES 98 AND 99

Minority Finding:

Mr. Walter A. Merrill, K.C., does not agree with the aforesaid majority of the Board in their findings relative to Articles 98 and 99 for the same reasons as already expressed in his original minority report.

(Sgd.) WALTER A. MERRILL,
Member of the Board.

ARTICLE 100

Unanimous Finding:

At the original hearings before the Board the Board was informed that the Company and the Brotherhood had agreed to the proposals of the Brotherhood, and, as a consequence, recommended that the proposals submitted by the Brotherhood should be accepted.

In its letter to the Department of Labour, dated the 17th of July, 1944, the Company proposes an alternative form to this article but it is the unanimous opinion of the Board that its original finding should be adhered to.

ARTICLE 102

Unanimous Finding:

The Board is of the unanimous opinion that Article 102 of the 1940 contract be struck out for the reasons set out below with respect to article 102-A dealing with the check-off.

ARTICLE 102-A

Unanimous Finding:

With respect to the matter of the check-off the Board declares that it was its intention that the privilege of the check-off should be that of the Brotherhood only during the pendency of the contract and that no organization be authorized or permitted to collect union dues on the Company's premises.

(Sgd.) OSCAR BOULANGER,
Chairman.
WALTER A. MERRILL,
Member of the Board.
F. R. SCOTT,
Member of the Board.

ARTICLES 102-B AND 102-C

Unanimous Finding:

In accordance with the instructions received from the Director of Industrial Relations, Mr. M. M. Maclean, the Board endeavoured to bring the parties together on the question of union shop. Inasmuch as the representatives of the Brotherhood and of the company submitted no new proposals to the Board which led the members of the Board to modify their original findings, and notwithstanding the efforts of the Board to induce the parties to reach some common ground of agreement, we must regretfully report that our efforts at reconciling the parties were unsuccessful and therefore the members of the Board see no reason to change or modify the majority and minority findings of the original report on this question of the union shop.

(Sgd.) OSCAR BOULANGER,
Chairman.
WALTER A. MERRILL,
Member of the Board.
F. R. SCOTT,
Member of the Board.

Administration of Wartime Labour Relations Regulations in British Columbia and Manitoba

The Order in Council effecting an agreement between the Dominion Government and the province of British Columbia providing for the administration within that province of the Wartime Labour Relations Regulations has been amended (P.C. 3062; L.G., May, 1944, p. 610).

At the request of the provincial government, and in order to remove uncertainty, jurisdiction over the coal mining industry in the province has been specifically vested in the National Wartime Labour Relations Board.

The amending Order, P.C. 5485, appears below.

Reference was made in the July LABOUR GAZETTE (p. 847) to the signing of an agreement between the Dominion and the Province of Manitoba. The text of the Order in Council approving this agreement (P.C. 3491) is printed below.

Text of Order in Council P.C. 5485

Whereas Order in Council P.C. 3062 of April 27, 1944, makes provision for the administration within the Province of British Columbia of the Wartime Labour Relations Regulations by the Minister of Labour of the said Province including matters relating to the mining industry in the said Province, but reserving inter alia the jurisdiction of the Wartime Labour Rela-

tions Board under the said Regulations with respect to matters where employers or employees in more than one province are affected;

And whereas a close relationship exists between employers engaged in the coal mining industry in the provinces of British Columbia and Alberta and between employees engaged in such industry in the said provinces with respect to matters covered by the said Regulations, and in view thereof, it is desirable that matters affecting employers and employees in the said industry in British Columbia be dealt with by the Wartime Labour Relations Board as such Board would be in a position to exercise jurisdiction in such matters simultaneously in the provinces of British Columbia and Alberta as circumstances may require from time to time;

And whereas the Government of the Province of British Columbia have accordingly requested that, notwithstanding anything contained in Order in Council P.C. 3062 of April 27, 1944, or the agreement referred to therein, the Wartime Labour Relations Board continue to exercise the jurisdiction vested in it under the said Wartime Labour Relations Regulations with respect to employees in the coal mining industry in the said Province and their employers;

And whereas it is deemed advisable to amend the provisions of Order in Council P.C. 3062 of April 27, 1944, to give effect to such request and to remove any uncertainty there may be under existing legislation as to the jurisdiction of the Wartime Labour Relations Board with respect to such employees and their employers;

Now, therefore, His Excellency the Governor General in Council, on the recommendation of the Minister of Labour, and under the authority of the War Measures Act is pleased to amend Order in Council P.C. 3062 of April 27, 1944, and it is hereby amended by adding the following as paragraph (iii) of subsection (2) of section two thereof:—

"(iii) Employees who are employed upon or in connection with a work or undertaking engaged in coal mining and the employers of all such employees in their relations with such employees and trade unions, employees' organizations and employers' organizations composed of such employees or employers."

His Excellency in Council, on the same recommendation, is further pleased to authorize and doth hereby authorize the amendment accordingly of the agreement entered into by the Minister of Labour with the Minister of Labour of British Columbia and approved by Order in Council P.C. 3062 of April 27, 1944.

Text of Order in Council P.C. 3491 *re* administration within the Province of Manitoba of the Wartime Labour Relations Regulations

Whereas section 36 of the Wartime Labour Relations Regulations (Order in Council P.C. 1003 of February 17, 1944) provides that the Minister of Labour may, with the approval of the Governor in Council, enter into an agreement with the government of any province to provide for the administration within that province of the said Regulations or any part thereof and that such agreement may provide for the manner in which the Minister of Labour shall exercise the powers conferred on him under the said section and for the transfer to the government of the province or persons specified by the government of the province of all or any part of the jurisdiction in respect of matters within the province conferred on the Wartime Labour Relations Board by the said Regulations, and for a procedure whereby an appeal may be had to the Wartime Labour Relations Board from a decision made in the exercise of the jurisdiction so conferred, and for the reimbursement of the province in respect of expenses so incurred.

And whereas pursuant thereto the Minister of Labour submits for approval an agreement dated 6th May, 1944, entered into by him with the President of the Executive Council of Manitoba, to provide for the administration of the said Regulations in the Province of Manitoba and for the establishment of a Board to administer the Wartime Labour Relations Regulations in the said Province;

Therefore, His Excellency the Governor General in Council, on the recommendation of the Minister of Labour, is pleased to approve the said agreement, of which a copy is hereto annexed as Schedule A, and it is hereby approved accordingly.

And whereas it is deemed necessary by reason of the war, for the security, defence, peace, order and welfare of Canada and for the effective prosecution of the war that the order hereinafter set out be made;

Therefore, His Excellency the Governor General in Council, on the recommendation of the Minister of Labour and under the authority of the War Measures Act, is pleased to make and doth hereby make the following Order:—

ORDER

1. In this Order, unless the context otherwise requires, words and expressions have the same meaning as in the Wartime Labour Relations Regulations, Order in Council P.C. 1003 of February 17, 1944.

2. (1) There shall be a Manitoba Wartime Labour Relations Board for the Province of Manitoba (hereinafter called "the Provincial Board") consisting of Mr. Justice S. E. Richards, Winnipeg, Man., who shall be Chairman thereof and the following members:—

J. H. Parkhill, President, Parkhill Bedding Ltd., Winnipeg, Man.,

E. Claydon, President, Claydon Company Ltd., Winnipeg, Man.,

J. B. Graham, Business Agent, United Brotherhood Carpenters and Joiners, America Local Union No. 343, Winnipeg, Man.,

John S. McNabb, Secretary, Winnipeg Labour Council, Winnipeg, Man.

(2) A majority of the members of the Provincial Board shall constitute a quorum.

(3) A decision of the majority of the members of the Provincial Board present and constituting a quorum shall be the decision of the Provincial Board and in the event of a tie, the Chairman shall have a casting vote.

(4) The Provincial Board and each member thereof shall have the powers of a Commissioner under Part I of the Inquiries Act.

(5) The Provincial Board and each member thereof may receive and accept such evidence and information on oath, affidavit, or otherwise as in its or his discretion it or he may deem fit and proper whether admissible as evidence in a court of law or not.

(6) The Provincial Board shall determine its own procedure but shall in every case give

an opportunity to all interested parties to present evidence, and make representations.

(7) Each member of the Provincial Board, other than the Chairman, shall be paid remuneration at the rate of fifteen dollars per day for each day engaged on the business of the Provincial Board together with actual living and travelling expenses while absent from his place of residence on the business of such Board; and the Chairman of such Board, in accordance with the recommendation of the Honourable Mr. S. S. Garson, Premier of Manitoba, under date of May 6, 1944, shall be paid an expense allowance of $166 per month during his occupancy of the positions of Chairman of such Board and the Manitoba Regional War Labour Board together with actual travelling expenses while absent from his place of residence on the business of either Boards.

(8) Mr. W. Elliott Wilson of Winnipeg, Man., Barrister, shall be the Chief Executive Officer of the Provincial Board.

3. The Provincial Board may make regulations governing its procedure not inconsistent with the Wartime Labour Relations Regulations or the regulations made by the Wartime Labour Relations Board thereunder.

4. (1) Except as hereinafter provided, the jurisdiction and powers of the Wartime Labour Relations Board under the Wartime Labour Relations Regulations with respect to

(i) employees in the Province of Manitoba described by the provisions of paragraphs (*b*) and (*c*) of subsection one of section three of the said Regulations,

(ii) the employers of all such employees in their relations with such employees, and

(iii) trade unions, employees' organizations and employers' organizations composed of such employees or employers, are hereby vested in the Provincial Board and all the provisions of the said Regulations relating to or referring to the Wartime Labour Relations Board shall relate and refer *mutatis mutandis* to the said Provincial Board.

(2) The provisions of subsection one of this section shall not affect nor be deemed to vest in the Provincial Board the jurisdiction of the Wartime Labour Relations Board under the Regulations with respect to

(i) any matter where employees in more than one province of a common employer are affected, or

(ii) any matter arising out of subsection three of section five of the Regulations where employees in more than one province of several employers are affected.

5. The Wartime Labour Relations Board may exercise the jurisdiction vested in it under the Wartime Labour Relations Regulations with respect to any proceeding pending before it on the date of this Order.

6. (1) Any employer, employee, employers' organization, trade union, or employees' organization interested in or affected by any decision or order of the Provincial Board made pursuant to the Wartime Labour Relations Regulations may appeal to the Wartime Labour Relations Board by leave of the Wartime Labour Relations Board or the Provincial Board if the application for such leave has been made within fifteen days of the issue of such decision or order of the Provincial Board or within such longer period as may be allowed by the Wartime Labour Relations Board.

(2) On any such appeal the Wartime Labour Relations Board may dismiss the appeal or make the decision or order which in its opinion the Provincial Board should have made.

7. Mr. James Leslie of Winnipeg, Man., shall be appointed to the staff of the Wartime Labour Relations Board as Chief Conciliation Officer for the Province of Manitoba with headquarters at Winnipeg, Man., at a salary of $230 per month effective June 1, 1944.

8. The expenditures incurred by the Minister of Labour under any agreement executed under section two of this Order shall be paid out of moneys appropriated for the administration of the Wartime Labour Relations Regulations.

Text of Agreement between the Dominion and the Province of Manitoba *re* administration of Wartime Labour Relations Regulations

This Agreement made this 6th day of May, 1944, between His Majesty the King in right of the Dominion of Canada, represented by the Minister of Labour of Canada, hereinafter called "the Dominion" of the one part and His Majesty the King in right of the Province of Manitoba, represented by the President of the Executive Council of Manitoba, hereinafter called "the Province" of the other part.

Whereas the Province has enacted appropriate legislation to apply the Wartime Labour Relations Regulations, Order in Council P.C. 1003 of February 17, 1944, and amendments, to employees described in paragraph (*c*) of subsection one of section three of the said Regulations, to employers of all such employees in their relations with such employees and to trade unions, employees' organizations and employers' organizations composed of such employees and employers; and

Whereas under the provisions of Section thirty-six of the Wartime Labour Relations Regulations the Minister of Labour of Canada is authorized, with the approval of the Governor General in Council to enter into an agreement with the Government of any province to provide for the administration within the province of such Regulations; and

Whereas the parties hereto desire to enter into such an agreement to provide for the administration within the Province of Manitoba of the Wartime Labour Relations Regulations;

Now therefore the parties hereto pursuant to the provisions of Section thirty-six of the aforesaid Regulations covenant and agree with each other as follows:—

1. (1) In this agreement, unless the context otherwise requires, words and expressions have the same meaning as in the Wartime Labour Relations Regulations.

(2) In this agreement

(*a*) "Dominion Minister" means the Minister of Labour of Canada,

(*b*) "Provincial Minister" means the Minister of Labour of the Province of Manitoba,

(*c*) "National Board" means the Wartime Labour Relations Board appointed under the Wartime Labour Relations Regulations,

(*d*) "Provincial Board" means the Board appointed by the Governor General in

Council pursuant to the provisions of this agreement to administer the Wartime Labour Relations Regulations in the Province of Manitoba,

(*e*) "Regulations" means the Wartime Labour Relations Regulations, Order in Council P.C. 1003 of February 17, 1944, and amendments.

2. The Dominion, by order of the Governor General in Council, shall appoint a Provincial Board to exercise in the Province of Manitoba the powers of the National Board under the Regulations in relation to all matters in respect of which jurisdiction is transferred to it pursuant to this agreement or otherwise; and shall provide for the appointment of, and appoint, an executive officer who will be the Chief Executive Officer of the Provincial Board.

3. (1) The Provincial Board shall consist of a Chairman and an even number of other members, not exceeding a total of six, equally representative of employers and employees; and a Vice-Chairman may be appointed to preside over the Provincial Board in the absence of the Chairman.

(2) The members of the Provincial Board shall be appointed by the Governor General in Council after consultation by the Dominion Minister with the Provincial Minister and the remuneration payable to such members shall be fixed at the same rates as are payable to members of the Regional War Labour Board for the Province of Manitoba.

(3) With the concurrence of the National War Labour Board, the staff, offices and other facilities of the Regional War Labour Board for the Province of Manitoba will be made available for the use of, and will be utilized by, the Provincial Board in the administration of the Regulations in the Province of Manitoba.

4. (1) Except as otherwise hereinafter provided the jurisdiction of the National Board under the Regulations shall be transferred to the Provincial Board with respect to employees in the Province of Manitoba described by the provisions of paragraphs (*b*) and (*c*) of subsection one of Section three of the Regulations, the employers of all such employees in their relations with such employees, and trade unions, employees' organizations and employers' organizations composed of such employees or employers.

(2) The provisions of subsection one of this section shall not be deemed to include the transfer of the jurisdiction of the National Board under the Regulations with respect to

(i) any matter where employees in more than one province of a common employer are affected, or

(ii) any matter arising out of subsection three of Section five of the Regulations where employees in more than one province of several employers are affected.

5. (1) Notwithstanding the provisions of section four of this agreement, the National Board may exercise the jurisdiction vested in it under the Regulations with respect to any proceeding pending before it on the date this agreement is approved by the Governor General in Council.

(2) Nothing contained in this agreement shall be deemed to preclude the Governor General in Council from re-vesting in the National Board jurisdiction under the Regulations relating to any particular matter which is otherwise within the jurisdiction of the Provincial Board by virtue of this agreement, and whether or not at that time pending before the Provincial Board.

6. (1) Any employer, employee, employers' organization, trade union, or employees' organization interested in or affected by any decision or order of the Provincial Board may appeal to the National Board, by leave of the National Board or the Provincial Board if the application for such leave has been made within fifteen days of the issue of such decision or order of the Provincial Board, or within such longer period as may be allowed by the National Board.

(2) On any such appeal the National Board may dismiss the appeal or make the decision or order which in its opinion the Provincial Board should have made.

7. The Provincial Board may make regulations governing its procedure not inconsistent with the Wartime Labour Relations Regulations or the regulations made by the National Board thereunder.

8. The services of the conciliation officers of the Provincial and the Dominion Departments of Labour will be utilized as required in the administration of the Regulations for the investigation of applications for certification and for conciliation purposes in accordance with such arrangements as are made from time to time between the Dominion Minister and Provincial Minister.

9. Where pursuant to Section thirteen of the Regulations a conciliation officer recommends the appointment of a Conciliation Board in relation to an employer and his employees in a matter within the jurisdiction of the Provincial Board he will transmit the same to the Provincial Minister who will forthwith transmit the same to the Dominion Minister along with whatever recommendation he sees fit to make with reference thereto

10. The Provincial Board will be responsible for the proper administration and enforcement of the Regulations within the province as to all matters transferred to its jurisdiction pursuant to this agreement; and the Provincial Board will itself institute all prosecutions for breaches of the regulations through counsel retained and instructed by it.

11. Except to the extent that the provisions of this section are altered by subsequent agreement between the Dominion and Provincial Ministers, the following provisions in regard to the cost of administration of the Regulations in the Province of Manitoba shall have effect:—

(1) The Province will reimburse the Dominion for one-third of its disbursements for the administration of the Regulations in the Province of Manitoba by the Provincial Board pursuant to this agreement including one-third of its disbursements made for Conciliation Boards appointed under the Regulations in relation to matters in respect of which jurisdiction is transferred to the Provincial Board under this agreement.

(2) For the purposes of this section, the disbursements of the Dominion shall include the amount of the salaries and expenses if any additional staff of the Regional War Labour Board for the Province of Manitoba which the Chairman of that Board certifies as having been employed to provide for the administration of the Regulations in the Province, and the disbursements made in the prosecution of offences under the Regulations, if certified or taxed by the Chairman of the Provincial Board.

(3) The Dominion will reimburse the Province for two-thirds of its disbursements for salaries of any provincial staff attached by arrangement with the National Board, for full time employment with the Provincial Board.

(4) The Dominion shall, in January of each year, furnish to the Province a statement of disbursements payable by the Province pursuant to this agreement for the preceding calendar year certified by the Comptroller of the Treasury, and the Province shall reimburse the Dominion for its share of such disbursements within two months after the receipt of such statement.

(5) The Province will, in January of each year, furnish to the Dominion a statement of disbursements payable by the Dominion pursuant to this agreement for the preceding calendar year certified by the Provincial Auditor and the Dominion shall, within two months after receipt thereof, reimburse the Province for its share of such disbursements.

(6) Each party shall furnish to the other such particulars of accounts as may be deemed necessary by the other for payment of the accounts.

12. This agreement may be terminated by either party on six months' notice.

13. The parties hereto will take steps to obtain any further approval of this agreement necessary to give it legal effect.

In witness whereof, the Honourable Humphrey Mitchell, Minister of Labour of Canada, has hereunto set his hand on behalf of the Dominion of Canada and the Honourable Stuart Sinclair Garson, President of the Executive Council of Manitoba, has hereunto set his hand on behalf of the Province of Manitoba.

Signed on behalf of the Dominion of Canada by the Honourable Humphrey Mitchell, Minister of Labour of Canada in the presence of George G. Greene.

HUMPHREY MITCHELL.

Signed on behalf of the Province of Manitoba by the Honourable Stuart Sinclair Garson in the presence of G. H. Rutherford.

S. S. GARSON.

Recent Proceedings Under the Industrial Disputes Investigation Act

WITH the coming into effect of Order in Council P.C. 1003, Wartime Labour Relations Regulations on March 20, 1944, the Industrial Disputes Investigation Act, except as to matters pending when these Regulations came into force, was declared to be of no effect while this Order is in force.

The Act, therefore, as from that date would apply only to such applications for the establishment of Boards of Conciliation and Investigation as had been received prior thereto.

Recently two Boards of Conciliation and Investigation submitted their reports in connection with the following disputes, applications with respect to which were pending when the Wartime Labour Relations Regulations became effective:—

(1) Between Halifax Shipyards, Limited, Halifax, N.S., and its employees, members of Local No. 1, Industrial Union of Marine and Shipbuilding Workers of Canada (C.C.L.).

(2) Between Canada Packers Limited, Edmonton, Alta., and its employees, members of Local 243, United Packinghouse Workers of America.

Report of Board in Dispute between Halifax Shipyards, Limited, Halifax, N.S., and its Employees

On June 16 the Minister of Labour received the report of the Board of Conciliation and Investigation established to deal with a dispute between Halifax Shipyards Limited, Halifax, N.S., and its employees, members of Local No. 1, Industrial Union of Marine and Shipbuilding Workers of Canada (C.C.L.) (L.G., April, 1944, p. 480).

The personnel of the Board was as follows: Honourable Mr. Justice John S. Smiley, Halifax, N.S., Chairman, appointed by the Minister of Labour in the absence of a joint recommendation from the other two members of the Board; Messrs. Charles B. Smith, Halifax, N.S., and D. W. Morrison, Glace Bay, N.S., appointed on the nomination of the employer and employees respectively.

The report of the Board was signed by the chairman and Mr. D. W. Morrison. Mr. Smith submitted a minority report.

The texts of the report of the Board and the minority report are as follows:—

Report of Board

In the matter of the Industrial Disputes Investigation Act and in the matter of a dispute between Halifax Shipyards Limited, Halifax, N.S., and Employees, Members of the Industrial Union of Marine and Shipbuilding Workers of Canada, Local No. 1 (C.C.L.).

To: The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ont.

Sir:

The Board of Conciliation and Investigation appointed by you has investigated the above dispute, and now has the honour to submit its report.

Sittings of the Board were held on the 3rd and 4th days of April, 1944, in the Municipal Council Chamber, Law Courts Building, Spring Garden Road, Halifax, N.S.

The applicant union was represented by the following official representatives:—

Silby Barrett, 40 Minto St., Glace Bay, N.S., a member of the Executive of the Canadian Congress of Labour and Regional Director thereof for the Maritime Provinces.

H. A. Shea, 74 Bedford Row, Halifax, N.S., representative of the C.C.L.

James O'Connell, 86 Quinpool Rd., Halifax, N.S., President of Local No. 1, Marine & Shipbuilding Workers of Canada.

In addition to the above official representatives of the employees there were present also the following unofficial representatives:—

Milfred Hubley, 268 Windmill Road, Dartmouth, N.S., Chairman Dartmouth Branch of Local No. 1.

Charles Murray, 74 Bedford Row, Halifax, N.S., Business Agent of Local No. 1.

On behalf of the employer the following official representatives were present:—

R. J. R. Nelson, 8 Bloomingdale Terrace, Halifax, N.S., General Manager of the employer.

Daniel Scouler, Armdale, Halifax, N.S., General Superintendent of the employer.

John Patterson, 61 Pleasant St., Dartmouth, N.S., Superintendent of the Dartmouth plant of the employer.

The Company carries on a shipbuilding and a ship repairing business. Its present shipbuilding activities are confined to the construction of destroyers for the Royal Canadian Navy. Its ship repairing facilities are employed in the execution of repairs to ships of war and merchant ships of Canada, the United Kingdom and the other united nations. The Company is engaged in war work practically to its full capacity.

The Union concerned is "The Industrial Union of Marine & Shipbuilding Workers of Canada, Local No. 1, Halifax, N.S.", which is chartered by the Canadian Congress of Labour. The Local was organized in the year 1938 when the number of employees was small compared with the number to-day.

The Company, in its brief, points out that heretofore the relations with its employees have been excellent and that working conditions in its plants are good. The representatives of the union admit these facts but say that they wish to make the relations between the company and the employees even better and indicate that one way of doing this is to carry out the working conditions under consideration. Shortly after the opening of the proceedings on the hearing Mr. Shea read a written brief on behalf of the employees. The first paragraph of this brief, in addition to setting out the demands of the union, shows a commendable attitude on the part of the employees toward the war effort and we therefore quote it in full as follows:—

"For approximately three years this union has sought to obtain from Halifax Shipyards Limited the inclusion of provisions for the union shop, and the check-off in the agreement signed by the union and the company. The company has, throughout this time, shown nothing but opposition to these demands, an attitude which would ordinarily have resulted in serious industrial strife had not the union adopted a no strike pledge as part of its contribution to the war effort. However, the employees feel that there should be no further delay in obtaining these demands and present this brief in justification."

The Union brief contains the following definitions of the terms "union shop" and "check-off":—

"By union shop this union understands a provision whereby every employee covered by the union agreement and eligible for union membership would be required to join and remain a member in good standing of the union as a condition of employment. This provision would not interfere with the Company's right to hire in accordance with its personal policies."

"By check-off is meant an arrangement whereby the Company would undertake to collect the workers' union dues from their wage payments at specified intervals, in the same way as Unemployment Insurance and other deductions are now made, and to remit the money collected thereby to an officer of the union designated for that purpose. Generally accompanying such a provision is a further one specifying that each worker must sign a form authorizing such a deduction; such form to be handed in to the Company."

Following is a summary of the contentions in support of the demands of the union:—

Union Shop

1. It would enable the union to better meet its contractual obligations and responsibilities and enforce its collective discipline in order to maintain harmonious union-management relations.

2. It makes for better spirit among the workers themselves, and hence for greater efficiency and productivity.

3. It provides that those who share the benefits should likewise share the responsibilities.

4. Some form of union shop is a necessary result of genuine collective bargaining, and opposition to it is in reality opposition to any form of collective bargaining.

5. The principle of majority rule can be carried into industrial relations only through some form of closed or union shop requiring all employees to be and remain union members.

6. With the full acceptance of union recognition, and the assurance that no attempts will be made to undermine the union's position, union policy can begin to shift from a purely defensive to a more constructive position. It can turn its attention from the problems of self

protection and play a larger part in working out the problems of the industry as a whole.

7. If labour is to be enabled to carry out in full its share of the joint undertaking to settle all disputes peacefully, it should have authority which matches its responsibility.

Check-off

1. Reference to Section 12 of the Trade Union Act (Nova Scotia Laws, 1937, Chapter 6) which makes specific provision for the check-off of union dues under certain conditions.

2. The union has qualified for the check-off under the Act above mentioned.

3. The Company is a subsidiary of Dominion Steel & Coal Corporation Limited which has granted the check-off to the employees in its coal mines and steel mills who are members of District No. 26 United Mine Workers of America and the United Steel Workers of America respectively. The employees of the Halifax Shipyards Limited are entitled to the same consideration.

4. The vote taken under the Trade Union Act established that 75·86 per cent of the employees were in favour of the check-off.

5. The grant of the check-off would be an indication that the Company fully recognized the status of the union and wished to co-operate with it.

6. It makes for greater union efficiency since the time which union officers would otherwise spend in collecting dues could be devoted to the task of maintaining harmonious industrial relationships.

7. The goodwill created by instituting the check-off would redound to the Company's benefit by way of better employer-employee understanding and therefore better production.

General

Both the union shop and the check-off are prevalent in many industries in Canada and have been in effect for many years.

Mr. R. J. R. Nelson, General Manager of the employer, read a brief on behalf of the employer, of which a summary follows:—

1. If it be determined that the provisions of the Trade Union Act, relating to check-off of union dues, apply to the company and the union establishes its legal position, the company will conform with the relevant provisions of the Statute, but it contends that such provisions have no application to the company.

2. The question as to the application of the provisions of the Trade Union Act relating to check-off should be decided by the Court and not by a Board of Conciliation under the Industrial Disputes Investigation Act.

3. It is not the function of an employer to collect dues for any union.

4. It is unfair and unreasonable to impose upon the company the burden of the checking-off of union dues and thus add one more task to the many imposed upon it by wartime administrative regulations.

5. So far as the Dominion Coal Company is concerned the statutes relating to coal mining have for many years provided for a check-off and it therefore has been an established usage in the collieries of Nova Scotia.

6. In compliance with the Trade Union Act the Sydney steel plant of the corporation has had a check-off since shortly after the passing of the Act, but as the check-off was not the result of voluntary action by the management, it has no bearing on the present application.

7. A check-off is unknown in the shipbuilding industry in Canada.

8. The union shop and the check-off should be rejected upon principle because they are essentially undemocratic, restrict the right of the employer on the one hand to select those who are to enter and remain in his employ without assurance of a supply of competent workmen, and of the employee on the other hand to make free choice of the organization to which he will give allegiance and to transfer that allegiance at will and because they impair and destroy the initiative and interest of union officers to exert their best efforts on behalf of their members.

9. By the enforcement of union membership a fundamental principle of social and business policy is violated.

10. Reference to the report of the Royal Commission appointed by the Quebec Government to make an inquiry into labour disputes in certain paper mills in the Lake St. John area, a synopsis of which is contained in the Labour Gazette, December, 1943, issue, pages 1693 to 1697.

11. A large number of former employees of the company are now on active service with His Majesty's forces and many of the present employees are members of rival unions or are not members of any union. None of these employees should be compelled, in order to continue their employment with the company, to join the union against their will as it would be most unjust and inequitable to require their continued employment to be dependent upon membership therein. Neither should new employees be forced against their will to join the union.

12. An agreement for a union shop and/or check-off would also offend against the provisions of the Reinstatement in Civil Employment Act (Statutes of Canada, 1942-1943, 6 Geo. VI, c. 31).

13. It would be against the national interest to insist upon conditions in the plant of the company which will operate to deter any man from accepting or doing the job for which he is fitted and which he is willing to take.

14. The effect of granting a union shop and/or check-off would, of necessity, be a loss to the company of a large and valuable part of its skilled labour force.

15. The company has experienced very great difficulty in securing skilled workmen and the loss of a substantial number of skilled employees at this time would be disastrous; moreover, if the demands of the union are granted, it will make it much more difficult to obtain the services of skilled workmen who belong to other unions or do not belong to any union.

16. If the demands of the union are granted it is inevitable that there will be most serious delay in the construction of naval vessels and in the execution of repairs to naval and merchant vessels which would have most serious consequences.

17. References to P.C. 2685 which provides, among other things, "That employees shall be free to organize in trade unions free from any control by employers or their agents".

18. Reference to Section 202 and 202a of the National Selective Service Civilian Regulations. The company is a designated establishment.

19. The submission of the union with respect to union shop in effect amounts to a requirement that not only must the minority of employees accept the policy of the majority as to working conditions at the plant of the company but that the minority must join the majority.

The company also submitted a supplementary memorandum consisting chiefly of references to various Board decisions reported in the LABOUR GAZETTE.

At the conclusion of the first day's session the Chairman arranged for a meeting between the representatives of the employees and representatives of the employer, at the office of Mr. R. J. R. Nelson, General Manager of the employer, that evening at 8 o'clock. At the opening of the session the following morning the Chairman was informed by Mr. Barrett that there was nothing to report with respect to the outcome of the meeting. From this statement it was evident that no progress had been made toward a settlement of the matters in dispute.

In the discussions during the sittings it was stated by the representatives of the union that if a member of another union, at present employed in the shipyards, showed his membership card within a specified period, he would not be required to join the Industrial Union; and also that a card, a sample of which is an exhibit, must be signed by a member before his dues are checked off.

At the time application was made to the Minister of Mines and Labour for the Province of Nova Scotia, on May 22nd, 1941, for a vote under the provisions of Section 12 of the Trade Union Act, the employer was collecting dues for the Halifax Shipyards Mutual Employees Benefit Society. The company discontinued the check-off for the Benefit Society on July 7th, 1941. The vote was taken on September 2nd, 1943, with the following result:—

No. of employees eligible to vote.	2,308
No. of votes cast.	1,873
No. of votes in favour of check-off.	1,751
No. of votes against check-off.	87
No. of spoiled ballots.	35
No. not voting.	435

Attention is directed to the letter from the Honourable L. D. Currie, Minister of Mines and Labour of Nova Scotia, to Mr. Nelson, dated September 3, 1943, with respect to the vote, a copy of which is enclosed with the documents returned herewith.

RECOMMENDATIONS

The paramount consideration of all parties concerned is the successful prosecution of the war, entailing constant maximum production. Without dealing with the merits and demerits of a union shop, as established and carried on in normal times, we are impressed with the contention of the company that the establishment of a union shop in this period of national emergency would have the effect of retarding the war effort, by making it more difficult to secure and retain the skilled labour necessary for the maximum production required. We are therefore of the opinion that a union shop should not be established in the Halifax Shipyards. At the same time we recognize the fact that in order for the union to operate efficiently it must possess a correspondent measure of security, having regard, of course, to the rights of the employer and the public and the national interest. We think that a maintenance of membership clause in the agreement between the Company and the union would afford a measure of added security for the union and not hinder the Company in securing and retaining skilled workmen. At the same time it should strengthen the spirit of co-operation and contentment among the members, and be conducive to greater efficiency and increased production. We are of opinion therefore that such a clause should be included in the agreement and that it should be in simple form. We suggest the following form taken from the majority report of the board in the dispute between West Coast Shipbuilders Limited et al and certain of their employees, reported at page 1674 of the December 1943 issue of the LABOUR GAZETTE:

"The Company agrees that any present employee who at the date of this agreement was a member of the union or who has become a member of the union since that date shall, as a condition of continued employment, maintain membership in good standing; and any employee who hereafter, during the life of this agreement, becomes a member or is reinstated as a member of the union, shall, as a condition of continued employment, maintain membership in good standing."

We are of opinion also that a clause providing for a check-off of union dues, should be included in the agreement. The reasons, which we have given in support of a maintenance of membership clause, would seem to apply with equal force to a check-off clause. Although the check-off will involve some additional clerical work, we do not think it will be sufficient to impose an undue burden on the Company. Experience in the other industries of the parent company indicates that this system has worked satisfactorily.

We believe the implementation of the above recommendations would have the effect of strengthening the satisfactory relations admittedly existing between the company and its employees.

In conclusion we wish to thank both the employees and the employer for their co-operation in the investigation.

Mr. C. B. Smith, K.C., the third member of the Board, dissents from these findings, and is filing a separate report.

All of which is respectfully submitted.

Dated at Halifax, N.S., this 13th day of June, A.D. 1944.

(Sgd.) JOHN S. SMILEY,
Chairman,

(Sgd.) D. W. MORRISON,
Member.

Minority Report

In the Matter of the Industrial Disputes Investigation Act and in the Matter of a dispute between Halifax Shipyards Limited and its Employees, members of the Industrial Union of Marine and Shipbuilding Workers of Canada, Local No. 1, Halifax.

To: *The Honourable the Minister of Labour*

As I cannot concur in the opinions of the majority of the Board I find it necessary to submit this my minority report.

MATTERS IN DISPUTE

The Board was established to deal with two matters of dispute, only, viz:—

(*a*) Check-off for Union dues.
(*b*) Union Shop Clause.

The representatives of the employees contend that the proposed agreement between the parties should provide for a "check-off" for union dues and also contain a "union shop" clause.

The representatives of the employer object to the inclusion of either of these provisions.

I understand that the majority of the Board will recommend the inclusion of a "check-off" clause. I further understand that while the Board is unanimously opposed to the inclusion of a "union shop" clause under present conditions, the majority will recommend the inclusion of a "maintenance of membership" clause.

As already stated, I cannot join in either of these recommendations.

In the present state of the law both Federal and Provincial it seems to me that our duty in respect to both items in dispute is reasonably clear.

1. CHECK-OFF

Section 12 of the Trade Union Act, Chapter 6 of the Acts of the Legislature of Nova Scotia for the year 1937, provides that:

"In any industry in which by statute or by arrangement between employer and employees deductions are made from the wages of employees for benefit societies, hospital charges, or the like, deductions shall be made by the employer from the wages of employees for periodical payments to a trade union of employees—

(*a*) If the officers of such trade union thereunto duly authorized by its members make application to the Minister of Labour for the taking of a vote to ascertain the wishes of the employees of such industry in respect of such deductions; and
(*b*) If, upon a vote taken by ballot at times and under conditions fixed by the Minister of Labour, a majority of the employees of such industry vote in favour of the making of such deductions; and
(*c*) If the individual employee being a member of such trade union makes to the employer a signed written request that such deductions be made from the wages due to him therein indicating the name of the person to whom such deductions shall be paid."

The Legislature has, therefore, said that in industries to which the Section applies, i.e., in industries in which there is an existing check-off for "benefit societies, hospital charges or the like" a check-off for union dues shall be compulsory when the necessary requirements are met.

Inferentially, on the principle that "express enactment closes the door to further implication" it has also said that there shall be no compulsory check-off in industries which do not fall within the section.

While in the latter industries check-off by agreement is not prohibited, the policy of the Legislature seems to me to be in industries where the principle of check-off has been accepted and the necessary machinery to administer it has been set up and is in existence it is proper that the check-off should be extended for the benefit of the trade unions concerned, but that in industries where no check-off exists it should not be established.

This in my opinion is the only reason for the differentiation in the Act between industries in which the check-off presently exists and those in which it does not.

The representatives of the employees contend, and the representatives of the employer deny that Section 12 applies in the present instance.

If it does, the employees are entitled to the check-off asked for as a matter of right. If it does not, they are not, in my view, entitled to the check-off at all.

This seems to have been recognized by all parties to the dispute, as the contract between them dated August 1, 1941, contained the following provision:

"If it be determined that the provisions of the Trade Union Act of Nova Scotia relating to check-off for Union dues apply to this Company, and the Union establishes its legal position, the Company agrees to conform with the relevant provisions of the legislation. The Company, however, contends that such provisions of the statute have no application to this Company and reserves all objections thereto."

The same provision was contained in the contract of November 16, 1942, which by its terms remained in force for one year from that date and which by mutual consent was extended from time to time until March 16, 1944.

The question of whether or not Section 12 applies in the present instance is a question of fact or possibly a mixed question of law and fact upon which this Board is not competent to pass.

I am, therefore, of the opinion that until the question is settled by a competent tribunal we should refrain from making any recommendation in the matter.

I may add that if the matter had to be determined apart altogether from the Nova Scotia statute I would be compelled to recommend against inclusion in the proposed Contract of any provision for a check-off, as I believe that the check-off is bad in principle and though differing in purpose is not different in essence from the "truck system" against which labour unions in England fought for years.

It seems to me that the individual workman is entitled to be paid his full wages in cash and that the question of whether or not he will pay union dues is one to be determined by him alone free from any coercion on the part of either his employer or his fellow employees.

The expense and inconvenience to the employer entailed in instituting and administering a system of check-off while not by any means negligible might well be justified if there were any compensating advantage to the individual employees as such, and if the institution of such a system would tend to the maintenance of the excellent relationship that has heretofore existed between employer and employees in Halifax Shipyards.

The impression, however, that I gathered at the hearing was that the check-off was designed not for the benefit of the employees as such but in reality for the benefit of the Union and its officers.

The right of the individual employee to determine for himself whether he will or will not pay union dues is in my opinion not a matter for bargaining between his employer and his trade union.

2. "Union Shop" Clause

As already intimated, I understand that the Board is unanimously of the opinion that no "union shop" clause should be included in the proposed agreement.

3. "Maintenance of Membership" Clause

In lieu of the "union shop" clause submitted by the representatives of the employees either in its original or in its amended form the majority report will, I understand, contain a recommendation that a "maintenance of membership" clause be included to the effect that all employees who are members of the contracting union at the date of the contract or who shall become members during the currency thereof shall, under pain of dismissal, remain members for the entire period for which the contract runs.

The inclusion of such a clause would, it appears to me, be a direct contravention of existing governmental labour policy.

In addition it would be an unwarranted interference with the individual liberty of the employees and might well cause undue hardship to the employer.

A "maintenance of membership" provision in any form, while not going as far as a "union shop" clause, is analogous in principle and purpose and it may reasonably be assumed that once such a clause is inserted in a contract it will be retained in all renewals and that there will never be any hiatus between new contracts and old during which an employee would be able to terminate his union membership without automatically losing his employment.

The government policy is clearly laid down in Order in Council P.C. 2685 of June 19, 1940.

Section 6 of that Order declares:

"That employees should be free to organize in trade unions free from any control by employers or their agents"

and proceeds to point out that it is a criminal offence for any employer, without lawful authority, to refuse to employ or to dismiss from his employment any person because of his membership in a lawful trade union.

And Section 9 declares:

"That workers, in the exercise of their right to organize, should use neither coercion nor intimidation of any kind to influence any person to join their organization."

These two basic principles of sound industrial relations policy are restated in more

mandatory form in Sections 19 and 20 of the Order in Council P.C. 1003 of February 17, 1944.

In order to apply these principles to the case under review it is necessary to frankly face the existing facts.

These facts, so far as they are material, appear to me to be:

1. That the principal object of the "maintenance of membership" clause is to perpetuate the union rather than to promote the interests of the individual employees, except in so far as compulsory union membership may be deemed to be a benefit.

This was freely admitted by the representatives of the contracting union who stated that the main object of the provision was to give the union more control over its members and greater power to discipline them.

2. That the business of ship-building is a complicated one in which are employed many different trades and crafts. While the large majority of the employees are presently members of the contracting union there are a number who belong to one or other of the craft unions and have definite objections to joining the Industrial Union. Again there are many employees who are now members of the Industrial Union who are eligible for membership in one or other of the craft unions and who might conceivably determine during the currency of the contract to join the craft unions appropriate to their own particular trades.

3. That there is a certain amount of competition for membership between the Industrial Union on the one hand and the various craft unions on the other, and this competition is accentuated by the fact that members of the craft unions are eligible for membership in the Industrial Union, while for the most part the reverse is not the case.

4. That by P.C. 1003 the right of minority unions to bargain collectively through their own duly appointed and accredited representatives is preserved.

5. That the Company is wholly engaged in essential war work, i.e. ship-building and ship repairing, and in carrying out this work is continuously under the necessity of taking on new hands, most of them skilled in one or other of the crafts and many of them members of craft unions.

In the light of these facts I am of the opinion that the inclusion of a "maintenance of membership" clause would be contrary to the spirit, if not indeed to the letter, of the enunciated principles of policy.

The same considerations which make it improper for employers to discriminate against an employee on account of his union membership must apply equally to prevent discrimination against him by reason of non-membership.

An employer who is prevented, and properly so, from refusing to hire or from discharging an employee by reason of such employee's membership in a union should not, by force of contract, be compelled to discharge the same employee by reason only of such employee changing his union affiliation or deciding to belong to no union at all.

Similarly, employees, who in the exercise of their right to organize are precluded from using any form of coercion to influence any person to join their organization, should not be permitted, for the purpose of compelling maintenance of membership, to vicariously exercise coercion of the strongest kind in the form of threatened loss of employment, by the simple expedient of exacting from the employer a covenant to discharge such person should he cease to be a member of their organization.

It seems to me to be a fundamental right, personal to each individual employee, to determine for himself free from any coercion whatsoever either on the part of his employer or fellow employees whether or not he shall belong to any union at all and, if so, to what union. I further think that implicit in this right to join the union of his choice is the right to leave it at will, and for his action in joining, refusing to join or leaving he is not bound to assign any reason to anyone.

It is quite conceivable that during the currency of the proposed agreement and renewals thereof a considerable number of present and future members of the contracting Union may for a variety of reasons, each personal to the individual concerned and which need not be catalogued here, desire to discontinue their union membership.

If this be so, their undoubted right to do so should not be denied them.

If, on the other hand, no considerable number should desire to relinquish their union membership there is no necessity for a "maintenance of membership" clause and to include one in the contract would simply mean departing from generally accepted principles and invading the individual rights of the employees without serving any useful purpose.

From the standpoint of the Company the proposed clause is equally objectionable.

In the first place its effect would be to make the Company the unwilling instrument of the contracting Union in the discharging of employees whose services were perfectly satisfactory to the Company, and for reasons with which the Company as such would not be concerned.

Again it might well place the Company all unwittingly in the invidious position of appearing to take sides in a situation caused by the competing ambitions of rival Unions to increase their membership, and in the interest of good industrial relations generally it is essential that the Company should not be placed in any such position.

But the main objection from the point of view of the employer is that it would in all probability interfere with the essential war work on which the Company is engaged.

As before pointed out, many individual crafts and trades are employed in the industry of shipbuilding and ship repairing. In these crafts and trades are many key men who are essential to the carrying on of the industry, and the loss of whom might well cause great delay and inconvenience and there are some indeed who are irreplaceable.

As most of these key men are eligible for membership in the craft unions pertaining to their particular trades, it is from among their ranks that defections, if any, from the industrial union might reasonably be expected, with the inevitable results above indicated.

Furthermore the inclusion of the proposed clause would probably make it more difficult for the Company to secure the services of additional skilled workmen who are urgently needed and who are being taken on from time to time.

Any of these skilled workmen who have craft union affiliations may well be loath to take employment in an industry in which the contract with the industrial union contains a "maintenance of membership" clause.

In conclusion I should like to express my appreciation of the very fair, but withal forceful, manner in which the representations of the parties interested were put before the Board by Messrs. Barrett, O'Connell and Shea on behalf of the employees, and Messrs. Nelson, Scouler and Paterson on behalf of the employer.

All of which is respectfully submitted.

(Sgd.) C. B. Smith.

Halifax, N.S., May 31, 1944.

Report of Board in Dispute between Canada Packers Limited, Edmonton, Alta., and its Employees

On July 26, the Minister of Labour received the report of the Board of Conciliation and Investigation established to deal with the dispute between Canada Packers, Limited, Edmonton, Alta., and its employees, members of Local 243, United Packinghouse Workers of America (L.G., May, 1944, p. 619).

The personnel of the Board was as follows: Mr. H. H. Parlee, Edmonton, Alta., Chairman, appointed by the Minister of Labour in the absence of a joint recommendation from Messrs. Lawrence Y. Cairns, K. C., and Rev. C. J. Foran, both of Edmonton, Alta., the employers' and employees' nominees respectively.

The report of the Board was signed by the chairman and Mr. L. Y. Cairns, K.C.; Rev. Mr. Foran submitting a minority report.

The texts of the report of the Board and the minority report are as follows:—

Report of Board

In the Matter of The Industrial Disputes Investigation Act and a Dispute between Canada Packers Ltd., Edmonton, Alta., and Its Employees, Members of Local 243, United Packinghouse Workers of America.

Board:

Mr. H. H. Parlee, K.C.
Chairman.

Mr. L. Y. Cairns, K.C.
Appointed on the recommendation of the Employers.

Rev. C. J. Foran, D.D.
Appointed on the recommendation of employees.

On the 6th day of March, 1944, Local 243 United Packinghouse Workers of America (hereinafter referred to as "Local 243") made application to the Minister of Labour for the establishment of a Board of Conciliation and Investigation, under the above Act.

On the 19th day of April, 1944, such a Board was established to be constituted as in said Act provided.

The Board commenced its sittings on the 13th day of June, 1944.

Notices of the meeting were published in the local daily press and special notices were sent to:

The Officials of Local 243;
The employer, Canada Packers Limited, and The Packing Plant Employees Federal Union No. 78, Trades and Labour Council of Canada (hereinafter referred to as "Union 78").

The following representatives appeared;

For Canada Packers Limited:

Mr. S. F. McDougall,
Manager, Canada Packers Ltd. (Edmonton).

Mr. C. J. Long,
Superintendent, Canada Packers Ltd. (Edmonton).

For the employees, Members of Local 243 U.P.W.A. (C.I.O.)

Mr. John Lenglet,
Western Canada Representative, United Packinghouse Workers of America (C.I.O.)
Mr. Fred Romanchuk,
President of Local No. 243, United Packinghouse Workers of America (C.I.O.)

For the Employees, Members of Union 78, Trades and Labour Congress of Canada (A.F. of L.)

Mr. Carl Berg,
Vice-President, Trades and Labour Congress of Canada (A. F. of L.)
Mr. J. Wallin,
Local No. 78 Trades and Labour Congress of America.

Mr. A. W. Holmes acted as Secretary.

Briefs were submitted before the Board on behalf of Local 243 and copies delivered to the representatives of the Company, and of Union 78.

Briefs were then submitted on behalf of the employer and on behalf of Local 78.

Opportunity was given to all parties to adduce any verbal testimony or to file replies if thought advisable.

After the conclusion of the evidence submitted the Board had a round-table and informal discussion with the parties to endeavour to induce an amicable settlement of the dispute as required by section 24 of the Act. No settlement was effected, although an adjournment was had to allow the parties to further consider the matter.

Mr. Lenglet, on behalf of Local 243, did express a willingness that a vote be taken to be held within one week without electioneering or campaigning. He stated that he would prefer that the vote be held and see the majority of the people voting have the decision as to which union should be entitled to the bargaining agency, but he stated that he did not object to the majority being the majority of those affected. This offer was declined by Mr. Berg.

Facts

The following sets forth the facts and circumstances ascertained by the Board including the cause of the dispute.

Some time in the year 1940 Union 78 was established in the City of Edmonton. In the autumn of 1942 the employees of the Company at Edmonton voted to the effect that they desired to be represented in their dealings with the Company by Packing Plant Employees Federal Union Local 78.

Following the voting the Company entered into an agreement with Local 78, dated 27th day of January, 1943.

By this agreement the Company recognized Union 78 as the exclusive bargaining agent for all employees in the Edmonton plant as the word "employee" was defined in the agreement.

This agreement, in part provided (see article 12):

"That this agreement shall remain in effect for a period of one year from the date of the execution hereof and shall continue in force thereafter on a yearly basis until terminated by either party giving the other party thirty (30) days' notice in writing prior to the expiration date."

In or about December, 1943, Local 243 claimed that a large majority of the employees of the packing plant desired to be represented by Local 243 in preference to Union 78.

In January, 1944, Union 78 agreed that a vote should be taken to ascertain the wishes of the employees. Thus, on the 27th day of January, 1944, with the approval of the Company, a vote was taken under the auspices and direction of the Alberta Board of Industrial Relations.

At the time the vote was taken there were 647 names of employees on the voters' list and thus eligible to vote.

The result of the vote was as follows:

In favour of Local 243	291
In favour of Union 78	276
In favour of no union	4
Spoiled ballots	7
Non-voters	69
Total	647

The result was that Local 243 obtained a majority of the votes cast and counted but did not obtain a majority of the employees affected, if that expression means those entitled to vote and on the voters' list.

On the 6th day of March, 1944, Local 243 made application for a Board under the Act alleging as its reason:

"Refusal of the Company to recognize Local 243 United Packing House Workers of America after winning a vote on January 27, 1944, conducted for that purpose by Department of Trade and Industry of the Alberta Government."

Subsequent to the application Mr. F. E. Harrison, Representative of the Dominion Department of Labour, endeavoured to settle the dispute. It was finally agreed by all parties that another vote should be taken to ascertain the wishes of the employees, which vote was taken on the 14th day of April, 1944, under the auspices and direction of the Alberta Board of Industrial Relations.

There were eligible to vote 646. The result of the vote was as follows:

In favour of Local 243	320
In favour of Union 78	226
In favour of no union	8
Non-voters	92
Total	646

It will therefore be seen that Local 243 did obtain a majority of the votes cast but did not obtain a majority of employees affected, if such is given the interpretation as above.

Before this Board Mr. Lenglet contended that the majority of the votes cast should prevail but frankly admitted that Local 243 had not in either case obtained a majority of employees affected.

Evidence was submitted that there were at least 100 who had enlisted for active service while employees of the Company. The Company Officials asserted that it felt itself under an obligation to see that these persons were given a position of some kind, if they so desired, upon their return to Edmonton. It also appears that the change of personnel of the employees is rapid; that since the commencement of the war there has been over 1,100 changes in the personnel, although it must be admitted that many of these were engaged in a temporary capacity. However, there has been such a change of 338 since the 14th day of April, last.

Before concluding this statement the Board desires to say that there appeared to be no desire on the part of any of the representatives of the Unions to becloud the issue. They were acting in accordance with their convictions and sincere in endeavouring to settle the problem as they respectively saw it.

Representatives of each Union considered that they were right in their contention. In short, the contention of Local 243 was that it was entitled to have the bargaining agency as it had obtained a majority of the votes cast in each vote that was taken. The contention of representatives of Union 78 being that, inasmuch as Local 243 had not obtained a majority of those eligible to vote that its Agreement with the Company was still in force and effect.

During the summer months many of the employees are absent on vacation and then follows some months of peak production at the plant.

Conclusions

1. That the Company has been meticulously impartial in its attitude throughout and was prepared to recognize either Union as the bargaining agent, if it obtained a majority of the employees eligible to vote.

2. That while it is true there are a number of former employees now on active service, who will likely be re-employed by the Company and thus interested, perhaps affected, it would be impractical to give them a vote or to consider them as an employee affected.

3. That another vote should be taken of the employees to ascertain their wishes. The difficulty is to ascertain when that vote should take place.

4. That the agreement of the 27th day of January, 1943, between Union 78 and the Company is in force and effect.

5. That when a vote is taken there is some more or less interference with the business of the Company.

Recommendations

That another vote of the employees affected shall be taken in January, 1945. We suggest this date as being sound in principle and logical and having regard to all the circumstances and conditions. We do not think that the Company should be embarrassed by more than one vote a year. It has already had two in the year 1944. While it is true that those former employees on active service should not be deemed to be employees affected, nevertheless, considering the rapid change in the personnel and all other circumstances we are of opinion that any alteration in the status quo requires a majority of employees eligible to vote. We are also of opinion that a yearly vote is advantageous to both unions as it will tend to stability and harmony among the workers. Conceivably, in a short space of time the losing union might claim that a vote should again be taken. This would lead to disturbance and a lack of harmony and efficiency in the plant.

All of which is respectfully submitted.

(Sgd.) H. H. Parlee,
Chairman.

I concur.

(Sgd.) L. Y. Cairns.

To: The Honourable Humphrey Mitchell,
Minister of Labour,
Ottawa.

Edmonton, Alberta,
July 24, 1944.

Minority Report

St. Anthony's Rectory,
8317-105 St., Edmonton,
July 22, 1944.

Honourable Humphrey Mitchell,
Minister of Labour,
Ottawa, Can.

Re: Industrial Disputes Investigation Act and re dispute between Canada Packers, Ltd., Edmonton, Alberta, and its employees, members of Local 243, United Packinghouse Workers of America, C.I.O.

Minority Report Submitted by Rev. Father C. J. Foran, a Member of the Conciliation Board appointed to Investigate the Above Dispute

Honourable Sir:

I find myself unable to concur in the recommendations made to yourself by the other two members of the Board appointed to investigate the above dispute and beg permission to make the following submission in the form of a minority report.

Members of the Board

Mr. H. H. Parlee, K.C. (Chairman)
Mr. L. Y. Cairns, K.C.
Rev. C. J. Foran, D.D.

Facts of the Case

1. This Board was set up by the Minister of Labour on April 19, 1944, under the Industrial Disputes Investigation Act to settle a dispute, or to make recommendations likely to effect the settlement of a dispute, between Canada Packers, Ltd., Edmonton, Alberta, and those of its employees who are members of Local 243, United Packinghouse Workers of America, C.I.O.

2. Since the autumn of 1942, bargaining rights in the Canada Packers were held by Local 78, a composite local affiliated with the American Federation of Labour, which thus became an interested party in the dispute.

3. Prior to the termination in January, 1944, of the yearly contract held by Local 78, the Company was informed by Local 243 that the C.I.O. affiliate challenged the right of Local 78 to continue as the bargaining agent for the workers at Canada Packers.

4. An election, under the provisions of the Alberta Industrial Conciliation and Arbitration Act and under the supervision of the Board of Industrial Relations of the Province, was held at Canada Packers on January 27, 1944.

The result was inconclusive in that Local 243, while obtaining a simple majority, did not obtain a majority vote of the "employees affected" as that phrase is interpreted by the Alberta Board of Industrial Relations.

According to the Company's brief submitted later, it was prevented, as the result of the indecisive vote, from recognizing either union as the bargaining agent.

(It is the opinion of the other two members of the Board that the Board of Industrial Relations exceeded its authority in telling the Company it must not recognize either union. If their contention is correct—and I incline to the opinion that it is—Local 78 remains the bargaining agent at Canada Packers and will remain so until rejected by a majority vote of employees affected. In the present existing situation that means that, on the basis of the latest figures available, 226 employees are authorized to bargain for the entire body contrary to the wishes of 320 employees opposed to their union. *Such a situation may be sanctioned by law but I contend that it offends against principles of equity.*)

The Company asserts that the agreement previously concluded with Local 78 remains in force by consent of all parties concerned but seems inclined to follow the directive issued by the Board of Industrial Relations to the effect that it must not recognize either union.

5. Disagreeing with the interpretation placed upon the Alberta Act by the Board of Industrial Relations, Local 243 appealed to the Minister of Labour at Ottawa for a Conciliation Board.

6. Following out routine practice, Mr. Fred Harrison, Western Conciliator for the Department of Labour, proceeded to Edmonton to attempt a settlement of the dispute. His efforts having failed, Mr. Harrison recommended another vote to which all parties concerned gave their consent. This vote took place on April 14, 1944, and again the result was indecisive. Local 243 increased its simple majority but failed by four votes to gain the majority of "employees affected." (Local 243—320 votes; Local 78—226 votes; 92 employees refrained from voting, for one reason or another. Representatives of Local 243 submitted for the consideration of this Board affidavits from seven employees who had not voted due to illness or other legitimate cause and who deposed that, had they voted, they would have cast their ballots in favour of 243.)

7. The Minister of Labour then proceeded to establish this Board which began its sit-

tings on June 13, 1944. Briefs were submitted by the following and in the following order:

Local 243, C.I.O. (Represented by John Lenglet and Fred Romanchuk.)

Canada Packers (Represented by Stewart McDougall and C. J. Long.)

Local 78, A.F. of L. (Represented by Carl Berg and John Wallin.)

Stripped of all irrelevancies, the salient points in the briefs submitted may be summarized as follows:

Local 243 clamoured for recognition on the basis of 320 votes cast plus seven affidavits which its representatives claimed showed a majority of the workers to be in favour of the C.I.O. affiliate.

Canada Packers, Ltd., asserted its willingness to recognize any union gaining the necessary majority but asked to be spared the inconvenience of oft-recurring elections.

Local 78 argued its right for continued recognition as the bargaining agent at Canada Packers.

8. The Board failed in its efforts to bring about a settlement by means of a round table discussion and that despite every effort made by the Chairman.

When asked, in the course of this discussion, for the greatest compromise that they were willing to make, the representatives of Local 243 agreed to the holding of another election. They stipulated that it should be held within a week; that there should be no electioneering; that an agreement be reached between the parties concerned as to whether a simple majority should suffice to declare a winner (the agreement Local 243 favoured) or whether a majority of employees affected should be required. (This latter requirement Local 243 was willing to accept.)

Furthermore, the representatives of Local 243 agreed to retire from the field should they lose the election on whatever basis it was fought.

(*This seemed then, and still seems, an eminently fair offer. As a matter of fact, it was the solution for the difficulty which kept presenting itself to my mind from the very beginning.* In view of the rapid turnover of manpower at the plant (338 employees since the election of April 14) I felt that Local 243 could not reasonably push its claim for recognition.)

Mr. McDougall is to be commended for the fairness and impartiality with which he expressed the Company's reacton to Mr. Lenglet's offer.

"Chairman—Mr. McDougall, what about a vote at any time in the near future?

Mr. McDougall—In the stand we took of being impartial, and wishing to follow that stand, I do not see where we would have any objection to taking a vote, if it is to determine the wishes of the employees; so I do not see any objection to a vote at some time in the near future."

He then asked for time to prepare for the consideration of the Board a list of factors likely to affect an election. Chief among these were the holiday schedule now under way and the busy season at the Plant beginning about October 1.

(*Here we have the two parties named in the instrument establishing this Board in virtual agreement upon a course of action the adoption of which was frustrated by the refusal of the third party to agree.*)

Local 78 refused to consent to the proposal acceptable to the other two parties and did not suggest an alternate compromise.

(This refusal definitely scuttled all efforts to effect a settlement by mutual agreement. Furthermore, I maintain, that since Local 78 had already consented to two elections within the year, its representatives had no valid reason for refusing to consent to a third to which the other interested parties had agreed. Certainly it is true that another election would inflict no hardship on Local 78 that it did not inflict upon the Company and Local 243.)

At this time the *tactics of Local 78 were definitely unyielding.* They were legitimate enough and dictated by strong convictions. As a consequence, I have no quarrel with them except in so far as *they defeated the purpose for which this Board was set up,* namely, to effect a settlement of the unfortunate situation prevailing at Canada Packers.

Here I must register disagreement with the recommendation made in the majority report. *The recommendation made by my two colleagues constitutes an indirect endorsation of a course of action which thwarts an early settlement of the dispute.*

One party or another has to suffer as a consequence of any recommendation made by a Board of this kind. *The party showing the least tendency to compromise merits the least consideration.* The opposite is true in the case of the recommendation made in the majority report. In military parlance, Local 78 decided to fight a delaying action rather than engage in a pitched battle (of ballots). That is good strategy on the part of Local 78 *but, in my opinion, it should not be endorsed by those who are charged with effecting a settlement of a dispute which is hampering production.*

Local 78 elected to stand on what it considered its legal rights and no one can take

exception to such action. However, the very fact that the Minister of Labour, knowing the situation as we must presume he did, decided to establish this Board casts serious doubts on the validity of these rights.

Conclusions

1. On the strength of the evidence submitted, it must be concluded that the Company is to be absolved of all charges of intimidation or discrimination. It has acted at all times with complete fairness and impartiality.

2. It must be concluded that all efforts to bring the two unions together seem doomed to failure before they get underway. Consequently, the sooner one or another is eliminated the better for the Company and the workers alike. In this regard, Mr. McDougall told the Board that the situation at the plant had lessened production but said he could not say to what degree.

3. About 100 former employees of Canada Packers are in the armed services. Some of these are likely to reenter the employ of the Company. It would, however, be impractical to consider them as "employees affected" by any dispute in the Plant during their absence.

Recommendations

All members of the Board were agreed that an election was called for sooner or later. We disagreed as to the date. My colleagues agreed it should be held in January, 1945. I held out for an early election.

In favour of the January date, the Chairman and Mr. Cairns were of the opinion that in order to maintain stable conditions at the Plant, an election should not be held oftener than once a year.

Under normal conditions this argument is cogent. But, when conditions are disturbed as they are in Canada Packers, an election is often the only way to clarify the matters in dispute. *Then, and under these conditions, elections are justified as often as they are necessary.* Moreover, the Act makes no recommendation to the effect that there should be but one election in a year.

An *early* election is the only course that offers any chance of an *early* solution of the situation at Canada Packers. Someone might say that a third election might again prove inconclusive. True, it might, but it must be recalled that Local 243 agreed to withdraw from the field in the event of its losing another election.

If, at the time of the round table discussion, Local 78 had agreed to the election, I am of the opinion no member of the Board would have raised any objection. In that event the dispute would have virtually settled itself and everyone would have gone home happy.

I find myself unable to concur in the majority report for the following reasons:

1. The majority report really makes no recommendation at all pertinent to the settlement of the dispute since the contract held by Local 78 expires in January next and an election would follow regardless of any recommendation from this Board should the two unions continue to contend for the bargaining rights.

2. The majority report, recommending an election in January, is in effect just another way of endorsing the continuance of the status quo and of the conditions that led to the establishing of this Board.

3. The majority report makes no contribution to the *early* settlement of the dispute since Local 78 retains the bargaining rights until January next. Thus we are confronted with the abnormal condition of Local 78 with 226 members retaining the bargaining rights against the wishes of Local 243 with 320 members.

4. The majority report is likely to lead to industrial strife at the plant since Local 78 retains the bargaining rights and that is the situation Local 243 was unwilling to accept at the time it asked for a Board.

Consequently, I make the following recommendations:

1. That another election in accordance with the provisions of the Alberta Act be held at Canada Packers within the shortest possible time and with the shortest possible notice.

"Within the shortest possible time" as this course offers the best chance of an early settlement and I suggest a date between August 1 and 15, 1944.

"With the shortest possible notice" because the issues at stake are well known to the workers at the Plant. They know now what union they want to bargain for them. A prolonged campaign will not enlighten them further but might becloud the issues and create tension among the workers. I am not denying the right of free speech but simply questioning the utility of too much of it.

2. In the event of a third inconclusive election the Company should be given guarantees by both unions that it will be freed from the inconveniences caused by an election campaign for a reasonable period of time—until the end of the year, at least, or perhaps until after the busy season in the Spring.

In conclusion, Honourable Sir, may I say that my failure to concur in the recommenda-

tion of my colleagues must not be taken to indicate any lack of harmony in the proceedings of the Board.

Its other two members are great gentlemen. I enjoyed every minute of my association with them. If we are ever brought together again, I hope it will be upon some matter on which we shall all agree.

Respectfully submitted,

(Sgd.) C. J. FORAN

Conciliation Work of the Industrial Relations Branch During July, 1944

DURING the month of July officers of the Industrial Relations Branch were called upon to handle 32 industrial disputes or controversial situations involving 20,215 workpeople employed in 53 different establishments. Of these 25 were new disputes which originated during the month while 7 were situations which had been unterminated as at June 30 and received further attention in July. They were dealt with under the provisions of the Conciliation and Labour Act.

Industrial Relations officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal, Fredericton, N.B., and Glace Bay, N.S. The territory of the two officers resident in Vancouver comprises British Columbia and Alberta; two officers stationed in Winnipeg cover the provinces of Saskatchewan and Manitoba and Northwestern Ontario; four officers resident in Toronto confine their activities to Ontario and work in close collaboration with the Provincial Conciliation service; two officers in Montreal are assigned to the Province of Quebec and two officers resident in Fredericton, N.B., and Glace Bay, N.S., represent the Department in the Maritime Provinces. The headquarters of the Industrial Relations Branch and the Director of Industrial Relations and staff are situated in Ottawa.

Classified by industries, the disputes occurred as follows:

MINING:	
Coal mining	7
Metal mining	2
MANUFACTURING:	
Animal food products	1
Metal products	13
Wood products, miscellaneous	1
Shipbuilding	2
TRANSPORTATION:	
Steam railways	2
Water	2
CONSTRUCTION:	
Buildings and structures	1
SERVICE:	
Business and Personal	1

A statistical analysis of the nature of the disputes handled, their cause, disposition, etc., is given below:

NATURE OF DISPUTE OR SITUATION:	
Strike	10
Threatened strike	3
Controversy	8
Arbitrations	3
Requests to conduct consent elections	1
Services of Commissioners	7
PREDOMINANT CAUSE OR OBJECT:	
Increase in wages	4
Decrease in wages	1
Other causes affecting wages and working conditions	5
Recognition of Union	3
Employment of Union members only	2
Discharge of workers for union activity or membership	7
To secure or maintain union wages and working conditions	1
Other union questions	1
Employment of particular persons	1
Discharge of workers*	3
Unclassified	4
DISPOSITION:	
Strike terminated by mediation	7
Threatened strike averted by mediation	2
Decision rendered in arbitration	2
Industrial Disputes Inquiry Commissioner appointed under P.C. 4020	5
Agreement signed	2
Verbal agreement	1
Dispute lapsed or called off; no further action required	4
Referred to N.W.L.B. or R.W.L.B.	2
Referred to Wartime Labour Relations Board	1
Other disposition	2
Disposition pending	4
RESULTS:	
In favour of employees	7
In favour of employer	9
Compromise or partially successful	2
Indefinite or unterminated	11
Not known	3
METHOD OF SETTLEMENT:	
Conciliation or mediation	15
Direct negotiations	2
Arbitration	1
Administrative action	9
Investigation only	2
Settlement pending	3

Brief summaries of the cases of chief interest or importance are given below:—

Metal Products Workers, Windsor, Ont.—In the July issue of the LABOUR GAZETTE reference was made to the appointment of Mr. J. A. Hanrahan, Police Magistrate of the City of Windsor, as an Industrial Disputes Inquiry

* Other than in connection with Union questions.

Commissioner to investigate the dismissal of an employee of the Aircraft Hydraulic Supplies Limited, of Windsor, allegedly because of union membership and activity. The case was heard during the early part of July and the Commissioner reported to the Minister of Labour that the weight of evidence proved that the employee in question had been dismissed for the reason that he was a member of or working on behalf of Local No. 195, United Automobile Workers of America. Pursuant to the recommendation of the Commissioner, the Minister of Labour ordered the Company to reinstate the employee in his former position with the same rights and privileges which he formerly enjoyed, and with reimbursement for lost wages.

Metal Products Workers, Hamilton, Ont.—Reference was made in the July issue of the LABOUR GAZETTE to the appointment of His Honour Judge Ian M. Macdonell of the City of Toronto as an Industrial Disputes Inquiry Commissioner to investigate charges that an employee of Sawyer-Massey Limited, Hamilton, Ontario, had been dismissed for the reason of his membership in and activity on behalf of the United Electrical, Radio and Machine Workers of America. Evidence was heard at two sittings in Hamilton during July. The Commissioner reported that although the labour situation at the plant was far from satisfactory, the attendance record of the employee in question was such that there could be no justification for recommending the man's reinstatement.

Metal Miners, Geraldton, Ont.—It was reported in the July issue of the LABOUR GAZETTE that the Minister of Labour had appointed a Commissioner under the provisions of Order in Council, P.C. 4020, to investigate a complaint that an official of the United Mine, Mill and Smelter Workers had been dismissed by his employer, Hard Rock Gold Mines, Limited, Geraldton, Ontario, because of Union membership and activity. His Honour Judge J. H. MacDonald of Sault Ste. Marie, Ontario, who acted as Industrial Disputes Inquiry Commissioner, reported after a hearing of the case, that the charge made by the Union was not proven by the weight of evidence, and that there had not been any improper action on the part of the Company officials.

Railway Workers, Quebec, P.Q.—In the June issue of the LABOUR GAZETTE reference was made to the appointment of the Honourable Mr. Justice Oscar L. Boulanger as an Industrial Disputes Inquiry Commissioner to investigate certain charges and countercharges under Order in Council, P.C. 4020, made by the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, and by the Quebec Railway, Light and Power Company of Quebec City, P.Q. The charges made by the Union were that one of its members had been dismissed for union membership and activity, and that another had been demoted to an inferior position for the same reason. The Company, in turn, laid charges that two of its employees (one of whom was the demoted person referred to above) had attempted improperly to organize a Union during working hours at the place of their employment, and had used coercion and intimidation to induce another employee to join the Union. The Commissioner reported to the Minister of Labour that the Union had proved its charges of discrimination in connection with both the dismissed employee and the person who had been demoted. Accordingly, the Minister of Labour ordered that each of these employees be reinstated in their former positions, and that the one who had been dismissed should be reimbursed for lost wages. With regard to the charges made by the Company, the Commissioner found that the management did not prove any overt acts in connection with the organization of a Union during working hours at the place of their employment; and that, taking into consideration the weight of evidence, the Company had not proved its charges or coercion and intimidation.

Coal Miners, Glace Bay, N.S.—About 1,487 coal miners of all classes employed in No. 2 and No. 20 Collieries of the Dominion Coal Company, Glace Bay, N.S., went on strike on July 17, 1944, when one employee refused to work at the coal face and the Company refused to give him other employment. The employee in question claimed that he was not able to continue working as a loader at the coal face, but the Company doctor claimed that he was physically fit for such work. The men resumed work on July 20 pending an investigation of the case. Conferences between Company officials and representatives of District No. 26, United Mine Workers of America were arranged by Mr. Allan MacDonald, Industrial Relations Officer, Glace Bay, N.S., on July 21 and 22. It was agreed that the employee would be examined by a medical board consisting of his own doctor, a Company doctor and a third chosen by the other two. If the board decided that the employee was unable to mine coal, the Company agreed to give him such other employment as was available, on the understanding that the settlement would not be considered as precedent in dealing with other similar cases.

Strikes and Lockouts in Canada During July, 1944

DURING the month of July the number of strikes and lockouts in Canada was two less than in June but the number of workers involved and the time loss were greater. There were 21 strikes during the month involving 9,696 workers with a time loss of 25,968 man working days as compared with 23 strikes involving 5,975 workers and a time loss of 9,491 man working days during the previous month. In July, 1943, there were 39 strikes with 15,679 workers and a time loss of 65,632 man working days.

Preliminary figures for the first seven months of 1944 show a total of 130 strikes involving 60,675 workers and a time loss of 356,846 man working days compared with 241 strikes, 114,631 workers and 581,552 man working days time loss during the first seven months of 1943.

Three strikes during July involved 1,000 or more workers, namely, shipyard workers at Halifax and Dartmouth, N.S., and coal miners at Glace Bay and at Stellarton, N.S. The first named strike accounted for approximately 45 per cent of the time loss for the month.

One strike involving 342 workers was carried over from June and twenty commenced during July. Of these twenty-one disputes, 17 were terminated during the month. Six resulted in favour of the employers, five in favour of the workers and six were indefinite in result. At the end of the month, therefore, there were four strikes unterminated, namely, coal miners, Stellarton, N.S., hat factory workers, Guelph, Ontario, shipyard workers, Halifax and Dartmouth, N.S., and taxicab drivers, Quebec, P.Q.

The record does not include minor strikes such as are defined in another paragraph nor does it include strikes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated.

STRIKES AND LOCKOUTS IN CANADA, JANUARY TO JULY, 1943-1944

Cumulative totals	241		114,631		581,552

* Preliminary.

† Strikes unterminated at the end of the previous year are included in these totals.

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is seldom encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout included as such in the records of the Department is a cessation of work involving six or more employees and lasting at least one working day. Strikes of less than one day's duration and strikes involving less than six employees are not included in the published record unless ten days or more time loss is caused, but a separate record of such strikes is maintained in the Department and the figures are given in the annual review. The records include all strikes and lockouts which come to the knowledge of the Department and the methods taken to obtain information preclude the probability of omissions of strikes of importance. Information as to a strike involving a small number of employees or for a short period of time is frequently not received until some time after its commencement.

STRIKES AND LOCKOUTS IN CANADA DURING JULY, 1944*

Industry, occupation and locality	Number involved		Time loss in man-working days	Particulars†
	Establishments	Workers		
Strikes and Lockouts in Progress Prior to July, 1944				
MANUFACTURING—				
Pulp, Paper and Paper Products—				
Paper mill workers, St. Jerome, P.Q.	1	342	1,026	Commenced June 15; for reinstatement of a worker; terminated July 5; conciliation, provincial; in favour of workers.
Strikes and Lockouts Commencing During July, 1944				
MINING—				
Coal miners, North Minto, N.B.	1	22	198	Commenced July 3; against discontinuance of wage increase; terminated July 12; reference to NWLB‡; in favour of workers.
Coal miners, Stellarton, N.S.	1	1,083	2,400	Commenced July 4; *re* working conditions; terminated July 6; conciliation, federal and return of workers pending negotiations; indefinite.
Coal miners, Cadomin, Alta.	1	250	500	Commenced July 10; against lack of medical services; terminated July 11; negotiations; in favour or workers.
Coal miners, Glace Bay, N.S.	1	1,488	4,464	Commenced July 17; protest over a loader (allegedly physically unfit) being refused datal work; terminated July 19 conciliation, federal and return of workers pending investigation; indefinite.
Coal miners, Glace Bay, N.S.	1	*(a)* 88	88	Commenced July 20; against refusal of company to guarantee average wage for the day following a mishap; terminated July 20; return of workers; in favour of employer.
Coal miners, Stellarton, N.S.	1	41	41	Commenced July 25; against deduction from pay of two workers for leaving early; terminated July 25; return of workers: in favour of employer.
Coal miners, Stellarton, N.S.	1	521	800	Commenced July 29; against suspension of a boy and cancelling of mine examiner's order *re* safety regulations; unterminated.
MANUFACTURING—				
Rubber and Its Products—				
Rubber factory workers (footwear), St. Remi, P.Q.	1	121	121	Commenced July 14; against dismissal of three workers allegedly for union activity; terminated July 17; conciliation, provincial; indefinite.
Textiles, Clothing, etc.—				
Hat factory workers, Guelph, Ont.	1	11	25	Commenced July 28; failure of one worker to pay union dues; unterminated.
Pulp, Paper and Paper Products—				
Paper mill workers, Ottawa, Ont.	1	600	1,500	Commenced July 7; for improved ventilation in machine rooms; terminated July 11; negotiations: in favour of workers.
Metal Products—				
Metal factory workers, Owen Sound, Ont.	1	520	325	Commenced July 10; against refusal of NWLB to grant wage increase; terminated July 10; return of workers; in favour of employer.
Motor vehicle factory workers, Oshawa, Ont.	1	*(b)* 280	280	Commenced July 10; against refusal of NWLB to grant wage increase: terminated July 10; return of workers; in favour of employer.
Agricultural implement factory workers, Winnipeg, Man.	1	75	75	Commenced July 10; against delay in negotiating a new agreement; terminated July 10; conciliation, federal; in favour of workers.

Strikes and Lockouts in Great Britain and Other Countries

THE latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month, bringing down to date that given in the March, 1944, issue, in the review of "Strikes and Lockouts in Canada and Other Countries, 1943".

United States

Preliminary figures for June show 500 strikes beginning in the month, in which 155,000 workers were involved. The time loss for all disputes in progress during the month was 680,000 working days.

Great Britain and Northern Ireland

The British *Ministry of Labour Gazette* publishes statistics dealing with disputes involving stoppages of work and gives some details of the more important ones. An Order under the Defence Regulations, effective July 25, 1940, provides for the settlement of disputes and the prevention of strikes and lockouts, as noted in the LABOUR GAZETTE, August, 1940, page 760.

The number of disputes beginning in April was 152, and 36 were still in progress from the previous month, making a total of 188 disputes in progress during the month, in which 239,200 workers were involved. The time loss in April was 719,000 working days.

The number of disputes beginning in May was 150, and 5 were still in progress from the previous month, making a total of 155 disputes in progress during the month, involving 27,700 workers, with a time loss of 45,000 working days.

Collective Agreements and Wage Schedules

Recent Collective Agreements

COLLECTIVE agreements received in the Department are outlined in the LABOUR GAZETTE from month to month. It is not possible because of limitation of space to include all agreements received. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of the employers and workers are also included. Verbally accepted agreements are so indicated.

Agreements made obligatory under the Collective Agreement Act in Quebec are summarized in a separate article following this.

Manufacturing: Vegetable Foods

WINNIPEG, MANITOBA.—OGILVIE FLOUR MILLS CO., LTD. AND FLOUR AND CEREAL WORKERS' UNION, LOCAL 132.

Agreement to be in effect from May 24, 1944, to May 24, 1945, and thereafter subject to 60 days' notice. The company recognizes the union as the sole bargaining agent for all employees and no discrimination to be shown by the company or the union against employees because of union membership or non-membership.

Hours: 8 per day, 48 per week. Overtime and work on Sundays and holidays, at time and one half. Vacation: one week with pay for employees with one year's service; two weeks with pay for employees with at least five years' service. Provision is made for seniority rights and for the settlement of grievances.

Manufacturing: Animal Foods

ST. BONIFACE AND WINNIPEG, MANITOBA.—CANADA PACKERS LIMITED AND UNITED PACKINGHOUSE WORKERS OF AMERICA, LOCAL 216.

Agreement to be in effect from June 1, 1944, to May 31, 1945, and thereafter from year to year, subject to notice. The company recognizes the union as the sole collective bargaining agency and the union agrees to represent all employees without discrimination.

Hours: 8½ per day, Monday to Thursday inclusive, 9 hours on Friday and 5 hours on Saturday, a 48 hour week. Overtime: for production and maintenance employees other than continuous shift operators, time and one half for work in excess of 9 hours per day, Monday to Friday, 5 hours on Saturday or 50 hours in any week; for continuous shift operators, overtime at time and one half for work over 9 hours in any day or 50 in any week. Time and one half for work on six holidays. Guaranteed wage: the company guarantees a 40-hour week to all regular employees.

Wages: both parties agree to accept the wage rates presently existing in the plants. The company agrees to pay a premium of 5 cents per hour to all regular employees whose shifts begin between 3 p.m. and 3 a.m. Wages and overtime rates are subject to approval by the Regional War Labour Board. Vacation: one week with pay to employees with at least one year's service; two weeks to employees with at least five years' service; three weeks to female employees with 15 years' service and to male employees with 20 years' service. Provision is made for seniority rights and for the settlement of grievances.

Manufacturing: Printing and Publishing

MONTREAL, OTTAWA, TORONTO, HAMILTON AND LONDON.—CANADIAN LITHOGRAPHERS' ASSOCIATION AND AMALGAMATED LITHOGRAPHERS OF AMERICA, LOCALS 27 (MONTREAL), 40 (OTTAWA), 12 (TORONTO), 42 (HAMILTON) AND 47 (LONDON).

Agreement to be in effect from April 1, 1944, to March 31, 1945.

Hours: 44 per week with a maximum of 9 hours in any day; for the day shift, work to end at noon on Saturday, the regular hours for each plant are to be posted. Overtime: all work either before or after the schedule established in each shop, to be paid at time and one half for the first three hours on the first five days of the week, and double time thereafter; double time for work on Saturday afternoons, Sundays and eight specified holidays (seven holidays in English plants in Quebec).

Wage rates now include the cost of living bonus. The following rates are subject to the approval of the Regional War Labour Boards of Quebec and Ontario. Hourly wage rates for artists in the Art Department: commercial, general, letterers and engravers $1.12; drug label work 79 cents; poster (crayon) $1.22, poster (letterers) 97 cents; process (colour correctors) $1.34. Hourly wage rates in the camera department: camera operators 72 cents for commercial, $1.12 for process and colour and for projection machine operators. Hourly wage rates in the plate making department: commercial transferers 97 cents; colour transferers, provers, photo composagraph and stop and re-

14828—6

peat operators $1.12; vacuum frame and contact negative operators producing original and proving plates and press plates with frames size up to and including 23 x 35, 68 cents; vacuum frame and contact negative operaters making press plates with frames size over 23 x 35, $1.12; negative assemblers and lay-outers $1.12; stone polishers and plate grainers operating a single plate machine 68 cents; plate grainers operating two single or one double plate machine 84 cents. Hourly wage rates in press department: journeymen pressmen 70 cents to $1.49, according to size and type of presses and whether one or more colours; press feeders and feeder operators from 43 to 53 cents during first year, from 46 to 65 cents during second year and from 50 to 76 cents thereafter; on 4-colour sheet fed presses 36 x 48 or over, first feeder operator 91 cents, second feeder operator 81 cents. For press feeders and feeder operators, the hourly wage rates for male employees under 21 years of age and female employees is in some classes one or two cents per hour below the rate for male employees over 21 years of age. Hourly wage rates for apprentices: in plate making department from 23 cents during first year to $1.01 during second half of sixth year; in art department and camera department, from 23 cents during first half of first year to 64 cents during second half of fifth year and to $1.01 for the second half of second year as improver. Hourly wage rate for helpers from 34 cents during first half of first year to 45 cents after second year. Night work: all employees working on night shifts are to be paid at 15 per cent higher than the day rate. Handicapped employees may be paid lower rates as established by the joint committees.

Apprentices are limited to one for three journeymen and an additional apprentice to each additional four journeymen in the press department; one apprentice to the first four journeymen and an additional apprentice to each additional 5 journeymen in all other departments.

Vacation: (subject to the approval of the Regional War Labour Boards of Quebec and Ontario) one week with full pay to employees with at least one year's service.

A joint committee composed of an equal number of representatives of employers and employees to be appointed to interpret and determine the application of the agreement.

Manufacturing: Non-Metallic Minerals, Chemicals, etc.

TRANSCONA, MANITOBA.—DEFENCE INDUSTRIES LIMITED AND THE WINNIPEG POWDER AND EXPLOSIVE WORKERS FEDERAL UNION 150.

Supplementary agreement to be in effect from April 20, 1944 to April 20, 1945. The original agreement was summarized in the LABOUR GAZETTE, May, 1943, p. 638. The wage rates now include the cost of living bonus. These rates are now, for some classes: craftsmen 92 to 99 cents, tradesmen 85 to 87 cents, tradesmen's helpers 50 to 82 cents, operators 72 to 81 cents, operators' helpers 60 to 72 cents, labourers 47 to 60 cents. Vacations with pay are granted in accordance with the plan approved by the Board.

Transportation and Public Utilities: Water Transportation

VANCOUVER, B.C.—SHIPPING FEDERATION OF BRITISH COLUMBIA AND BURRARD COASTWISE LONGSHOREMEN'S ASSOCIATION.

This agreement which applies to the loading and discharging in the harbour of Vancouver, of coastwise vessels which ply between the ports in British Columbia, Puget Sound and Alaska, is to be in effect from June 8, 1944, to June 7, 1945, and thereafter from year to year, subject to notice. Preference in employment to be given to union members, if available. Longshoremen shall no longer be eligible for employment when they cease to be members of the union.

Hours: straight time is all time between 8 a.m. and 5 p.m. Monday to Friday inclusive and between 8 a.m. and 1 p.m. Saturday; overtime rates are payable for all other hours and for all work on Sundays and holidays. Wages: for double winch drivers $1.10 for straight time and $1.47 for overtime; for dock truckers on cement and for all other labour $1 for straight time and $1.33 for overtime. For work through meal hours, time and one third until relieved.

A Labour Relation Committee to be established for the settlement of disputes and to deal with other matters of mutual concern.

Collective Agreement Act, Quebec

Recent Proceedings under the Act

IN Quebec, the Collective Agreement Act provides that where a collective agreement has been entered into by an organization of employees and one or more employers or associations of employers either side may apply to the provincial Minister of Labour to have the terms of the agreement which concern wages, hours of labour, apprenticeship and certain other conditions made binding throughout the province or within a certain district on all employers and employees in the trade or industry covered by the agreement. Notice of such application is published and thirty days allowed for the filing of objections, after which an Order in Council may be passed granting the application, with or without changes as considered advisable by the Minister. The Order in Council may be amended or revoked in the same manner. Each agreement is administered and enforced by a joint committee of the parties. Further information concerning this legislation is given in the LABOUR GAZETTE, January, 1943, page 86. Proceedings under this Act and earlier legislation have been noted in the LABOUR GAZETTE monthly since June, 1934.

Recent proceedings under the act include the amendment of nine agreements, all of which are noted below. Requests for a new agreement for retail stores at Windsor, and

for the amendment of the agreement for barbers and hairdressers at Montreal were published in the *Quebec Official Gazette,* July 8. Requests for amendments of agreements for the paint industry in the province and for bakers in Montreal were gazetted July 15. Requests for new agreements for the linoleum industry in the province, and for hospital employees at Sherbrooke were also gazetted July 15. Requests for new agreements for can and metal utensil manufacturing in the province and for hospital employees in Quebec were gazetted July 22. A request for the amendment of the building trades agreement at Sherbrooke was published in the *Quebec Official Gazette* July 29. Requests for a new agreement for retail stores at St. Johns and for the amendment of the agreement for barbers and hairdressers at Joliette were also gazetted July 29.

In addition, Orders in Council were published in the *Quebec Official Gazette* during July approving or amending the constitution and by-laws of certain joint committees and others approving the levy of assessment on the parties.

Manufacturing: Fur and Leather Products

Fur Manufacturing Industry (Wholesale), Montreal

An Order in Council, dated July 19, and gazetted July 29, extends the term of this agreement (L.G. Sept., 1940, p. 970; Jan., 1943, p. 87; May 1944, p. 637) to September 1, 1944.

Tannery Industry, Province of Quebec

An Order in Council dated July 19, and gazetted July 29, amends the previous Orders in Council for these trades, (L.G. Mar. 1940, p. 282; Feb., 1941, p. 183; Aug., p. 1008; Oct., p. 1313; Mar., 1942, p. 353, Sept., p. 1097; Dec., p. 1490; Apr., 1943, p. 489, Oct., p. 1381; Mar., 1944, p. 359, June, p. 753.)

Hourly wage rates including cost of living bonus: all stationary enginemen and maintenance men (millwrights), watchmen who also work in the manufacturing of leather, as well as at least 60 per cent of all other male workers and 60 per cent of female workers in the industry to receive 52½ cents in Zone I, 49 cents in Zone II and 43½ cents in Zone III; not more than 25 per cent of the male workers and 25 per cent of the female workers to receive 41½ cents in Zone I, 39½ cents in Zone II and 34 cents in Zone III; not more than 15 per cent of the male workers and 15 per cent of the female workers to receive 30½ cents in Zones I and II and 26 cents in Zone III. Vacation: one week with pay after one year's continuous service. Vacation pay should not be allowed for vacation not taken.

Manufacturing: Textiles and Clothing

Men's and Boys' Clothing Industry, Province of Quebec

An Order in Council, dated June 27, and gazetted July 8, extends the time of the previous Orders in Council for this industry (L. G. Dec., 1937, p. 1385; Dec., 1939, p. 1279; Nov., 1940, p. 1202; Aug., 1941, p. 1008, Sept., p. 1150; Mar. 1942, p. 353) to August 1, 1944.

Another Order in Council, dated July 19, and gazetted July 29, amends the previous Orders in Council for this industry. The term of the agreement is extended to July 1, 1945, and thereafter from year to year subject to notice.

(The above rates are a 5 per cent increase over those rates in effect June, 1941, and a 25 per cent increase over those in effect Dec., 1937.) Piece rates are also increased by the same percentage.

Vacation: one week with pay for employees with one year's service.

Manufacturing: Printing and Publishing

PRINTING TRADES, MONTREAL

An Order in Council, dated June 23, and gazetted July 8, extends the term of this agreement (L.G. May, 1944, p. 637, and previous issues) to September 30, 1944.

Manufacturing: Metal Products

CLOCKMAKERS, MONTREAL

An Order in Council, dated July 19, and gazetted July 29, amends the previous Order in Council for this trade (L.G. Nov., 1943, p. 1530.) This amendment does not affect the summary already given.

Construction

BUILDING TRADES, QUEBEC CITY AND DISTRICT

An Order in Council, dated June 28, and gazetted July 8, amends the previous Orders in Council for this industry (L.G., Aug., 1941, p. 1009; Sept., 1942, p. 1097; Oct., p. 1209; Feb., 1943, p. 220; Feb., 1944, p. 199).

Hourly wage rates now include the cost of living bonus. There is a general wage increase of 15 cents over the previous basic wage schedule for all trades excepting contractors doing personal services whose rates remain the same. For structural steel, tank and other plate work and the installation of portable boilers and tanks, the minimum rate is $1, except the installation of portable tanks and boilers under two tons in weight for which the minimum rate is 70 cents. For maintenance men outside Zone I, qualified workmen shall receive $25 per week and unqualified workmen (labourers) $21. Painters' rates on structural steel are increased to 85 cents, structural iron workers to $1, boilermakers to $1.

Apprentices: one apprentice to seven structural iron workers.

BUILDING TRADES, VAL D'OR AND AMOS

An Order in Council, dated June 28, and gazetted July 15, amends the previous Orders in Council for this industry (L.G. June, 1941, p. 705; Oct., p. 1315, Dec., p. 1573; Mar., 1942, p. 353; Feb., 1943, p. 220; Mar., 1944, p. 359, June, p. 753.)

Hourly wage rates now include the cost of living bonus. There is a 5-cent increase in the hourly rates, a $2.40 increase in the weekly rates over rates published in the LABOUR GAZETTE, Oct. 1941, p. 1315.

Trade

RETAIL STORES, QUEBEC

An Order in Council, dated June 23, and gazetted July 8, amends the previous Orders in Council for this industry (L.G. April, 1943, p. 490 and previous issues as there noted.)

Weekly wage rates including cost of living bonus: 60 per cent of male clerks, $25.60; 25 per cent of male clerks, $20.60; 15 per cent, $12.60; for female clerks, 60 per cent at $13.62, 25 per cent at $11.37, 15 per cent at $8.58; accountant $29.60, assistant accountant (male) $22.60; assistant accountant (female) $14.21; collector (on the road) $24.60; apprentice tailors and dressmakers $9.60 in first year to $19.60 in fourth year; skilled tailor and dressmaker with 5 years' experience $25.60; apprentice milliner-seamstress from $5.92 in first year to $11.84 in fourth year; skilled milliner, seamstress, (woman with 5 years' experience) $13.62; tradesmen $25.60 to $27.60, trades apprentices and general work service man $9.47 to $20.60; watchmen $22.60.

Industrial Standards Acts, Etc.

Schedules of Wages and Hours Recently Approved by Provincial Orders in Council in Ontario and Alberta

IN six provines—Ontario, Alberta, Nova Scotia, Saskatchewan, New Brunswick and Manitoba—legislation provides that, following a petition from representatives of employers or employees in any (or specified) industries, the provincial Minister charged with the administration of the Act may himself, or through a government official delegated by him, call a conference of representatives of employers and employees. This conference is for the purpose of investigating and considering the conditions of labour in the industry and of negotiating minimum rates of wages and maximum hours of work. A schedule of wages and hours of labour drawn up at such a conference, if the Minister considers that it has been agreed to by a proper and sufficient representation of employers and employees, may on his recommendation be made binding by Order in Council in all the zones designated by the Minister. The Minister may also establish an advisory committee for every zone to which a schedule applies to assist in carrying out the provisions of the Act and the regulations. References to the summaries of these Acts and to amendments to them are given in the LABOUR GAZETTE, October, 1940, page 1077. Schedules of wages and hours recently made binding by Orders in Council under these acts are summarized below.

Ontario

Manufacturing: Miscellaneous Wood Products

HARD FURNITURE INDUSTRY, PROVINCE OF ONTARIO

An Order in Council, dated May 2, and gazetted May 13, makes binding the terms of a new schedule for this industry throughout the province, from March 30, 1944, to March 30, 1945.

Hours: 8½ per day, 4½ on Saturdays, a 47 hour week; overtime and work on holidays is payable at time and one half. The Advisory Committee may permit overtime work on the production of church, theatre and school furniture at straight time.

The number of employees who have had less than 4 years' experience in the industry and who are either under 21 years of age or were under 21 years when they commenced work in the industry, together with all female employees, shall not exceed 20 per cent of the total number of employees in a plant (or 25 per cent in the case of plants more than 50 per cent of whose production consists of all wood chairs). The minimum hourly rates for this class of employees are 25 cents during first year of employment, 28 cents during second year, 31 cents during third year, 34 cents during fourth year.

For all other employees, the province is divided into two zones: the first zone consisting of the city of Toronto and the counties of York, Peel, Wentworth, Halton, Lincoln, Welland, Haldimand, Norfolk, Brant, Oxford and parts of the counties of Wellington, Waterloo, Perth, Middlesex and Elgin; in this zone the minimum average rates in each plant for these employees is 60 cents and the minimum rate 53 cents. The second zone consists of the rest of the province and the minimum average rate in each plant for these employees is 58 cents and the minimum rate 51 cents. In computing the average rate the wages paid to superintendent, manager and foreman and to any handicapped person who has been granted a special wage rate are not considered.

If any employer fails to maintain the average rates for his plant or exceeds the specified proportion of the lower paid group, then the minimum rate for each employee in the plant shall be the above minimum average rate for that plant.

Special rates may be established by the Advisory Committee for any handicapped employee.

Persons employed on any shift other than the regular day shift shall be paid a premium of 5 cents per hour except when working on overtime.

Construction

CARPENTERS, BROCKVILLE.

An Order in Council, dated June 16, and gazetted June 24, makes binding the terms of a schedule for carpenters in the town of Brockville, and adjacent district. The schedule is to be in effect from May 17, 1944, to March 30, 1945.

Hours: 8 per day, 4 on Saturdays, a 44-hour week. Overtime is payable at $1.35 per hour for the first three hours and $1.80 thereafter. For work on night shifts, 8 hours' pay for 7 hours' work.

The minimum wage rate for carpenters is 90 cents per hour. The Advisory Committee may fix a special minimum rate for any handicapped employee.

Alberta

Service: Business and Personal

BARBERS, CALGARY.

An Order in Council, dated May 2, and gazetted May 15, makes binding the terms of a schedule for barbers in the city of Calgary, to be in effect from May 25, 1944 to May 24, 1945 or thereafter during pleasure.

Hours: a minimum of 4 hours in a day; a maximum of 9 hours per day, 49 per week; each employee to be allowed one hour per day for lunch; shops close at 1 p.m. on Wednesdays. Wages: for full time employees, 60 per cent of total takings, with a guarantee of $20 per week; for hourly paid employees, 50 cents per hour with a minimum payment for 4 consecutive hours in every day employed; for persons employed by the day, 60 per cent of total takings with a guarantee of $3.50 per day ($5 on Saturdays); for apprentices, 60 per cent of total takings with a guarantee of $10 per week. Not more than one apprentice to a barber shop. A schedule of minimum charges is set.

Canadian Vocational Training

Increase in Enrolment of Ex-Service Men and Women—Supervisory Training in Civil Service

CANADIAN Vocational Training provides the following types of training:—

(1) Pre-employment classes in vocational schools for men and women about to enter war industry;

(2) Part-time classes, principally for the upgrading of persons already employed;

(3) Training plant schools;

(4) Special classes for foremen and supervisors;

(5) Training of enlisted men as tradesmen for the Army, Navy and R.C.A.F.;

(6) Rehabilitation training for persons discharged from the Armed Forces in the present war and referred for training by the Department of Pensions and National Health;

(7) Assistance to certain categories of university students whose services are needed in connection with the war effort.

Canadian Vocational Training is carried on under agreements made by the Dominion Government with each province. The administration is decentralized with a Regional Director in each province. Training is given in technical schools, special training centres and in industrial plants. The provinces and municipalities supply the shop facilities of the technical schools in the program free of charge. Provincial Governments also pay certain administrative costs and share with the Dominion in the cost of machinery and equipment purchases. All other costs are paid by the Dominion with funds from the War Appropriation.

From its inception up to June 30, 1944, the gross enrolment under Canadian Vocational has been as follows:

Training for Industry	226,130
Army Tradesmen	42,452
Navy Tradesmen	8,042
R.C.A.F. Tradesmen	65,108
Rehabilitation (discharged persons from the forces)	3,745
Students	5,373
Total	350,850

The gross enrolment in all types of classes on June 30 was 6,075 which constitutes the lowest figure during the operation of the program. Of this enrolment 3,417 were tradesmen from the Army, Navy and Air Force. Very few full-time pre-employment classes for industry were carried on during the month. Out of the total of 132 plant schools that had been approved up to June 30, 1944, 34 were still operating, the others had all met their requirements and had suspended operations.

Rehabilitation Training

The enrolment of ex-service men and women taking vocational training showed a slight increase during the month. The procedure adopted for placing individuals for training in industrial establishments has become better established and is working more smoothly, although the numbers involved are still very small. The closing of the schools operated to train tradesmen for the R.C.A.F. has permitted the conversion of these centres to rehabilitation training. The necessary alterations are being made and equipment is being installed. Arrangements have been completed for Canadian Vocational Training to take over the premises on the grounds of the Normal School in Toronto, formerly carried on by the R.C.A.F. as No. 6 I.T.S. It is expected to have this centre operating early in the fall. The training camp formerly carried on by the Army at Grand Prairie, Alberta, has also been made available for rehabilitation training, and is being converted to that purpose.

Supervisory Training

The Canadian Vocational Training Branch of the Department of Labour has undertaken to organize and set up training facilities in each department of the Dominion Civil Service, to familiarize the supervisory staffs with their five responsibilities:

I. Knowledge of the work
II. Knowledge of responsibilities
III. Skill in improving methods
IV. Skill in leading
V. Skill in instructing

I. *Knowledge of the work* refers to the kind of information which makes your business or job different from all other businesses or jobs.

II. *Knowledge of responsibilities* refers to particular department situations regarding

(1) Trainees in Part-time Classes consist largely of employed persons who are being given training at the request of employers in war production, who wish to up-grade their employees.

(2) Includes those graduates, who, though actually placed prior to June 30, 1944, were not so reported until after June 1, 1944.

[1] Includes graduates from previous month's classes who were not reported placed until after June 1, 1944.

—policies, regulations, rules, schedules and inter-departmental relationships. These are different in every department or company, hence this knowledge of responsibilities must be supplied locally. This is accomplished through the course—Job Relations Training, Series I.

III. *Skill in improving methods* deals with making the best use of the manpower, materials and equipment by having supervisors study each operation in order to combine, rearrange, and simplify details of the job. This skill is taught in Job Methods Training Course.

IV. *Skill in leading* helps the supervisor to improve his ability in working with people. These are basic principles that when applied day in and day out will tend to keep the relations smooth and problems from arising. This is accomplished through the course—Job Relations Training, Series II.

V. *Skill in instructing* is concerned with helping supervisors develop a well trained work force to have less faulty work, re-work, fewer accidents and people thoroughly understanding their jobs. This skill is practised in Job Instruction Sessions.

Canadian Vocational Training undertook this program as of January 3 of this year, and since that date has organized twelve departments with a staff of thirty trainers. To date, approximately 1,700 supervisors have been trained, and the courses are being received with a great deal of enthusiasm, and the general opinion is that this training should have been made available sooner. Quite a number of departments are reporting improved employee-employer relations and are very pleased with the increased efficiency evidenced in their staffs, due to these training facilities.

Occupational Hazards for Women in Wartime

ACCIDENTS occurring to women increased in the United States, according to a bulletin issued by the Women's Bureau of the U.S. Department of Labour. In Britain, the Chief Factory Inspector for the United Kingdom reported an increase of 90 per cent in the accident rate per 1,000 women employed in 1941 as compared with 1938. The large number of women in industry part-time has made it impossible to estimate the accident rate since 1941. Although most States do not compile injury figures separately for women, those which have, show a large increase in the number of accidents in the past year or two. The number of accidents per 1,000 women employed is not given but there is sufficient information to indicate the seriousness of the problem.

Measures recommended to cope with accident and health problems include safety education for the great number of women without previous industrial experience; clothing rules which the employees have helped to formulate and the purpose of which they understand; adaptation of the working environment to women's shorter reach, smaller hands, shorter height, and inability to stand constantly or lift heavy loads without serious consequences; provision where there is exposure to harmful and poisonous substances of protective equipment, suitable washing facilities, and devices to remove gas, fumes and dust from the air; periodic physical examinations; special attention to women working in extreme heat or cold and to lighting for women doing fine work.

Special problems of control have arisen as a result of the war. Among these are the lead hazard due to restriction on the use of tin and the consequent use of a larger amount of lead in solder, and the subcontracting of radium painting to small shops.

Increased hours, short lunch periods, pressure for production, overcrowding, makeshift washing facilities and too little time for washing are all war factors which tend to lower resistance to occupational disease, so that it becomes doubtful whether maximum concentrations of fumes and dusts in the air considered safe in peace time are still applicable.

The increased number of women welders raises special problems. Protection from fumes is essential since the metal to be welded may be painted with lead paint, and the coating on the rods to be welded may be of various materials, like aluminum oxide, calcium, silicon dioxide, manganese or carbon dioxide and little is known about the toxicity of these coatings when volatilized. Welding on stainless steel is especially dangerous. Clothing must be designed to offer protection from welding burns. The pamphlet states that, contrary to widespread belief, exposure to arc welding has no harmful effects on the reproductive organs, provided there is no other hazard present such as lead or other heavy metal. The increasing use of X-ray in industry makes it important that machines be sufficiently guarded and protective equipment be provided for the operator.

Activities of Unemployment Insurance Commission

Statistical Analysis of Operations for June—Claims for Benefit—Insurance Registration—The Fund—On-the-Job Staff Training

DURING June 3,226 applications for Unemployment Insurance benefit were filed in the local offices of the Unemployment Insurance Commission. This compares with 4,654 filed during May this year and 1,772 during June, 1943. The number of claims continues to decline each month, as is expected during this season of the year, but each monthly total remains approximately double the number for the corresponding month of last year.

A total of 4,707 persons (3,502 males and 1,205 females) signed the live unemployment register during the last week of June, whereas 7,329 (5,490 males and 1,839 females) signed during the last week in May. This indicates that the total on benefit and claiming benefit declined, during the period, to a greater extent than did the number of claimants.

The number of persons considered entitled to benefit during June was 2,276 compared with 4,421 during May and 1,390 in June of last year. Those considered not entitled to benefit numbered 881 in June, 1,057 in May and 388 in June last year.

Benefit was paid during June to 7,983 persons, 2,733 of whom commenced receiving it during that month. In May, benefit was paid to 14,095 persons of whom 5,223 commenced receiving it during the month, while in June of last year 2,729 persons received benefit, 1,096 of whom commenced receiving it in that month. Those to whom benefit was paid received a total of $247,891 in June for 128,922 compensated unemployed days, $473,709 for 240,232 days in May and $66,307 for 36,040 days during June last year.

The average duration of the unemployment compensated was 16·1 days in June as against 17·0 days in May and 13·2 days in June, 1943. The average amount paid for beneficiary was $31.05 during June, $33.61 during May and $24.30 during June last year. The average amount paid per compensated day of unemployment was $1.92 in June, $1.97 in May and $1.84 last June.

Tables 3 and 5 provide an analysis by provinces.

Insurance Registrations

Reports received from Local Offices of the Unemployment Insurance Commission showed that as at July 31, 1944, 2,542,883 employees have been contributors to the fund since April 1, 1944, an increase of 337,127 since the commencement of the current fiscal year. Of this increase, 200,373 represented new entrants to insurable employment and 136,754 resumed insurable employment since April 1.

As at July 31, 1944, 135,810 employers were registered as having insurable employees, an increase of 5,799 from June 30, 1944. This increase is mainly due to the opening of summer resorts and general summer seasonal business.

Registration of employers and employees as at July 31, 1944, by regions follows:—

TABLE I

The column "Interest on Investments and Profit on Sale of Securities" represents:—
(a) Interest received on due dates of the various Government Bonds, with proper adjustments being made at the end of each year for interest accrued and amortization charges.
(b) Profit on sales of securities taken into account at the end of each year only.

The "Miscellaneous" column includes the following:—

Penalties	$ 2,236 78
Contributions in respect of services in the armed forces	154,648 43
Miscellaneous	1,543 91
	$ 158,429 42

On-the-Job Training for Staffs of Employment and Selective Service Offices

Staff training as a continuing function was inaugurated in the local Employment and Selective Service offices of the Unemployment Insurance Commission a little over a year ago. Since that time steady progress has been made.

Training courses are being prepared to cover progressively the various activities conducted in these offices. These include courses on National Selective Service Civilian Regulations; the procedure in connection with the paying of supplementary allowances to those entitled to it by reason of compulsory transfer, etc.; the technique of interviewing applicants for employment and of taking claims for benefit. When the principle of self-registration by applicants at local offices was recently adopted, intensive training was conducted for the staffs concerned prior to the installation of this new method.

Instruction material is prepared in half-hour units to fit in with the policy adopted in most local offices of a half-hour of staff training per day. This training usually takes place the first thing in the morning. Questionnaires on each subject are prepared to test the knowledge and skill acquired.

Supervisory personnel have been trained in Job Instruction and Job Methods. Selected members from the staffs of offices attended schools conducted by the Regional Staff Training Advisers at which they were taught tested procedures for passing on information to those under their supervision. Obviously many of the supervisory personnel would be people with no specific training in the art of instructing others and the Job Instructor Training, as sponsored by the Vocational Training Branch of the Labour Department, has proven beneficial. The same applies to the Job Methods Training given the personnel responsible for setting up methods and procedures in their work. Growing out of this Job Methods Training, proposals for improvements in methods are being received at Head Office where machinery has been set up to study and evaluate them.

There is every reason to believe that both induction training and on-the-job training of staff yields dividends and there is no question of whether time spent on staff training is warranted—it is definitely desirable.

Accidents to Longshoremen in the United States

In a bulletin published by the U.S. Department of Labour entitled, "Injuries and Accident Causes in the Longshore Industry, 1942," it is pointed out that more than 138 longshoremen experienced disabling injuries in the course of every million man-hours of longshore work during 1942. No other industry for which injury-frequency information is available had a record approaching this figure. Logging held the second highest place with 89·6 disabling injuries during the same period. The bulletin states that in 1942 the chances for an individual longshoreman were approximately 1 in 560 that he would be killed or completely disabled for life, 1 in 48 that he would experience a permanent physical impairment, and 1 in 4 that he would lose time owing to a temporary injury.

The total number of disabling injuries for dockmen and holdmen in 258 stevedoring establishments during 1942 was 528, and 1,020 respectively; while permanent partial disability for dockmen, hand truckers and holdmen were 53, 71 and 87.

Safety codes for New York Atlantic Shipping and for the Pacific Coast were drawn up in 1939 and 1929 respectively, by the Maritime Association of the Port of New York and the Pacific Coast Marine Associations' Accident Prevention Bureau. The application of the Atlantic code was purely voluntary, however, and was accepted by comparatively few offices, while the 1934 coast-wide strike in the Pacific longshore industry interfered with work on the Pacific code. Differences of opinion between employers and union leaders in regard to the interpretation of the code have so far prevented its adoption. Both codes are printed in appendix B of the bulletin.

Safety shoes, gloves, aprons, goggles and hard hats will not prevent accidents, but their use would prevent many resulting injuries. Casual employment for short periods and continuous pressure for speed have so far prevented adequate instruction in safety and supervision of safety devices; but these difficulties differ only in degree from those in other industries.

Rehabilitation

Employment for Discharged Persons

Plans for Rehabilitation of Members of Armed Forces in Canada

WHEN civilians join the Canadian Armed Forces special arrangements exist for showing them the ways of the particular Service which they join, and for generally softening the impact of the change to military status. When men and women are being discharged from the Armed Forces it is essential that something of a similar nature be provided. The persons concerned may have changed as a result of military service, and the communities to which they return almost invariably have changed.

This preparation for re-entry into civilian life commences in the Services. The Navy, Army and Air Force are all making arrangements for assisting those who are about to be discharged in the planning of their civilian careers. Then the Department of Pensions and National Health interviews all such persons and its representatives explain the provisions which have been made by the Government for the rehabilitation of discharged men and women. Finally, the Department of Labour, through the offices of the Unemployment Insurance Commission, is prepared to place in suitable employment all those who want jobs and are ready to work. In order that this phase of placement activities shall receive special attention, a Veterans Placement Adviser has been appointed at the Head Office of the Commission. A similar appointment has already been made at the Head Office of the Ontario Region and a Veterans Placement Adviser will be appointed to each of the other regions in the near future. The job of the official at Head Office consists partly of working out plans and procedures for ensuring that suitable jobs are provided for all persons discharged from the Navy, Army and Air Force who are ready to go to work.

The Department of Pensions and National Health is responsible for rehabilitation generally. Its functions include recommending people for vocational training, educational training, grants under the Veterans Land Act and generally controlling the various benefits which have been provided by the Government for persons discharged from the Armed Forces. Its officials also advise and assist in the placement of handicapped veterans and generally work with Citizens' Committees in order to ensure that every opportunity for employment is given to discharged persons. The offices of the Unemployment Insurance Commission are responsible for placing the discharged persons in suitable jobs and also for the administration of the Reinstatement in Civil Employment Act.

A study of the discharges which have been carried out in recent months indicates that approximately 50 per cent of the personnel at present being discharged are returning to their former employment or are self-employed. In effect, this means that approximately half of the people being discharged do not require any particular service from any Government department. Of the remainder, from 10 to 15 per cent require further medical treatment, take vocational or educational training, settle themselves on small holdings or take advantage of the provisions of the Veterans Land Act. This leaves from 35 to 40 per cent who want jobs. It is with these that the Unemployment Insurance Commission is directly concerned.

Employment Procedure

In order to insure that the discharged persons who want jobs are suitably placed, the Employment and Selective Service Office at each point where military discharges are carried out has one or more officials stationed in the District Depot. These officials interview persons who are being discharged and obtain full particulars of the capabilities and desires of those who wish to obtain employment. Incidentally, National Registration is carried out by the official from the Employment and Selective Service Office in accordance with arrangements which were approved by the Chief Registrar for Canada in order to obviate the necessity of discharged personnel going to a Post Office to obtain National Registration Certificates.

At the conclusion of the interview, the dischargee is given an introduction to the

Manager of the Employment and Selective Service Office nearest to the place where he intends to take up residence, and a form setting forth his particulars is forwarded to that office by mail. As a result of this procedure, the Manager of the office concerned will have information in advance about the arrival of the discharged person and will be able to plan tentatively for his employment. Somewhat similar arrangements are made for the handling of discharged women and personnel of the Navy and R.C.A.F. In all these cases the numbers being discharged at any point are comparatively small, and it is usually not necessary to have an official stationed at the office where discharges are being carried out. Frequently, the personnel concerned are brought to the local office of the Employment and Selective Service and interviewed there.

In the offices of the Employment and Selective Service it has been found desirable to provide special facilities for handling discharged persons. To meet this need, Armed Forces Registration Units have been set up. In actual fact the Units will seldom consist of more than one person, and in the smaller offices armed forces registration will be carried out as a part-time duty by one designated person in each office. These Units have the duty of ensuring that every man or woman discharged from the Armed Forces who reports to an Employment Office is given special attention in securing employment. A special card is prepared for each such person as well as an entry in a journal. The journal constitutes a ready reference and shows at once whether or not persons have been placed. Each person is followed up until placed in employment which it is apparent that he or she can retain. This arrangement meets the need for special treatment to persons who have been discharged from the Services in the same way as these persons received special treatment when they joined the Armed Forces.

Plans Made Carefully

The procedure which has been outlined above was decided upon after thorough discussion and study. It had been felt by some that separate offices should be provided for the placement of discharged persons. However, it is considered that the existing arrangements are more satisfactory in that they place all the facilities of the Employment Offices at the disposal of discharged persons, with the added advantage of providing a special follow-up to insure that such persons are satisfactorily placed. Until the present system was put into effect, each office had worked out its own procedure for the placement of discharged persons. The best features of these arrangements were collected and consolidated into the instructions which are now in effect. Present indications are that these instructions will produce satisfactory results and it is anticipated that the Employment and Selective Service Offices throughout Canada will be organized satisfactorily to handle the employment problem which will come during the period of adjustment after the capitulation of Germany and Japan.

Rehabilitation of Ex-Service Personnel in Australia

THE return to civil life of men discharged from the Australian armed services is creating some problems for the Directorate of Manpower of the Commonwealth. As a similar situation confronts Canada the experience of Australia may be of interest to Canadian employers and workers.

It is stated in a recent issue of the *Manpower Review,* which is prepared and issued by the Director-General of Manpower in Australia, that "since the commencement of the war, tens of thousands of servicemen have been discharged from the defence forces." During recent months "the number of discharges . . . . has been increasing to an extent which warranted the establishment of a separate section in the Manpower Directorate to deal with their re-establishment in civil employment . . . ." Taking a long-term view the Commonwealth authorities are striving to create a technique in handling the problem that will be capable of adaptation when the time for general demobilization arrives. Of even greater importance than administrative machinery, it is asserted that "the all-important problem is to attune the rate of demobilization to the rate of absorption."

Agencies Concerned with Re-establishment

A number of Commonwealth agencies have been charged with the responsibility for particular phases of re-establishment. First of all, the Repatriation Commission, with its specialized experience acquired since it was set up in 1920, has been made responsible for the determination and payment of pensions, medical and psychiatric treatment, provision

of artificial aids, sustenance payments during convalescence and pending placement in employment, advances for the establishment of businesses, the education of soldiers' children, etc.

In the second place, the Manpower Directorate is the placement authority under the Defence Power. It is stated that this will "no doubt emerge in the post-war period in the form of a Commonwealth Employment Service."

Thirdly, the Industrial Training Division of the Department of Labour and National Service will be the controlling authority for vocational and industrial training.

Fourthly, the Universities' Commission "has a charter enabling it to control university and professional training and to administer a system of subsidies payable to students selected to proceed to a university and other approved courses."

In addition, Rehabilitation Sections have been established by the army, the navy and the air force.

"The Ministry of Postwar Reconstruction has been entrusted with the responsibility for over-all planning of those measures required to deal with the re-establishment of ex-service personnel. Its functions, of course, embrace a very wide scope of planning and co-ordination throughout the gamut of governmental activities and control in the post-war set-up of the Commonwealth." To deal with the most important aspects of rehabilitation "there have been established a number of representative inter-departmental committees responsible to the Department of Post-war Reconstruction, the chief of which are the demobilization committee, the re-establishment and re-employment committee, and the reconstruction training committee". The personnel and the function of these committees are outlined on the basis of past and present experience in handling men discharged from the services and with a view to meeting the problems that will probably arise when the time comes for general demobilization.

Labour for Veterans' Hospitals in Canada

CONTRACTORS who are now working on veterans' hospitals in Canada are to be given top priority on requests for workers on construction.

Building activity in the vicinity of veterans' hospitals now under construction may be halted, if necessary, to provide labour for the hospital contractors.

The Director of National Selective Service, Mr. Arthur MacNamara has ruled that hospitals for returned military personnel are to be given absolute priority on the services of bricklayers, carpenters, and other construction labour. In areas where a labour shortage exists, workmen may be shifted to hospital jobs under a compulsory transfer order.

Selective Service officials state that such compulsory transfers may interfere with other building projects, and this fact should be considered by construction contractors before they take on new jobs in areas where hospitals are now being planned or built.

In a letter to local employment office managers, Mr. MacNamara stated it was imperative that hospitals intended for the care of returned men and women be completed "just as speedily as human ingenuity can accomplish the work."

Employment and Selective Service officials across Canada are now keeping in close touch with contractors and subcontractors doing work on veterans' hospitals. Additional labour will be supplied where needed—even if it becomes necessary to move workers from their home districts.

Employment and Unemployment

Summary

INFORMATION in this section regarding the employment situation in Canada is based upon reports from the following sources:

The employment situation at the beginning of June, as reported by employers.—The Dominion Bureau of Statistics receives each month reports from firms employing fifteen or more employees. These firms represent practically all industries except agriculture, fishing, hunting and highly specialized business operations.

The Bureau has been receiving these reports for many years; hence, although the figures given show considerably less than the total number of persons employed in Canada, they give a valid picture of the trend of employment in Canada over a period of years.

Industrial employment at the beginning of June showed a general advance, according to returns received from 14,603 co-operating establishments with staffs aggregating 1,821,490 men and women, as compared with 1,797,873 reported on May 1.

The index number of employment (based on the 1926 average as 100) was 180·5 as compared with 178·2 in the preceding month, but was lower than the June 1, 1943 figure of 181·2.

Information is also embodied in this article concerning payrolls which is furnished each month by the co-operating firms. The per capita average weekly wage of $31.81 showed a decrease from that of $32.26 at the beginning of May, while at June 1, 1943, the figure was $30.93.

Report on employment conditions for July.—A summary of employment conditions for the month of July has been prepared by the Research and Statistics Branch, Department of Labour, on the basis of reports received from Local Employment and Selective Service Offices across Canada. These reports describe employment conditions in the Maritime, Quebec, Ontario, Prairie and Pacific Regions.

Applications for employment; vacancies, and placements, June, 1944.—From the Employment and Selective Service Offices of the Unemployment Insurance Commission come reports showing the number of positions reported as vacant across the Dominion, together with the number of applications for employment and the number of placements effected.

Reports received from the Offices during the four-week period June 2, to June 29, 1944, showed an increase in the daily average of placements in employment when compared with the preceding five weeks and a decrease when compared with the five weeks May 28 to July 1, 1943, the changes in both instances being slight. The greatest improvements in placements under the first comparison were noted in manufacturing, trade and services and a substantial decrease was recorded in forestry and logging. Under the second comparison, all industrial groups except forestry and logging, and finance and insurance registered losses, the most pronounced being in manufacturing, and construction. During the period under review there were 230,868 vacancies reported, 207,653 applications for employment and 148,478 placements effected in regular and casual employment.

Unemployment in trade unions.—The Department of Labour receives reports from the local trade unions throughout Canada, showing the number of their members who were unemployed during the period under review.

The statistical article summing up the information contained in these reports is published quarterly in the LABOUR GAZETTE.

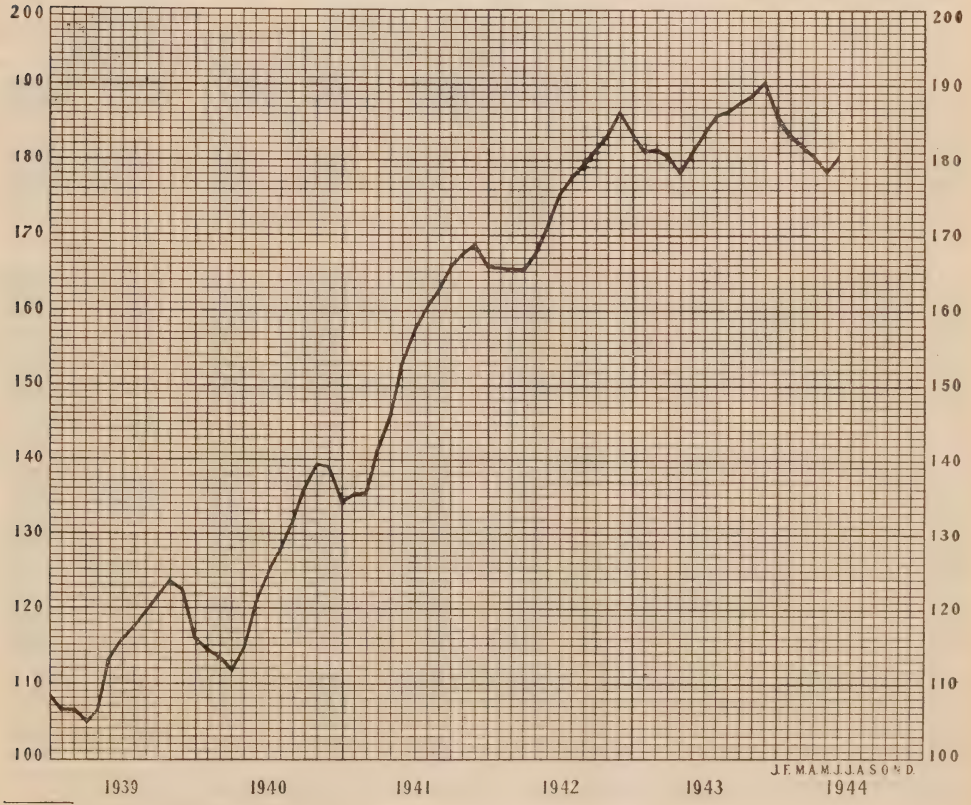
At the beginning of July the percentage of unemployment among trade unions was 0·3 in comparison with percentages of 0·9 in April and 0·6 in July, a year ago. The July figure was based on returns received from 2,206 labour organizations with a total membership of 415,707 persons.

Unemployment as reported by the Unemployment Insurance Commission.—In the article *Activities of the Unemployment Insurance Commission* appears each month a statement showing the number of claims made each month for unemployment insurance benefit.

During June, 1944, 3,226 persons made claim for benefit, as compared with 4,654 in May, and 1,772 in June, 1943.

The Employment Situation at the Beginning of June, 1944, as Reported by Employers

INDUSTRIAL employment at the beginning of June showed a general advance which was decidedly below-average for June 1 in the years since 1920. The number of persons taken on was practically the same as the number laid-off at May 1, restoring the general index to its April 1 position, which was somewhat lower than in any earlier month since May 1, 1943. The 14,603 firms co-operating in the latest survey reported a combined working force of 1,821,490 men and women. As compared with 1,797,873 in their last return, there was a gain of 23,617 workers, or 1·3 per cent.



The increase in the number in recorded employment raised the crude index* from 178·2 at May 1, to 180·5 at the beginning of June, as compared with 181·2 at June 1, 1943. Reflecting the smaller-than-average advance at the date under review, the seasonally-corrected index showed a decline, falling from 185·0 at May 1, to 180·5 at the beginning of June.

Since the first of January, there has been a reduction of 2·8 per cent in the unadjusted index. While this loss is not large, it is interesting because it is contrary to the usual trend from January 1 to June 1, there being normally, an expansion of about four per cent in general industrial employment between those two dates.

As already stated, the general increase at June 1 as compared with a month earlier was approximately equal to the contra-seasonal decrease which had been indicated at the beginning of May. However, the industrial distribution of the gains differed from that of the preceding decline, being influenced to a considerable extent by seasonal trends. As a result, the April 1 levels in many divisions

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

* Based on the 1926 average as 100 per cent.

were not restored. There was a further, but small contraction in manufacturing as a whole, most of which took place in iron and steel, non-ferrous metals and textiles. Mining was also seasonally quieter than at May 1, but the remaining non-manufacturing industries showed heightened activity. The greatest gain, of 17,750 persons, took place in construction; this increase, and those in transportation and services, were below-normal for June 1. The additions to the working forces in logging, communications and trade, on the other hand, were about average in extent.

The reduction in manufacturing was slight, involving a loss of 0·1 per cent; it is particularly noteworthy, however, because it is only the second occasion in the period since 1920 in which the trend at June 1 has been unfavourable. In the class of durable manufactured goods, there was a decline of over 3,000 workers; the non-durable goods industries reported a gain of some 1,900 men and women, while central electric stations increased their personnel by almost 600. Within the light manufacturing group, the most important advances were in animal foods.

Payrolls

The firms furnishing statistics at the beginning of June disbursed the sum of $57,950,073 in salaries and wages for services rendered in the week preceding. This aggregate was less by 0·1 per cent than that of $57,998,385 reported in the eight leading industries at the beginning of May. The decline largely resulted from the loss of working time occasioned by the observance of Victoria Day as a holiday. The per capita average fell from $32.26 at May 1, to $31.81 at the beginning of June, as compared with $30.93 at June 1, 1943, and $28.20 at June 1, 1942. In the years for which statistics of payrolls are available, reductions in the average earnings at the beginning of June have frequently been reported, partly due to

TABLE I—INDEX NUMBERS OF EMPLOYMENT AND PAYROLLS, BASED ON JUNE 1, 1941=100, TOGETHER WITH PER CAPITA WEEKLY EARNINGS

(The latest figures are subject to revision.)

June 1	118·1	146·0	31·81	132·8	166·7	32·64

the observance of the 24th of May as a statutory holiday and partly because of seasonal increases in the employment of casual workers and others at the lower rates of pay. The June 1, 1944, average was smaller than those at the beginning of March, April and May, but was otherwise the highest in the record, commencing in 1941. Between June 1, 1943, and June 1, 1944, the index number of payrolls has risen by 1·8 per cent, while that of employment has fallen by 0·4 per cent.

When the figures of employment and payrolls in financial institutions are included, the survey shows that the total number in recorded employment in the nine leading industries at June 1, was 1,886,238, as compared with 1,862,637 at the beginning of May. The weekly payroll fell from $60,109,897 at that date, to $60,066,354 at the beginning of June. The per capita average in the nine industries stood at $31.84, as compared with $32.27 at May 1, and $30.93 at June 1, 1943.

Table II summarizes the latest statistics of employment and payrolls for the leading industrial groups, the provinces and economic areas, and the eight leading industrial cities, and gives comparisons with May 1, 1944, and June 1, 1943 and 1942.

TABLE II—EMPLOYMENT AND EARNINGS

Number of Persons Employed at June 1, 1944, by the Co-operating Establishments and Aggregate and Per Capita Weekly Earnings of Such Employees, Together with Index Numbers of Employment and Payrolls as at June 1 and May 1, 1944 and June 1, 1943 Based on June 1, 1941, as 100 p.c.

(The latest figures are subject to revision)

[1] This classification comprises the following:—iron and steel, non-ferrous metals, electrical apparatus, lumber, musical instruments and clay, glass and stone products.

Table IV indicates that in the three-year period for which payroll data are now available, the number of persons in recorded employment in the eight leading industrial groups has shown an increase of 18·1 per cent, while the aggregate weekly earnings of these workers are higher by 46 per cent. Including finance, the gain in employment from June 1, 1941, to June 1, 1944, amounted to 17·6 per cent, and that in payrolls, to 45·1 per cent. The explanation previously given for the much greater rise in the salaries and wages than in the numbers employed may again be stated:—(1) the concentration of workers in the heavy manufacturing industries, where rates of pay are above the average and, in addition, there has been a considerable amount of overtime work; (2) the payment of cost-of-living bonuses to the majority of workers; the rates at which these allowances were calculated were increased on more than one occasion before their incorporation in the basic wage rates as from February 15, 1944, and (3) the progressive up-grading of employees as they gain experience in their work. In an important number of cases, higher wage-rates have also been granted.

The influence of the war has resulted in particularly marked expansion in employment and payrolls in factories, in which the rate of acceleration during the period of observation has been decidedly greater than in the non-manufacturing industries; the index of employment in the former has risen by 32·8 per cent from June 1, 1941, and that of payrolls has advanced by 66·7 per cent, proportions decidedly exceeding those elsewhere given for the eight leading industries. The factors stated above as influencing the general trends have had an even greater effect in the case of manufacturing.

In spite of recently-indicated contractions in the durable goods industries, the growth in employment and payrolls in that division has been outstandingly large in the months for which data are available; in this class, the index of employment shows a gain of 51·5 per cent, accompanied by an increase of 93·3 per cent in the salaries and wages distributed between June 1, 1941, and June 1, 1944. In the non-durable goods, the index number of employment at the date under review was higher by 16 per cent than that indicated at June 1, 1941, since when there has been an increase of 39·4 per cent in

[1] The relative weight shows the proportion of employees reported in the indicated industry to the total number of employees reported in Canada by the firms making returns at the date under review.

the payrolls disbursed by the co-operating establishments.

In regard to the marked variations in the average earnings of workers in the different industrial classes, it must again be pointed out that the sex distribution of such persons is an important factor, frequently associated with variations in the age groups. In general, the female workers tend to belong to the younger age classes, in which the earnings are naturally lower than among those of greater experience. The matter of short-time or over-time may also considerably influence the reported aggregates and averages, which likewise reflect variations in the extent to which casual labour is used; the degree of skill generally required of workers in the industry is of course also an extremely important factor.

Report on Employment Conditions for July, 1944

THE following abstract of regional summaries of reports from Employment and Selective Service Offices of the Unemployment Insurance Commission indicates that employment conditions across Canada at the end of July were as follows:

Maritime Region

Agriculture.—The haying season is at its height throughout the maritime provinces, with a resultant serious shortage of experienced farm workers. Inexperienced helpers—boys, women and children are working long hours in the fields, and with their aid it is hoped that the crop will be harvested satisfactorily, although it is estimated that it will be approximately 25 per cent under last year's yield.

Prince Edward Island is the most hard-pressed of the maritime provinces at present, with the labour shortage accentuated by the fact that in spite of the lower prices prevailing this season the fishermen who were expected to help out with the haying are sticking to their boats. In the past fortnight the Charlottetown office has made a special effort to fill some 120 orders, and as a result of compulsory transfer and direction of all applicants to the land, has succeeded in placing 84. The Summerside office reports similar difficulty in procuring much-needed assistance. Favourable weather has eased the situation somewhat, but unless outside help is available, it is feared that a large portion of the crop may not be harvested.

On the mainland the labour outlook is more encouraging, although Woodstock reports that while the haying is well advanced, through the assistance of students and girls from town, farmers in the vicinity are increasingly worried over the later potato and grain crops.

Logging.—Until the haying is completed, logging operations are practically at a standstill. However, Halifax reports that choppers are still urgently needed on the Upper Musquodoboit, and with driving operations resumed in New Brunswick contractors in the Campbellton area expect that the cut will be as good as last year, in spite of the existing shortage of loggers. In the vicinity of Newcastle the demand for pulpwood cutters is continuingly heavy, and one large operator in the Bathurst area requires an additional 225 men.

Coal Mining.—There is little change in the manpower situation in the region's coal mines. Sydney reports that the shortage of skilled miners persists, and at New Glasgow orders are on hand for 78 miners and 35 mine workers. An anticipated increase in production in Minto collieries is materializing as stripping operations proceed.

Manufacturing.—In the manufacturing field, the fish processing plants and sawmills of the region continue to make a considerable seasonal demand on the labour force, but the requirements of both industries are less than a few weeks earlier, although no easier to satisfy. The textile plants, too, are experiencing difficulty in filling their female labour requirements.

Maritime shipyards, while not so exigent in their call for workers, are still in need of additional manpower. The two large shipbuilding companies at Bridgewater have had few applicants from their orders in clearance through the Maritimes, Quebec and Ontario, and are further handicapped by the fact that many carpenters and labourers have gone home for the haying. The requirements of H.M.C. Dockyard have dropped during the past month, and about 50 skilled workmen of all types would satisfy their needs for the time being, in addition to 35 unskilled labourers at the Bedford Magazine and Naval Stores. The Halifax Shipyards, with skilled tradesmen of many kinds required for new construction, are receiving some of these from Toronto, but have been advised that the

workers expected from the Quebec region will not be available.

Construction.—Wherever construction is in progress, a definite lack of carpenters, bricklayers, painters and skilled building labourers is noted and contracts are falling behind schedule as a result. Carpenters and labourers are still required for the airport at Debert, and approximately 30 building tradesmen are needed for paving work at the naval base at Digby. In Halifax, rock drillers and labourers are called for, both for the construction of the new hospital and other projects, and carpenters and labourers are needed for the erection of the new K. of C. Service Hut, for which a further demand is expected later.

Quebec Region

Agriculture.—The concensus of report indicates that, on the whole, Quebec is suffering less than other parts of the Dominion insofar as agriculture is concerned. Haying is almost finished, except in the northerly Lake St. John district, where temporary permits of farmers in industry have been extended another 15 days. Ste. Anne de Bellevue, St. Jerome and Campbell's Bay record a shortage of farm labour which cannot be met, and Coaticook, Valleyfield and St. Hyacinthe are similarly handicapped, while the Quebec office reports that during the past fortnight more than 50 soldiers on leave have been placed on neighbouring farms.

Logging.—The continued dry weather is holding up logging operations in many parts of the region, and the dearth of necessary bushworkers is still noticeable. The exodus of agricultural workers from the logging camps is aggravating the current shortage, and some companies lack even sufficient men for necessary repairs and improvements. Chicoutimi is calling for 400 more bushmen to continue spring cutting and river improvements, Rouyn requires 170, and Quebec and LaTuque are similarly needy. In the St. Joseph d'Alma area the river drive is almost over, and a considerable number of those released are returning to the bush to cut pulpwood.

July 22 was the expiry date for the issuance of exit permits for work in the American lumber camps. Megantic reports that some 250 permits were issued from that office, another 160 were given out at Riviere du Loup and still others at Coaticook. Indications were that the American companies would fill their quotas.

Mining.—There is little new development to report in the labour situation of the region's mines. In the Rouyn area approximately 400 men are needed for the base metal mines, but only 16 for the gold operations: some 70 diamond drill runners and 76 helpers are also required for the prospecting program now being carried on. Operations in the Val d'Or district, too, are short of the necessary workers.

From Campbell's Bay comes the report of many placements in the local zinc mines during the past fortnight, and the expectation of many more being engaged in the near future, but there has been a lay-off of some proportions at the Quyon molybdenum workings. The contract for the sinking of a new shaft and the erection of a bunkhouse for some 200 men has been awarded at Asbestos: men in the company's mills have been placed on an 8-hour, 5-day week, and will be employed on the new construction on the sixth day of each week.

Manufacturing.—The Montreal office reports that all the basic manufacturing industries in the city are in great need of extra labour. There has been no improvement in the packing plant situation, and employers have been asked to study means of putting a stop to labour turnover.

The textile and garment industries throughout the province continue to carry on with a minimum of staff. Girls and experienced sewing machine operators are needed in the Farnham plants, and at Granby 52 men and 50 women are called for. Experienced workers for the silk mill at Louiseville are in great demand and, in addition to 20 women who started to work recently in the boys' clothing factory another 20 will be needed soon.

In Quebec City, the shoe factories are calling for skilled workers, and have also some vacancies for women. Some 150 women have been referred to the Arsenal during the past fortnight and another 50 are requested. In Valleyfield the cotton textile plants are working a five-day week for the summer months.

At the height of the agricultural season, the cannery at St. Hyacinthe is in full swing of pea and bean canning. Its present orders total 100 women, who will be difficult to procure, and it is probable that the demand will have to be filled by students and women wanting temporary work.

In Three Rivers employment conditions are much more encouraging than earlier in the year. A training class of 60 has been organized under the Youth Training program, to provide machine operators for a steel plant, and when these workers are ready the company will require some 200 helpers. The demand for female labour in Three Rivers has also increased greatly and it is hard to find girls of 18 and upwards to work on uniforms.

The province's shell program continues to call for a large number of workers. One plant

at Three Rivers is commencing the operations of a department for the manufacture of cartridge containers, to employ about 75 people, and another at Ste. Therese is organizing a recruiting campaign to secure 300 girls. The shipyards of the Quebec region are slowing down on their shipbuilding programs, but as yet no lay-off of employees has occurred. One lay-off is in progress at Beauharnois, where the St. Laurent Alloys and Metals, Limited, is releasing about 100 men, some of whom will be placed in the aluminum plants.

Construction.—There has been no lessening in the manpower needs of construction during the past month and the demand for building tradesmen still far exceeds the supply. In all parts of the province road and bridge building is retarded by the loss of agricultural workers, who are busy with the haying. In Montreal, building construction is unchangingly short of labour.

Ontario Region

Agriculture.—As the summer advances agriculture is increasing its already heavy demands on Ontario's labour force. In all parts of the province there is a shortage for the haying, and recourse has been taken to whatever aid may be at hand in the various localities. Farm Commando workers engaged on a part-time basis are helping out where the need is pressing, and prisoners of war, conscientious objectors and western labour are also proving invaluable. Cobourg reports that men from the factories and soldiers on furlough have been pressed into service, and some workers in Kingston industries are obtaining four to six weeks' leave to go home for the harvest.

In the fruit belt, students are hoeing, picking and carrying on other light duties, releasing more experienced agriculturists for jobs requiring greater strength and skill. In the neighbourhood of Chatham an intensive campaign is being conducted to enlist from 150 to 200 students for the huge tomato crop grown under cannery contract, and Belleville is endeavouring to secure tomato pickers from four local factories closing for holidays from August 6 to 12. The completion of cherry picking and peach thinning in the St. Catharines area has brought about a temporary slacking off on the fruit farms.

Logging.—Labour needs in the logging industry have become subordinate to those of agriculture for the time being, and many farmers have left the bush to return home for the harvest. In the vicinity of Sault Ste. Marie, paper mills at Hornepayne are calling for another 200 pulpcutters, and approximately 1,000 pulpcutters and 25 drivers are needed for another company, but little hope of procuring these loggers is entertained, in spite of every effort to fill the orders.

Mining.—No change of any moment has occurred in the labour conditions of the region's mines, which continue to suffer from an inadequate supply of miners and labourers alike.

Manufacturing.—The manufacturing industries are still seriously short of heavy labour, for foundries and implement factories alike. The call for many hundred additional workers on Canada's shell production program is similarly urgent. In Hamilton, approximately 450 women are needed for this work: all part-time requirements have been met, and straight time shifts have been agreed on for permanent employees, in order to facilitate employment expansion. At Nobel, women are being taken on at the rate of about 25 weekly on an order for 500 shell workers, and in Welland one employer requires at least another 100 female workers to fill out three shifts. In one Ingersoll plant an increased order for shell parts necessitates the employment of 60 more men and 30 women.

With the completion of the summer vacation, the demand for skilled male labour has increased in practically every manufacturing centre. The Belleville office reports that the chief bottleneck at present is the lack of foundry labourers and skilled moulders, the latter almost impossible to procure. In Brantford the demand for iron and steel workers has mounted steadily in the past fortnight, with all types of skilled tradesmen needed immediately. The large implement plants are willing to take on trainees for moulders, but are meeting with little success in obtaining labour of this sort. London and Toronto report that the manpower situation has eased somewhat, but there is a continuing demand from Kingston and New Toronto, Oshawa and St. Thomas.

The needs of the Ontario textile plants remain unfilled. Cornwall and Dunnville record an unsatisfied demand for men and women alike, while in Brantford some 55 males and 202 females are required, with placements very slow and few women available. In Hamilton the need for experienced and trainee textile employees still tops the list. Welland, Peterborough and St. Catharines share in the universal dearth of workers for the textile industry.

On July 14, the Huron County Elementary Flying Training School became Aircraft Holding Unit No. 102 and an order for some 30 to 40 civilian employees, placed with the Goderich office during the past week, is absorbing all employees unplaced after the final lay-off at the station. At Windsor the 253 male workers out of the total of 520 laid off this month by the Canadian Motor Lamp Company have all been interviewed and a large

number are already absorbed in other essential industries, while others are taking a week's vacation before accepting other jobs. Of the 377 women laid off by the company only 139 have reported in search of employment since July 18, and of these 32 have been placed, while 21 employees of the Inspection Board have been transferred to other localities.

Construction.—The general demand for construction labour continues unchanged. In almost every part of the province municipal paving contracts and local construction are being held up by the scarcity of labour of all sorts. In Brantford 100 carpenters and 25 labourers are needed for the erection of 100 dwellings under Wartime Housing, and the erection of 200 homes for soldiers' families in Windsor is handicapped by the lack of the same type of labour. New Toronto reports that only enough construction labour is available to fill about 10 per cent of the current demands, and the shortage in the Windsor area is hampering alterations of local war plants and a new addition to the Canadian Driving and Maintenance School.

Prairie Region

Agriculture.—With haying well under way except in areas affected by a recent heavy rainfall, prairie farmers are making their plans for the agricultural help which will be so greatly needed for the coming harvest. The labour outlook for that important season is not encouraging, but every effort is being made to meet the emergency and in many districts local committees are being formed and co-operative movements are on foot to organize the securing of farm workers.

In the Fort Frances area excessively heavy rains have hampered operations, retarding the placement and referral of helpers. Plans are going forward to meet the farmers' requirements and quite a number of Air Force personnel have already obtained leave to work on the various farms through the district.

Farther west, North Battleford reports that orders are piling up, and a farm labour committee has started an organized campaign for harvest helpers. Swift Current, too, has appointed local and zone secretaries. It is estimated that some 500 men wil be required in the Swift Current area alone, and Saskatoon also needs a great number to handle the hay and fodder crop, which is one of the heaviest in the history of Saskatchewan. Regina's immediate needs include 50 tractor and combine men, 8 married couples and 20 general labourers, all of whom are difficult to procure, and a similar shortage exists in other parts of the province.

The Edmonton office reports that while present orders stand at 50 farm workers, three times that number could be placed if available. Some relief has been given through the assistance of students. In the Calgary area an increase in applicants during the past fortnight has reduced live orders to 35, an unusually low total for this season, but Blairmore is still pressing in its call for haymakers and experienced irrigation men are greatly needed in the vicinity of Lethbridge.

Logging.—The manpower needs of the logging industry are reasonably well filled for the time being, and some employers report themselves so well satisfied with the services of prisoners of war in the camps that they propose to use more of them next winter if available. In the Fort Frances area driving operations for both saw logs and pulpwood are almost completed. There has been no shortage of drivers as yet, but unfilled orders for the logging and pulpwood camps remain at 300. The greatest manpower shortage, as always, exists in the Lakehead district, where 3,506 pulpcutters and other bushworkers are needed.

Coal Mining.—The shortage of manpower in the region's coal mines has not lessened during the past two weeks. Certified miners and skilled underground mine labourers are at a premium, and the necessity of releasing a considerable number on account of physical disability is increasing the need. Lethbridge, Red Deer and Edmonton are particularly exigent in their call for additional miners: all are far short of the quota required for satisfactory production.

Base Metal Mining.—Referrals to the base metal mines of the prairie region have shown a decided increase through the addition of students and school teachers on vacation. The Port Arthur office has orders for 182 muckers and all the northern gold mines are calling for labour of practically every type, but Indians are relieving the need somewhat. The Flin Flon office reports new orders during the past week for surface, mill and underground labour. A considerable number of women are working in the zinc operations in that area, thus relieving the shortage of male labour. From Fort Frances comes the report that requests from the Steep Rock Iron Mines have been greatly reduced, and operations there have reached a point where some men are being released.

Manufacturing.—There has been no noticeable abatement of the manufacturing industry's demand for heavy labour in the past month. Winnipeg, Edmonton and Calgary in particular are suffering from this labour lack.

Calgary, which reports the placing of approximately 500 students during the past fortnight (400 in high priority manufacturing and construction), states that employers are willing to accept these youths wherever the work is not too heavy for them.

In Calgary the packing plants are sufficiently staffed for the time being, and Edmonton plants, too, while still requiring extra workers, are in a much better labour position than earlier in the summer. In the latter city two large establishments, in conjunction with the War Emergency Training program, have instituted schools for training youths in the packing industry and the local office is now selecting, from the province at large, 15 young men for each plant. At Prince Albert the industry is not so fortunate, and the labour situation will probably be grave from now until the end of the harvest.

As a result of a decrease in separations during the past month, the aircraft plant at Fort William has succeeded in enlarging its payroll to 7,000 workers, and the saturation point has almost been reached in the provision of local accommodation. The specimen shell submitted by another Lakehead company has been approved by the Inspection Board, and machines and assembly lines are being cleared for production.

Construction.—Although the supply of construction labourers has been exhausted, there is no general shortage of building tradesmen throughout the prairies. Port Arthur is in greatest need of unavailable labour, and building contracts in the area face mounting shortages of job labourers. A new note in building labour is struck at Winnipeg, where one contractor is asking for two women as construction labourers on repairs.

Transportation.—Shortage of transportation labour seems to be greater in the prairie region than in any other part of the Dominion. While the demand is being partially met by students, these are not physically capable of badly-needed track maintenance labour, and there also exists a definite shortage of machinists, boilermakers and roundhouse helpers for the railways, with little prospect of procuring them. In the Port Arthur area alone there are 437 vacancies for transportation workers and Edmonton reports that orders for train gangs remain at 350. In Calgary, 26 students have been taken on as section hands, 18 women as engine wipers and another 10 as car cleaners.

Pacific Region

Agriculture.—Farm labour demands are still being satisfactorily met in British Columbia. Fruit, vegetable and orchard work is going forward in all parts of the province with the assistance of women, students, neighbouring townspeople and soldiers on short leave as well as during the evenings. Loggers idle on account of the fire hazard are also helping out, and helpers from the prairies have been brought in under the auspices of the Emergency Farm Labour Service.

In the vicinity of Chilliwack some women are working in the hop yards, and Japanese women from the district have been transferred to various agricultural jobs on farms and fruit ranches in other parts of the region, and in Ontario. Vancouver and New Westminster find the lack of dairy hands a constant problem, but some relief has been assured by placing high school boys during their vacation. There has also been a slight increase in the general demand for farm hands in the Victoria area, but no interest is shown by the type of applicants usually engaged for this sort of employment. There is also some difficulty in meeting the requirements of the small fruit growers on the Island, but no emergency exists.

Logging.—With the sole exception of the Nelson area, the logging industry throughout British Columbia is very short of every type of bushworker and clearance orders throughout the region and the prairies have brought few applicants. While Nelson, too, has still a considerable number of vacancies, the Doukhobors are returning from their haying and other farm duties.

Practically all logging operations throughout the province have been closed down temporarily on account of fire hazard, but this respite will be brief and the reopening of the camps in a short time will accentuate the labour demand. Cranbrook and Kamloops are suffering from the absence of farmers busy with the haying, and Vancouver has orders on file for approximately 1,000 bushmen, including every class of logging labour, but fallers and buckers, chokermen and riggers in particular. In the far north, Prince Rupert is also handicapped by the insufficiency of its logging manpower supply.

On Vancouver Island, Government orders have reduced operations in the Duncan area to morning shifts during the dry season, and one company has closed down several of its camps entirely, as some 50,000,000 or 60,000,000 feet of logs are in the lake awaiting cutting. At Port Alberni, where all operations are in abeyance, bushmen are being placed for the time being with the Municipal Works Department and similar projects. Victoria reports that improved weather conditions now make it possible for crews to return to the woods

but the heavy demand is only slightly relieved by the placing of students.

Sawmills.—The needs of British Columbia sawmills are correspondingly heavy. Vancouver alone reports that the pulp and sawmills in that area require 600 men, mostly in the heavy and unskilled labour category, and no skilled workers are available locally. New Westminster's already heavy demands for experienced hands have been stepped up by large orders placed locally for the manufacture of ammunition boxes. The Department of Munitions and Supply has asked for increased production, and consequently, cut-off sawyers, rip sawyers and factory resaw men are greatly needed but are unprocurable in the area.

Coal Mining.—Although certified miners can be absorbed into the coal mines of British Columbia at any time, there is no pressing labour need for the time being, except in the Courtenay area, where some 100 miners are required, and the shortage of manpower has resulted in serious depletion of coal reserves.

Base Metal Mining.—The labour demand in the base metal mines is continuingly heavy and while surface requirements are fairly well met, experienced underground workers are badly needed and difficult to obtain. Some 100 experienced and another 100 inexperienced underground workers could be used on operations at Kimberley. Although some relief has been given by transfers from the mercury mine at Pinchi Lake, the number of terminations of employment for health reasons leaves the total requirements unchanged, and the company is prepared to accept any applicants between 18 and 45 capable of passing the medical examination. Development work is on the increase in the Princeton area, with a commensurately higher number of men required, and in the Prince Rupert district a considerable demand for miners and labourers is reported.

Manufacturing.—On the whole, the manpower demands of manufacturing are not so pressing in the Pacific region as elsewhere throughout the Dominion. The Vancouver office reports a general tendency towards decrease in orders, although a steady but not excessive request for skilled and unskilled workers continues. New Westminster, too, records a levelling off in the call for tradesmen, helpers and labourers and a slight tendency towards reduction of staff. At the present time, some 417 women and 260 students are registered for factory work in New Westminster.

There is little demand for aircraft workers in Victoria plants, with the exception of replacements, but the call in the shipyards is again on an upward trend. Very few suitable applicants are available for these vacancies, and wherever possible compulsory transfer orders are being applied. While the considerable number of students engaged in the Victoria yards will be of temporary assistance, it has been necessary to place orders for all types of skilled and semi-skilled labour in clearance. Female helpers are in increased demand for H.M.C. Dockyard, which is the largest shipbuilding employer of women in the area.

A fair call for shipyard workers persists at Prince Rupert, and even farther north, the Whitehorse office reports that approximately 100 male employees are still required for the local refinery.

Construction.—The shortage of finishing carpenters, building labourers and allied tradesmen for construction has not yet been met, but the situation has eased slightly as National Defence projects near completion. At Courtenay, work on the airport is slowing down, but in the Prince Rupert area there is still a heavy demand for carpenters and building labourers for National Defence construction. Approximately 200 men are still required for the maintenance of the Alaska Highway.

Transportation.—The closing down of the logging camps in some districts has resulted in a heavy overtaxing of transportation facilities and bus drivers and railway crews are in great demand throughout the province. There is also a persistent call for track workers, and during the past week some 50 Japanese from the Hope Road project have been placed on this work, resulting in the closing of one of the Government camps in the Princeton area.

Applications for Employment; Vacancies and Placements; June, 1944

REPORTS of the Employment and Selective Service Offices of the Unemployment Insurance Commission for the four-week period June 2 to June 29, 1944, showed a negligible increase in the average daily placements when compared with the previous five-week period April 28 to June 1, 1944. The only noteworthy changes in industrial groups were gains in manufacturing and trade and a loss in forestry and logging. A slight decline from the four weeks May 28 to July 1, 1943, was recorded in the daily average of placements effected. Under this comparison reductions were noted in all industrial divisions except

forestry and logging and finance and insurance, the most substantial being in manufacturing and construction.

The accompanying chart shows the trend of employment since January, 1942, as represented by the ratios of vacancies notified and of placements effected for each 100 applications for work registered at Employment and Selective Service Offices throughout Canada. It will be seen from the graph that the trends of the curves of vacancies and placements in relation to applications took downward courses. The ratio of vacancies to each 100 applications was 111·1 during the four weeks ending June 29, in contrast with 126·7 during the previous five weeks, and 114·6 during the five-week period May 28 to July 1, 1943. The ratio of placements to each 100 applications during the period under review was 71·5 compared with 74·1 during the five weeks April 28 to June 1, 1944, and 70·9 during the five weeks ending July 1, last year.

The average number of vacancies reported daily by employers to the Employment Offices throughout Canada during the four weeks June 2 to June 29, 1944, was 9,619 in comparison with 10,407 in the preceding five weeks and 11,600 during the five weeks May 28 to July 1, a year ago. The average number of applications for employment received daily during the period under review was 8,652 compared with 8,210 in the previous period and 10,124 during the five weeks May 28 to July 1, 1943. The average number of placements made daily by the offices during the four weeks ending June 29, was 6,187, of which 6,045 were in regular employment and 142 in work of one week's duration or less, in comparison with a daily average of 6,086 during the previous four weeks. Placements during the five-week period ending July 1, 1943, averaged 7,174 daily, consisting of 7,005 in regular employment and 169 in casual work.

During the period June 2 to June 29, 1944, the offices referred 199,880 persons to employment and effected a total of 148,478 placements. Of these, the placements in regular employment numbered 145,077, of which 92,219 were of males and 52,858 females, while placements in casual work totalled 3,401. The number of vacancies reported by employers was 148,984 for males and 81,884 for females, a total of 230,868, while applications for work numbered 207,653, of which 128,801 were from males and 78,852 from females. Reports for the five weeks ending June 1, 1944, showed 312,200 positions offered, 246,306 applications for employment and 182,572 placements effected, while in the five weeks ending July 1, 1943, there were reported 336,388 vacancies, 293,597 applications and 208,032 placements in regular and casual employment.

The following table gives the placements effected by the offices each year from January, 1934, to date:

Year	Placements		
	Regular	Casual	Totals

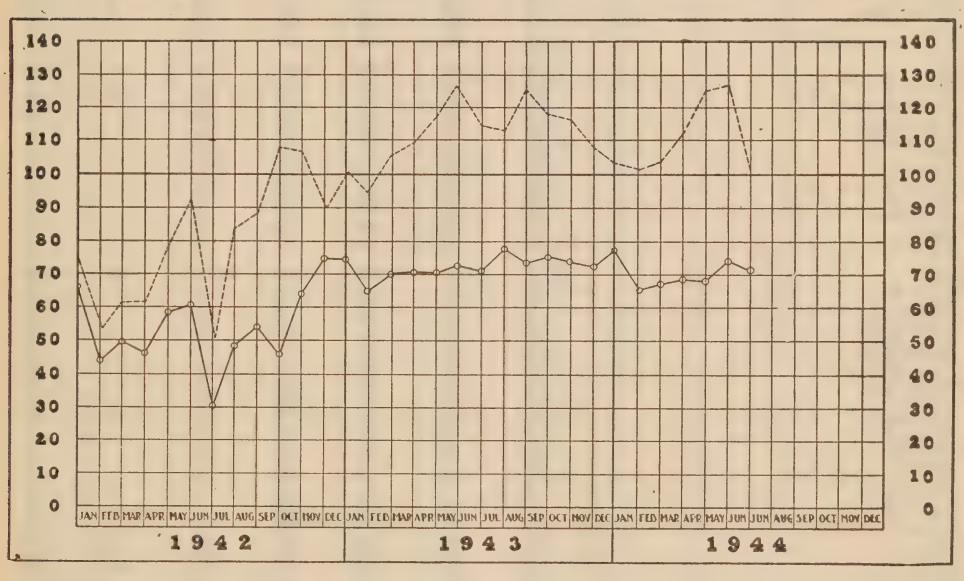
Nova Scotia and Prince Edward Island

During the four weeks ending June 29, 1944, the daily average of positions offered through Employment and Selective Service Offices in Nova Scotia and Prince Edward Island was 316, compared with 349 in the previous period and 499 during the five weeks ending July 1, last year. There was a daily average of 266 placements compared with 249 in the preceding five weeks and 301 during the period ending July 1, 1943. The decrease in the daily average of placements from the period ending July 1, last year, was greatest in construction. Of the changes in all other groups, a decline in public utilities operation and an increase in trade were the most important. Industrial divisions in which the majority of placements were effected included: manufacturing 2,557; services 1,232; trade 942; construction 750; public utilities operation 626 and mining 157. Placements in regular employment numbered 4,223 of men and 2,068 of women.



New Brunswick

Opportunities for employment at Employment Offices in New Brunswick during the period ending June 29, 1944, numbered 276 daily compared with 324 in the preceding five weeks and 280 during the period ending July 1, 1943. The average number of placements effected daily was 199 during the four weeks under review, in comparison with 174 in the previous period and 219 during the five weeks ending July 1, last year. The reduction in placements from the period ending July 1, 1943, was not large for the province as a whole under this comparison. The only changes of importance were moderate decreases in construction and public utilities operation. Placements by industrial groups numbered: manufacturing 1,699; services 732; trades 633; public utilities operation 602; forestry and logging 531, and construction 413. There were 3,283 men and 1,441 women placed in regular employment.

Quebec

There was a decrease in the average number of positions available daily at Employment Offices in the Province of Quebec during the four weeks ending June 29, there being 2,883, compared with 3,585 in the previous period and 3,730 during the five weeks ending July 1, last year. Placements, likewise, showed declines under both comparisons, the daily average being 1,721 during the period under review, as compared with 2,020 in the preceding five weeks and 1,949 during the period ending July 1, 1943. The decline in placements from the five weeks ending July 1, last year, was mainly due to a substantial decrease in manufacturing, although a fairly large loss occurred in construction. These decreases were partly offset by a large increase in forestry and logging and moderate gains in trade, public utilities operation and services. Industrial divisions in which most of the placements were effected were: manufacturing 18,667; services 5,792; construction 4,482; forestry and logging 3,975; public utilities operation 3,574; trade 3,281 and mining 920. Regular placements numbered 29,209 of men and 11,938 of women.

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

Ontario

Orders received at Employment Offices in Ontario during the four weeks under review called for an average of 3,984 workers daily compared with 4,114 in the preceding period and 4,284 during the five weeks ending July 1, 1943. Placements showed an increase in comparison with the period ending June 1, 1944, but a decrease in contrast with the five weeks ending July 1, last year. The daily average was 2,570 during the period under review, 2,255 in the previous five weeks and 2,834 during the period ending July 1, 1943. A substantial reduction in placements in manufacturing, augmented by a smaller decline in construction accounted for the loss from the five weeks ending July 1, last year under this comparison. In addition, however, trade and agriculture reported moderate decreases while gains were registered in services, forestry and logging, and public utilities operation. Placements by industrial divisions included: manufacturing 28,161; services 12,671; trade 7,360; public utilities operation 5,379; construction 3,522; forestry and logging 1,784; finance and insurance, 1,207; mining 1,045 and agriculture 562. Placements in regular employment numbered 35,640 of men and 24,949 of women.

Manitoba

Positions offered through Employment Offices in Manitoba during the period ending June 29, 1944, averaged 476 daily compared with 431 in the previous five weeks and 435 during the period ending July 1, last year.

Placements showed a daily average of 307, in contrast with 263 in the preceding period and 360 during the five weeks ending July 1, 1943. All industrial groups recorded decreases in the daily average of placements from the period ending July 1, last year. The greatest reductions were reported in services, construction, public utilities operation and manufacturing. Industries in which employment was found for more than 100 workers included: manufacturing 2,391; services 1,926; trade 1,398; public utilities operation 876; construction 389; finance and insurance 160, and mining 121. During the period under review, regular placements numbered 3,401 of men and 3,032 of women.

Saskatchewan

Employment opportunities, as indicated by orders received at Offices in Saskatchewan during the four weeks ending June 29, 1944, showed a daily average of 217, compared with 289 in the preceding period and 244 during the five weeks ending July 1, 1943. There was a daily average of 154 placements compared with 161 in the previous five weeks and 185 during the period ending July 1, last year. Moderate decreases in placements from the period ending July 1, 1943, were reported in all industrial groups, except finance and insurance, where the increase was nominal. Of the reductions reported, the largest were in construction and manufacturing. Placements by industrial divisions numbered: services 1,241; trade 798; manufacturing 672; public utilities operation 481; construction 227 and agriculture 129. There were 1,898 men and 1,518 women placed in regular employment.

Alberta

The demand for workers on a daily average as indicated by orders listed at Employment Offices in Alberta during the period ending June 29, 1944, was 425, as compared with 452 in the previous five weeks and 497 during the period ending July 1, last year. The average number of placements registered daily was 255, in comparison with 293 during the period ending June 1, and 333 in the five weeks ending July 1, 1943. Placements were less numerous in all industrial divisions than those of the period ending July 1, last year. The largest decreases were reported in construction, manufacturing, public utilities operation, services and trade. Industrial groups in which most of the placements were effected were: services 1,739; manufacturing 1,179; trade 1,035; construction 770; public utilities operation 661; mining 419, and agriculture 146. Placements in regular employment numbered 3,372 of men and 2,407 of women.

British Columbia

Orders listed at Employment Offices in British Columbia during the four weeks under review, called for a daily average of 1,042 workers, compared with 933 in the preceding period and 1,244 during the five weeks ending July 1, 1943. The average number of placements effected daily was 714, in contrast with 646 in the previous five weeks and 754 during the period ending July 1, last year. Placements under manufacturing were considerably fewer than during the five weeks ending July 1, 1943; and moderate declines were registered in construction and mining. These decreases, however, were partly offset by moderate gains in services and agriculture together with smaller advances in trade, and finance and insurance. The majority of placements recorded during the period under review, took place in the following industries: manufacturing 5,489; services 3,698; trade 2,086; construction 1,730; public utilities operation 1,527; forestry and logging 1,438; agriculture 441, and mining 405. Regular placements numbered 11,193 of men and 5,505 of women.

Quarterly Report of Employment and Selective Service Offices, March 31 to June 29, 1944

EMPLOYMENT conditions, as indicated by the work of Employment and Selective Service Offices of the Unemployment Insurance Commission during the second quarter of 1944, showed slight decreases in both vacancies and placements when compared with those reported during the corresponding quarter of 1943. Manufacturing, construction, services, finance and insurance and fishing, hunting and trapping recorded losses in both instances, the greatest reductions being in manufacturing and construction. Forestry and logging and public utilities showed gains under both comparisons. There were more placements but fewer vacancies in agriculture while mining and trade registered an increase in vacancies but a decline in placements. Provincially, all provinces showed losses in vacancies and placements, the most marked changes being reductions in vacancies in Quebec, British

Columbia and Nova Scotia and a decrease of placements in Ontario.

From the chart which accompanies the article on the work of the Employment and Selective Service Offices for the five-week period ending June 29, it will be seen that the curve of vacancies in relation to applications showed an increase during April and May but a decrease during June, while the curve of placements took a slightly downward course in April, rose sharply during May but dropped moderately during June. During the thirteen-week period there was a ratio of 121·3 vacancies and 71·9 placements for each 100 applications for employment as compared with 118·9 vacancies and 71·0 placements during the corresponding period a year ago.

The average number of positions offered daily during the quarter under review was 9,983; of applicants registered 8,232; and of placements effected 5,923 in contrast with a daily average of 11,312 vacancies, 9,513 appli-

cations and 6,759 placements during the same quarter of 1943.

During the three months April to June, 1944, the offices reported that they had referred 614,162 persons to positions and had effected a total of 456,076 placements, of which 444,445 were in regular employment and 11,631 in casual work. Of the placements in regular employment, 292,204 were of males and 152,241 of females. A comparison with the corresponding period of 1943 shows that 513,650 placements were then made, of which 499,993 were in regular employment and 13,657 in casual work. Applications for employment during the period under review were received from 408,094 males and 225,776 females, a total of 633,870 in contrast with the registration of 722,931 during the same period last year. Employers notified the offices during the quarter April to June, 1944, of 768,692 vacancies of which 508,104 were for males and 260,588 for females, as compared with 859,660 opportunities for work offered during the corresponding period a year ago.

Unemployment in Trade Unions at the Close of the Quarter Ending June 30, 1944

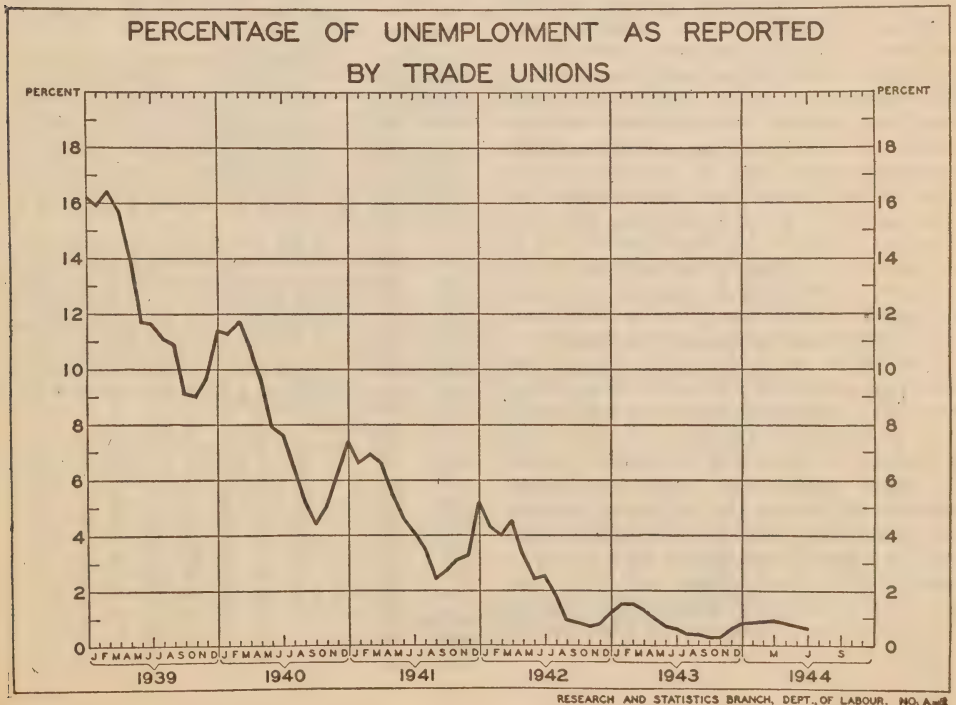
UNEMPLOYMENT in the following report has reference to involuntary idleness, due to economic causes. Persons who are without work on account of sickness, a strike or a lockout, or who are engaged in work outside their own trades, are not considered as unemployed. As returns from unions making reports vary from quarter to quarter, with consequent variations in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

At the close of the June quarter returns were tabulated from 2,206 labour organizations, having a combined membership of 415,707 persons, of whom, 1,147, or a percentage of ·3 were listed as without work, in comparison with percentages of ·9 in March and ·6 in June, a year ago. Any unemployment reported at this date and for some time past has been due to a great extent to temporary lay-offs. The moderate employment expansion shown over March was traced mainly to the marked betterment for union members in the building and construction trades, which is generally true for these workers at this time of the year. Conditions among fishermen showed marked improvement, but as the membership in this group is small this change did not greatly affect the situation as a whole. Union members in the manufacturing, transportation, mining and service groups reported slightly higher employment levels, while among the comparatively small section of lumber workers and loggers also, there was a minor increase in work.

The percentage of unemployed members in each province is shown in table I. As indicated therein, these figures ranged from ·1 per cent in Nova Scotia to ·6 in New Brunswick. In comparison with conditions at the end of the previous quarter employment levels in Ontario, Manitoba, Alberta and British Columbia were moderately higher, while improvements of somewhat lesser degree were in evidence also in Nova Scotia, New Brunswick, Quebec and Saskatchewan. As compared with the situation in June, a year ago, appreciably higher employment levels were manifested in Quebec and Alberta, while an increase in work although of somewhat lesser degree, was apparent in Manitoba. Slightly better conditions were observed in New Brunswick, Nova Scotia, Ontario and Saskatchewan, while in contrast a very slight recession was indicated in the returns received from British Columbia unions.

A separate compilation is made each month of unemployment among union members in the largest city in each province with the exception of Prince Edward Island. At the end of June, these percentages ranged from ·1 in Toronto to 1·1 in Regina. As compared with March returns, the employment level in Edmonton was considerably higher, while in Winnipeg, Halifax, Montreal and Toronto there were employment expansions, although these were not so pronounced. Slight improvement only was reflected in both Saint John and Vancouver. In contrast to these a moderately lower level was indicated in Regina. In comparison with conditions in June, a year ago, appreciably higher employment levels were observed in Montreal, Winnipeg, Edmonton and Saint John, while in Toronto the situation improved, although not to such a great extent. On the other hand, slightly less work was in evidence in Halifax, Regina and Vancouver.

The accompanying chart shows the trend of unemployment from January, 1939, to date. The point of the curve in June was at a moderately lower level than at the close of the March quarter, thus reflecting a rather substantial expansion in available work. In comparison with the situation in June, 1943, the level was slightly lower, thus indicating a fair betterment only.



For the manufacturing industries returns were received from 782 unions, having a total membership of 223,975 persons, of whom 250, or a percentage of ·1 were listed as without work, in comparison with a percentage of ·3 both at the end of March, 1944, and in June, a year ago. In comparison with reports received at the close of the March quarter, woodworkers recorded an appreciably higher level of activity. Among papermakers, and among union members in the printing and iron and steel trades, as well as for those in the animal products division, in which section are tabulated returns from unions such as butchers, meat and fish packers, leather and fur workers, there were slight employment advances. For the non-ferrous metals group, in which are included reports from such trades as metal polishers, jewellery, aluminum and mine, mill and smelter workers and in the unclassified manufacturing group, likewise, slight increases in activity only were necessary to attain full employment. For those in the mineral products section a very minor betterment resulted in full employment, while no one was reported as idle at either date among employees in electric power production, etc., textile and carpet, hat, cap and glove, clay, glass and stone and chemical workers. In the vegetable products division, in which are included reports covering such occupations as soft drink, cigar and tobacco workers and bakers and confectioners, the situation remained unchanged; very little unemployment

was apparent in this group. For union members in the garment division, in which are included reports from both women's and men's clothing workers, there was a minor decline in the very high employment level prevailing in these trades. In comparison with the situation in June, a year ago, unclassified manufacturing workers manifested an appreciable advance to full employment. Union members in the printing trades and in the animal products group were moderately better employed, while for paper makers and woodworkers slightly better conditions were indicated. As will be seen in table II the very high employment level which prevailed also for those in the iron and steel trades, a year ago, remained unchanged. On the other hand, a very slight decline in activity was observed for union members in the vegetable products division.

Reports were tabulated from 50 unions of coal miners, with a total membership of 17,370 persons, all of whom were listed as working, as compared with an unemployment percentage of ·3 in both March, 1944, and June, 1943. In comparison with conditions in March, an appreciable advance to full employment was apparent in Alberta, while in British Columbia a slight increase only was necessary to attain the same result. Full employment at both dates was reflected in reports received from union members in Nova Scotia and New Brunswick. As compared with conditions in June, a year ago, the situation in Alberta, as in the previous comparison, indicated a moderate improvement, while in Nova Scotia, the slight increase in available work provided full employment. In New Brunswick and British Columbia, no one was listed as out of work at either date.

In the metallic ores and non-metallic minerals sections of the mining division, reports were tabulated covering 8,012 and 4,863 union members, respectively. In comparison with conditions in both March, 1944, and June, 1943, there was, in each instance, a slight increase in available work, which for those in the metallic ores group was all that was necessary to attain full employment.

Reports were received from 189 unions in the building and construction trades. These organizations reported a combined membership of 35,300 persons, of whom 325, or a percentage of ·9 were unemployed, in comparison with percentages of 6·5 in March and 2·8 in June, a year ago. As compared with March, carpenters and joiners manifested a marked employment advance, an improvement due to a great extent to seasonal conditions. Noteworthy increases in available work were in evidence, likewise, among bricklayers, masons and plasterers, plumbers and steamfitters and hod carriers and unclassified building workers. Although the membership involved was small, a pronounced employment advance was indicated, likewise, among steamshovelmen. The percentages of those without work among bridge and structural iron workers

and granite and stonecutters, both of which organizations have small memberships, also were reduced substantially, thus reflecting noteworthy improvements. Painters, decorators and paperhangers indicated a slight advance to full employment, while among wood, wire and metal lathers, no one was reported as without work at either date. On the other hand, a slight decline in activity was apparent among electrical workers; very little unemployment was apparent at this date in the great majority of the trades. In comparison with conditions in June, 1943, the employment level for carpenters and joiners was substantially higher and among hod carriers and unclassified building labourers, likewise, there was a noteworthy increase in available work. The unemployment percentage showed a marked reduction for granite and stonecutters but as the membership is small, this change did not greatly affect the situation as a whole. The amount of work available for bricklayers, masons and plasterers showed a moderate contraction.

Returns were tabulated in the transportation industries from 834 unions with a combined membership of 79,380 persons, of whom 254, or a percentage of ·3 were without employment, in comparison with percentages of ·4 in March and ·6 in June, a year ago. Over 80 per cent of the entire group membership reported was included in the steam railway group. In comparison with March the situation for these workers, as well as for those in the street and electric railway division, remained unchanged. For teamsters and chauffeurs, etc., full employment prevailed at both dates, while, on the other hand, a very slight decline in activity took place among navigation workers. As compared with the returns for June a year ago, a slightly higher employment level was in evidence in the steam railway group, while for teamsters and chauffeurs, etc., a minor advance only was necessary to attain full employment. As in the previous comparisons, the situation among street and electric railway employees remained unchanged, while for navigation workers there was a slight recession in available work.

As in March and in June, 1943, union members in the retail and wholesale trades did not report any unemployment. In the service group is included returns from civic employees, in addition to hotel and restaurant, theatre and stage employees, barbers, stationary engineers and firemen and unclassified workers. The employment level for this group, when taken as a whole, was slightly higher both as compared with March returns and with those of June, a year ago. A membership totalling over 26,000 was included in the service division.

Reports were received which covered a total of 225 members in the fishing group and 7,126 workers in the lumber workers and loggers' section. No unemployment was in evidence in June, in either occupation. In the case of fishermen this was a very substantial improvement over March, while for lumber workers and loggers full employment was reached through a slight expansion only, in available work. The situation in both occupations was identical with that of June a year ago, at which date, also, the entire group memberships were reported to be working.

Table I shows by provinces the average percentage of union members who were unemployed each year from 1933 to 1943, inclusive, and also the percentage of unemployment for June, of each year from 1932 to 1942, for each month of 1943 and for the quarters ending March and June, 1944. Table II summarizes the returns in the various groups of industries for the months included in Table I.

TABLE I.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

Month	N.S. and Prince Edward Island	New Brunswick	Quebec	Ontario	Manitoba	Saskatchewan	Alberta	British Columbia	Canada
Average 1933	16·0	13·0	25·2	24·4	20·3	17·2	21·7	20·8	22·3

Labour Law

Labour Legislation in Quebec in 1944

THE Quebec Legislature during its session from January 18 to June 3 enacted new statutes providing for collective bargaining in any industry except agriculture and domestic service, for compulsory arbitration of disputes in public services, the protection of children, and for a Department of Social Welfare. Acts relating to workmen's compensation, vocational schools and housing were amended.

Collective Bargaining

The Labour Relations Act applies to all employees, except superintendents, foremen and other representatives of the employer, members of the professions, domestic servants and farm workers. Railway companies under Dominion jurisdiction are excluded from the Act. The Act requires employers or employers' associations to negotiate, with a view to concluding an agreement, with the representatives of one or more associations of which at least 60 per cent of their employees are members. For failure to negotiate in good faith, an employee is liable to a fine of from $100 to $500 and for a subsequent offence to a fine of from $200 to $1,000 or, in the case of an individual, to three months' imprisonment. An "association" includes "a professional syndicate or union of such syndicates, a group of employees or employers, *bona fide,* having as object the regulation of relations between employers and employees and the study, defence and development of the economic, social and moral interests of its members, with respect for law and authority." Every employer and employee is declared to have the right to be a member of an association and to participate in its lawful activities.

The Act is to be administered by the Labour Relations Board* of three members. It is to determine any dispute as to whether the employer is to bargain with representatives of all his employees or with any particular groups. All questions of representation are to be determined by the Board.

An association desiring to be recognized for purposes of bargaining must forward to the Board a written petition authorized by a resolution of the association, and a copy of the resolution must be filed in support of the petition. To determine the right of the association to recognition, the Board may examine its books and records and may order a secret ballot among any group of employees, if it considers that constraint has been used to prevent employees from joining an association or to force them to join, or if the employees are members of more than one association in sufficient numbers to affect the decision. Employers must facilitate the taking of the vote and every employee in the group specified by the Board must vote unless he has a valid excuse for not doing so. The Board is to issue a certificate to every association recognized by it stating the group which it is entitled to represent. An employer or association may be represented, for purposes of the Act, by duly authorizing representatives.

The employer or employers' association must be given at least eight days written notice of the time and place for carrying on negotiations. If the negotiations have been carried on for 30 days without success or if either party believes that they will not be completed within a reasonable time, either party may notify the Board of the difficulties encountered. The Minister of Labour must forthwith, appoint a conciliation officer to confer with the parties and try to effect an agreement. The conciliation officer must report within 14 days and if no agreement is arrived at, the Minister must appoint a council of arbitration under the Quebec Trade Disputes Act, the report of the conciliation officer taking the place of the application provided for in the Act.

A collective agreement may not be made for more than one year but it may be agreed that it shall continue in force from year to year, unless one of the parties gives written notice of termination to the other not less than 30 days nor more than 60 days before the date of expiration. During the 30-day interval any association may petition the

* The Quebec Labour Relations Board set up under this Act has jurisdiction over purely provincial industries. It is not to be confused with the Quebec Wartime Relations Board, set up under Dominion-Provincial agreement to administer the Dominion Wartime Labour Relations Regulations (P.C. 1003) in the Province of Quebec in respect of war industries (L.G., July, 1944, p. 847). Jurisdiction over railways and interprovincial industries rests with the National Board.

Board to be recognized as the bargaining agent in place of the association which signed the agreement. If any association has been so recognized by the Board, the agreement becomes void, as regards the group represented, at the renewal date following the date of the petition, even though neither party has given notice of non-renewal.

Any association of not less than 20 employees which constitutes at least 10 per cent of the group covered by an agreement made by another association, is entitled to obtain from the latter a copy of the agreement and to make to the employer, on behalf of its members, any complaint arising from a violation of the Act or of the agreement.

Nothing in the Act is to prevent an unrecognized association from making a collective agreement but such an agreement is void from the date on which another association is recognized by the Board as the bargaining agent for the employees concerned. These provisions do not apply, however, to an agreement existing when the Act came into force (February 3, 1944), unless the Board decides that when it was made or renewed, an association which was a party to it did not fulfil the conditions required for recognition by the Board. An agreement is of no effect until a certified copy of it has been filed with the Board.

It is forbidden for an employers' association or for an employer or his agent to seek to dominate or to hinder the formation or activities of an employees' association, or for an employees' association, or any person acting for it, to belong to an employers' association or seek to dominate it or hinder its formation or activities. Employers and their agents or associations may not refuse to employ any person because such person is a member or officer of an association or seek, by intimidation, threat of dismissal or other threat, or by imposition of a penalty, or by any other means to compel an employee to abstain from becoming, or to cease to be, a member or officer of an association. This provision is not, however, to have the effect of preventing an employer from suspending, dismissing, or transferring an employee for cause, proof of which is on the employer. No person may use intimidation or threats to induce any one to become or to refrain from becoming or to cease to be a member of an association. No person acting on behalf of an association may solicit an employee for union membership in working hours or at his place of employment except with the consent of the employer.

A strike or lockout is prohibited so long as an association of employees has not been recognized as representing the group of employees concerned and so long as such association has not taken the required proceedings for the making of an agreement and until 14 days after the Minister has received the report of a council of arbitration appointed under the Trade Disputes Act. Until these conditions are fulfilled an employer may not change the conditions of employment without the employees' consent. A strike or lockout is also prohibited for the duration of a collective agreement, unless the dispute has been referred for settlement in accordance with the agreement or, failing such provision in the agreement, in accordance with the Quebec Trade Disputes Act, and for 14 days after receipt by the Minister of the report. The above provisions are not to prevent an interruption of work which does not constitute a strike or lockout.

No association, or person acting on behalf of an association, may order, encourage or support a slackening of work designed to limit production. No association which has entered into a collective agreement and no group of employers or of employees who are members of such association may take steps to join another association except during the 60 days preceding the date of expiration or renewal of the agreement.

Every association must file with the Labour Relations Board a copy of its constitution and by-laws, a statement showing fees and assessments and, after each election or appointment of officers or representatives, a certificate stating the names and addresses of such persons.

The Labour Relations Board is to consist of a Chairman and two other members appointed by the Lieutenant-Governor in Council. Every decision must have the assent of two members, which number also constitutes a quorum at meetings. The Board may make regulations governing its procedure, the form of reports to be made and, generally, for carrying out the Act. Such regulations are to come into force on approval of the Lieutenant-Governor in Council and publication in the Quebec Official Gazette. In the absence of a regulation applicable to a particular case, however, the Board may prescribe any act or formality which could be prescribed by a regulation and with the same effect. Any person authorized by the Board may make an investigation to ascertain whether the Act is being complied with. The Board may revise or cancel any of its decisions or any certificate issued by it. A decision of the Board is not evidence for purposes other than those set forth in the Public Services Employees Disputes Act. No evidence is to be admitted to show that an investigation or prosecution under the Labour Relations Act has been taken on complaint of an informer or to discover the identity of the latter.

An employer or association of employers which, having received the prescribed notice, fails to acknowledge as representing his or its employees, or fails to negotiate with the representatives of, an association recognized by the Board, is liable to a fine of from $100 to $500 for a first offence, and for a second offence, to a fine ranging from $200 to $1,000 and, in addition, in the case of an individual, to a prison term not exceeding three months. Any person declaring or instigating a strike or lockout contrary to the Act, or participating in it, is liable, in the case of an employer, association, or officer or representative of an association, to a fine of from $100 to $1,000 for each day or part of a day during which the strike or lockout exists and in all other cases to a fine of from $10 to $50 for each such day or part of a day. Any person failing to comply with any obligation imposed by the Act or by a regulation or decision of the Board, is liable, unless another penalty is applicable, to a fine not exceeding $100 for a first offence or $1,000 for a subsequent offence. An official of the Board or any person acting under its orders who reveals to any one other than the Board any fact which he learns in the discharge of his duties is liable to a fine of not more than $100.

The following are party to an offence and liable to the same penalty as the person committing it: Any person who aids or abets the commission of the offence, and if the offence is committed by a corporation or an association, every director, administrator, manager or officer who in any manner approves of or acquiesces in the act which constitutes the offence. If several persons conspire to commit an offence, each of them is guilty of each offence committed by any of them in carrying out their common intention. No penal prosecution may be taken under the Act without the written authority of the Board or the consent of the Attorney General.

If it is proved to the Board that an association of employers seeks to dominate or hinder the formation or activities of an employees' association or that an employees' association belongs to or seeks to dominate or hinder the formation or activities of an association of employers, the Board may, without prejudice to any other penalty, dissolve the offending association after giving it an opportunity to produce evidence in its own defence.

The provisions of the Act apply to collective agreements existing at the time of its coming into force (February 3, 1944) but such agreements are to be deemed to be amended to limit their force to one year, with privilege of automatic renewal on the same terms as those given above for agreements made under the Act.

Arbitration of Disputes in Public Services

The Public Services Employees Disputes Act prohibits a strike or lockout in a "public service" which is defined to include municipal and school corporations, the Provincial Civil Service, public charitable institutions within the meaning of the Quebec Public Charities Act, insane asylums, the operation of telephones and telegraphs, transportation, railways, tramways, navigation, and the production, transmission, distribution or sale of gas, water or electricity. Railways under Dominion jurisdiction are excluded.

Notwithstanding any general law or special Act, the Labour Relations Act is to apply to public service employees with the modifications indicated in this Act.

Except in the Civil Service, where the Civil Service Commission is to act as a council of arbitration, disputes in public services are to be submitted to arbitration under the provisions of the existing collective agreement for the settlement of disputes or, if there is no such provision, under the Quebec Trade Disputes Act. The arbitration award may be executed under authority of a court of competent jurisdiction on application of an interested party or of the Labour Relations Board. No arbitration award establishing conditions of employment is to bind the parties for more than one year.

Members of Provincial or municipal police forces and civil servants may not remain or become members of an association which does not consist solely of persons in the same category or which is affiliated with another organization or association.

The Act contains sections identical with those in the Labour Relations Act fixing penalties for declaring, instigating or participating in a strike or lockout and for failure to comply with the Act or with regulations or decisions of the Board, enumerating classes of persons deemed to be party to an offence, declaring each of several parties to a conspiracy guilty of an offence committed in carrying out the common intention, forbidding the taking of an action without written authority of the Board, and prohibiting the admission of evidence which would identify an informer.

Workmen's Compensation

An amendment was made in the section of the Workmen's Compensation Act dealing with compensation to workmen engaged in water transport. Where such a workman resides or was hired in the Province and is obliged to work both within and without the Province, compensation is payable if the vessel is registered in a Canadian port or if the

owner or charterer has his domicile or principal place of business in the Province. Formerly, compensation was only payable in such cases if the accident happened in Canadian territorial waters.

Merchant Seamen

The section of the Civil Code which declared the hiring of seamen to be subject to the provisions of the Canada Shipping Act and of the Merchant Shipping Act of Great Britain was amended to delete the reference to the latter statute, which was repealed, in so far as it related to Canada, by the revised Canada Shipping Act, 1934.

Medical Examination of Employees

An amendment in the Cities and Towns Act enables city and town councils to make by-laws requiring persons employed in hotels and restaurants to undergo an annual medical examination and to furnish the municipal officer appointed for the purpose with a medical certificate stating that they are not germ-carriers liable to spread infection, to forbid any hotel or restaurant-keeper to employ any person who does not hold such a certificate, and to determine the classes of employment to which the by-law shall apply.

Vocational Education

An Act respecting Certified Technicians changes the name of the "Corporation of Technicians", which was incorporated under the Quebec Companies Act, to the "Corporation of Certified Technicians" and amends the Specialized Schools Act to provide that a diploma given by a "Specialized School" to a technician in any special field shall confer upon the holder the right to membership in the Corporation, without further examination, after payment of the ordinary fee, which may not exceed $10 a year. The Specialized Schools Act governs the Montreal School of Higher Commercial Studies, schools of fine arts in Montreal and Quebec, technical schools in Montreal, Quebec, Three Rivers and Hull, the Montreal Furniture-making School and any arts and trades schools.

Only members of the Corporation in good standing, holding the necessary diploma or a diploma issued outside the Province and declared equivalent by the Lieutenant-Governor in Council, on recommendation of the Superior Council of Technical Education, may use in the Province the title of "certified technician," followed by an indication of their speciality. Any one who, either verbally or in writing, assumes such a title or a title giving rise to the belief that he is a certified technician without having the right to do so, is liable to a fine not exceeding $100 for a first offence and from $100 to $200 for a subsequent offence.

An Act to amend the Specialized Schools Act classifies the Graphic Arts School as a technical school. The director of the school will, accordingly, become a member of the Superior Council of Technical Education.

Free Education and School Books

Amendments in the Education Act, which came into force July 1, 1944, enable the Province to reimburse school boards for three-fourths of the cost of purchasing school books which are made available free of cost to school children. Where the Lieutenant-Governor in Council, on recommendation of a Committee of the Council of Education, requires the use of a specified text-book, the Government is to pay nine-tenths of the cost.

School commissioners or trustees may not collect school fees except for grades above the primary and intermediate grades.

Protection of Children

The Children's Protection Act and the Child Protection Schools Act carry out, with some slight changes, the recommendations of the Quebec Health Insurance Commission's Report on child protection and nurseries. The former Act repeals the Industrial Schools Act and enacts new provisions for taking care of neglected children. A "neglected child" is defined to include, *inter alia,* a child who begs in a street or public place, whether he does so openly or on the pretext of selling or offering anything for sale. The child protection schools are to replace the industrial schools which have been abolished.

Housing

The Housing Act enables the Provincial Treasurer, with the authorization of the Lieutenant-Governor in Council, to make agreements with corporations or cooperative syndicates and with the Dominion Government for the purpose of making loans for the construction of dwellings costing not more than $6,000, including the cost of the land. The Provincial Government is to make loans to the institutions, which, in turn, may lend to persons building houses an amount not exceeding the difference between 90 per cent of the cost and the amount of the loan under any Dominion housing law.

The agreement may fix the date of maturity of the Provincial Government loan on a date after the expiration of the period fixed for repayment of the Dominion loan. It may also be agreed that the Provincial Government will bear the loss of its advance if the amount owing the other parties could not otherwise be collected. The sums required for carrying out the Act may be paid from the Consolidated Revenue Fund of the Province up to a total of $1,000,000.

An Act to encourage the Construction of Dwelling Houses by a Commutation of Taxes amends the Municipal Tax Exemption Act to enable municipal corporations to pass by-laws granting a commutation of taxes, on certain types of dwellings built between April 1, 1944 and April 1, 1947. The commutation is to consist of a reduction of not more than 70 per cent in the assessed value for the first year, and is to decrease uniformly each year for seven years, at the end of which time the owner will be taxed on the full assessed value. The houses, on one or more classes of which commutation may be granted, are: Single-family residences, detached or semi-detached, occupied by the owner and having assessed value of at least $2,000; two-family detached or semi-detached dwellings, one section of which is occupied by the owner, with assessed value of not less than $4,000; and residences laid out for a number of dwellings built by a limited dividend corporation with Dominion Government assistance. Commutation lasting for 14 years and reducible every two years may also be granted on detached or semi-detached single-family dwelling houses occupied by the owner and valued at from $2,000 to $5,000. Commutation does not apply in any case to school taxes, water-rates or compensation for water.

Department of Social Welfare

The Department of Social Welfare Act sets up such a Department, distinct from the Department of Health, in accordance with the recommendation of the Quebec Health Insurance Commission. The new Department is to administer the laws relating to old age and blind persons' pensions, and needy mothers' assistance, which are at present under the Department of Labour, and the new law relating to protection of children. The carrying out of the Public Charities Act is divided between the two Departments.

Co-operation

An Act to incorporate "La Societe d'Assurance des Caisses Populaires" constitutes the persons named in the Act and any who may join them, a corporation under the above title with headquarters at Levis. The corporation is an association without share capital and its purpose is to carry on a mutual insurance business, including land and maritime insurance and reinsurance respecting property, civil responsibility and persons, except life insurance. The object is to protect the business and property of co-operators and members of credit unions incorporated under the Quebec Co-operative Syndicates Act. Contributions may be received for establishing a reserve fund from at least three credit unions.

Resolution

A Resolution, adopted May 3, 1944, urged that, owing to the general increase in the cost of living in the Province, the House consider reducing from 70 to 65 the age at which old age pensions might be granted and concur with the Dominion Government in any agreement arrived at on this matter.

Recent Regulations Under Dominion and Provincial Legislation

RECENT Dominion Orders in Council deal with the incorporation of the cost-of-living bonus in the wage-rates of hourly-paid Government employees and with compensation for employees of Crown companies injured or killed in the course of their duties, in flying accidents. Another Order permits ships' officers to take certain measures to deal with offending seamen on Canadian ships. The Canadian Vocational Training Program has been extended to include the production of essential civilian goods.

Among Provincial Orders are: Alberta regulations governing overtime rates for men employed in road construction; exemption of fruit and vegetable canneries in British Columbia from the Hours of Work Act during the season; a summer Order providing for a 56-hour week for women in resort hotels in British Columbia and a British Columbia regulation providing for and the filling of a vacancy as a collective bargaining representative. New First Aid Service requirements have been issued by the British Columbia Workmen's Compensation Board. The wages of Ontario apprentices can now be increased or reduced with journeymen's rates. Under the Ontario Hours of Work and Vacations with Pay Act general regulations were made and rulings issued for hotels, restaurants and retail shops. New regulations govern fire-protection methods and apprentices in Ontario theatres.

Dominion

Government Employees

An Order in Council (P.C. 3374) made under the War Measures Act and gazetted May 15 sets out the procedure for establishing new "consolidated wage-rates," that is, the former wage-rates plus cost-of-living bonuses, for Government employees who are exempt from the Civil Service Act and paid at hourly rates. Lists are to be prepared showing the Department, its location, the number of positions by classes as of April 1, 1944, the present hourly rates, giving pay and bonus if any, and the proposed new consolidated rates. A certificate is to be attached to the schedule of rates showing the concurrence of the Department of Labour. These lists are to be submitted to the Treasury Board with a recommendation from the Minister of the Department concerned before May 31, 1944, but the rates so established are not to be effective before July 1. Any future changes in rates are to be authorized in the same manner. The Order excludes hourly-paid employees from the Order in Council (P.C. 6702) of August 26, 1941, as amended, which granted a cost-of-living bonus to members of the Public Service of Canada, but it does not bring any Government employee under the Wartime Wages Control Order, 1943, who was not previously subject to it. The Order in Council (P.C. 22/4627) of June 1, 1942, is rescinded, which stipulated that changes in the wages of employees engaged at prevailing hourly rates should be approved only when concurred in by the Treasury Board on the recommendation of the National War Labour Board.

An Amendment (P.C. 33/5177) made July 7, 1944, and gazetted July 17, makes the stipulation that the new consolidated wage-rates as provided for above, shall apply to Government employees paid at prevailing hourly rates who do not contribute to the Superannunation Fund and who are exempt from the Civil Service Act. The Order provides further that on or before July 1, 1944, rates for the latter class will be established by the Governor in Council on the recommendation of the Minister of the Department concerned. The time-limit for the submission to the Treasury Board of the lists mentioned above was extended until June 30, 1944.

Seamen

An Order in Council, made on June 5, 1944, under the War Measures Act and gazetted June 12, deals with the matter of jurisdiction concerning seamen charged with offences while serving on Canadian ships. The order provides for adequate measures to be taken on board ship during the present war emergency to investigate misconduct on the part of seamen and, where necessary, to enable adequate disciplinary action to be subsequently taken in Canada against any offender. Where the efficiency of the ship may be endangered, such a seaman may be discharged in a convenient port or place, when the ship is not likely to proceed to Canada for some time. The offence must be entered in the official ship's log. Court expenses are carried by the Department of National Defence for Naval Services.

Vocational Training

An Order in Council (P.C. 5103) passed July 3 and gazetted July 10 replaces that of April 17 (P.C. 2692) (L.G., May, 1944, P. 675), which extended the Canadian Vocational Training Program to the production of essential civilian goods. The earlier Order amended the agreements which have been made in the Dominion with eight provinces concerning the training of workers for war industries by enlarging the definition of "war industries" to include such industries producing essential civilian goods as might be designated by the Dominion Director of Training on the recommendation of the Wartime Prices and Trade Board. The repealing Order provides, instead, that each provincial agreement may be amended in regard to the definition of war industry by a supplementary agreement signed with the Dominion, the Dominion Minister of Labour to designate, on the recommendation of the Prices Board, what industries shall be considered "war industries".

Workmen's Compensation for Crown Company Employees

An Order in Council (P.C. 3095) under the War Measures Act and the Department of Munitions and Supply Act, which was made April 8, 1944, provides workmen's compensation for persons who receive injury as a result of flying in the course of their duties as employees of a "Crown company". Gazetted May 8, the Order states that employees of any company which has or may become incorporated by the Minister of Munitions and Supply, will be deemed to be employed in the Public Service of Canada or under the direction of a department of public service. They will be eligible to receive compensation for injury resulting from a flight in any aircraft, military or civil, taken in the course of their duties as employees of such a corporation, as stipulated in Orders in Council (P.C. 2187) of October 20, 1922, and (P.C. 1165) of June 15, 1927. Compensation may also be given the dependents

in case of fatal accidents occurring during airplane flights on the same scale as would be awarded under the Pension Act to members of the Canadian Air Force in the same circumstances.

Other Orders

The following recent Orders in Council are summarized elsewhere in the LABOUR GAZETTE: P.C. 5130 and P.C. 5419 of July 6 and 24, amending National Selective Service Civilian Regulations; P.C. 5485 of July 18, concerning coal mining in British Columbia under the Wartime Labour Relations Regulations; P.C. 5210 dated July 13, consolidating the Post-Discharge Re-establishment Order, and P.C. 5771 of July 27, postponing military training for men engaged in delivering coal.

Provincial

Alberta Male Minimum Wage Act

Orders No. 23 under the Male Minimum Wage Act and No. 31 of the Hours of Work Act, made on June 15, 1944, and gazetted June 30, stipulate that men engaged on road construction in rural municipalities, must be paid for overtime at not less than the ordinary rate. The Orders do not apply in incorporated cities, towns and villages. They became effective on June 15, 1944.

B.C. Electrical Energy Inspection Act

An Order in Council of June 26, 1944, gazetted June 29, replaces regulations approved on January 25, 1935 (L.G. April 1935, p. 323). The Order amends the variations made in the Canadian Electrical Code for use in B.C. by the British Columbia regulations of 1935. The changes relate to definitions concerned with administrative agencies and the wiring of buildings.

The Order stipulates that only rigid conduit or, by special permission, flexible conduit, or armoured-cable shall be employed in wiring buildings used for industrial, commercial or manufacturing purposes, as well as in wiring buildings of fireproof or of mill construction, hotels, private or public hospitals, churches, halls and other meeting-places having a floor area of 1,200 square feet or more including aisles. In addition, bus-bars must be used for currents in excess of 100 amperes. If the floor area of a garage or service station is sufficient to accommodate more than two vehicles, it was required that the wiring should be in conduit, surface metal raceways, armoured-cable, wireways or busways. The words "armoured cable" are struck out.

British Columbia Hours of Work Act

A regulation of June 27, 1944, under this Act which was gazetted June 29, stipulates that employees engaged in canning, preserving, drying or packing any kind of fruit or vegetable, are exempt from the Hours of Work Act until March 31, 1945.

B.C. Female Minimum Wage Act

The annual summer Order pertaining to resort hotels made June 27, 1944, and gazetted June 29, is declared effective from the latter date until September 9, inclusive. Instead of the maximum 48-hour week and eight-hour day fixed in Order 52, women employed in the hotel and catering industry in summer resorts may work up to 56 hours a week and ten hours a day. Time and a half is payable for time worked in excess of 48 hours a week, but not for work in excess of eight hours a day, if the weekly maximum is not exceeded. Twenty-four consecutive hours of rest in each week must be given unless application is made to the Board by both employers and employees. The Order does not apply to cities, organized districts or villages.

B.C. Wartime Labour Relations Act

Regulation 3 under this Act, gazetted June 22, provides that if any person appointed or elected to act as bargaining representative is no longer available to act in this capacity, a successor may be appointed or elected with the approval of the Minister of Labour.

B.C. Workmen's Compensation Act

The Workmen's Compensation Board of British Columbia has laid down new First Aid Service requirements which became effective June 1, 1944. The previous rules which came into operation on May 31, 1942 (L.G. 1942, p. 693), replaced those issued in 1922.

The new rules are set out in a pamphlet distributed by the Board. The chief changes in the first-aid equipment required to be kept are in the number of various supplies to be available and the addition to the list of certain articles: optic loops with caps, jelly for burns, ammonia inhalants, adhesive dressings, and a copy of First Aid Service Requirements.

Ontario Apprenticeship Act

General regulations under the Apprenticeship Act were amended by Order in Council of June 8, 1944, and gazetted on June 24. The

change made on June 8 provides for increasing or reducing the wages of apprentices during the life of the contract. The previous regulations made no provision for a change in wages except by written application to the Director for a revision of rates. The amendment provides for wages of apprentices to be increased or decreased in the same degree as the prevailing wage paid to a journeyman, where wages of the apprentice may be shown to be a percentage of those of a journeyman.

The Apprenticeship Act, 1928, governed apprenticeship in bricklaying, masonry, carpentry, painting and decorating, and plastering. In 1937 the following trades were brought under it: electrician, motor vehicle repairer, plumber, sheet metal worker, steamfitter, barber and hairdresser.

The Act states that no minor may be employed in any of these trades for longer than three months, except under contract of apprenticeship lasting for not less than two years. A formal document, signed by both parties, must be drawn up, any alteration of terms being reported to the Minister. By the 1937 amendment, no person eligible to be an apprentice in any designated trade who has not completed the period of apprenticeship, shall be employed for more than three months unless he enters into a formal contract.

The revised Act of 1936 provides for a Provincial Apprenticeship Board appointed by the Lieutenant-Governor in Council consisting of three members, one of whom shall act as chairman. The members will be paid no regular salary, but will receive expenses when engaged on duties arising from the Act.

Ontario Theatres and Cinematographs Act

New regulations under this Act were approved by Order in Council of July 11, 1944. They deal chiefly with methods of fire-protection and apprentices. Definitions of approved Class A and Class B fire-doors are given and there are new sections covering sprinkler and heating systems; the arrangement of film-housing buildings; vault vents; lighting, elevator and stairway requirements; approved shipping containers; and the storage of films in exchanges.

There is a reduction in the number of subjects for apprentices' examinations and fuller details of the subjects remaining in the syllabus. In addition, apprentices are to be examined on their knowledge of film and projection, electricity and sound. A $5 fee must accompany application for any class of apprentice examination or any renewal of certificate.

Three classes of licences are to be issued; first and second class projectionists and apprentices.

Quebec Minimum Wage Act

Assessments. By-law B-1 (L.G., 1943, p. 107) providing for assessments on employers to cover the cost of administration of the Act except in connection with forest operations has been revised by an order gazetted June 23. The section is repealed which stipulated that cost-of-living bonuses were not subject to the levy. This change affects the levy on all wages paid on and after July 1, 1944. Similar amendments in By-laws B-1-B and B-1-C pertaining to levies on employers engaged in timber-driving operations, and forest operations other than timber-driving (L.G., 1944, p. 236) were made by Orders gazetted June 23. The latter amendment has been in operation since May 1, 1944.

Orders made on June 27 and gazetted July 29, add a new clause to By-laws B-1-B and B-1-C, stating that for truck-drivers using their own trucks, the levy is made only on the part representing thirty-hundredths ($^{30}/_{100}$) of the amounts paid them, and for carters hired to work with their horses and vehicles, only on the part representing half the amounts paid them.

Renewals. Order No. 9 (L.G. 1943, p. 1034) fixing minimum salaries for teachers employed by the City of Verdun School Board has been renewed until July 1, 1945, by an Order gazetted June 23. Order 37 (L.G., 1940, p. 927) governing establishments manufacturing glass containers has been renewed until August 1, 1945, by an Order gazetted June 30.

Three minimum wage Orders were renewed by notices gazetted July 29. Order No. 14 (L.G., 1938, pp. 1099, 1236; 1940, p. 124) concerning maintenance men working in office-buildings, apartment houses and other public buildings in the Montreal district has been renewed until September 1, 1945, by an Order gazetted July 29. Order 28 relating to dye-works and laundries in the City of Quebec and town of Quebec-West (L.G., 1939, p. 1003; 1940, p. 447), and Order 29 concerning taxicabs and automobiles for hire in the cities of Quebec and Levis (L.G., 1939, p. 1002), have also been renewed until September 1, 1945.

Legal Decisions Affecting Labour

Ontario Court Quashes By-Law Governing Shop Closing-Hours in London

A MOTION to quash a by-law passed in 1944 under the Factory, Shop and Office Building Act was heard by Mr. Justice Gillanders in Weekly Court, London, on June 22. A clause of the by-law provided that all fruit shops in the City of London should close on all week-days except Saturday, with certain exceptions, at 6.30 p.m. and should remain closed until 5 a.m. on the following day. Further clauses provided that such shops should close at 7 p.m. on Saturdays and every day preceding a public or statutory or civic holiday and remain closed until 5 a.m. of the next business day. The Court quashed the by-law. The applicant was granted costs, and other security which he had paid into the Court was to be returned after the time limit for an appeal.

The by-law was attacked on the ground that the statute did not give the Council power to provide by by-law for shops to be closed beyond 6 p.m. on any day, or before 5 a.m. on the following day, except by petition from three-fourths of the owners of such shops in the municipality. The by-law provided for the closing of fruit shops at 6.30 p.m. It was suggested that in the event of the Court holding the above-mentioned clauses *ultra vires*, that portion of the by-law might be quashed, allowing the remainder to stand. Justice Gillanders cited a former case in which the Court suggested that an individual councillor might not have voted for the by-law except as a whole. Similar reasoning applied in this case. The Court concluded with the decision that the by-law must be quashed. *Nelson vs. City of London,* (1944) O.W.N. 455.

Action under Quebec Minimum Wage Act Succeeds if Time Limit Not Pleaded

On October 29, 1943, the Quebec Superior Court awarded a claim for salary amounting to $130 to the Minimum Wage Commission on behalf of a janitor. He and his wife had worked as joint janitors from March 1 to September 1, 1942, receiving a total of $140, or $20 for four months and $30 for two months. Minimum Wage Ordinance 14 of September 10, 1938, prescribes $45 as the minimum rate for janitors devoting full time to 12 to 20 apartments. Thus they should have received $270 and the Court upheld the claim for the difference of $130.

The defence argued that the man alone was engaged as janitor and he worked only part-time. However the evidence established that while he did not work full-time, his wife worked full-time and they were joint janitors paid jointly. The defence raised the question of the time-limit imposed on actions for wages. Article 30 of the Minimum Wage Act stipulates:

> "Any civil action arising out of an ordinance or out of this Act is prescribed by six months from the due date in each case . . ."

This prescription was not pleaded, however, and the Court held that according to article 2188 of the Civil Code of Quebec, it could not supply this defence:

> "The Court cannot of its own motion supply the defence resulting from prescription, except in cases where the right of action is denied."

Commission du Salaire Minimum v. Lajeunesse, 1944, Rapports Judiciaires de Quebec, Cour Supérieure, 197.

Two Judgments Involving British Woodworking Regulations

Two cases recently decided in the British Courts were concerned with injuries suffered by workers in woodworking establishments. One decision was in favour of the employer and the other awarded damages to the employee.

The British Court of Appeal dismissed a workman's action against his employers claiming damages for the loss of a thumb in a circular saw. The Factories Act requires all dangerous machinery to be securely fenced but the Woodworking Machinery Regulations, 1922, modified the Act in respect of saws by substituting prescribed guarding for the "secure fencing" required by the Factories Act. Since the saw was entirely enclosed at the bottom underneath the table, and had an adjustable guard at the top, it was ruled that the employers had complied with the obligation imposed by the Regulations.

The evidence showed that no better guard was in existence, and it seemed that no guard had been invented which would provide absolutely secure fencing for these saws. Lord Justice Goddard pointed out that some part of the cutting edge had to be exposed or the wood could not be cut. In any case, the Factories Act expressly provided that special regulations might be made to "modify or extend with respect to any class or description of factory any provisions of Part II," which includes the section on fencing machinery. The Lord Justice said that this amounted to a recognition that there were some modern machines which could not be completely fenced if they were to be used. The Regulations, therefore, must be regarded as a modification of the Factories Act provision. *Miller v. William Boothman and Sons Ltd.* Court of Appeal, January 12 and 19, 1944.

A woodworking machinist seriously injured his right index finger in a chain mortising machine and sued his employers for damages, claiming that they had not carried out the safety provisions of the Woodworking Machinery Regulations. The chain cutter on the machine projected about ⅝ inch below the guard, and the case hinged on whether, according to the Regulations, it was the worker's or the employer's responsibility to see that the guard was properly adjusted. The British Court of the King's Bench ruled that the plaintiff had met with the accident as a result of a breach of statutory duty by the employers, and awarded £500 damages and costs.

The workman relied on Regulation 21 providing that:

> The guards and other appliances required by these regulations shall be maintained in an efficient state and shall be constantly kept in position while the machinery is in motion, except when, owing to the nature of the work being done, the use of the guards or appliances is rendered impracticable. The guards shall be so adjusted as to enable the work to be carried out without unnecessary risk.

In opposing the workman's claim, the employers stressed Regulation 23:

> "Every person employed on a woodworking machine shall (i) use and maintain in proper adjustment the guards provided in accordance with these regulations . . ."

Mr. Justice Singleton accepted the plaintiff's evidence regarding the position of the guard before the accident, and his statement that it had been that way as long as he had worked on the machine and that he had not been instructed with regard to adjusting it. In the Court's opinion it was the duty of the employers to see that the guard was in its proper position, and then after its initial correct adjustment, the worker was responsible for keeping it that way, although the employer should ensure from time to time that this was being done. Thus the employers had failed to carry out their obligation under Regulation 21. *Tay v. D. & L. Studios Ltd.* High Court of Justice, King's Bench Division, December 20, 1943.

British Court of Appeal Holds Children's Allowances Paid to Corporation Employees Valid

Two Birmingham city councillors, respondents in the case, had paid "children's allowances" to some of the non-manual employees of the city corporation following the adoption by the council of a report endorsing a plan for children's allowances. The district auditor to the Ministry of Health contended that these payments were illegal and disallowed them, surcharging them on the councillors. The Divisional Court quashed the disallowances and surcharges, holding that the respondents had exercised their powers with care and had recognized that reasonable discretion must be exercised in the interests of the ratepayers. Upon appeal the decision of the Divisional Court was upheld. The case was reported in the London *Times* of May 13, 1944.

Lord Justice Goddard of the Court of Appeal said that however the sums paid by the corporation to their employees were made up, they were, nevertheless, wages. The job of the auditor was to see whether there was any excess in the amount of wages, not to inquire into the motive of the corporation for paying that amount. In this case the amounts paid were fair and reasonable. If the corporation had brought every salary up to its pre-war value, they would have been within their rights, so that it must have been within their powers to bring the salaries of those who were hardest hit up to this level. *Lewis and Others v. Walker,* Court of Appeal.

Prices and Price Control

Activities of the Wartime Prices and Trade Board April-June, 1944

THE three months reviewed in this summary saw the invasion of France and the intensification of war production in a number of fields. The Canadian civilian economy, therefore, continued to be faced with problems of shortages and pressure on prices.

Supply and Pricing Problems

The most serious problem was a general labour shortage. The tight labour situation resulting from the full use of the country's resources for war and civilian production was rendered critical by the coincidence of new requirements for war production with the return of farmers and farm workers from their temporary winter occupations (logging, meat packing, etc.), and an intensified recruiting drive for the armed forces.

The supply and pricing problems that arose during the quarter were largely the result of continued labour shortages. Shortages in the textile field required further scheduling of production and additional measures to control prices and qualities of clothing. A shortage of containers of all kinds was partly due to shortages of labour for lumbering and pulpwood cutting in former seasons. Most durable household goods remained in short supply owing to the continuing need to use labour and production facilities for munitions. This shortage necessitated production programs for various articles and improved control over the prices of used goods.

In the foods sphere, strawberries, raspberries and cherries were brought under price control and the tea and coffee ration was increased. Butter production continued to lag behind last year's level, and a second temporary reduction in the butter ration was made in June.

Review of Controls

Civilian supplies continue to be restricted and the outlook for the future is uncertain, depending to a large extent on the duration of the campaign in Europe. The situation may change suddenly and problems of reconversion may arise without much advance notice. In order to facilitate civilian production when it becomes possible the Board's Administrators are reviewing standardization measures, simplification and quantity restrictions and are removing those no longer essential. Many of these general restrictions have been rendered unnecessary by the development of "positive" measures, such as the allocation of raw materials and the scheduling of production.

In June a number of changes were made in the Board's order requiring a permit for the commencement, acquisition or expansion of a business and for new lines of business. Some relaxation of these regulations was possible in view of the fact that controls over the distribution of goods in short supply, and methods of pricing new goods were more fully developed, and the rate of expansion of war production had slowed down. The order was, therefore, modified to permit a change of ownership, the acquisition of more floor space and movement to new premises without a licence from the Board. Permits were still required for the commencement of a new business and for changes in the class of business and in the class of goods dealt in. However, the Board signified its readiness to grant such permits, on the understanding that the permit did not entitle the applicant to a quota of any goods in short supply.

This relaxation was desirable in order to enable ex-servicemen and others to re-enter or establish civilian type businesses and to enable plans to be made for the production of new lines of civilian goods when war requirements permit.

During the quarter under review the procedure for the procurement of Canadian relief supplies by the United Nations Relief and Rehabilitation Administration was worked out. The Prices Board is concerned with these arrangements since it is responsible for the supply of civilian goods in Canada and is, therefore, concerned with ensuring that exports do not reduce domestic supplies below essential civilian requirements. The Board takes part in the preparation of estimates of supplies that can be made available for relief. Arrangements have already been made for the supply of various materials and equipment by Canada, including woollen garments, farm machinery, canned fish and soap.

The Budget

In his budget speech on June 26 the Minister of Finance announced that the government desired "to give concrete evidence of the direction which it is endeavouring to follow in the formulation of post-war commercial policy", and also "to give to agriculture assurance in respect of some of the conditions under which it may expect to operate after the war". The budget, therefore, provided for the removal of customs duties and war exchange tax on agricultural machinery and parts. The Board took steps to see that the benefit of this reduction in costs would be passed on to the consumer by requiring importers and dealers to reduce their prices by an equivalent amount, except in the case of parts imported for further manufacture.

In view of the great shortage of United States dollars prevailing at the time, Schedule I of the War Exchange Conservation Act of December, 1940, prohibited the import of a long list of articles from non-sterling areas. Since then, however, Canada's foreign exchange position has improved, and the government decided that Schedule I should be repealed, since it was purely an emergency regulation. This amendment was scheduled to go into effect on August 1.

The Minister of Finance emphasized that "it must not be assumed that there will forthwith flow into this country a flood of imports. Because of the scarcity of supplies in the United States many of these prohibitions have been quite nominal in effect". In addition imports will have to sell under the domestic ceiling and it will not be profitable in many cases to buy at United States prices since "it is not proposed to extend import subsidies to luxury goods".

In July, the existing system of import control by permit was applied to the textile items affected by this amendment, namely: clothing and certain household textile articles. Canada's total imports of textiles from the United States are limited by quotas fixed by the War Production Board and permit control is necessary to assure that quotas are not exceeded and are filled in accordance with Canadian requirements. Imports of gasoline, motor vehicles and diamonds were also placed under permit.

Foods

Fresh Fruits: Ceiling prices were set for the 1944 crop of strawberries, raspberries and cherries, in accordance with the policy adopted in the summer of 1943 of controlling prices of fresh fruits wherever practicable. Prices were set below those prevailing last year but above the 1942 level and the normal seasonal drop in strawberry prices in the second half of June was provided for. In the late-producing areas maximum prices and markups were to rise again after July 15 as is normally the case. In July maximum prices were also set for apricots.

Meat—Lamb and Mutton: In the course of the quarter a system of standard prices at wholesale and retail was introduced for mutton, and all lamb and mutton pricing orders were revised and consolidated in an order effective July 3.

Wholesale and retail cuts of mutton were standardized, and specific maximum prices set, as had already been done in the case of beef, veal and lamb. Retailers were required to display a lamb and mutton price card supplied by the Board. The lamb price structure was revised so as to make maximum wholesale prices for all lamb except "spring lamb" uniform throughout the year.

Retail prices will fall if wholesale prices drop below the ceiling, since the order requires the retailer to reduce the maximum price of retail cuts by one cent per lb. for each drop of one cent per lb. in the average carcass cost of his purchases in the previous week. The same provision was made for spring lamb and mutton. The special spring lamb ceiling was made to terminate on July 15 instead of August 31, as last year, thus reducing ceiling prices during those six weeks.

Beef: Until the end of 1943 the amount of meat available in butcher shops was limited because of heavy demand both at home and for export. By the beginning of 1944, however, the removal of restrictions on pork for domestic consumption, together with the increased marketing of cattle, lambs and calves, and the bottlenecks in cold storage and transportation had resulted in surplus meat supplies.

Consumers were, therefore, in a better position to express their preferences and, under the existing price structure, front quarter beef tended to back up in the hands of packers and dealers, while the demand for hind quarter cuts was high.

Meat rationing was suspended early in March, but there was no appreciable change in overall consumer purchases and front quarter beef continued to move slowly.

Early in June the Board attempted to stimulate a more balanced marketing of beef by reducing the maximum wholesale and retail prices of fore quarter cuts and increasing the prices of hind quarter cuts. This adjustment involved no change in the average level of beef prices and was helpful in moving fore

quarters, though it did not completely restore the balance. No corrective could offer a complete solution during the warm weather when front quarter beef is always in poor demand.

Corn: In April a shortage of corn developed in the United States and was reflected in Canada since this country is dependent on imports and has since the war relied on the United States.

The United States War Food Administration took over the allocation of United States supplies and in Canada the Board froze stocks of corn in elevators in Ontario and Quebec and in the hands of processors, though sales to farmers for feeding purposes were still permitted. All available stocks, as well as supplies, obtained from the United States were allocated to the starch factories whose products include such important war materials as adhesives used in the manufacture of shipping cases, glue used in plywood veneers for aircraft, nitro starch for explosives, etc. A subsidy was arranged to cover extra transportation or other costs arising where corn was secured from other than normal sources.

Tea and Coffee: Increased shipments of tea and coffee resulted in a substantial improvement in stocks, and on May 1, 1944, it was possible to increase the ration by a further 40 per cent. The increase was achieved by doubling the amount of tea and coffee obtainable on each coupon and validating two coupons every month instead of every three weeks.

Evaporated Milk: Under the system of priority sales of evaporated milk introduced in October, 1943, special ration coupon cards were issued for infants and persons requiring evaporated milk for reasons of health. In "restricted areas"—areas in which sufficient fluid milk for general consumption was available—evaporated milk could be obtained only against coupons, while in "free areas"—deficient in fluid milk—sales without coupons were permitted after sufficient supplies had been set aside for the requirements of "priority users". In the period under review the supply improved to the point where "priority users" in free areas could obtain their requirements without coupons. There was thus a tendency for consumers in these areas to accumulate coupons which constituted a potential threat to future supply. It was therefore decided to suspend "rationing" in the free areas from June 1. In order to prevent a further flow of coupons from "free" to "restricted" areas a new issue of coupons in restricted areas was made in May and the old coupons became invalid on June 1.

Butter: The trend of butter production in the second quarter continued downward. At the same time the trend of butter consumption continued to rise. In order to conserve supplies and avoid an acute shortage in the winter a reduction in the butter ration was made in June by postponing for one week the validity date of the coupon due on June 1. A similar reduction had been made in April.

The Board also took steps to increase the supply of butterfat available for butter production by prohibiting the practice of manufacturing special high butterfat milk by the artificial addition of butterfat.

Textiles and Footwear

Supply: The general labour shortage which characterized the period under review was particularly marked in the civilian textile field and the efficiency of the available labour force continued to decline due to the lack of experienced help. Special local attention was given by National Selective Service to obtaining assistance for key firms located in tight labour areas.

The production of men's fine socks and children's socks and stockings was scheduled in April so as to meet essential requirements. This program followed similar programs previously introduced for work socks, underwear, children's wear and work clothing.

A reduction in the supply of worsted suitings obtainable from Great Britain threatened the supply of men's suits. In order to obtain the greatest possible domestic output the wool administration of the Board scheduled the production of worsted suitings in June, directing manufacturers to produce stated amounts by the end of the year. This program will increase domestic production and it is expected that the balance of requirements may be obtained from the United Kingdom.

In May, officers of the Board developed a program for the production of $6 million worth of heavy woollen outer garments for UNRRA in late 1944 and in 1945. This was made possible by a substantial reduction in the requirements of the armed forces compared with 1943. Production is to be scheduled by WPTB so as not to disturb essential domestic civilian and military production. The plan was approved by the Combined Production and Resources Board and accepted by UNRRA in June. Military fabric requirements for 1944 were revised upward during the half year but not sufficiently to affect production for civilian account except in the worsted field.

Price and Quality: To facilitate investigation of complaints regarding quality deterior-

ation, manufacturers of a wide range of clothing are required to show on every article their WPTB license number or name, and the style number and size of the garment. This provision was extended in the quarter under review to manufacturers of men's and boys' woollen fine clothing, sports wear and work garments, to waterproof or rubberized clothing and to footwear.

Price control was further improved in June by requiring retailers to attach a price tag to practically every item of men's, women's and children's clothing offered for sale, except when displayed in a shop window.

Revision of Restrictions: In accordance with the Board's policy of removing unnecessary or unworkable restrictions, simplification restrictions governing the manufacture of women's, misses' and children's wear were reviewed and revised during the quarter. The freezing of styles was terminated and evening wraps, riding jackets, three-piece suits and some of the other articles that had been prohibited were again permitted, since production of these garments had never been substantial. Short "coatees" were permitted since they help to conserve lining materials. The major material and labour saving restrictions were continued and their enforcement improved.

Restrictions on the manufacture of flannelette garments which had had the object of increasing the supply of flannelette for essential children's garments were removed during the quarter. Their general purpose of assuring output of needed garments was now accomplished by production directives controlling the manufacture of children's garments, and by the allocation of flannelette supplies by the administrator.

Since children's shoes cannot be efficiently repaired with half soles, the use of full leather soles was permitted in June for juvenile shoes up to size 3. The same exemption was provided for the repair of loggers' boots and cowboy boots, which also require full leather soles. This relaxation was designed to prolong the life of children's shoes by facilitating efficient repairs and to conserve leather by reducing the high wartime demand for new children's shoes.

Use of Containers

In wartime the great increase in the country's physical output has led to a corresponding increase in the need for containers of all kinds. Overseas shipments of war goods have created new demands for shipping cases and Canada has exported boxes and shipping cases to her allies.

During the quarter a serious shortage of containers of all kinds developed. While in the past it has been possible to develop substitutes when a particular packaging material was not available, the shortage has now spread to all materials and has necessitated control over the use of all containers by the Board. Until the supply position becomes easier increasing emphasis on conservation and re-use will be necessary.

Metal and Glass: The first serious shortage occurred after Pearl Harbour when tin supplies from East Asia were cut off. The loss of these supplies and the shortage of steel plate due to heavy war requirements necessitated the Board's container conversion program which involved the transfer of a wide range of commodities from metal to glass and paper packages. Metal containers were restricted to goods for which no suitable alternative container could be manufactured.

This conversion program made heavy demands on the glass and paper package industries, and the limits set to their output by available productive facilities, labour and raw materials began to be felt in the course of 1943. Simplification and standardization of metal cans, glass containers and paper boxes and shipping cases were imposed by the Board so as to promote greater output and more efficient use of containers.

In the fall of 1943 there was some relaxation of restrictions on metal containers owing to the growing shortage of glass and paper packages and to the small crop of the fruits and vegetables for which tinplate was needed. In the winter there were signs of an easing in the supply of steel plate, and on April 1, 1944, quotas for metal containers were revised so as to relieve the glass, wooden and paperboard container industries of some of their burden and to compensate for the small pack of fruits and vegetables in 1943. Apple sauce, beets, beans, carrots and other products were again permitted to be canned, and quotas for spiced pork products and other foods were increased. Metal containers were permitted for home canning by consumers and a number of non-food articles were moved back into metal containers.

Steel plate supplies tightened again in the spring and summer and in July an order was issued, safeguarding tin plate supplies for essential fruits and vegetables by restricting temporarily the packing of various other foodstuffs during the third quarter of 1944.

In spite of the standardization of bottles and jars the glass container industry has had great difficulty in meeting the greatly increased wartime demand, largely arising from the container conversion program. In the

spring of 1944, the Board found it necessary to allocate supplies of bottles and jars, setting quotas for different products in accordance with their essentiality. The re-use of old containers was promoted by various methods, including an increase in the deposit charge on beer bottles.

Paperboard Boxes and Shipping Cases: Shortage of labour in the pulpwood industry resulted in critical shortages of paper boxes and fibreboard and corrugated shipping cases in the fall of 1943. The Board took over the allocation of raw materials and non-essential types of containers were eliminated. Priorities for the delivery of shipping cases were established and quotas for packing different commodities were set.

Nevertheless the shortage of these containers became increasingly serious, largely owing to an inadequate supply of waste paper for paperboard production. In April the system of priorities for shipping cases was revised, the administrator's control over allocation was improved, and quotas for various products were reduced. The administrator of shipping cases asked manufacturers and others to re-use containers as much as possible and to use larger containers and fewer interior partitions whenever feasible.

In May a similar system of priorities and quotas was established for paper boxes and for a variety of articles paperboard packages were prohibited. Orders for war departments and for packaging perishable foodstuffs were given priority over others.

Wooden Containers: The shortage of wooden fruit baskets, shipping cases, etc., became critical in the spring of this year. The industry's annual production is planned in the fall and last fall a considerable decline in war orders was anticipated. In the spring, however, war requirements increased considerably and an added strain was put on the industry by the necessity, in many instances, of repacking goods in smaller containers suitable for carrying ashore from landing barges.

The resulting shortage of containers for domestic use made it necessary in June for the Board to take control of the allocation of containers to ensure that priority was given to containers for government departments and for essential foodstuffs.

The production of baskets was stimulated by bulk purchases of basket bottoms which were resold to basket manufacturers at prices appropriate to their ceilings. In view of the acute shortage of wood veneers, substitute fibreboard cheese box bodies were bulk purchased to encourage cheese box production. As in the previous year, subsidies were arranged to maintain the production of fruit and vegetable containers.

Metals

Farm Machinery: Production of farm machinery in the 1944-45 season was planned in consultation with the Wartime Industries Control Board and the War Production Board in the United States. Production and import quotas for many articles were higher than those fixed for the 1943-44 season, and repair parts could be produced and imported without restriction.

Total tonnage to be produced under the program was estimated at about 241,000 tons. This includes a special allocation of farm machinery for returned service men established on farms under the Veterans' Land Act. In addition, plans were made for the production of 20,500 tons of farm machinery in the current quota period as part of Canada's share of UNRRA's relief program.

Owing to rising costs and diminishing war contracts, manufacturers of farm machinery have experienced increasing difficulty in selling under their ceiling prices. Some relief was provided by the government's decision to remove war exchange tax and customs duties on imported farm equipment and parts (see p. 1057) since manufacturers who import and assemble parts, selling the completed machine, obtain the benefit of the reduced cost of parts. In addition, to avoid subsidy payments, the war exchange tax was removed, effective April 1, on a wide range of raw materials and components when imported by a manufacturer for use in the manufacture of farm implements.

Household Appliances: During the quarter new programs for landing craft, ships, shell cases, etc., precluded any considerable resumption of civilian production. However, a limited number of essential household appliances continued to be produced under plans worked out by this Board and approved by the Wartime Industries Control Board. Programs for the current year included 23,100 washing machines, 110,000 electric irons, 13,000 electric ranges, 7,500 rangettes and 75,000 hot plates, as well as 35,000 ice boxes (made of masonite), 3,500 water heaters and 20,000 heating pads. An allocation of materials for the production of nickel silver flatware was approved, and, in June, the production of 17,500 sewing machines was scheduled. These programs are objectives but their fulfillment cannot be regarded as assured—it will depend on the future trend of war production and the availability of labour, which is now the chief bottleneck.

A critical shortage in the supply of hot air furnaces became evident in June, due to an increase in the issue of construction permits, and a decline in furnace production resulting from shortages of labour and sheet steel. It was necessary, therefore, to safeguard supplies of furnaces for replacements and essential installations in new buildings. Sales to consumers were placed under permit control, and manufacturers were required to retain 5 per cent of their stocks for allocation to essential users by the Administrator.

The shortage of new household appliances, furniture, bicycles, etc., made it particularly important to ensure the observance of ceiling prices on used goods. Regulations for used goods not dealt with in specific orders were made in May, and provided for the display of a price tag on all used goods priced at $15.00 or more. The maximum price of used goods in working order is either the basic period price or 80 per cent of the current price of the same or similar new goods, whichever is the lower.

Newsprint

Owing to the demand of United States publishers for lighter weight newsprint, the production by Canadian mills of newsprint of 30-pound basic weight, as well as the customary 32-pound paper, was planned on an experimental basis for May and June. This arrangement was made jointly by the United States War Production Board and the Wartime Prices and Trade Board. The previous Canadian commitment to deliver 200,000 tons of 32-pound newsprint to the United States during each month in the first six months of 1944 was suspended. Instead the commitment was made variable, depending on the proportionate amounts of 32-pound paper and 30-pound paper that were ordered and varying from 200,000 tons per month if no 30-pound paper was ordered to 182,500 tons if no 32-pound newsprint was ordered. This reduction was made necessary by the fact that the light-weight paper reduced the tonnage output of those newsprint machines which had been operating at capacity. In addition, the wood extension program introduced earlier in the year by the Canadian industry could not be applied when mixed weights were produced. Owing to the higher cost of producing the light-weight paper the price was set $4.00 per ton higher than the price of 32-pound newsprint in both the United States and Canada.

Operations during May and June substantially confirmed the estimates on which the variable quota had been based. In June, the problem was studied by a special committee of United States publishers appointed by the War Production Board which met with Canadian officials and representatives of the Canadian industry. The committee recommended that for the third quarter of 1944 Canada be asked to return to the previous commitment of 200,000 tons of 32-pound paper per month, instead of a lower commitment for mixed weights. The committee further suggested that the newsprint tonnage quotas of users of 30-pound newsprint should be cut down to compensate for the increased yardage per ton, which would remove all inducement to order 30-pound newsprint. These recommendations were accepted by the War Production Board's Newsprint Industry Advisory Committee and implemented by WPB. Accordingly, during the third quarter of 1944 deliveries from Canada to the United States will be at the rate of 200,000 tons per month.

Prices, Retail and Wholesale, in Canada, July, 1944

Cost of Living, Prices of Staple Articles, and Index Numbers, as Reported by the Dominion Bureau of Statistics

THE Dominion Bureau of Statistics cost-of-living index for July 3, 1944, remained unchanged from the June level of 119·0 (1935-39=100·0). This represented a wartime increase of 18·1 per cent. In July, foods moved up 0·9 points to 132·0, due to higher prices for potatoes, lamb, the better quality cuts of beef, carrots and eggs. Declines were noted for the cheaper cuts of beef, and cabbage. Reflecting general reductions in domestic electricity rates in the province of Quebec as well as scattered decreases in Prince Edward Island, New Brunswick and Ontario, the fuel and lighting index dropped from 112·5 to 108·9 between June 1 and July 3. Fractional price declines for cleaning supplies lowered the homefurnishings and services index 0·1 to 118·3, while the remaining groups were unchanged; rentals continued at 111·9, clothing at 121·5, and miscellaneous items at 109·0.

Retail Prices

The accompanying table on retail prices of staple foods, coal and rentals (Table IV) is

prepared each month by the Dominion Bureau of Statistics. It shows the prices of these commodities in 64 cities across Canada at the date under review.

The prices of the staple food items included in the table are all used in the calculation of the index of the food group in the official cost-of-living index, and give a reasonably complete picture of prices throughout Canada as used in the calculation of the index of this particular group. They are the averages of prices of goods reported to the Bureau by independent stores. They do not include prices from chain stores. As the movement of chain store prices agrees closely with the movement of independent store prices it was considered that the extra work and cost involved in compiling and printing a separate table for chain store prices were not warranted although chain store prices are used in the calculation of the index.

The coal and rental figures given are also used in the official cost-of-living index. Quotations are shown for anthracite coal in the provinces of Ontario and Quebec, and for bituminous coal in the rest of Canada, where this type of coal is more generally used.

Rental figures given in the table are typical of rents being paid by tenant households in each city. In some cities, flats and apartments are more numerous than single houses; in such cases rents for flats and apartments are shown while figures for other cities represent single-house rentals. In all cases figures represent rents being paid, not the rent asked for vacant dwellings. The basis of these figures is the record of rents for every tenth tenant-occupied dwelling collected in the 1941 census of housing. The movement of rents since that time has been determined from reports submitted by real estate agents. The 1941 census averages have been adjusted in accordance with the change indicated by these reports, and the printed figures show a $4 spread centred around each city average.

COST OF LIVING AND WHOLESALE PRICES IN CANADA 1914-1922 AND 1939-1943

BASE: PRICES IN JULY, 1914 AND IN AUGUST, 1939=100

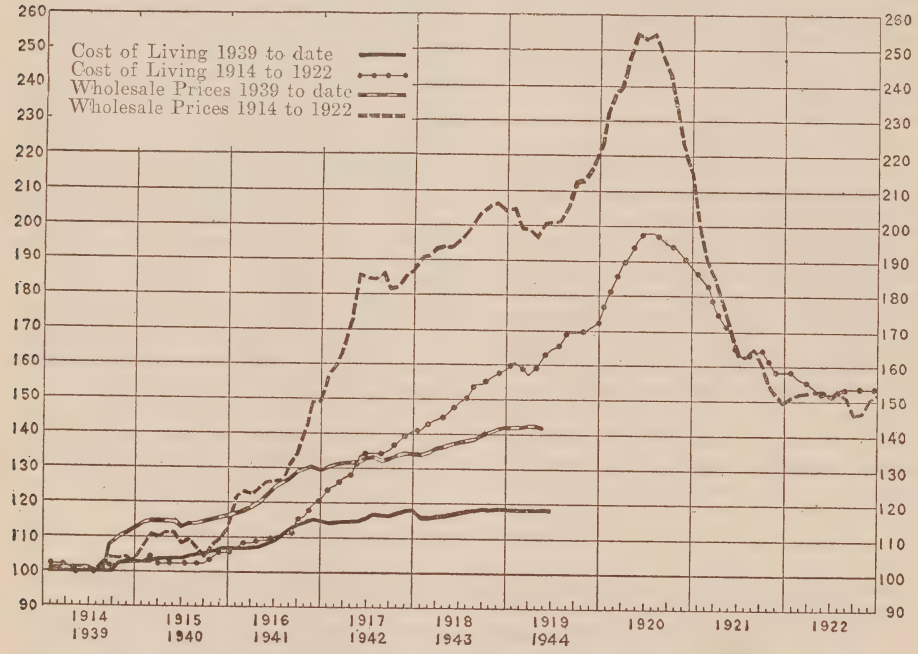

Table III is designed to show the variation in the retail prices of commodities since the beginning of the war. Taking the Dominion average retail price of each of the commodities at August, 1939, as 100, the table shows the percentage changes in prices since that date; also the actual price on the first of the current month.

The Dominion Bureau of Statistics issues an index number of retail prices of commodities included in the cost-of-living index excluding rents and services. This index is included in Table I.

The accompanying chart shows the trend of the cost of living and wholesale prices since the beginning of the present war compared with the trend in the period of 1914-1922.

Explanatory Note as to Cost-of-Living Index

The index number of the cost of living was constructed on the basis of a survey of expenditure by 1,439 families of wage-earners and salaried workers with earnings between $600 and $2,800 in 1938. The average expenditure was $1,413.90, divided as follows: food (31·3 per cent), $443; shelter (19·1 per cent), $269.50; fuel and light (6·4 per cent), $90.50; clothing (11·7 per cent), $165.80; home furnishings (8·9 per cent), $125.70; miscellaneous (22·6 per cent), $319.40.

The last-named group includes health (4·3 per cent), $60.80; personal care (1·7 per cent) $23.90; transportation (5·6 per cent), $79.30; recreation (5·8 per cent), $82.10; life insurance (5·2 per cent), $73.30. Other expenditure not directly represented in the index brought the total family living expenditure to $1,453.80.

A description of the cost-of-living index, how it is calculated, and the complete list of items included in each of the principal groups, food, fuel, rent clothing, home furnishings, etc., with their weights, was published in the Labour Gazette for July, 1943, page 1057.

The control of prices under an Order in Council of November 1, 1941, P.C. 8527, became effective on December 1, 1941 (L.G., 1941, page 1371). The order provided that no person should sell any goods or supply services at prices higher than during the period September 15 to October 11, 1941, except under the regulations of the Wartime Prices and Trade Board. The activities of the Board in the operation of the price control policy are summarized from time to time in the Labour Gazette under the title, *Activities of the Wartime Prices and Trade Board.*

Wholesale Prices, July, 1944

The Bureau of Statistics composite index of wholesale prices remained unchanged at 102·5 in July for the third consecutive month (1926=100·0). Group changes were small, animal products declining 0·2 to 105·9 with losses for steers, calves, lambs and muskrat skins outweighing upturns for dry shore codfish, hogs, eggs, and beaver skins. An equal decline in the fibres, textiles and textile products group index to 91·7 reflected lower quotations for botany serge, while the non-metallic series index change from 102·5 to 102·3 was due to lower prices for manufactured gas and crushed stone. British Columbia run-of-mine coal moved up fractionally in this section. Iron and steel products declined 0·1 to 117·0, and the chemicals and allied product index of 100·0 was also 0·1 lower. Vegetable products recorded the only increase, rising fractionally from 95·0 in June to 95·1 in July. Higher prices were recorded for potatoes, lemons and oranges in this group while losses were noted for rye, onions, hay and rosin.

Canadian farm product prices also continued unchanged in July at 102·0. Animal products were easier, an index for this series dropping 1·2 points to 119·0, due mainly to decreases for livestock and poultry. Eggs were moderately firmer. In the field products section a gain of 0·7 to 91·8 was due to upturns in potatoes which overbalanced lower quotations for onions and hay.

TABLE I.—DOMINION BUREAU OF STATISTICS INDEX NUMBERS OF THE COST OF LIVING IN CANADA

PRICES AS AT THE BEGINNING OF EACH MONTH

(b) The basis of these figures is the record of rents collected in the 1941 census of housing. The movement since then has been determined from reports from real estate agents, the census averages being adjusted in accordance with the changes indicated by these reports.

(c) Rents marked (c) are for apartments or flats. Other rent figures are for single houses. Apartment and flat rents have been shown where this type of dwelling is more common than single houses.

Accidents and Accident Prevention

Fatal Industrial Accidents in Canada During the Second Quarter of 1944

DURING the second quarter of 1944 there were 286 fatal industrial accidents, including deaths from industrial diseases, reported by workmen's compensation boards, etc. This compares with 344 fatal accidents during the second quarter of 1943. Of the 286 fatalities in the period under review, 62 occurred in April, 117 in May and 107 in June. Fatal accidents during each year are recorded by quarterly periods in the issues of the LABOUR GAZETTE for May, August and November of that year, and in February of the following year.

The supplementary lists of accidents not reported in time for inclusion in the reports covering the periods in which they occurred, contain 38 fatalities for the first quarter of 1944 and nine fatalities for 1943.

In this series of reports, it is customary to record industrial accidents under the dates of their occurrence, and fatal industrial diseases under the dates on which they prove fatal.

Information concerning accidents was received from the provincial Workmen's Compensation Boards, the Board of Transport Commissioners, certain other official sources, as well as from the correspondents of the LABOUR GAZETTE and newspaper reports.

Classified by groups of industries, the fatalities occurring during the second quarter of 1944 were as follows: agriculture, 31; logging, 27; fishing and trapping, 19; mining, non-ferrous smelting and quarrying, 34; manufacturing, 59; construction, 20; central electric stations, 7; transportation and public utilities, 63; trade, 8; finance, 1; service, 17.

Of the mining accidents, 25 were in "metalliferous mining," six in "coal mining," and three in "non-metallic mineral mining and quarrying, n.e.s."

Of the accidents in manufacturing, one was in "vegetable foods, drink and tobacco," one in "animal foods," three in "textiles and clothing," one in "leather, fur and products," one in "rubber products," eight in "saw and planing mill products," two in "wood products," two in "pulp, paper and paper products." 20 in "iron, steel and products," three in "non-ferrous metal products," seven in "non-metallic mineral products," three in "chemical and allied products," and seven in "shipbuilding."

In construction there were nine fatalities in "buildings and structures," seven in "highway and bridge," and four in "miscellaneous."

In transportation and public utilities, there were 30 fatalities in "steam railways," two in "street and electric railways," 10 in "water transportation," four in "air transportation," 14 in "local and highway transportation," one in "storage," one in "telegraphs and telephones," and one in "express."

In trade there were four fatalities in "wholesale," and four in "retail" trade.

Of the fatalities in service, 14 were in "public administration," one in "laundering, dyeing and cleaning," and two in "personal, domestic and business."

There was no serious disaster resulting in the loss of a large number of lives during the period under review. Accidents involving the loss of two or more lives were as follows:

When three fishing boats were swamped in a storm, off Richibuctu, N.B., on June 13, four fishermen were drowned from one boat, four fishermen from another boat, and two fishermen from the third boat. On the same day, two fishermen were drowned from a motorboat in a storm, off Cape Traverse, P.E.I. Two lobster fishermen were drowned when a skiff capsized, in Tracadie Harbour, N.S., on May 27.

When a speeder jumped a track on a logging railway, while transporting workmen, near Kapuskasing, Ontario, a roadmaster and two sectionmen were killed, on June 7. Two log drivers were drowned in a river from a log drive, near Blind River, Ontario, about May 26; and two loggers were drowned when a canoe capsized, near Courtenay, B.C., on June 5.

On May 19, two miners were asphyxiated by gas in a mine, near South Porcupine, Ontario. A well driller and a farmer were asphyxiated by gas in a well, near Vermillion, Alberta, on May 21.

On May 15, a locomotive exploded, near Cayuga, Ontario, killing an engineer, a fireman and a brakeman. Three trackmen lost their lives, near Rodney, Ontario, on May 19, when a train struck a jigger on which they were riding. Two sectionmen were killed when struck by an engine, at St. Constant, Quebec, on June 10.

When a plane crashed while en route from Dorval, Que., to Newfoundland, a pilot and a radio officer were killed, on May 20.

A truck driver and a mechanic were killed in Montreal, Que., on April 25, when a bomber plane crashed and struck their truck.

While fighting bush fires, near Webster, Alberta, two forest fire fighters were burned to death on May 4; and two fire rangers were drowned from a canoe, north of Fort Coulonge, Que., on May 17.

Supplementary Lists of Accidents

A supplementary list of accidents occurring during the first quarter of 1944 has been compiled which contains 38 fatalities of which one was in agriculture, five in logging, three in mining, non-ferrous smelting and quarrying, 16 in manufacturing, two in construction, eight in transportation and public utilities, and three in trade. Five of these accidents occurred in January, eight in February, and 25 in March.

A further supplementary list of accidents occurring in 1943 has been made. This includes nine fatalities, of which one was in logging, three in construction, four in transportation and public utilities, and one in trade. One of these accidents occurred in February, one in March, one in April, one in October, two in November, and three in December.

Machinery-Guarding Under British Factories Act

A NUMBER of cases have recently come before the British Courts in which the duty imposed on the employer by the Factories Act, 1937, to fence machinery securely had been disregarded. The firm in each case was convicted and fined.

This negligence of employers resulted in hair and scalp injuries to five women when their hair became entangled in machinery. Three of these five cases involved unfenced or insecurely fenced stockbars. The Factories Act stipulates that any part of a stockbar which projects beyond the headstock of a lathe shall be securely fenced unless it is in such a position as to be as safe as if securely fenced. There was no guard in one instance, in another the stockbar projected beyond the guard and in the third the guard was not in

position at the time of the accident, and even if it had been, it probably would not have prevented the injury, for it was only a shallow guard in the shape of an inverted trough. In only one of these five cases was the woman's hair protected by a cap, but on this subject the Industrial Accident Prevention Bulletin issued by the British Ministry of Labour and National Service notes

> that the law says the stockbars must be fenced—not the operators' heads and that, even if it did not, a guard fixed on a machine is infinitely better than some protective device stuck on the worker. It is a basic principle in safety to prevent the danger at its source whether it be mechanical, electrical or chemical. The attachment of a safety device to the worker is, at best, an uncertain second line of defence and, at worst, a plain admission of defeat.

One fatality resulted from a painter being caught in an unfenced shaft which, although well above ground level, was near a corrugated iron runway connecting two sheds which he was painting. The Factories Act requires:

> Every part of the transmission machinery shall be securely fenced unless it is in such a position or of such construction as to be as safe . . . as it would be if securely fenced.

It was ruled that painting and maintenance work are entirely normal in a factory and therefore the shaft could not be considered "safe by position."

Another example of unfenced machinery causing an accident occurred when a man climbed a ladder to adjust some cloth at the intake rollers on a scouring machine in a dye-works, not knowing that he could do it from the ground. The firm was convicted for failure to comply with the law. In another case a woodworking machine had a sound guard which apparently was never used, the injured worker never having been instructed as to its use. In still another case, the worker walked between a leather-cleaning machine and the wall, a 30-inch space, in order to adjust a belt. There was no guard and when his clothing caught on a revolving shaft, he was killed. It was pointed out that the machine could have had a guard consisting of a complete enclosure of the back of the machinery with access through a gate interlocked with the starting mechanism.

Work Accidents in United States Shipyards, 1943

THE spectacular development of the wartime shipbuilding industry in the United States provides a somewhat unique medium for an analytical study of work accidents. Such a study, covering the year 1943, has been carried out by the Bureau of Labour Statistics at Washington and some of the more significant results of the study were published in the midsummer issue of *Industrial Safety Survey*, quarterly publication of the International Labour Office.

In a brief review of the position of the American shipbuilding industry since the outbreak of war, the article points out that the findings are noteworthy for at least two reasons: (1) shipbuilding was at an all-time peak, and (2) a nationwide co-ordinated attempt was made to curtail workers' injuries.

Problem of Providing Enough Ships

At the outbreak of war in 1939, the merchant fleet of the United States consisted of about 1,100 vessels, aggregating approximately 10,500,000 tons dwt., most of which had been built about 20 years before. When the United States entered the war in December, 1941, the merchant fleet had been augmented by foreign vessels which had been seized in American ports, or acquired by negotiation or requisition. These brought the dead weight tonnage to about 12,000,000 tons.

Shipbuilding was stepped up during the early months of 1942, but by July it was clearly failing to keep up with enemy sinkings and the net merchant tonnage had fallen to about 11,750,000 tons dwt. Moreover, the losses of the other Allied nations were far in excess of the tonnage they produced. It was imperative that exceptional efforts should be made to increase shipyard output. This involved two problems: (1) the obtaining of essential materials, and (2) the development of a much larger working force. A year later, in July, 1943, the American merchant fleet totalled about 2,000 ships aggregating about 20,000,000 tons, an increase of nearly 100 per cent in 12 months. New ships were being turned out at an average rate of about one a day, and this was subsequently stepped-up to an average of five ships a day.

Augmented Working Force and Accident Ratio

The article states that to achieve this increased production, employment in the shipyards had been increased from about 69,000 in 1939, to more than a million in 1943. For the most part the new labour force had no previous experience in shipbuilding. It came

from all kinds of industries and comprised young and old, men and women. These had to be trained and thrown into active production with the least delay possible. Such an increase in the employment of inexperienced workers created a serious problem in accident prevention. This was rendered still more acute by the necessity for replacing old methods of shipbuilding with new techniques, which, in turn, introduced new accident hazards. In 1942, there were 33·1 disabling injuries per million employee-hours, as against 26·4 for 1941 and 20·6 in 1940. A conference of all shipyard safety and health directors was called in the autumn of 1942, under the joint auspices of the Maritime Commission and the Navy. This conference worked out and adopted a set of minimum requirements for the safety and health of shipyard workers, which were later approved by the Navy and the Maritime Commission, and were made mandatory on every contract shipyard engaged in building ships for the government.

Minimum Safety Requirements

The main features of the "Manual of Minimum Requirements" were as follows:

"1. As the name implies, the manual covers only minimum requirements for safety and health.

"2. Yards with less than 2,000 to 3,000 workers need not have full-time physicians. But yards having 3,000 to 5,000 workers should have two full-time physicians, and one additional physician for each 5,000 men.

"3. Yards employing up to 5,000 workers should have six full-time nurses in the main dispensary, and three additional nurses for each additional 5,000 workers. First-aid stations are to be staffed by additional nurses.

"4. Physical facilities required are indicated in considerable detail, covering such items as treatment rooms, X-ray room, first-aid rooms, ambulances, etc.

"5. Specified health precautions are required for certain types of operations, particularly where the hazards involve dusts, fumes, acid gases and mists, solvents, fiberglass, asbestos, and other chemicals or substances which may occasion dematitis and other types of industrial diseases.

"6. On the accident-prevention side of the program, a safety director is required in every shipyard. The director is to be responsible directly to the highest ranking managerial executive or his designated representative.

"7. In addition to the safety director, an assistant director is required in yards having 3,000 or more workers. One safety engineer is to be added for every 1,500 employees. Thus a yard with 35,000 employees should have a safety director, an assistant director, and 21 safety engineers or inspectors.

"8. The functions of the safety director and his staff are outlined in some detail and follow well-established safety practices, ranging from responsibility for safe working conditions and employee training to the required types of reports.

"9. In addition to the reports to be kept within the yard for the guidance of the management and the safety director, the requirements call for two reports to the Maritime Commission. One of these is the monthly injury summary, which contains the exposure and injury data necessary for the computation of the injury frequency rate in each yard. The other is the supervisor's report, which is to be made out for each disabling injury. In this form the emphasis is on accident cause analysis and method of prevention. The following questions are the core of this form:

"(6) Describe accident or case fully (what injured was doing, what happened, etc.)
(7) What unsafe condition caused accident or occupational disease? (Specify: broken ladder, defective staging, lack of ventilating equipment, etc.).
(8) What was done wrong (unsafely) that caused accident or occupational disease? (Specify: failure to wear provided goggles, overloading crane, using mushroomed chisel, failure to use respiratory protective equipment, etc.)
(9) Describe resulting injury or occupational disease.
(10) What have you done to prevent similar occurrences?
(11) What do you recommend to prevent similar occurrences?

"The purpose of this form was threefold: (1) to provide the supervisor with an adequate form on which to record each disabling injury; (2) to require the supervisor to make an analysis of the unsafe factors in each accident, and at the same time to reveal to the safety department whether he understood his accident problems and had taken the proper remedial measures, or whether he required attention from the safety men; and (3) to provide the Maritime Commission—which administered the program—with records which would permit adequate direction.

"10. Specific safety provisions are laid down for a large variety of hazards—welding, burning, housekeeping, lighting, etc. In the execution of the safety and health program, the Maritime Commission utilizes a director for safety, and a director for health and hygiene. The latter is assisted by a small staff of medical men who engage in studies and investigations of the health conditions in shipyards. The safety staff consists of four regional consultants whose duty it is to work with the safety directors in the various yards."

The report forms were submitted monthly by each yard to the U.S. Bureau of Labour Statistics for determining: (1) the relative standing of each yard, month by month, and (2) the types of conditions or unsafe practices which give rise to important classes of accidents, and which appear to predominate in specific yards. Injuries requiring only first aid which result either in permanent impairment or loss of time were excluded from the count. The information was tabulated and submitted to the yards reporting and to the Maritime Commission. In addition, the Bureau set up a card index system covering accident types, unsafe conditions and unsafe acts for each yard, so as to provide means for quick reference by the safety consultant.

Reduction in Accident Incidence

The study indicated that "the intensified safety program produced a marked decline in the incidence of work injuries during the latter part of 1943. The private shipyards finished the year with an average frequency rate of 31·2. Maritime Commission data indicate that shipyards building merchant ships had an average of 32·6 disabling injuries per million employee hours in 1943, as against an average of 37·9 in 1942, the decline being most marked in the closing three months of 1943." The frequency rate in the private yard under Navy contracts and building various types of warships was even better, the average for the latter being 28·8.

General Statistical Findings

Thirty-five per cent of all injuries reported were due to workers being struck by moving, sliding or falling objects: fully one-third of these injuries could have been prevented by the use of proper protective equipment. Twenty-one per cent of all injuries were due to falls: the largest proportion of these resulted from unguarded stagings, deck openings, etc. Slips and over-exertion, usually resulting in strains and occasional hernias, constituted the accident type in 16 per cent of the reported cases: most of these were directly traceable to "poor housekeeping". Striking against objects caused ten per cent of the accidents reported which were nearly equally divided among "unsafe conditions due to lack of protective equipment, poor housekeeping and defects of agencies." About eight per cent of the reported accidents were due to contact with heat or flames: many of these could have been prevented if workers had worn suitable goggles. Workers being caught in or between objects accounted for six per cent of the accidents; inhalation, absorption or ingestion of poisonous substances for two per cent and miscellaneous causes for another two per cent.

Among the conclusions reached as a result of the study, it is stated that in most cases both an unsafe condition and an unsafe act contributed to accidents. Failure to wear protective equipment was the most outstanding type of unsafe act and was involved in 19 per cent of all reported cases. Improper lifting methods, or taking an insecure grip on objects to be lifted—most frequently, the object being a tool—caused some 16 per cent of the total accidents classified under "unsafe acts". Eye injuries constituted 16 per cent of all reported injuries during 1943. In 11 per cent, the injuries were caused by foreign particles striking the eye and the other five per cent consisted of welder's flash cases. During the first seven months of 1943, crane accidents amounted to only five per cent of the reported disabling accidents, but they caused more severe accidents than any other mechanical equipment.

United States Bulletins on Industrial Safety

SAFETY Subjects is the title of a 152-page bulletin recently published in the United States.* Much of the material was originally prepared to assist State labour departments in training factory inspectors. Since 1941 it has also been used in mimeographed form in the War Safety Training Program sponsored jointly by the Department of Labour and the Office of Education for supervisors and workers in war plants (L.G., 1943, p. 1330).

Safety subjects dealt with in the 25 chapters in the booklet range from forms of safety organization, safety psychology, plant housekeeping maintenance and safety inspection to accident reports and records. The causes of accidents are analyzed and methods of discovering and correcting hazards and appraising safety performance suggested. Considerable attention is given to a discussion of ways of safeguarding various types of machinery, preventing falls and handling materials safely. There is a brief history of the industrial safety movement and the development of legal and voluntary safety standards by State governments and such organizations as the American Standards Association is described. Other chapters dealt with electrical hazards, explosion dangers and fire prevention. Questions on the subject matter of each chapter are included and reference is made to publications of the National Safety Council, American Standards Association and other organizations promoting safety.

It is emphasized throughout the bulletin that safety pays in dollars and cents as well as in improved employee morale and public goodwill. "Greater safety usually means greater production largely because it involves better control". This is particularly true in mass-production industries where planning and control are very important. The indirect

**Safety Subjects*, U.S. Department of Labour, Division of Labour Standards, Bull. No. 67, Jan., 1944, U.S. Government Printing Office. 20 cents.

cost of accidents have been estimated to be at least four times as great as the medical and compensation costs, and the average cost to the employer for each lost-time accident has been calculated to be about $950. That a large proportion of accidents are preventable has been proved by the records of a number of large firms and such industries as railroads, automobiles, steel, and petroleum, but it is stated that

> . . . any large reduction in the annual injury toll must come through greatly improved safety performance in the multitude of small firms and businesses which, despite the prominence of our industrial giants, still account for a large majority of our industrial employment.

Management's Responsibility

Great stress is laid on management's responsibility for removing physical hazards, training workers in safe methods of work and organizing accident-prevention work. The relative merits of different types of plant safety organization are discussed but the conclusion is that "active executive interest and direction leads to an effective program regardless of the form of safety organization." Safety committees with worker representatives promote safety consciousness and bring together different viewpoints but are usually weak in execution. "A committee will take its work seriously," it is pointed out, "in proportion to management's attitude toward it." A safety director will be effective only if he can work well with foremen and other executives and is given sufficient authority to carry out accident-prevention work.

Since "most injuries result from a combination of physical hazards and faulty behaviour", accident prevention involves constant efforts to discover and remove hazards and train workers in safe methods. While general safety education by means of posters, contests, meetings, etc. is regarded as important in training workers, it must be supplemented by intensive individual contact through foremen trained in safety and in methods of dealing with workers. "It is as much the supervisor's duty to see that men work safely as it is to see that they work effectively."

Hazards can be discovered by careful and regular inspections, analysis of jobs and investigation of all lost-time accidents. Prompt corrective action must follow such inspections and investigations. Whenever an accident is traced to a particular hazard or bad practice, the whole plant should be inspected for similar conditions elsewhere. The qualifications and functions of inspectors are described and the role which State safety inspection services should play in educating and assisting small employers is stressed. However a warning is issued:

> Without carefully worked out and well-maintained means of training and instructing its safety inspectors, no State can hope to render a safety service that will reasonably measure up to the need or opportunity.

"An inspector," it is observed, "must not only know his subject, but he must be salesman enough to sell it to sometimes unwilling executives."

Chief Sources of Injuries

Statistics show that the chief sources of injuries are handling objects, the operation of mechanical equipment, the use of tools and falls. Separate chapters are devoted to methods of preventing accidents from each of these sources. It is stressed that good housekeeping, adequate maintenance and foresight in planning the factory to ensure sufficient working space, head room, storage facilities and room for traffic can prevent many accidents and are a sign of competent management.

In the manufacturing industries machinery is a major source of injuries, a high proportion of which result in permanent disabilities. The guarding of all dangerous machinery is strongly urged and a detailed description of suitable guards for various types of metal working and woodworking machines is included. It is pointed out that

> the correct kind of guards invariably increase production through enabling machines to be operated more steadily or faster, or both.

Condemnation is expressed for the attitude "that it is sufficient to guard a machine so that an operator faithfully obeying carefully worked out rules of safe operation can escape injury". Many operators are not adequately trained or supervised and even the most careful operator will make a mistake occasionally. Guards should be an integral part of the machine installed when it is manufactured rather than as an after-thought. However until employers demand fully-guarded machines, manufacturers cannot be expected to make them. "Too much emphasis is placed on keeping guard costs down and far too little on keeping their effectiveness high."

The keeping of accident records is recommended so that frequency and severity rates may be computed, and safety performance gauged. A study of such records can also show where the majority of accidents occur, which employees are "accident repeaters" and what accidents recur most frequently.

Manual on Accident Records

Stressing that "accident records are indispensable aids toward accident prevention," the United States Department of Labour has recently published a manual on methods of recording industrial accidents and computing frequency and severity rates.* The frequency rate, which is the number of disabling injuries per million employee-hours of exposure, indicates whether accidents are on the increase and how the plant's safety record compares with the records of similar plants. It can also be used to compare the performance of different departments if a separate rate is calculated for each department, and will show where most accidents are occurring and the effectiveness of remedial measures. The severity rate, which is the average time-loss in days per 1,000 hours worked, indicates the seriousness of the accident problem.

Sample forms are included in the manual for reporting accidents, tabulating causes and summarizing the monthly frequency rates of different departments. It is strongly urged that the form on which a supervisor reports each accident should "require him to think in terms of causes and remedial measures". The use of code numbers is suggested for tabulating accident causes in sufficient detail to draw attention to the unsafe act and unsafe condition causing each accident. Studies of the effect of sex, occupation, age, experience, shift and other such factors on accident rates are recommended.

* Accident-Record Manual for Industrial Plants, U.S. Department of Labour, Bureau of Labour Statistics Bull. No. 772, March, 1944. Price 10 cents.

Safety through Management Leadership

Safety through Management Leadership is the title of Special Bulletin No. 15 of the Division of Labour Standards, United States Department of Labour. Designed to awaken management to its responsibility for directing the safety program, it contains information on plant safety organization, safety committees and training of supervisors and workers in safe methods of work. Descriptions of safety programs for large, medium and small plants are included. In addition there is a list of other safety publications and posters issued by the Division of Labour Standards for the campaign of the National Committee for the Conservation of Manpower in War Industries.

The value, composition and functions of safety committees are discussed in detail. It is pointed out that committees with worker members secure plant-wide interest and co-operation in accident prevention, particularly if membership is rotated. They act in an advisory capacity to management which must take an active interest in them and see that their recommendations are carried out or reasons given for not adopting them. Suggested functions for committees are drafting safety rules, inspecting the plant for unsafe conditions, investigating accidents, determining standards for safe machinery and equipment and promoting safety-consciousness through personal contacts, rallies, posters, contests, etc.

The importance of training new workers in safety is stressed. This must be followed up with day by day supervision. Employers are urged to select safety-minded supervisors and to take advantage of the wartime safety courses provided for supervisors and members of safety committees by the U.S. Department of Labour.

Canadian Labour ...industries... *essages*

...m...

ON the advent of Labour Day the Minister of Labour, Honourable Humphrey Mitchell, issued the following message:

"It is just fifty years since the Parliament of Canada decreed that the first Monday of September in each year should be called Labour Day, and should be a public holiday throughout this country. 1944 marks the semi-centennial of a special day on which recognition is given to the part played in our economic life by the workers, so frequently known by the general name of 'labour'.

"It is particularly fitting that the people of Canada pay tribute at this time to the workers in our factories, shipyards, mines, and the many other industries which have provided the sinews of war which our young men of the Armed Services are using so victoriously wherever the battle of freedom is being waged.

"Canadian labour has played a great role in this gigantic struggle, and the end which cannot now be long delayed will follow in very real measure on the strenuous efforts they have put forward since 1939.

"One cannot think of Labour Day, and of the work accomplished by the whole body of industrial workers, without thinking also of the great trade union movement, of which Labour Day may almost be termed the birthday. It was the trade union movement that secured from the Parliament of Canada in 1894 its first recognition in the form of the establishment of Labour Day. Since that date, the greater proportion of the progressive labour and social legislation which is so familiar, has been enacted as a result of trade union suggestions and requests.

"The trade union movement preceding 1894 provided a solid foundation on which the present day movement has been built. The early trade unionists—and on this day labour all over Canada will do them honour—built much better than they knew. The infant they adopted has become a very healthy, energetic and progressive individual. No one would suggest that he has yet acquired his full stature. No one would suggest that his accomplishments to date are more than an indication of what he will accomplish in the future. The good of the country will certainly be furthered as the trade union movement thrives and progresses.

"At no time in our history will we require clear thinking and sound action on the part of all sections of the population, as in the post-war era. Labour has certainly played its part in wartime. I feel that we may count most confidently on labour—and of course I am referring to the trade union movement—to play its part in building a new and better Canada in the years which will follow the victory so rapidly approaching now."

Mr. Percy R. Bengough

Dealing with this anniversary of labour, Mr. Percy R. Bengough, President, The Trades and Labour Congress of Canada, stated in part as follows:

"It is not impossible, in fact it is reasonably probable, that this Labour Day is the last Labour Day of this global war. With such reasonable expectations, however, we must see that there is no easing up on the job of winning this war . . . It is the first duty of the workers on this Labour Day to again dedicate themselves to do all possible to bring victory in the shortest possible time . . .

"We must not forget our great obligations to all those in the Allied countries—yes, and the underground movements in Fascist controlled countries, who have fought and died that we can continue as free men and women. The people of the world must realize and profit from the knowledge gained during this war period and keep in mind the enormous productive capacity that has been developed as a result of the war effort."

At the same time, Mr. Bengough emphasized the need for careful consideration of post-war labour conditions. He asserted that we have an abundance of materials. We have the knowledge and ability to fashion these materials to every human need and requirement . . . Further, "the workers and all sane thinking citizens must insist on a system of life in the post-war period that will guarantee to every citizen, able and willing to work, an adequate income sufficient to provide a good home and comfortable living for himself and his family; that will free all from the fear of want for the whole of their lives, with efficient treatment during illness, and full protection in old age . . . On this Labour Day our objective must be 'Victory and forward to a larger life'."

Mr. A. R. Mosher

Mr. A. R. Mosher, President of the Canadian Congress of Labour, in his Labour Day message declared in part that: "Organized Labour in Canada is looking forward to the winning of the war and the building of a better national and world-order with a growing

awareness of its own [illegible] Records the opportunities for far-reaching constructive activity which the war has made indispensable. It is increasingly evident that the war has speeded up the discovery and application of new materials and processes in the field of production which might otherwise have waited decades for development."

Continuing, Mr. Mosher asserted that organized labour will maintain and increase its strength under any economic or political system which is democratic in character and that labour organization will use whatever effective means it finds to attain its chief objective, namely the attainment of the highest possible standard of living which the nation can provide through industry, agriculture and international trade.

Dealing with labour's relationships with outside interests and groups, Mr. Mosher said:

"It is essential, in the interests of unity and harmony, that the people of Canada outside the ranks of labour should have a clear understanding of what labour organization involves and implies. Labour wants nothing for itself that it does not desire for every other element in the nation; labour is opposed to nothing that is beneficial to the general welfare. Labour does not seek to usurp the function of management, or to do away with enterprise and initiative. It asks only that industry be managed with proper regard for the human factors involved, and that enterprise and initiative be directed toward the most efficient utilization of our human and natural resources and the equitable distribution of the resultant product, rather than to their exploitation for the sake of profit . . . "

It is against this background of effort and aspiration, Mr. Mosher said, that the struggle for union recognition and security and such devices as the union shop and the check-off, as well as adequate labour legislation should be considered. He admitted that labour has made mistakes, but it is learning from its errors and gaining wisdom with its increasing power.

He declared that: "Labour is eager to cooperate with every other group and institution in Canada in establishing a social order which will be worthy of the sacrifices which the war has demanded and the hopes of those who paid the price of freedom. The realm of the possible has been widely extended by the experience and the lessons of the war; ancient barriers to progress have been proven to be illusions, and the way is now open for the attainment of a life of abundance, of happiness, of well-being for every citizen such as no one has ever dared to envisage in his most optimistic moments. If we face the future with the courage which is winning the war, and the determination to conquer poverty and insecurity in the same spirit of all-out effort and aggressiveness, victory is as certain as tomorrow's sunrise."

Mr. Alfred Charpentier

Mr. Alfred Charpentier, President of the Canadian and Catholic Confederation of Labour, referred especially to post-war conditions. He said in part: "A new spirit is permeating society. Suffering and privation throughout the world have not been in vain. The voice of Christian socialism is being heard and many countries are directing their efforts to finding better and more just solutions for the problems of distribution, such, for example, as family allowances. In all democratic countries," Mr. Charpentier asserted, "may be seen the trend, or intensification, as the case may be, of a tripartite development of government-employer-labour collaboration for the establishment of tomorrow's order."

He continued: "Some great principles of justice are now generally accepted, such as, priority of wages over stock dividends; equal pay for equal work; fair wages (higher than the minimum rate) when the financial position of the employer admits of it; right to annual holidays with pay; . . . to which may be added a new labour demand, namely, the guarantee of a minimum annual wage in fundamental industries . . . Then too, there is the tendency to develop the extension of what is broadly known as 'social service' and 'labour relations service', notably in the manufacturing industries."

Labour and Industry in Nova Scotia

Annual Report of the Provincial Department of Labour for 1943

THE annual report of the Nova Scotia Department of Labour for the fiscal year ending November 30, 1943, states that: "conditions on the whole remained unchanged, there being some fluctuations within the various trade groups involving minor recessions. Trade unions reporting at the close of October, 1943, indicate that while full employment was shown to a great extent on the finishing of existing jobs, in the Halifax zone, ·8 per cent of inactivity was shown and ·2 inactivity was shown for the province as a whole.

"There was a definite shortage of skilled labour and of necessary building material in the Halifax zone.

"The shipbuilding industry reported a shortage of labour. Amherst reported help was available except in the aircraft industry.

"The colliery districts show a decrease in the average daily force of 845 men. The total shifts worked show a decrease for the year of 192,128 man days."

Joint Adjustment Board.—This Board, which was established in 1941, considered 19 cases in 1943. A decision was given in each case and was accepted by both parties with the exception of one case from Sydney Mines, where the management claimed that the Board had no right to deal with it. This case was settled subsequently between the management and its employees.

Factories Inspection and Industrial Accidents.—So much attention had to be given to the larger industries, that it was not possible to carry out the regular routine of inspections of many small mills and factories in remote places. It is stated however, that "the profits of factory inspection have been received by a larger number of workers than ever before in our history."

The number of accidents reported or ascertained for the fiscal year 1943 was 1,381, of which eight were fatal. Among the injured were 147 women and girls. The Nova Scotia Accident Prevention Association continued to make a valuable contribution to accident prevention. Among the several activities of the Association emphasis was placed on an educational campaign in industrial plants throughout the province. By compiling accurate statistics relating to accidents and by building up a valuable library on safety matters, the Association has become a clearing house from which employers can receive useful information on my problem in accident prevention.

Efforts were made throughout the year to bring about still further improvement in sanitation in industrial plants, especially in older industries. Ventilating systems were improved in many instances and better washrooms, shower baths and lavatories were provided, where replacements and changes were recommended as desirable or necessary.

Welfare Work.—Considerable advances have been made in industrial welfare work, notably since the operation of war industries began. Buildings have been erected or remodelled for recreational and kindred services and rest rooms have been provided inside the plants. Large cafeterias have been built and equipped with modern facilities for providing meals in larger plants and refreshment booths in the smaller industries. Personnel officials and matrons give a variety of personal services to employees. The Safety and Welfare organization in one large industry has the following official staff: a superintendent in charge, three safety inspectors, a personnel official, a doctor and three trained nurses, a lady supervisor and her assistant.

Women Workers.—There were 12,441 women employed in industry in Nova Scotia in 1943. Approximately 2,200 women and girls worked in industries where men only had formerly been employed. They worked at machines in wooden box factories and operated electric travelling cranes. They were employed as welders and burners in shipyards, handled machines, tools and presses in the metal industries and worked as labourers.

Women workers received $186,790.07 weekly in wages, the average individual weekly wage being $15.01 and the average work-week was 48 hours.

The problems arising from the employment of boys, particularly with reference to the minimum age limit, received careful attention during the year.

Minimum Wages.—During 1943, inspections by the Minimum Wage Board showed that throughout the province the average working week has been greatly reduced, especially in stores. While this may be only a wartime measure, it is pointed out that it has shown employers that practically the same volume of business can be transacted in a shorter period of time, with the same or better results and improved relationships between management and workers.

Amendments were made to certain of the Board's Orders respecting women. Thus, effective on June 1, 1943, minimum wages were adjusted for female employees in garages, gasoline service stations, operators of taxi or delivery cars, messenger services, theatres and places of amusement and all females in any class of employment when replacing male

workers. Full time wages for experienced workers in the Halifax, Sydney and Glace Bay group were set at a minimum of $12 per week and for all other incorporated towns in the province, $11 per week. Corresponding apprenticeship rates for period of one month, $10 and $9 per week and for part-time employees 25 cents and 23 cents per hour respectively.

The working hours for which these minimum wages shall be paid shall not be more than eight hours per day, or 48 hours per week. Any hours worked in excess of 48 hours shall be counted as overtime and shall be paid for at the rate of time and a half. Part time workers shall be paid for not less than four hours, and any employees required to wait on the premises shall be paid for the time thus spent. No reductions from the rates set by the Order for the use, purchase or laundrying of uniforms, caps, or similar articles of apparel. Employees may not be discharged by any employer, because of having registered a complaint with the Board or for having given testimony, or for being about to give testimony at any investigation or proceedings permitted or prescribed under the Act. Any employee who is paid less than the minimum wage set out in the Order may sue and recover in any court of competent jurisdiction. Similar provisions with respect to wages and with some variations in the matter of hours worked were applied to a wide range of other establishments employing women.

War Emergency Training.—The main effort in trade training as in 1941 and 1942, was carried out under a Dominion-Provincial Agreement. The purpose was to fit persons for special occupational duties by means of intensive trade courses. The trainees may be either members of the armed services or civilians preparing for work in war industries. The training was of four different types: (1) Trade training given in schools or training centres where technical instruction was given and trade skill developed without any resulting useful production; (2) Trade training given in a school conducted in a producing plant where the work of the trainees results in useful production; (3) Educational training of a general nature, to prepare members of the R.C.A.F. for entry into specific technical training for duties as air crew; (4) Training of members of supervisory staffs for greater efficiency by the conference method. The educational training was carried out by the provincial authorities, but almost all the expense was borne by the Dominion government. The province made the necessary buildings available, paid administrative costs and one-half of the price of new equipment. Among the institutions that assisted in the work were: the technical college, commercial high school and Dalhousie University at Halifax, the trade training centre at New Glasgow, the basic training camp at Parkdale and the agricultural college at Truro. In addition, several of the largest shipbuilding, textile, machinery, steel and coal companies throughout the province co-operated in the work. Apprentice training projects also were continued during the year. The number of student-hours of instruction given at the three youth training centres of Glace Bay, North Sydney and Sydney was 37,303. Of this training time, 32,823 hours was provided for women trainees and 4,480 for men.

Labour in Quebec, 1942-43

THE *Statistical Year Book* (Quebec Province) for the fiscal year ending March 31, 1943, has recently been issued by the Department of Trade and Commerce and Municipal Affairs. It contains a wide range of useful information in condensed form, with reference to the people, resources, trade and industry of the province.

The edition has the advantage of setting forth definitive figures of the Dominion census of 1941. It is pointed out that "there has been a large increase in production in all fields, but more particularly in the manufacturing industry, external trade through the ports of the province and retail trade."

In the section devoted to organized labour, it is stated that there were 135 labour disputes in the province in 1942, involving 4,260 workers and with a loss of 155,284 man-days. This was a marked increase over 1941, the respective figures for the latter year being 38 labour disputes, involving 11,832 workers and a loss of 51,833 man-days.

Provincial legislation respecting industrial establishments "applies to manufactures, factories, plants, lumbering, workshops and annexes, but not to mines or domestic workshops." It requires that establishments must be built and maintained with due regard for the safety and health of workers and additional regulations pertaining to certain kinds of work in specified industries may be made as deemed necessary by the Lieutenant-Governor in Council. In establishments "classed as dangerous, unhealthy or uncomfortable boys under 16 years of age and girls under 18 should not be employed. In other establishments, the minimum age is 14 years." The limit of working hours for children and females in factories is 10 hours per day and 55 hours per week. "Directors of establishments are compelled to supply government inspectors with any information that may be required." The total number of inspections carried out in 1941-42 was 28,407.

THE LABOUR GAZETTE

PREPARED AND EDITED BY

THE DEPARTMENT OF LABOUR, OTTAWA, CANADA

Minister—Hon. HUMPHREY MITCHELL

Deputy Minister—ARTHUR MACNAMARA

Editor—HARRY J. WALKER

VOLUME XLIV] SEPTEMBER, 1944 [NUMBER 9

Notes of Current Interest

Postponement of Dominion-Provincial Conference

Postponement of the proposed Dominion-Provincial Conference until after the next federal election was announced by the Prime Minister, Rt. Hon. W. L. Mackenzie King, in the House of Commons on August 15.

The Prime Minister stated that the conference should, if possible, be held between the governments that will be in office during the next few years in order to ensure implementation of the important decisions that may be reached.

Matters for discussion, as listed in an agenda tentatively proposed by the Dominion government, include: planning for full employment and a high national income; proposals for social security, health insurance, and public welfare; provisions to implement international treaties and agreements (including conventions of the International Labour Organization); special measures for veterans' re-establishment; public improvements; conservation and development of national resources; transportation; encouragement of private industry (including agriculture and housing); and other problems.

The purpose of the conference would be to "recommend the most effective allocation of responsibility between governments in Canada for carrying out policies generally agreed on as desirable, with particular attention to the financial and jurisdictional aspects."

The Prime Minister stated that preparations for the conference would be continued, so that it could be held immediately following a general election.

Housing legislation enacted by Dominion Government

Legislation intended to improve housing conditions in Canada after the war was enacted by the Parliament of Canada during August.

The Act provides for loans at a low rate of interest for the construction of homes for prospective home-owners; loans for low rental housing projects; grants to municipalities for slum clearance; rural housing; loans for the repair of existing homes; and technical research designed to lower housing costs and promote better housing conditions and community planning.

As explained in the House of Commons by the Minister of Finance, Hon. J. L. Ilsley, the Act will permit loans up to 95 per cent of the first $2,000 of lending value, plus 85 per cent of the amount by which the lending value exceeds $2,000 but does not exceed $4,000, plus 70 per cent of the amount, if any, by which the lending value exceeds $4,000.

Illustrating the way in which the plan will work out, the Minister indicated that on a house with a lending value of $2,500 the maximum loan would be 95 per cent of the $2,000 plus 85 per cent of the $500, or a total of $2,325. The Minister continued:

"On a house with a lending value of $3,000, we could make a loan of $2,750 or 91⅔ per cent; on one with a lending value of $4,000 we could make a maximum loan of 90 per cent; on one with a lending value of $5,000 we could make a maximum loan of 86 per cent; and on houses with a lending value in excess of $5,000 the maximum percentage of loan would gradually scale down."

The rate of interest on the loans is to be not in excess of 4½ per cent.

Further details of the housing measure may be found elsewhere in this issue, on page 1175.

Labour legislation during 1944

Legislation of interest to labour enacted by the Parliament of Canada in its session from January to August, 1944, is described in detail elsewhere in this issue in an article beginning on page 1171.

The article outlines Acts of Parliament concerned with family allowances; housing; the setting up of three Government departments to deal with reconstruction, veterans' affairs, and health and welfare; veterans' insurance; war service gratuities; and other matters.

Engagement of men and women about to be discharged from Armed Forces

Any employer addressing enquiries to the Armed Forces for the services of men and women who are about to be discharged will, in future, find that all such enquiries are being passed to National Selective Service, according to an announcement made by Mr. Arthur MacNamara, Director of National Selective Service. The new procedure follows discussions on the subject between the Department of Labour and the Defence Departments.

At the present time National Selective Service has special officers at the discharge points, to facilitate the rehabilitation of men and women being discharged from the Forces.

Previously a heavy burden had been placed upon the administrative facilities of the Armed Services by these requests, and much work will now be saved by the new procedure since all employers' enquiries would have to go through National Selective Service in any event.

Continued demand for persons with technical training

A continued shortage of technical persons in certain specialized lines for essential undertakings is reported by the Wartime Bureau of Technical Personnel. Demand for technical persons is following a trend similar to demand in the broader fields of manpower, in that new programs of production are constantly being developed even though recession in some lines might suggest an easing of the manpower situation.

One such new program which has involved technical personnel to a marked degree is that dealing with the production of penicillin. In this instance the demand for technical persons developed unexpectedly and with great rapidity. It became necessary to recruit large numbers of scientists and other workers in an entirely new field, in order to iron out production problems and to develop output so that a large supply of penicillin would be constantly forthcoming. Before the penicillin needs for trained persons were fully met, however, shell production was unexpectedly stepped up again, resulting in a further search for persons with the scientific training required.

Such situations, moreover, have to be dealt with in the face of a steady drain of technical persons to the Armed Forces, both in a technical capacity, and to a limited extent, by enlistments for general duties in the three Services. Anticipated needs of the Services are therefore kept in mind so that recommendations as to suitable candidates in all or any of the technical branches can be submitted at short notice.

Considerable success has been achieved in the placing of newly graduated technical persons, but many of the openings listed in the Bureau's records require persons with experience, and such openings are still being filled with great difficulty.

Another important factor affecting the supply of technical persons is the limited extent to which women take the required technical training. Among the three hundred and fifty women who graduate each year and become qualified as technical persons, approximately one half are in the field of household economics and of the remainder, most have completed rather generalized courses in science. This makes it impossible to consider the replacement of male engineers by women in very many cases.

Many firms have been unable to secure their normal annual requirements of newly graduated personnel for five years although those engineers and scientists they have on their staffs have all become five years older. The result is that the average age of the technical personnel in most industries which were established before the war has been steadily increasing, and as time goes on deaths and retirements will take such a toll as to have a marked effect on operating capacity.

A small return to industry has been made from the limited number being retired from the Armed Forces due to age, sickness, or wounds; but the numbers of such men will have to increase considerably before real relief is available, the Bureau reports.

In the meantime a number of industries have filed inquiries with the Bureau for engineers and scientists who may become available through retirement from the Armed Forces, and no doubt, as other employers have an opportunity to take stock of their position, further such requests will be forthcoming.

With employers beginning to show an interest in "rebuilding" their staffs on the one hand, and the prospect of an increasing flow of technical persons out of the Armed Forces on the other, the Bureau is preparing to do its share in relating the supply and demand.

Commenting on the work of the Wartime Bureau of Technical Personnel, Mr. Arthur MacNamara, Director of National Selective Service declared that, dealing as it does with the supply and demand of scientists, engineers, and other technical persons, the activities of the Bureau have played an important part in making Canada's high industrial production level at all possible.

A. A. Heaps appointed controller of grain handling

Appointment of Mr. A. A. Heaps as Controller of Grain Handling for Fort William and Port Arthur was announced recently by the Honourable Humphrey Mitchell, Minister of Labour. The appointment of Mr. Heaps, a member of the staff of the Unemployment Insurance Commission, was made by Order in Council P.C. 6410, August 11.

The Minister stated that the Government found it highly important that steps should be taken at once to overcome the difficulty in the handling of grain at the head of the lakes, caused partly by labour shortage and partly by the need to increase grain movements. Due to the lack of men for unloading, several thousands of railway cars had been tied up, and in view of the heavy pressure on the railroads for moving freight, and especially in view of the nearness of the harvesting season on the Prairies, the Government decided upon action to ease the situation. Congestion of grain at the lakehead had threatened to interrupt shipping on the Great Lakes.

The order authorizes the controller to issue such directions and orders as the Minister of Labour deems necessary, for the prompt unloading of grain from railway cars to terminal elevators, and for the loading of grain from the elevators into lake vessels.

The controller may redirect railroad cars carrying grain from one elevator to another; direct that any person employed in handling grain shall work such overtime as he considers necessary, and direct employers to make arrangements to accommodate such overtime; direct any employer in the Fort William-Port Arthur area to give leave of absence to any employees required to assist in unloading or loading of grain; and direct any male persons to accept employment at this type of work.

Overtime work by employees is to be paid for in accordance with prevailing agreements between employers and employees. No person directed by the Controller to employment in unloading or loading grain may quit such employment without permission in writing from the Controller.

Penalties are provided for failure on the part of either employer or employees to comply with any direction made by the Controller under the Regulations.

Fractional decrease in cost-of-living index

The Dominion Bureau of Statistics cost of living index declined from 119·0 for July 3, to 118·9 for August 1, 1944. Seasonal decreases in prices for fresh vegetables were mainly responsible for this minor change. The food index fell from 132·0 in July to 131·5 in August with lower quotations for onions, cabbage, carrots, potatoes and lamb being partially offset by increases for eggs, lemons and oranges. Additional reductions in electricity rates in the provinces of Quebec and Ontario caused the fuel and light index to fall from 108·9 to 108·7. The electricity sub-group index now stands at 93·2. Home furnishings and services advanced fractionally from 118·3 to 118·5 on scattered increases affecting items of furniture, textile furnishings and hardware. Other group indexes remained unchanged, rentals at 111·9, clothing at 121·5, and miscellaneous items at 109·0. After adjustment to the base August, 1939 as 100·0 the index was 118·0 at August 1.

Employment and industrial statistics

The table below shows the latest statistics available reflecting industrial conditions in Canada.

An increase in employment was indicated at July 1 by the figures published by the Dominion Bureau of Statistics. The increase conformed with the seasonal movement since 1920. The 14,668 establishments reporting to the Bureau showed a total working force of 1,853,618 at July 1 which was 1·7 per cent larger than at June 1. The index of employment, based on the 1926 average as 100, was 183·5 at July 1, 180·5 at June 1, 183·7 at July 1, 1943, and 115·8 at July 1, 1939. The expansion in industrial employment

* Many of the figures in this table with an analysis are included in the Monthly Review of Business Statistics issued by the Dominion Bureau of Statistics, price $1.00 per year.

† Week ended August 31, 1944.

(1) Base, 1926=100. (2) Figures are for the end of the preceding month. (3) Base, June, 1941=100. (4) Base, 1935-1939=100. (5) Adjusted, where necessary, for seasonal variation. (6) Notes in the hands of the public at the end of the preceding month. (7) Figure for four weeks ended August 26, 1944 and corresponding previous periods. (8) Maclean's Building Review.

was accompanied by a 1·4 per cent increase in payrolls to a total of $58,783,879 for the recorded working force, as compared with the beginning of June. The per capita weekly earnings declined from $31.80 at June 1 to $31.71 at July 1. The average at July 1, 1943, was $30.97.

There were considerable increases in manufacturing, construction and transportation and smaller gains in mining, communications and services. There was a small decrease in logging and very little change in trade.

The index of the physical volume of business on the base 1935-39 as 100 declined from 238·8 in June to 232·2 in July. The five main components of the index, mineral production, manufacturing, construction, electric power and distribution, participated in the decline.

The index of the physical volume of business for the first seven months of 1944 averaged 4·1 per cent higher than for the similar period in 1943. In the same comparison, the index of industrial production averaged 2 per cent higher and the index of employment 0·3 per cent higher; mineral production was 1 per cent higher and mining employment 1·9 per cent lower; manufacturing production 2·9 per cent higher and manufacturing employment 0·9 per cent higher; the value of construction contracts awarded and building permits issued were 56·4 and 62·9 per cent higher, respectively, while construction employment was 24·2 per cent lower. Again in the same comparison, export trade increased 28·6 per cent, import trade 2·3 per cent, carloadings 8·3 per cent, wholesale prices 4 per cent, and the cost of living 1·1 per cent. Bank debits expanded 16 per cent and the circulating media 21·9 per cent.

Political action program of Canadian Congress of Labour

The Political Action Committee of the Canadian Congress of Labour has drawn up a program listing the immediate and long-range political aims of the Congress. The program was prepared by representatives of the national and international unions affiliated to the Congress who compose the Political Action Committee meeting in Toronto on August 11 and 12.

The Committee came into being as a result of a resolution adopted at the convention of the Congress in September, 1943, which endorsed the C.C.F. as the "political arm of labour" and recommended that all Congress unions affiliate to the C.C.F. (L.G., 1943, p. 1440).

Explaining the reasons for the establishment of the Committee, the program states in part:

"There is widespread fear that the end of the war will see again the unemployment, insecurity and suffering which were the lot of the great mass of the people during the decade before the war. . . .

"It has become increasingly clear that if the workers are to enjoy freedom from want and freedom from fear, organized labour must once and for all definitely adopt a positive political attitude. It must take its part in the political struggles of the day. While our Congress has endorsed the Co-operative Commonwealth Federation as the political arm of labour in Canada and recommended to Congress unions that they become affiliated with it, organized labour as represented in our Congress must adopt its own definite political program."

The program details a number of objectives, which include the following: "useful jobs at union wages and under union conditions . . . . for every man and woman able and willing to work"; social ownership of banking and finance; various social security measures; retention of certain of the wartime controls and "the thorough democratization of all the controlling bodies"; public works projects; lay-off pay for those discharged from war factories; certain rehabilitation proposals; a federal housing program; national food, fuel and transportation policies; the raising of rural living standards; retention of crown companies under public ownership in peacetime; encouragement of co-operatives; improved educational facilities and better pay for teachers; legislation to counteract racial or religious discrimination; the extension of federal powers to enable the Dominion government to legislate on labour and social questions and to implement International Labour Conventions; a national labour relations act protecting collective bargaining; the removal of wage controls; provision of a basic minimum wage; a reduction in working hours; two weeks' vacation with pay; raising of income tax exemptions.

In the field of international relations, the program calls for the fullest co-operation with other nations, particularly the British Commonwealth, the United States, the Soviet Union and China. Together with the rest of the United Nations, it is considered, Canada must work for "the fullest possible development of international co-operation, in the I.L.O., the World Court, the Food Organization, U.N.R.R.A., and some form of effective League of Nations"; also that labour be represented at the peace conference.

It is stated that local political action committees are being formed and that a full-time field secretary will shortly be appointed.

Labour congresses announce annual conventions

The diamond jubilee convention of the Trades and Labour Congress of Canada will be held in the Royal York Hotel, Toronto, Ontario, beginning at 10 a.m. (City time), Monday, October 23, 1944. Sessions will be held daily until the business is completed.

The date for the reception of resolutions was set for Monday, September 18, in order to provide sufficient time for their translation, classification and printing for presentation to the convention.

The fifth regular convention of the Canadian Congress of Labour will be held in the Chateau Frontenac, Quebec City, at 10 a.m., Monday, October 16, 1944, and continuing until the business of the convention is completed.

Resolutions for presentation to the convention were to have been in the hands of the Secretary-Treasurer of the Congress at least 15 days before the convention. Those received after that date would not be considered except by a two-thirds majority vote of the delegates attending the convention.

The Canadian and Catholic Confederation of Labour convened at Three Rivers, Quebec, September 17 to 20.

Accounts of these conventions will appear in a forthcoming issue of the LABOUR GAZETTE.

Maritime Labour Institute issues brochure on labour relations

The Maritime Labour Institute recently issued a brochure covering the proceedings of the course in Labour Relations held at Dalhousie University at the end of March (L.G. May, 1944, p. 597). It contains digests of the papers presented during the course by Pat Conroy of the Canadian Congress of Labour, Boris Shishkin, of the American Federation of Labour and also by such educationists as Professors F. A. Magoun, of the Massachusetts Institute of Technology, B. S. Keirstead of McGill University, and G. A. McAllister and L. Richter, of the Institute of Public Affairs, Dalhousie University.

The program comprised topics of special importance to labour at the present time: the functions and responsibilities of labour unions, wage determination, industrial psychology, labour legislation, social security and the economic situation of the major Maritime industries. To avoid overloading of the program a full day was devoted to each topic. "Throughout the whole course," it is stated, "an intense interest in the subjects presented by the speakers was apparent." This interest manifested itself in the discussions and also in the formal decision to organize the Institute on a permanent basis, under the joint supervision of the Institute of Public Affairs of Dalhousie University and an advisory committee selected from trade unions throughout the province. Altogether, 62 men and two women were in attendance, representing 21 unions or 30 locals.

It is asserted in the introduction to the brochure that "the Maritimes may have to face serious difficulties in the post-war period. Labour must be as well prepared to meet them as management." The course, "probably the first ever to be held at a Canadian university," is a co-operative effort on the part of the University and the government, which shares in meeting the expense involved, and the trade unions in the Maritimes, to make this objective a reality.

Wage incentive plan endorsed by War Expenditures Committee

Included in a report to Parliament submitted on August 12 by the War Expenditures Committee of the House of Commons is an endorsement of the wage incentive plan now in operation in the Aircraft Divison of Canadian Vickers Limited, Montreal.

The Committee recommended that the "plan of profit-sharing by labour" used by Vickers "should be carefully studied by all other manufacturers in this industry and so far as possible should be universally used."

It declares that the plan "has resulted in an increased production and substantially lower cost per plane." The report adds: "Not only is production speeded up but the savings greatly exceed the cost of the bonus."

According to information received from the Company, the plan in operation at Vickers is a wage incentive system described by the firm as "task and bonus." Under this system each task is time-studied and the normal rate in hours or minutes per unit is set. For every hour saved over the normal the savings of time are shared between the Company and the employees on a fifty-fifty basis. In other words, if the normal is set at ten hours per unit and the task is done in eight hours, the employee will get nine hours' pay for eight hours' work and the Company will get one hour. "In this way", the Company reports, "the wages increase and the costs decrease simultaneously."

Group-Captain B. F. Wood assigned to Selective Service post

The appointment has been announced of Group-Captain Byron F. Wood as Associate Director of National Selective Service (essential services).

Group Captain Wood's services are being loaned by the R.C.A.F., with which he has been serving since early in the war, his most recent post having been Director of Manning, at R.C.A.F. Headquarters, Ottawa.

Immediately prior to joining the R.C.A.F., Group-Captain Wood was on the staff of the University of Toronto.

Appointment of Paul Goulet to External Trade Advisory Committee

Order in Council P.C. 6492 of August 16, provides for the appointment of a representative of the Department of Labour in the membership of the External Trade Advisory Committee.

The Minister of Labour has named Mr. Paul Goulet to represent his department in the work of the Committee.

Mr. Goulet is from Montreal and has been an Associate Director of National Selective Service since 1942.

The External Trade Advisory Committee is an interdepartmental Committee consisting of representatives from the Departments of External Affairs, Trade and Commerce, Finance, Munitions and Supply, National Revenue, Agriculture and Labour, and from the Wartime Prices and Trade Board, the Foreign Exchange Control Board and the Mutual Aid Board.

Collective bargaining and union status in United States

A recent bulletin (No. 776) of the United States Bureau of Labour Statistics states that there were, at the beginning of 1944, about 31,000,000 persons employed in private industry in the United States in occupations where unions are actively engaged in efforts to obtain written agreements. This includes all the gainfully occupied except the self-employed, proprietors, supervisors (other than certain transportation personnel), agricultural labourers on farms where less than six are employed, sharecroppers and domestic workers.

Approximately 13,750,000 workers, or almost 45 per cent of all workers in private industry, were employed under the terms of union agreements. The net gain during 1943 was about 750,000.

It is pointed out that some industries continued to be much more widely organized than others. Manufacturing wage earners as a whole were about 60 per cent covered by union agreements. In such industries as aluminum fabrication, automobiles, men's clothing, non-ferrous metal smelting and refining, shipbuilding and basic steel, over 90 per cent were under agreement. Over 95 per cent of the coal miners, longshoremen and workers on railroads, including clerical and supervisory personnel and over 80 per cent of the workers in the construction, maritime, local bus and street railway, trucking and telegraph industries, and practically all professional actors and musicians were employed under union agreements.

On the other hand, agreements covered only a little over five per cent of the clerical and professional workers in manufacturing and financial establishments and wholesale and retail trade. Collective bargaining agreements covered nearly twenty per cent of an estimated 2,000,000 workers in service occupations other than domestic work.

Over 20 per cent of all workers under agreement, or over three million workers, at the beginning of 1944 were covered by clauses which provide for maintenance-of-union membership. In manufacturing the proportion of workers under membership-maintenance clauses rose during the year from less than 25 per cent to about 35 per cent. Most of the maintenance-of-membership clauses provided for a 15-day escape period and a few agreements allowed for as much as 60 days in which employees were allowed to withdraw from union membership.

Only two or three per cent of all workers under agreements were covered by clauses which stated that union members would be given preference in hiring over non-union members, but did not require union membership as a condition of employment.

About 30 per cent of all workers under agreement were covered by provisions which do not require union membership as a condition of hiring or continued employment. However, in such cases, the union is recognized as the sole bargaining agent for all employees in the bargaining unit—including those not in the union.

Almost a third of all workers under agreement in January, 1944, or about 4,330,000, were covered by some form of check-off provisions, as compared with approximately 2,500,000 a year earlier. Over 3,000,000 of the workers under check-off clauses were employed in manufacturing and almost half a million were coal miners. Such clauses were reported to be common in aircraft, hosiery, silk and rayon, and cotton-textile agreements, and the proportion increased during the year, especially in agricultural and electrical machinery, shipbuilding, industrial chemicals, petroleum and in the woollen and worsted textiles industries.

Vacation policy of U.S. War Labour Board

In its fourteenth monthly report to the Senate the United States National War Labour Board outlined its policy in regard to vacations with pay.

The Board "believes that vacations of reasonable duration aid in securing maximum war production," and states that it will generally approve a vacation period not to exceed one week with pay to employees with one year's service, and two weeks to employees with five or more years' service. Regional Boards are at liberty to order such a vacation plan regardless of whether it is the practice in the area or industry.

"We have adopted this policy," the report states, "because of our conviction that the practice of granting two weeks vacation with pay to employees of five years or more service has increasingly become a normal practice in American industry throughout the country. This type of plan has been voluntarily instituted by the vast number of companies as a sound management practice in order to secure maximum efficiency on the part of the workers."

However, the report states, this does not mean that such vacations will be ordered regardless of all circumstances. Nor does it mean that Boards are not free to order more liberal vacation plans, but more liberal plans are to be ordered or approved only when they are in line with prevailing industry and area practice.

Decision on employer's ability to pay wage increase

In a recent decision the U.S. National War Labour Board has declared that it will not give consideration to an employer's financial position in determining wage rates to be paid in wartime.

The case concerned retroactive payment of a three-cent hourly wage increase, involving about 650 employees of a rubber company. The Board had in November, 1943, unanimously granted the increase making it retroactive to November, 1942, the date of the expiration of the previous contract. The company put the wage increase into effect, but petitioned for reconsideration as to the retroactive date. The financial position of the company was examined by a special investigator of the Board and a public hearing was held on May 22, 1944, following which the Board reaffirmed its order.

The Board's decision represented the opinion of its labour and public members. Industry members dissented.

The majority opinion of the Board stated that consideration of an employer's financial position in determining wage rates to be paid in wartime "would defeat wage stabilization and make a nullity of the Congressional policy."

It declared: "While some employers would gain because even at this time they are not doing well, more of them would suffer because their present larger-than-normal profits would warrant increases in wage rates beyond those which we have been allowing."

The opinion explained that the Board would not object if the union itself agreed to forego part of the retroactive wage bill in the interest of enabling the Company to remain in business after the war ends, but asserted that the Board "cannot make an order requiring the employees to accept less than the full amount of the retroactive pay due them under the Board's Directive Order."

"The employees," it continued, "have been looking forward to an increase ever since the dispute arose. Patriotically they have remained at work without going on strike, although paid less than the minimum of the sound and tested going wage rates and despite the fact that the settlement has been long delayed. The retroactive pay awarded is clearly coming to them."

In their dissenting opinion the industry members said that the company had had bad financial experience except in the last three years and that it was unquestioned that the company would have to negotiate a loan in order to make the retroactive payment of the wage increase.

Calculating absence and labour turnover rates in U.S.

Methods of calculating absence and labour turnover rates are described in Special Bulletin No. 17 of the Division of Labour Standards of the United States Department of Labor. Entitled *the A B C of Absenteeism and Labour Turnover,* the brief pamphlet also indicates how the rates may be used to show reasons for absences and separations, and suggests measures for reducing the rates. A table prepared by the Bureau of Labour Statistics showing absence rates in a number of important war industries is included for purposes of comparison. To ensure uniformity of statistics, the definitions of such terms as absenteeism, quits, discharges, lay-offs, etc., used by the Bureau of Labour Statistics are given.

It is pointed out that high absence and turnover rates "are storm signals pointing to unrest, serious production delays and increased costs." The rates are also an index of management's personnel policies and relations with the workers. To reduce the rates, management is urged to improve its general policies relat-

ing to induction, training, supervision, promotions, wages, hours and other working conditions, safety and health, grievance procedure and industrial relations. Attention must also be given to external conditions such as transport, housing, child care, shopping hours and recreational facilities. It is stated that causes for quitting start with hiring, when proper placement and followup to insure adjustment are needed, with special consideration of home arrangements of women workers.

Employers are urged to train foremen, shop stewards and members of labour-management committees in interviewing persons who have been absent or are about to quit. Some have found that a skilful exit-interviewer can prevent many resignations. The keeping of individual and group records which show employees the extent of absences and turnover coupled with emphasis on the importance of the work in the war effort is recommended. It is pointed out, also, that attendance will be improved by formulating and enforcing a clear-cut policy on excusable absences.

Employment of school children

An article entitled *Employment of School Children* in the *American Child* gives the results of brief surveys conducted in New York City, Peoria, Ill., and East Orange, N.J., to discover the effects of part-time work on pupils' school attendance and scholarship.

In an East Orange high school, one out of every four students had a part-time job. The largest number of those working were in the college preparatory course rather than the business course. New Jersey law limits the combined hours of work and school for students under 16 to 8 hours a day, a fact which may have contributed towards the situation that "students who are potentially able to do good work in school are actually doing it in spite of part-time activities."

In five Peoria schools, 1,650 out of 5,000 students were working for wages. The majority worked less than 30 hours a week, but 117 worked from 31 to 40 hours, and 56 more than 40 hours. The Illinois law also sets an 8-hour limit for combined work and school for those under 16. Although the percentage of withdrawals from school were only 1 per cent higher than in 1937-8, the benefits of staying in school while working after hours were doubtful; teachers reported that the students were too sleepy to learn and some were unable to keep up their school work.

In New York City the survey was conducted among 774 selected pupils who worked part-time. There was only a slight increase of absence among them, but, although their scholastic record was somewhat lower than the average pupil's even before they took their jobs, there was a marked increase, after employment, in the number failing two or more subjects.

The article points out that no conclusions can be drawn from these surveys, that they merely illustrate the need for more comprehensive and comparable studies.

Plan for reconstruction of free trade union movement in Germany

A conference was held in Sweden last February at which 27 former members of the German trade union movement, now in exile, participated, in addition to representatives of the trade union movement of Sweden and the United States and of the Refugee Committee, according to the August issue of the *International Labour Review*.

The conference adopted a tentative plan for the reconstruction of German trade unions after the war, based upon the premise that a "free and independent trade union movement is necessary for a future democratic Germany." The aim is to dissolve the Labour Front, which was part of the political apparatus of the Nazi regime for the suppression of the working class, and to organize workmen rapidly in a new trade union league.

The conference anticipated that after the breakdown of the Nazi regime workers would resort to spontaneous individual action in various places and factories with the object of reconstituting the trade unions. The plan calls for free election of union officers in the different localities and for the organization of a central committee to co-ordinate trade union action in the country.

Membership of International Federation of Trade Unions

Membership in the International Federation of Trade Unions increased during 1943 to 16,172,325 workers. In 1942 membership was just over fifteen million, and in 1941 almost thirteen and a half million.

The rise is partly due to increases in membership in the affiliated organizations, and partly to the readmission of France, which passed from the list of exiled trade union groups to the list of regular national centres.

The report of the Federation states that the figures given for France (120,000) apply only to membership in liberated North Africa. It refers also to the underground activities of the old Confédération Générale du Travail inside France itself.

Fourteen countries are now affiliated with the Federation, and seven groups of exiled European trade unionists have been functioning in Great Britain.

Labour-Management Committees

Progress of Labour-Management Committees in Canada

Activities of Industrial Production Co-operation Board

AN increase to 225 in the number of labour-management production committees functioning in Canada or in process of being organized in co-operation with the Industrial Production Co-operation Board was recently reported by Mr. H. Carl Goldenberg, Chairman of the Board.

As the instrument of the Government's policy of encouraging labour-management committees in Canadian war industry, the Board has recently been expanding its operations. The number of field officers has been increased, and an intensified program of publicity and public information is being undertaken, which includes the use of motion pictures.

It is planned to conduct in various localities and industries conferences similar to that conducted in July by Mr. Goldenberg and Mr. M. M. Maclean in the Nova Scotia coal fields where the recently-formed committees are at work on a number of production problems and with a view to improving relations between management and the unions. (L.G., Aug., 1944, p. 940.)

Meetings have been held regularly to secure the opinions and recommendations of the Advisory Committee of the Industrial Production Co-operation Board, which contains representatives of unions and management whose experience is of benefit to the members of the Board. (L.G., Feb., 1944, p. 144.)

List of Field Officers

The following men have been appointed field officers of the Board. Their services are available on request for help in the establishment of labour-management production committees.

Mr. R. W. Crumb, Supervisor of Field Staff, Industrial Production Co-operation Board, Room 207, 9 Richmond St., E., Toronto 1, Ontario.

Mr. W. Dunn, Room 207, 9 Richmond St., E., Toronto 1, Ontario.

Mr. C. J. Richardson, Room 207, 9 Richmond St., E., Toronto 1, Ontario.

Mr. H. A. Spence, Room 207, 9 Richmond St., E., Toronto 1, Ontario.

Mr. C. A. Baby, 434 Lister Building, 42 James St., N., Hamilton, Ontario.

Mr. J. A. McDonald, Room 906, Canada Building, 363 Ouellette Avenue, Windsor, Ontario.

Mr. O. L. Lussier, Room 1010, Confederation Bldg., 1253 McGill College Avenue, Montreal, Quebec.

Mr. R. J. Zanettin, Room 1010, Confederation Bldg., 1253 McGill College Avenue, Montreal, Quebec.

Mr. Allan MacDonald, 24 Union Street, Glace Bay, N.S.

Mr. Alex S. Farrell, 19 Rupert Street, Amherst, N.S.

Mr. H. R. Pettigrove, Room 2, Post Office Building, Fredericton, N.B.

Mr. F. E. Harrison, 315 Federal Building, Vancouver, B.C.

Mr. H. S. Johnstone, 617 Royal Bank Building, Winnipeg, Manitoba.

Mr. D. B. Chant, 330 University Avenue, Toronto, Ontario.

Lt.-Col. J. A. W. LaBelle, P.O. Box 52, St. Eustache, Co. Deux Montagnes, P.Q.

The last two names are not field officers but advisers to the Board whose services are available in a consultative capacity.

Use of Films

A graphic means of spreading information about labour-management production committees and how they operate is being provided by films distributed through the National Film Board, Ottawa. Two new productions, *Democracy at Work* and *The New Pattern* deal with the work of the committees in Great Britain. The first treats in detail some of the specialized jobs handled by the committees. It illustrates the work of departmental sub-committees in large plants, accident prevention committees and absentee committees, with actual examples from British factories. It also shows from start to finish a special production drive organized by the labour-management committee in a royal ordnance factory.

The film concludes by expressing the confidence of British workers that these methods in industry will help win the peace, as they have contributed vitally to winning the war.

The second film is an account of labour-management production committees in the construction industry in Britain. It takes as its example the building of an airfield, and

shows some of the problems involved in a construction job of this kind, such as the hiring of large numbers of men for the few months of the job, and the consequent necessity of billeting and feeding them, and providing transport to and from work for those who have to be billeted some distance from the construction site. The labour-management committee which is established on the site is shown applying democratic methods to solving these and other problems.

Guiding Principles

Out of the experience of a representative group of committees in plants of all sizes and in every type of industry, the following principles have been determined which, according to the Industrial Production Co-operation Board, may determine the success or failure of labour-management committees.

Basic Rules

1. The members chosen for the top committee should be responsible leaders of both management and labour to give weight to their recommendations and to get action on their decisions.

2. There must be a clear understanding, in advance, as to the scope of the committee's activity and this should be made clear to all employees.

3. One or two persons concerned with collective bargaining should be on the top committee, and their job is to see to it that bargaining matters are properly referred.

4. Both top management and top labour officials should fully endorse the plan and should let all employees know they endorse it, especially all key supervisory and key union members (when the plant has a union).

5. Both management and labour should freely discuss and act upon real production problems in committee meetings.

6. Management should accept committee recommendations unless there are very clear reasons to the contrary.

7. Every recommendation of the committee should be acted upon promptly. Where company or union policy is involved, officials should make decisions as quickly as possible. Long delays will kill interest in the job.

8. The committee must be so organized as to put its program over in the plant. Careful planning is required.

9. It is an honour to be a committee member and if the importance and dignity of the joint committee's work is emphasized, the work of the committee will become increasingly effective.

10. Both management and labour must be resolved to give the plan a thorough and honest trial.

Committee Makeup and Meeting

1. The number of persons representing labour and management should be agreeable to each.

2. The committee should be large enough to be representative and small enough to be an effective working unit.

3. The members should be chosen freely by labour and management respectively.

4. If there is a recognized collective bargaining agent, the labour members may be chosen through it.

5. Both management and labour should be represented by enough persons in responsible positions to get prompt decisions.

6. Committee members should be chosen on the basis of their knowledge or special interest, acquaintance with the work force and capacity for team-work.

7. The committee should include representation of women, or other special groups, depending on the proportion and need.

8. If the chairman is from management, the co-chairman or secretary of the committee should be a labour representative, or vice-versa.

9. The committee should meet at least twice a month.

10. Proper advance notification of the meeting should be given.

11. The program for the meeting should be planned in advance.

12. Minutes should be kept and distributed to all members.

13. Collective bargaining issues and grievances should not be introduced into committee discussions.

Concluding Points

1. The committee should be jointly constructed to meet the principal production problems on which joint action can make a contribution.

2. Appropriate subcommittees should be set up: (*a*) for special activities, plantwide; (*b*) by departments—on production problems and for some special activities.

3. Subcommittees should report to the main committee.

4. The labour-management committee should actually promote at least three of the following production activities as joint enterprises: (*a*) handle production problems in main committee or department committees; (*b*) conduct a joint suggestion system with a liberal awards program; (*c*) promote conservation of materials; (*d*) conduct salvage programs; (*e*) further care of tools and equipment; (*f*) develop programs for improving quality work.

5. The committee's program should include at least three of the following manpower activities as joint activities: (*a*) assist in introducing new employees to their work; (*b*) co-operate in upgrading and training—in co-operation with management and the collective bargaining agent, if any; (*c*) participate in work on replacement schedules and other selective service problems—also in co-operation with collective bargaining agent, if any; (*d*) assist in reducing absenteeism and turnover; (*e*) promote safety throughout the plant; (*f*) participate in car pooling, transportation and rationing programs; (*g*) promote nutrition and health—including plant feeding; (*h*) develop child care and housing activities.

6. Special activities should be serviced by a planned publicity and educational program that really reaches all employees through at least three of the following means: (*a*) posters and bulletin boards; (*b*) leaflets for workers; (*c*) joint L-M Drive bulletin or other plant publication; (*d*) slogan contests; (*e*) motion pictures

and transcriptions; (*f*) plant rallies, interpreting war program; (*g*) war bond and war fund drives.

7. The committee plan should have wide employee participation.

8. Committees and subcommittees should set goals and devise ways of measuring results of their work.

9. The labour-management committee should achieve the results it sets out to accomplish.

Awards for Workers' Ideas in United States

Labour-Management Committees Instrumental in Bringing Suggestions to Light

IDEAS by United States workers for improving war production have saved millions of man-hours of work and provided "vast train and ship loads" of extra equipment and munitions for men at the fighting fronts, according to Headquarters of the U.S. War Production Drive. Suggestions by workers had by August earned over 6,000 awards from the War Production Board at Washington.

The national honours are issued frequently for suggestions of such a type that they can be used in other factories. They are passed upon by a committee of 12 members representing all types of industry and technical production, education, and representatives of organized labour.

Suggestions are graded according to:

(1) the number of man-hours saved;
(2) the amount of reduction in the use of critical materials made possible;
(3) ingenuity of the method or device in relation to its application to a specific production job; and
(4) its applicability in other plants or industries.

Workers' ideas are brought to light through the use of suggestion systems, which are generally organized in United States firms by the plant labour-management production committee. Of these committes there are now over 4,800, the War Production Drive announces, covering 8,000,000 workers.

It is a common practice of the labour-management committee to arrange for plant awards for the best ideas; and to decide which of them merit referral to the national awards committee in Washington.

Four types of national awards are given. The Citation is the highest honour. Only 16 persons in the country have received the WPB Citation. Next highest award is the Certificate. To date, more than 345 men, as well as 15 women, have received Certificates. Between 1,600 and 1,700 persons have been given Honourable Mentions, and, of these approximately 50 are women. Approximately 4,000 persons have received Commendations. Almost 200 women war workers have made suggestions of such merit that labour-management committees forwarded these to the Headquarters Board.

Winning suggestions have come most frequently from the following industries: shipbuilding, aircraft, radio-electronics, aircraft and marine engines, guns, mounts and sight-extensions, rifles, small arms and ammunition. In shipbuilding alone, improved work practices resulting from workers' ideas have saved an estimated additional $20,000,000 in man-hours and materials.

Examples of Winning Suggestions

The following are examples of suggestions that have won national awards:

Suggestion of Frederick G. Gray, of Winchester Repeating Arms Inc., New Haven, Conn., to tumble 28 different Garand and carbine parts into revolving barrels with soft steel weight and an abrasive compound, instead of filing off machining burrs. Result: 160,000 man-hours per year released for additional production. Certificate.

Suggestion of Clifford Carey, of Boeckeler Associates (AFL), Trenton, Mich., for cone-shaped piece of equipment to spread grain over a larger area of water in the tank where alcohol is being made. Previously, when the grain was introduced in a solid flow through a 12-inch tube, dough balls were constantly forming. These would plug lines, pumps and valves. Much time was lost in cleaning them out. Result: Greatly increased production of alcohol. Certificate.

Kitchen-inspired suggestion of Miriam Bennett, of Curtiss-Wright Corporation (AFL), Columbus, Ohio, for a chromate paste dispenser that looks like a chef's pastry icing tube. Used to apply moist chromate paste to steel parts that will come in contact with Dural or aluminum parts, it saves $15 in materials every working day. It also speeds operations. Chromate paste is used between dissimilar materials to prevent electrolytic corrosion. Honourable Mention.

Development by "Mr. X", of Firestone Tire and Rubber Co. (CIO), Akron, Ohio, of a shatterproof stainless steel oxygen cylinder for high altitude flying. Result: Many lives

of fliers saved. "Mr. X" preserves his anonymity because he has close relatives in Germany and wishes to avoid any chance that reprisals and persecutions might be inflicted upon his kinfolk. Certificate.

Suggestion by Ella F. Baikie, electrician, of Kaiser Company, Inc., (AFL), Richmond, Calif., for stinger repair moulds. Jackson stingers are electrode holders used in welding. Previously, large quantities of stinger parts were thrown out as irreparable because it was so difficult to hold the parts in place for brazing. Mrs. Baikie had three shapes of moulds made at the forge shop: upper jaw, lower jaw and teeth. In those moulds the parts can be held firmly to be repaired. Result: An average of 15 stingers can be remade in a day, and serve the same purpose as new ones costing $5.50 each—a saving of $82.50 per 24-hour day. Certificate.

Device by W. H. McCollister, of Firestone Tire and Rubber Co. (CIO), Akron, Ohio, for loosening aeroplane tire beads. This tool, which eliminates the necessity of driving half-tracks and tractors across the rubber or pounding it with sledge hammers, is in use on front line emergency fields as well as in home factories. It can be operated by a woman as easily as a man. Result: Immense saving of rubber and time. Certificate.

Ice-grip tire design for military aeroplanes, devised by Clem J. Burkely of Goodyear Tire and Rubber Co. (CIO), Akron, Ohio, which imbeds tire treads with small steel springs in such a way that they protrude very slightly above the tread surface. The short springs adapt themselves to a broken tread design, which permits the tire to be cured in a regulation mould. Since the springs are small, they are not liable to cause damage if dislodged while the wheel is moving. As the tread wears down, new points are formed as each successive turn of the helix wears off. This preserves the non-skid feature for the life of the tread. Citation.

Suggestion by James Cowling, of Martinson Machine Co., Kalamazoo, Mich., for a new milling machine, which broke bottlenecks in making the 155 MM gun. Result: fifty per cent increased production. Certificate.

The War Production Drive has on file the details of all the devices which have won honours for their orignators; and these are available to other war production plants. The cumulative effect of one person's idea is therefore potentially tremendous.

Manpower

Check-up of Male Employees under Mobilization Regulations

Delinquents Located—Merchant Seamen on Inland Waters—Charges Under Civilian Regulations

AN Order signed on August 15 by the Honourable Humphrey Mitchell, Minister of Labour, requires employers of male employees to check on the documents in the possession of any new employees being engaged, so that the employer may be satisfied that the man has not failed to comply with Mobilization Regulations.

While each employer is required to check on all new employees he engages in the future, he is only required to report to the Mobilization Registrars on men thought to be in the designated age classes who fail to furnish evidence that they have complied with the military call-up, or that because of marriage or for other reasons they do not have to comply.

The employer must report on any doubtful case within seven days of the time he engages the man. Even though a man does not possess documents to show that he has complied with the regulations, the employer is not prohibited from hiring him, providing that any other Selective Service regulations have been complied with.

By an Order of the Minister of Labour signed several months ago, all employers had to similarly check on their male employees by May 1 this year (L.G., April, 1944, p. 450). Under the present order employers were required to report by August 29 to the nearest Mobilization Registrar on any employees hired since May 1 who did not possess the necessary documents.

Results of Check-up

On August 31 it was announced that a total of 7,245 men not in good standing under Mobilization Regulations had been located through employers' reports on their male employees.

The delinquents were among nearly 36,000 doubtful cases reported by employers to Divisional Registrars in 13 Mobilization areas. Officials have taken steps to follow up on the cases of those who had not complied with the Regulations.

The remaining men investigated were found to be in good standing, and were permitted to remain in their civilian jobs.

Merchant Seamen on Inland Waters

Mr. A. MacNamara, Director of National Selective Service, announced on August 31 that merchant seamen engaged on inland waters are now "frozen" to their particular employers. Previously seamen engaged on inland waters were not restricted in their movements within the industry but now each shipping employer becomes a "designated establishment".

It was further indicated that permission is now required from a National Selective Service Officer by a merchant seaman before he may terminate his employment. This requirement is applicable in the case of all "frozen" occupations. (L.G., 1943, p. 1333).

Prosecutions Under National Selective Service Civilian Regulations in August

Failure to comply with National Selective Service Civilian Regulations resulted in the prosecution of 174 persons during the month of August. Twenty-seven more charges were laid than in the previous month, with 53 conscientious objectors—25 of whom were convicted—charged with failure to follow a direction to report to an alternative service work camp.

During the month, 71 employees were convicted on charges which included quitting "designated" employment without Selective Service permission, or failing to accept high priority work when referred to it by a Selective Service officer. Employers were convicted in 14 cases, most of the accused being charged with engaging workers without permits.

A total of 110 court convictions was registered across Canada for the month, compared with 68 in July. Nineteen charges were withdrawn, and in 5 cases the accused were acquitted.

At September 1, a total of 364 cases was still pending—20 being charges against employers, 197 against employees, and 147 against conscientious objectors.

Selective Placement of Handicapped in United States

A RECENT press bulletin issued by the War Manpower Commission at Washington states that placements of physically handicapped persons by the United States Employment Service may total nearly half a million in 1944.

It is asserted that the placement record of the Employment Service shows a notable development in the placement of the handicapped in recent years. During 1940, jobs were found for 27,703 handicapped persons and the number of such placements was approximately doubled each year up to the end of 1943. With the increasing emphasis that is being given to the placement of the handicapped it is expected that an equally notable increase will be made in 1944.

For several years prior to the war a search was carried on for occupations in which handicapped persons could be employed satisfactorily. In this early research the important factor in selection was considered to be the nature of the disability, rather than the individual's remaining physical capacities. It is asserted that this method was found to be "severely wanting". In its place a job analysis was developed which emphasized "the remaining physical capacities and other qualifications of the worker in their specific relationship to the physical demands and other requirements of the job. This new approach is generally referred to as 'selective placement'." It is designed to throw open "every job in the occupational dictionary" in accordance with the applicant's capacity to meet the physical demands of any specific job. It has been adopted by the Occupational Analysis Division of the War Manpower Commission's Bureau of Manpower Utilization at Washington, "as standard practice in their studies of jobs in industry".

It is stated that the publication, *Selective Placement of the Handicapped,* issued by the Veterans' Employment Service Division of the War Manpower Commission "has become the accepted textbook of all employment service personnel in the local office placement activities concerning the handicapped". It is stated also, that training plans were initiated early in 1944 for the training of at least one person in each local employment office in the United States in the technique of selective placement.

The need for obtaining the co-operation of industry has been recognized as essential. From experience so far it would appear that this has been secured in large measure, and efforts will be made to have it continued and extended in the post-war period.

U.S. Summary of British Woman-Power Policies

A comprehensive survey of British policies and experience in the employment of women during the war has recently been published by the Women's Bureau of the United States Department of Labour (Bulletin No. 200). It describes the arrangements for mobilizing women and the evolution of policy from persuasion to compulsion, the Government's efforts to improve conditions inside the factory and to solve shopping, child-care and other outside problems. A chapter is devoted to the problem of women's pay and trends in women's earnings during the war. Post-war plans are also outlined. It is pointed out that in 1943 women constituted 60 per cent of the labour force in Royal Ordnance Factories, over 50 per cent in the chemical and explosives industry, 40 per cent in aircraft and 35 per cent in the engineering industry. Much of the material in the bulletin has already appeared in notes and articles in the LABOUR GAZETTE.

Appendices include a list of industries in which union agreements stipulate that women replacing men are to receive the men's rates (in some cases after a probationary period), and a list of industries where lower rates are paid to women replacing men. Tables show the increase in average earnings of men and women, the bases on which women's pay is calculated for the various operations in Royal Ordnance Factories and trade union membership among women from 1913 to 1941.

Decisions of National War Labour Board

DURING the month of August, the National War Labour Board issued decisions in the following cases:—

Western Union Telegraph Company and American Communications Association (C.I.O.).

Burkhardt's Dairy, Kitchener Dairies Ltd., Kitwat Jersey Dairy, Maple Lane Dairy, Purity Dairy, Model Dairy Kitchener, Ltd., Rickert Dairy, Rosemount Farms Dairy, Westside Dairy Ltd., all of Kitchener, Ont. and Dairy Workers' Union, Local 22697 (A.F. of L.).

Montreal Ornamental Iron and Bronze Manufacturers and Contractors and United Steelworkers of America, Local 2366.

McKinnon Industries, Limited (St. Catharines, Ont.) and U.A.W.—C.I.O., Local 199.

Canadian National Railways and System Adjustment Board of Canadian Brotherhood of Railway Employees and Other Transport Workers.

Canadian Pacific Express Company and Brotherhood of Express Employees.

General Steel Wares Limited (Toronto and London) and United Steelworkers of America, Locals 1111 and 2771.

Canadian Pacific Railway Company (West Saint John, N.B.) and Committee of Elevator Employees, members of International Longshoremen's Association, Local 1121.

Standard Lime Company, Limited (Joliette, Que.) and Union Canadienne des Ouvriers des produits de la chaux, Local No. 1.

Canadian Pacific Air Lines Limited, and Canadian Airways Limited (Winnipeg, Man.) and International Association of Machinists, Lodges 764 and 1572.

Hudson's Bay Company.

National Steel Car Corporation, Limited and Local 2352, United Steelworkers of America.

Canadian Car and Foundry Company, (Amherst, N.S.) and A. S. Farrell.

Fraser Companies, Limited (Edmundston, N.B.) and Restigouche Company, Limited (Atholville, N.B.) and International Brotherhood of Pulp, Sulphite and Paper Mill Workers.

Service Station Equipment Company, Limited, (Winnipeg, Man.) and Employees' Association of the said plant.

Victory Aircraft Limited (Malton, Ont.) and International Association of Machinists, Lodge 717.

Re: The Western Union Telegraph Company *and* American Communications Association (C.I.O.)

Reasons for Decision

The Union applies for substantial wage adjustments for classifications engaged in the Companys cable division at Montreal, North Sydney, N.S. and Canso, N.S. to bring them more in line with rates paid similar classifications in the United States.

The application must be viewed by the Board under the provisions of the Wartime Wages Control Order, 1943, P.C. 9384. The evidence is that the Company pays rates which are as high, if not higher, than those paid by any Company in the same line of business in Eastern Canada. Our view is that there is no case for an increase to rectify a gross inequality or gross injustice under section 20 (1) (*a*) of the Order.

Nor do we think that this is a case where the Board should exercise its discretion under paragraph (*b*) of section 20 (1) and direct an increase equal to the difference between the maximum cost-of-living bonus and the amount which was being paid, namely the minimum mandatory under our general orders.

The application must be denied.

August 3, 1944.

Re: Burkhardt's Dairy, Kitchener Dairies Ltd., Kitwat Jersey Dairy, Maple Lane Dairy, Purity Dairy, Model Dairy Kitchener Ltd., Rickert Dairy, Rosemount Farms Dairy, Westside Dairy Ltd., all of Kitchener, Ont., and Dairy Workers Union, Local 22697 (AFL)

Reasons for Decision

This appeal by the Union is from an order dated April 27, 1944, of the Ontario Regional Board setting under P.C. 5963 what it considered to be a reasonable and fair basis of remuneration for employees in the dairy distributive trade in the Kitchener area.

The Regional Board appears to have given the matter considerable study and attention and has equalized the rates at the level which it thought was the proper one.

It is impossible for this Board to find ground upon which it could with reason reverse the decision of the Regional Board.

The appeal must be dismissed.

August 3, 1944.

Re: Montreal Ornamental Iron and Bronze Manufacturers and Contractors *and* United Steelworkers of America, Local 2366.

Reasons for Decision

This is an appeal by the Union from a decision of the Quebec Regional Board dated November 12, 1943, refusing an increase in the cost-of-living bonus. The application must be considered in the light of the only relevant source from which the war labour boards can draw power, namely section 34 (3) of P.C. 5963. More precisely, the matter must be viewed under P.C. 2370 (now the proviso attached to section 34 (3)), because no case was attempted to determine the bonus on the rise in the cost-of-living index since the last general increase in wages.

The argument for the appeal resolves itself in a request that we make comparisons of the 95-cent bonus in this industry with the full bonus which was being paid in the shipbuilding industry, the $2.50 bonus in the building trades and the sheet metal industry, etc. Our view is that the intent and purpose of the enactment of P.C. 2370 does not permit a broad construction. We find no ground for an increase "within the industry" concerned directly and following the consistent interpretation heretofore given by the Board, comparison with other industries, however closely related or allied they may be, was not contemplated by the Order in Council.

Consequently, we must refuse the appeal.

August 3, 1944.

Re: The McKinnon Industries Limited (St. Catharines, Ont.) *and* U.A.W.-C.I.O. Local 199.

Reasons for Decision

This matter comes to us as an appeal from the Ontario Regional Board and the question is to determine to what extent the union is entitled to receive notice of the applications made by the Company to the Regional Board. The problem is one of interpretation of by-law 13 (2) which governs the procedure to be followed by war labour boards and is as follows:—

"The National Board or any Regional Board to which an application is referred shall give notice in such manner, as, in the circumstances, it deems sufficient to any person, firm, corporation or association having an immediate interest in the matter in respect of which such application is made and shall give an opportunity for representations to be made by or on behalf of every such person with regard thereto."

By the current collective agreement between the parties dated April 13, 1943, the Company recognized the union "as the exclusive bargaining agent for the purpose of collective bargaining for those of the Company's eligible hourly-rated employees who are members of the union in good standing". These words only concede to the union a limited representative status and to paraphrase the by-law, the union would have "an immediate interest" only in such application as affects "eligible hourly-rated employees who are members of the union in good standing".

When an application by this company is received by the Regional Board while this agreement is in effect and the classifications mentioned in the application are eligible to union membership, then it should be incumbent upon the Board to ascertain whether in fact union members are involved and if they are, then we think the union has an "immediate interest" in the application.

On the argument before this Board, the Company submitted that under the by-law the

Regional Board had a discretion as to whether or not notice should be given to any party interested and a like discretion as to the nature of such notice. In our opinion the wording of the by-law does not justify this interpretation. Our view is that when "eligible" union members are directly involved in an application the union has an "immediate interest" and there is no discretion: the Board *shall* give notice to the union and *shall* give the union an opportunity to make representations, either written or oral (or both) as the Board may determine.

On December 18, 1943, the Regional Board gave the union notice that it had approved certain wage rates requested by the Company in its foundry operations. The union says there were union members in the classifications concerned and its statement was not contradicted. Such being the case, in our opinion notification of the decision was not a compliance with the by-law. What the union was entitled to was notice of the application and an opportunity to make representations.

Our view is that the by-law, when interpreted as we suggest, provides a proper rule and safeguards the development of harmonious industrial relations within the scope of the agreement.

Re: Canadian National Railways *and* System Adjustment Board of Canadian Brotherhood of Railway Employees and Other Transport Workers.

Reasons for Decision

This application under P.C. 5963 is on behalf of the sleeping and dining car employees for a basic month's work of 208 hours, overtime, vacations with pay and an increase in wage rates. There were a number of rules submitted upon which the parties were in agreement and insofar as this Board's approval may be required they are hereby authorized.

As to the first request, the application should be dealt with in the same manner as in case file 2N-250[1] and the hours of service per month shall be 240 with overtime for time worked in excess of 240 hours on the actual minute basis at pro rata rate.

With respect to the increase in wages, we adopt our decision in the main railway case (file N-1300)[2], and we direct from the date of application, November 25, 1943, increases in basic rates of the classifications covered by this application, as follows:—

1. Six cents (6¢) per hour to all hourly paid classifications;
2. Forty-eight cents (48¢) per day to all daily paid classifications;
3. Two dollars and eighty-eight cents ($2.88) per week to all weekly paid classifications;
4. Twelve dollars and forty-eight cents ($12.48) per month to all monthly paid classifications.

Any classifications, however, who have received wage increases subsequent to August, 1939, will have such increases taken into account when adjustment is made for the present increase.

Our decision on vacations with pay is reserved.

There will be finding and direction accordingly.

August 3, 1944.

Re: Canadian Pacific Express Company *and* Brotherhood of Express Employees.

Reasons for Decision

An application by the Brotherhood under Order in Council P.C. 5963 for an increase of $20 per month in the basic wage rates of employees in the company's express and cartage departments who are covered by collective agreements.

This case was retained pending determination of application N-1300[2] on behalf of certain railway employees. The decision with respect to that application having been filed on July 31, 1944, we adopt it as our decision in this case.

Therefore, the classifications represented on the hearing of this application, as and from the date of said application, viz., October 21, 1943, are entitled to increases in their basic rates as follows:—

1. Six cents (6¢) per hour to all hourly paid classifications;
2. Forty-eight cents (48¢) per day to all daily paid classifications;
3. Two dollars and eighty-eight cents ($2.88) per week to all weekly paid classifications;
4. Twelve dollars and forty-eight cents ($12.48) per month to all monthly paid classifications.

Any classifications, however, who have received wage increases subsequent to August, 1939, will have such increases taken into account when adjustment is made for the present increase.

Finding and Direction will issue accordingly. August 3, 1944.

Re: General Steel Wares Limited (Toronto and London) *and* United Steelworkers of America, Locals 1111 and 2771.

Reasons for Decision

This is an appeal by the employer from a decision of the Ontario Regional Board dated April 29, 1944, directing under P.C. 9384 an increase in starting rates for men from 58 cents to a range of 60-63 cents in the Toronto plant, from 53 to 55-60 cents in the London wares plant and from 53 to 63 cents in the London foundry plant. The Company's schedule of rates for women and boys under 18 was entirely revised and the automatic progressive increases ordered could mean a raise of 16 cents in the hourly rate of some junior employees having completed 6 months of employment. The Regional Board also directed payment of a 5 cents premium for work on the night shift which in all cases starts at 7 p.m. or later.

The Order gives the Board power to allow increases "only if and to the extent that (it) find that such (increases are) necessary to rectify a gross inequality or gross injustice." What appears to have been done here by the Regional Board was to fix starting rates at what the Board thought was a fair and reasonable level. There was no finding of "gross inequality or gross injustice" and no further evidence as to the other rates in the three plants involved. So that we have the bottom rung of the ladder being moved upwards under the new formula and the rest are likely to follow.

In June, 1943, the Regional Board increased the male starting rate by 5 cents in the Toronto plant under the comparative formula of P.C. 5963. Seven months later the Union applies for a further increase under the new Order.

It must be noted that the present control order is not a mere continuation of the former; its primary purpose, the stabilization of the wage structure, must be given effect to. Recourse to what may be fair and reasonable on a constantly ascending comparative basis will never achieve that purpose.

The Regional Board's decision in this case on the matter of wage increases cannot be sustained because it was not shown that the increases were ordered on the basis contemplated by section 20 (1) (*a*) of the governing order.

As to the night work premium, the evidence is that only a small percentage of the working force is affected. There are a small number of maintenance employees and as production requires some shift workers we do not think it necessary to interfere with that portion of the decision.

The appeal is therefore allowed except as to the night work premium.

August 3, 1944.

Re: Canadian Pacific Railway Company (West St. John, N.B.) *and* Committee of Elevator Employees, members of International Longshoremen's Association, Local 1121.

Reasons for Decision

An application by the employees for a wage increase from 64 to 98 cents on the ground that the work performed by elevator grain handlers should be remunerated at longshore rates.

A similar application on behalf of these employees was refused by this Board, differently constituted, on February 3, 1943. It was then sought to bring these rates up to the rates paid to longshoremen. We have no evidence to warrant our taking a different view in the present case.

However, there appears reason to acknowledge that grain handlers and wharf freight handlers should stand in the same relative position with respect to longshoremen rates although we do not by that wish to lay down the rule that elevator employees and freight handlers are generally to be considered as comparable classifications.

This Board having granted an increase to the wharf freight handlers (L.G., 1943, p. 1488) we think in the circumstances there should be an increase of 3 cents per hour in this case, effective from the date of application.

August 4, 1944.

Re: Standard Lime Company, Limited (Joliette, Que.) *and* Union Canadienne des ouvriers des produits de la chaux; Local No. 1.

Reasons for Decision

This is an appeal by the Union from a decision of the Quebec Regional Board dated February 29, 1944, refusing an application under P.C. 9384 for a 10 cent hourly wage increase. Leave to appeal was given by the Regional Board.

The established base rate in the plant is now 40 cents. The Company pleaded its inability to pay higher wages and it was on the basis of

that plea that the Regional Board denied the application. In the course of the proceedings before this Board, the Company has agreed to a 5 cent increase.

On the basis of the Board's views expressed in the Asbestos decision (L.G., May, 1944, p. 602) we are of opinion that a 5-cent increase is allowable under section 20 (1) (*a*) of the order as amended. There will be a finding and direction accordingly.

So that the Board may properly exercise its discretion under section 30 (2) of the Order on the matter of retroactive payment of the award, we ask the parties to file with this Board their submissions on the question not later than September 1 next.

August 3, 1944.

Re: Canadian Pacific Air Lines Limited and Canadian Airways, Limited (Winnipeg, Man.) *and* International Association of Machinists, Lodges 764 and 1572.

Reasons for Decision

This application by the Union is for wage increases for monthly-rated employees in the maintenance, overhaul and stores departments of the transportation division of Canadian Pacific Airlines Limited and for the hourly-rated shop employees of the engine overhaul depot of Canadian Airways Limited. The request is for 23 cents per hour or $46 per month in keeping with the application dated September 15, 1943, by the main body of steam railway employees (case N-1300)[1]. There is also a request that rates for beginners under 18 be eliminated in the overhaul depot and for an overtime rule in the transportation division.

Taking first the case of Canadian Airways Limited, a subsidiary of CPA, the evidence is that overhauling engines for the Air Lines is a minor portion of its operations; the company is largely engaged on contract work for the Department of Munitions and Supply as is another subsidiary, Mid-West Aircraft Limited, whose case was previously considered by the Board (MacDonald Bros. Aircraft Ltd. et al decision, L.G., May, 1944, p. 605) on an appeal from the Manitoba Board. The proper comparison is with the companies dealt with in that decision and the recent increase to steam railway employees is altogether unrelatable to the employees concerned in this application. This branch of the application must be refused.

The request for monthly-rated employees of Canadian Pacific Air Lines must be viewed in relation to air transportation rates and not on the basis requested. Our recent 6-cent decision for steam railway employees was the result of a comparative study designed to give them an increase representing roughly and with allowances the raise in rates generally since the beginning of the war. This Board did not propose to set up a new level.

The overtime rule now in effect is payment at pro rata rate after 48 hours or compensatory time off, which appears to be the general practice in this industry for monthly rated employees. We do not think we should extend the rule at this time.

Finding and Direction accordingly.

August 3, 1944.

Re: Hudson's Bay Company

Reasons for Decision

This appeal is from a decision of the British Columbia Board dated May 19, 1944, concerning the company's store managers at Nelson, Vernon and Kamloops who were declared by this Board to be not above the rank of foreman (L.G., May, 1944, p. 600).

There are two questions:

(1) Are these three employees to be considered as belonging to the one occupational classification?

(2) In establishing rates for them pursuant to section 15 and Schedule A of P.C. 9384 are annual bonuses paid on a basis other than a time basis to be incorporated into the salary rates?

"similar duties" and "exercise a like type and degree of skill" (section 13 (1) (*h*)). We think it appeared in the case cited above that such was the situation and our answer to the first question will be in the affirmative (see Schell Transports, Limited, L.G., Mar., 1944, p. 283). It must be noted that our decision is confined to the three employees mentioned and is not to be extended to all managers in what the company calls its "interior stores division".

With respect to question 2, our view is that the "establishment of wage rates" under section 15 and Schedule A does not contemplate the merging of all the various types of remuneration enumerated in the definition of "wages" in section 13 (1) (*o*) of the Order.

The answer to question 1 turns upon whether on the facts these managers perform If the company wishes to convert into exclusively time rates rates which heretofore were calculated partially on another basis, it may make application to the Regional Board under section 20 (1) (*c*) (iv) of the Order.

We therefore sustain the decision of the Regional Board with respect to question 2, and we allow the appeal with respect to question 1. August 11, 1944.

[1] L. G., Aug., 1944, p. 960.

Re: National Steel Car Corporation, Limited *and* Local 2352, United Steelworkers of America.

Reasons for Decision

This is an appeal by the employer from an Order from the Regional War Labour Board of the Province of Ontario dated May 16, 1944, directing the Company to grant to all employees who have completed one year's continuous service, or more, one week's vacation with pay, in accordance with the terms of the memorandum attached to said Order.

At the hearing, the President of the Company stated that he fully approved of the principle of vacations with pay and in fact he had applied for and had been granted such authority by the Regional War Labour Board on or about July 3, 1943, but it had not been put in effect by the Company. One of his objections to the Order of the Regional War Labour Board was that his Company has a special order for construction of ore cars, which is to be completed about October 1, 1944.

The Board is of the opinion that the Order of the Regional War Labour Board should be confirmed and as there is no cross appeal of the employees, the effective date of the Order should be May 16, 1944, being the date of the Order of the Regional War Labour Board.

In view of the provisions of Section (*a*) of the schedule attached to the Regional War Labour Board's Order—that the vacation would be allowed for and during the following twelve months' service, the Board is of opinion that by co-operation of the employer and employees there should be no difficulty in working out a plan of holidays that would not impair the quantity and regularity of war production.

The appeal is therefore dismissed and finding and direction will issue accordingly.

August 16, 1944.

Re: Canadian Car and Foundry Company Limited (Amherst, N.S.) *and* A. S. Farrell.

Reasons for Decision

An application by the Company for leave to appeal from a decision dated April 15, 1944, of the Regional Board for Nova Scotia which increased the salary of the Company's Industrial Relations officer from $275 to $300 per month. The direction under appeal was made under the provisions of P.C. 9384.

Under section 20 (1) of that Order the Board could direct an increase of a wage rate "established" under the Order "for an occupational classification" to the extent necessary "to rectify a gross inequality or gross injustice". The first question is to determine whether this employee was one for which the employer was required to "establish" a rate under section 15 and schedule A of the Order. By virtue of the proviso to section 15 (1) Mr. Farrell was presumed to be above the rank of foreman because he was being paid a rate of more than $250 per month and on the material filed by him on this appeal we must conclude that the presumption has not been removed. There was no jurisdiction in the wages control order in his case and the conclusion must be that the application and appeal are to be allowed.

August 15, 1944.

Re: Fraser Companies, Limited (Edmundston, N.B.) and Restigouche Company, Limited (Atholville, N.B.) *and* International Brotherhood of Pulp, Sulphite and Paper Mill Workers.

Reasons for Decision

An appeal from a decision dated June 16, 1944, of the Regional Board for New Brunswick refusing a joint application for approval of an agreement providing two weeks' vacations with pay after five years of employment. The Regional Board restricted the plan to the strict terms of D.B. 17 but gave leave to bring this appeal.

There is no contest between the parties and as an alternative to the original application there is now proposed a vacation plan recently approved by the Ontario Board for certain mills in that province under which the 2 weeks' vacation becomes effective after 10 years' service. The plan is as follows:—

After 1 year's continuous service—1 week.
After 5 years' continuous service—1 week plus 1 day.
After 6 years' continuous service—1 week plus 2 days.
After 7 years' continuous service—1 week plus 3 days.
After 8 years' continuous service—1 week plus 4 days.
After 9 years' continuous service—1 week plus 5 days.

After 10 years' continuous service—2 weeks.

Rather than send the case back to the Regional Board for consideration of this plan, we think we can upon a broad comparison with what is being done in Ontario give our approval to the plan set out above (Provincial Transport Company, L.G., 1943, p. 1491; Otis-Fensom Elevator Company, L.G., April, 1944, p. 472).

The appeal will be allowed.

August 16, 1944.

Re: Service Station Equipment Company Limited (Winnipeg, Man.) *and* Employees' Association of the said plant.

Reasons for Decision

This is a joint application for leave to appeal from a decision of the Manitoba Regional Board dated March 22, 1944 refusing vacations with pay while the Company maintained a practice, established prior to wage control, of paying for time not worked on statutory holidays. Hourly-rated employees only are concerned and leave to appeal was denied by the Regional Board.

The purpose of vacations with pay is to provide the worker who qualifies with a period of rest and an opportunity for recuperation of energy. Statutory holiday-pay is a money premium which very often serves as a steady-work bonus or as a substitute for an overtime rule.

The policy of this Board has been rather unfavourable to holiday-pay, while vacations with pay have been approved extensively under the conditions laid down in our decision bulletin 17. But this Board has never approved a vacation with pay plan on condition that a working condition, such as statutory holiday-pay, established prior to November 15, 1941 be discontinued. We are of opinion that the application could have been authorized without doing violence to the purposes of the Order (P.C. 9384). Our view of this case is that payment for statutory holidays is not the issue, because that condition ante-dated wage control. The question resolved is merely that statutory holiday-pay established prior to wage control does not necessarily bar a vacation with pay plan under D.B. 17.

We allow the application and also the appeal. The result is that the combined plan set out in the original application dated March 16, 1944 is hereby authorized.

August 15, 1944.

Re: Victory Aircraft Limited (Malton, Ont.) *and* International Association of Machinists, Lodge 717.

Supplementary Reasons for Decision

Following the Board's interim decision of May 3, 1944, [1] Professor J. C. Cameron was appointed as our investigator to make a comparative examination of employee-classification at this plant and at the De Havilland and other comparable plants. We have the benefit of his helpful and competent report and we find that 34·8 per cent of De Havilland employees were classified as journeymen (week of June 5, 1944) while the percentage at Victory Aircraft (end of April, 1944) was 13·7 per cent. These figures establish the Union's allegation that production workers at Malton have not been upgraded to or engaged in the journeyman classification in as large numbers as at De Havilland.

But apart from De Havilland, the prevailing practice in a representative section of the aircraft industry was also examined and we find that on that basis no condition of inequality exists at Victory. The practice which has been followed at the De Havilland plant cannot be used as a yardstick with which to measure the fairness and reasonableness of the practice at Victory, when De Havilland is so far out of line with the rest of the industry. The report says: "A detailed study of the figures leads one to the conclusion that the classification system at Victory is, on the whole, as favourable to the employees as at any other plant, De Havilland and possibly Fleet (17·9 per cent) excepted".

We do not propose to rectify at the expense of the public treasury an inequality created by what appears to have been the inordinate and abnormal system of classifying and upgrading practiced at De Havilland. The responsibility for curing the situation will have to rest upon the management at De Havilland and the authorities to whom they are accountable.

With regard to upward adjustments of wage rates, we give approval, effective from February 20, 1944, to the following maximum rates (inclusive of cost-of-living bonus):

Tool and die makers—1st class	$1.20
Journeymen (including machinists).	1.00
Inspectors, class I	1.05

Finding and Direction accordingly.

August 16, 1944.

[1] L. G., June, 1944, p. 727.

Industrial Disputes and Conciliation

Introduction

THE *Industrial Disputes and Conciliation* section contains monthly articles dealing with proceedings under the National Wartime Labour Relations Regulations, Conciliation Work of the Department of Labour, and Strikes and Lockouts in Canada, Great Britain and other countries.

Recent Proceedings under the Wartime Labour Relations Regulations.—Under the Wartime Labour Relations Regulations, P.C. 1003, the Government has extended its jurisdiction over employer-employee relations which are normally exclusively within the provincial field, to the extent considered necessary to cover adequately employers and employees in industries "essential to the efficient prosecution of the war", but without attempting to include other industry which has not a direct bearing on war production. In so far as these latter industries are concerned, each province can make its own decision as to whether or not they shall be brought under the Regulations.

Agreements have been made under the Regulations between the Dominion and every province except Alberta and Prince Edward Island providing for the setting up of provincial agencies for the administration of the Regulations.

The work of the Wartime Labour Relations Board (National) is here described in two separate articles. The first deals with applications made by unions for certification and their disposition by the Board; the second describes conciliation proceedings under the Regulations and includes the reports of Boards of Conciliation.

Conciliation Work of the Industrial Relations Branch.—Conciliation proceedings are carried on by the Industrial Relations Branch of the Department of Labour under the provisions of the Conciliation and Labour Act which empowers the Minister to inquire into the causes and circumstances of a dispute, to take such steps as seem expedient for the purpose of bringing the parties together, and to appoint a conciliator or an arbitrator when requested by the parties concerned.

Strikes and Lockouts.—The latest information concerning strikes and lockouts in Canada is published monthly in tabular form, with a summary appearing once a year. The summary of strikes and lockouts in Canada and other countries during 1943 appeared in the LABOUR GAZETTE for March, 1944.

The latest available information as to strikes and lockouts in Great Britain and other countries appears from month to month.

Amendment to the Wartime Labour Relations Regulations

ON September 6, the Minister of Labour, Hon. Humphrey Mitchell, announced that on the recommendation of the Wartime Labour Relations Board (National), the Wartime Labour Relations Regulations, P.C. 1003 had been amended.

By the amending Order in Council P.C. 6893, Section 15 of the original Order has been rescinded and a new section substituted. Section 15 originally provided that no collective agreement could be made for a period of less than one year but that where the term of an agreement was for more than one year it would be deemed to contain a provision for its termination at any time after one year, on two months' notice by either party to the agreement. The new section provides that every agreement, whether made before or after the effective date of the Regulations, is deemed to run for a period of not less than one year from its operative date and is not capable of cancellation by the parties within that period without the consent of the Wartime Labour Relations Board. In cases where an agreement, whether made before or after the effective date of the Regulations, is for a period of more than one year it shall be deemed to contain a provision for its termination at any time after one year from its operative date on two months' notice by either party.

A subsection has been added to Section 16 of the Regulations providing that in instances where either party to an existing

collective agreement has required the other under this section to enter into negotiations for the renewal of an agreement, sections 11, 12, 13 and 14 of the Regulations shall apply as in the case of negotiations for an agreement following certification of bargaining representatives under the Regulations. These sections provide for the intervention of the Wartime Labour Relations Board with a view to the completion of an agreement, the appointment by the Minister of Labour of a Conciliation Officer, the establishment of a Board of Conciliation and the manner in which he may deal with the Board's report.

Order in Council P.C. 7307 of September 16, 1941, is revoked by the amending order. Order in Council P.C. 7307 which was complementary to the Industrial Disputes Investigation Act now suspended, provided that strike votes in war industries should be conducted under the supervision of the Department of Labour following Board of Conciliation procedure and that a majority vote of those affected was necessary to make the strike legal. Since all proceedings under Boards of Conciliation established pursuant to the Act have now been completed, the revocation of P.C. 7307 became necessary.

The text of the new order in Council follows.

Text of P.C. 6393

Whereas the Minister of Labour reports that the Wartime Labour Relations Board has recommended the amendment of the Wartime Labour Relations Regulations, Order in Council P.C. 1003 of February 17, 1944, as hereinafter set forth;

That there has been consultation with the Ministers of Labour of the provinces concerned with reference to the said amendment; and

That it is necessary by reason of the war for the security, defence, peace, order and welfare of Canada and for the efficient prosecution of the war that provision be made accordingly;

Therefore, His Excellency the Governor General in Council, on the recommendation of the Minister of Labour, is pleased to amend the said regulations, and they are hereby amended as follows:—

1. Section fifteen is rescinded and the following substituted therefor:

"(15) Every collective agreement, whether made before or after the effective date of these Regulations, shall be deemed to run for a period of not less than one year from its operative date and shall not be capable of cancellation by the parties within that period without the consent of the Board; and when any such collective agreement is expressed to run for more than one year, it shall contain or be deemed to contain a provision for the termination thereof at any time after one year from its operative date on two months' notice by either party thereto."

2. Section sixteen is renumbered as subsection one of section sixteen and the following is added as subsection two of section sixteen:

"(2) Where either party to a collective agreement has required the other, pursuant to subsection one, to enter into negotiations for the renewal of the agreement, sections eleven, twelve, thirteen and fourteen shall apply to such negotiations for the renewal of the agreement as in the case of negotiations for a collective agreement."

3. Paragraph (*b*) of subsection three of section forty-eight is rescinded.

His Excellency in Council is further pleased to revoke and doth hereby revoke Order in Council P.C. 7307 of September 16, 1941 establishing regulations with a view to the avoidance of industrial strife.

Applications for Certification under the Wartime Labour Relations Regulations

THE Wartime Labour Relations Board (National) met for four days during the month of August. During this period the Board received twenty-five applications, held five public hearings, ordered two representation votes, issued fifteen certificates designating bargaining representatives, rejected five applications for certification, approved the withdrawal of three applications and gave decisions in four appeal cases.

Certifications Issued

(1) *Val d'or Mine and Mill Workers, Local 654 and Lamaque Mining Company, Limited, Bourlamaque, P.Q.*, (L.G., July 1944, p. 844).— Following a preliminary investigation of the application, the Board ordered that a representation vote of the employees be taken. Out of 295 eligible employees 227 voted in favour of the applicant union and 20 against. The Local Union and Messrs. Leo. Wennerholm, Albert Pelette, A. Lalonde, Basil Pelette, R. H. Carlin, Thos. McGuire and J. J. Billoki were certified as the bargaining representatives for the hourly-rated employees of the Lamaque Mining Company, Limited, Bourlamaque, P.Q. except supervisory and clerical staff, guards, technicians, laboratory employees or employees holding positions higher than that of sub-foreman or mucker boss.

(2) *Canadian Union of Soapstone Workers, Local No. 1 and Broughton Soapstone and Quarry Company, Limited, Thetford Mines, P.Q.* (L.G., July 1944, p. 845).— Following a preliminary investigation of the application, the Board ordered that a representation vote of the employees be taken. Out of 35 eligible employees 26 voted in favour of the applicant union and 5 against. The Local Union and

Messrs. Edmund Leblond, Wilfrid Nutbrown, and Emile Jacques were certified as the bargaining representatives of the employees of the Broughton Soapstone Mine and Quarry Company, Limited, Leeds Station, Quebec, except the Manager, Assistant Manager and the Foreman having authority to employ and discharge.

(3) *Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees (Coal Handlers) and Canadian Pacific Railway Company (Island Coal Dock) Fort William, Ontario* (L.G., July 1944, p. 845). —Following a preliminary investigation of the application, the Board ordered that a representation vote of the employees be taken. Out of 54 eligible employees 48 voted in favour of the applicant union and 2 against. The Local Union and Messrs. J. L. Pateman and T. T. Graveson were certified as the bargaining representatives for all weighmen, coalmen, watchmen, mine operators, repairmen, carloaders and oilers of the Canadian Pacific Railway Company (Island Coal Dock), Fort William, Ontario.

(4) *Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, Lodge 650 and Superior Elevator Company, Port Arthur, Ontario.* (L.G., July 1944, p. 845)—Following a preliminary investigation of the application, the Board ordered that a representation vote of the employees be taken. Out of 16 eligible employees 14 voted in favour of the applicant union and 2 against. The Local Union and Messrs. J. L. Pateman, C. Hardick, and F. Ryder were certified as the bargaining representatives for the monthly-rated and hourly-rated employees of the Superior Elevator Company, Limited, Port Arthur, Ontario, except foreman, supervisor and office staff employees.

(5) *Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, Lodge 650 and Northland Terminals, Limited, Fort William, Ontario.* (L.G., July 1944, p. 845) Following a preliminary investigation of the application, the Board ordered that a representation vote of the employees be taken. Out of 31 eligible employees 26 voted in favour of the applicant union and 1 against. The Local Union and Messrs. J. L. Pateman, C. Hardick and F. Ryder were certified as the bargaining representatives for the monthly-rated and hourly-rated employees of Northland Terminals, Limited, Fort William, Ontario, except foremen, supervisory and office staff employees.

(6) *Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, and National Grain Company, Limited, Fort William, Ontario.* (L.G. July 1944, p. 845)—The Local Union and Messrs. J. L. Pateman, C. Hardick and F. Ryder were certified as the bargaining representatives for monthly-rated and hourly-rated employees of the National Grain Company, Limited, Fort William, Ontario, except foremen, supervisory and office staff employees. The representation vote of the employees was taken prior to certification by the Board in which 32 out of 38 eligible employees voted in favour of the applicant union and 2 against.

(7) *Brotherhood of Railway, and Steamship Clerks, Freight Handlers, Express and Station Employees, Local No. 650 and Reliance Grain Company, Limited, Fort William, Ontario.* (L.G., July 1944, p. 845)—The Local Union and Messrs. J. L. Pateman, C. Hardick, and F. Ryder were certified as the bargaining representatives for the monthly-rated and hourly-rated employees including a foreman of the Reliance Grain Company, Limited, Fort William, Ontario except office and other supervisory personnel. Certification by the Board followed the taking of a representation vote in which 28 out of 37 eligible employees voted in favour of the applicant union and 3 against.

(8) *Dawson Miners Union, Local 564, International Union of Mine, Mill and Smelter Workers and Yukon Consolidated Gold Corporation, Limited, Dawson City, Y.T.* (L.G., July 1944, p. 845)—Following an examination of the Union's membership records by an Officer of the Board, the Board certified the Union and Messrs. George Boxall, Joseph Stamelen, C. J. Lelievre, Chas. Mills, Wm. Scott, H. Hegstrom, J. K. Struthers, Chase J. Powers, Harvey Murphy, R. A. Hyssop, Don. Guise and John Ogbourne as the bargaining representatives for the employees of the Yukon Consolidated Gold Corporation, Limited, Dawson Recording District except foremen, dredgemasters, assayers, Gold Room employees, Timekeepers, Office workers, Shift bosses, supervisors and draftsmen.

(9) *Deepsea and Inlandboatmen's Union of the Pacific, B.C. Division and Badwater Towing Company, Vancouver, B.C.* (L.G., July 1944, p. 845)—Following an examination of the Union's membership records by an officer of the Board, the Board certified the Union and Messrs. J. M. Smith and H. Sipes, as the bargaining representatives for the employees of the Badwater Towing Company, Vancouver, B.C., except certificated deck officers and engineer officers.

(10) *International Brotherhood of Electrical Workers, Local 230 and Canadian Collieries (Dunsmuir), Limited, (Puntledge River Power-house), Vancouver, B.C.* (L.G., July

1944, p. 845)—Following an examination of the Union's membership records by an officer of the Board, the Board certified the Union and Mr. Frederick J. Bevis as the bargaining representatives for the employees engaged in the Puntledge River Power-House of the Canadian Collieries, (Dunsmuir), Limited, Vancouver, B.C. except the Power-House foreman.

(11) *Brotherhood of Railroad Signalmen of America and Toronto Terminals Railway Company, Toronto, Ontario.* (L.G., Aug., 1944, p. 969)—The Union and Mr. E. J. Burnan were certified as the bargaining representatives for the employees in the Signal Division of the Toronto Terminals Railway Company except the supervisor. Certification by the Board followed an examination of the Union's membership records by an officer of the Board.

(12) *Deepsea and Inlandboatmen's Union of the Pacific, B.C. Division, and Messrs. J. M. Smith and H. Sipes* were certified as bargaining represenatives for the various categories of unlicensed personnel employed on the tugs and barges operated by W. F. Gibson & Sons, Vancouver, B.C. in its towing service except unlicensed employees temporarily serving in positions ordinarily occupied by certificated (licensed) officers and engineers. (L.G., July 1944, p. 845).—Certification followed a representation vote of the employees conducted by an officer of the Board.

(13) *Canadian Brotherhood of Railway Employees and Other Transport Workers, Division 217, and Messrs. W. H. Sands, E. E. Wilkinson, W. D. Tucker and R. Heriot* were certified as bargaining representatives for firemen, deckhands, bargemen, and cooks employed on tugs and barges operated by the Canadian Pacific Railway Company on Okanagan Lake, B.C. (L.G., Aug. 1944, p. 968) —The Union's membership records were examined by an officer of the Board prior to certification.

(14) *Canadian Seamen's Union, Local 5, and Mr. A. J. McKeown* were certified as bargaining representatives for the unlicensed personnel engaged on the cable ships operated by the Western Union Telegraph Company, Halifax, N.S., except the purser. (L.G., Aug. 1944, p. 968)—Certification of bargaining representatives followed an examination of the Union's membership records by an officer of the Board.

(15) *National Harbours Board Employees' Association of Montreal and National Harbours Board, Montreal, P.Q.* (L.G., July 1944, p. 844)—The Association and Messrs. E. L. McLean, J. Gagne and V. Black were certified as bargaining representatives for the hourly-rated, shift-rated and monthly-rated employees of the National Harbours Board in Montreal, excepting all employees who are classed as permanent for the purposes of the National Harbours Board Pension Plan By-law I and excluding also the following groups or occupational classifications: all the employees on the pay-rolls of the Grain Elevator System and the Cold Storage Warehouse; employees in the Cold Storage Power House; employees of the General Maintenance Forces who are *regularly* assigned to electrical or millwright work in the Grain Elevator System; employees in the Pass Bureau; toll collectors; and all temporary employees who are filling positions which are ordinarily classed as permanent for the purposes of the Pension Plan. Certification of bargaining representatives followed the examination of the Association's membership records by an officer of the Board.

Applications for Certification Rejected

(1) *United Steelworkers of America and Steel Company of Canada, Dominion Wire Works, St. Joseph Street plant, Lachine, P.Q., and the Notre Dame and Charlevoix Streets plant, Montreal, P.Q. and the Stelco Employees Association for the same two plants of the company.* (L.G., June 1944, p. 740).—Following an investigation of the applications and a public hearing, the Board rejected the four applications because of lack of jurisdiction, the company not being engaged in producing or manufacturing for war industry or war purposes as defined in Schedule "A" of the Wartime Labour Relations Regulations.

(2) *National Association of Metal Workers of Three Rivers, and Canada Iron Foundries, Limited, Three Rivers, P.Q.* (L.G., July, 1944, p. 845).—Following an investigation of the application and a public hearing at which representatives of the applicant union, the company and the International Moulders and Foundry Workers' Union, intervener, presented their cases, the Board rejected the application on the grounds that it was made too late in view of the agreement which was in existence and in view of the provisions of Section 9 of Wartime Labour Relations Regulations, P.C. 1003, which provides for the election of new bargaining representatives only after the expiry of a ten-month period from the operative date of the agreement.

Applications for Certification Withdrawn

(1) *Employees' Union of Wartime Metals Corporation (C.C.L.) and Wartime Metals Corporation, Black Lake, P.Q.* (L.G., July 1944, p. 845).—On the request of a representative of the applicant union, the application

for certification of bargaining representatives has been withdrawn.

(2) *Canadian Union of Asbestos Workers, Local 5 and Bell Asbestos Mines, Limited, Thetford Mines, P.Q.* (L.G., July 1944, p. 845). On the request of a representative of the applicant union, the application for certification of bargaining representatives has been withdrawn.

(3) *International Longshoremen's Association, Local 163, and Canadian Pacific Railway Company (B.C. Coast Steamship Service, Victoria, B.C.)* (L.G., Aug. 1944, p. 968).—On the request of the secretary of the applicant union, the application for certification of bargaining representatives has been withdrawn.

International Union Operating Engineers, Local 510, and Prince Rupert Dry Dock and Shipyard, Prince Rupert, B.C.

Shipwrights, Joiners and Caulkers' Industrial Union, No. 2 (C.C.L.) and Prince Rupert Dry Dock and Shipyard.

Decision of Board in Appeal Cases

The following appeals from decisions of Provincial Labour Relations Boards and applications for leave to appeal therefrom were considered by the Wartime Labour Relations Board (National) and judgment given.

1. The Wartime Labour Relations Board (National) denied the appeal of the Dairy Co-operative Marketing Association, Limited, Prince Albert, Sask., and the Dairy Pool Employees' Co-operative Association, from a directive of the Saskatchewan Wartime Labour Relations Board naming and appointing Local

241, United Packinghouse Workers of America, and certain officers of that union as bargaining representatives of certain employees of the Prince Albert Plant of the employer Association.

Under the direction of the Saskatchewan Wartime Labour Relations Board, a representation vote of the production workers and milk salesmen employed in the Prince Albert plant of the employer was taken, a majority voting in favour of Local 241, United Packinghouse Workers of America electing or appointing bargaining representatives on their behalf. Subsequent to the certification of such bargaining representatives by the Saskatchewan Board, the Dairy Co-operative Marketing Association appealed the decision on the grounds (1) that the vote was confined to a limited group of employees in one only of the plants of the employer Association; (2) that the bargaining unit comprised only a small group of workers having no special or distinctive trade skills or trade qualifications that would qualify them for special representation under Section 5 (4) of the Regulations; and on other grounds.

The Wartime Labour Relations Board (National) denied the appeal holding that the appellant had not established that the Saskatchewan Board had erred in fixing the bargaining unit.

The appellants were represented by Messrs. Arthur Moxon, K.C., Saskatoon, Saskatchewan and the respondent union by Mr. F. W. Dowling.

2. The Wartime Labour Relations Board (National) decided to set aside the certification by the British Columbia Minister of Labour of the officers of the United Steelworkers of America as bargaining representatives of the employees of Plant No. 3 of Vivian Diesels and Munitions, Limited, Vancouver, B.C., and appointed G. R. Currie, Industrial Relations Officer, Vancouver, B.C., as Returning Officer for the purpose of taking a representation vote of the employees of this plant.

The decision of the Board was made on an appeal by Lodge 692, International Association of Machinists, against the certification of the officers of the United Steelworkers of America as bargaining representatives for certain employees of Vivian Diesels and Munitions, Limited, Plant No. 3, Vancouver, B.C., the ground for the appeal being that the appellant union was entitled as an interested party to an opportunity to present evidence and make representations.

The appellants were represented by Messrs. D. S. Lyons and P. R. Bengough and the respondent union by Mr. John Mitchell.

3. The Wartime Labour Relations Board (National) rendered judgment on an appeal by the Motor Products Corporation, Limited, Windsor, Ont., against the decision of the Ontario Labour Relations Board in referring to the Dominion Minister of Labour the matter of negotiations between the Company and Local 195, United Automobile Aircraft and Agricultural Implement Workers of America for the renewal of an existing collective agreement in order that the Minister might instruct a Conciliation Officer to confer with the parties and attempt to effect an agreement under the Regulations. The Company contended that the Regulations applied only where the bargaining representatives of the employees had been certified in accordance therewith.

In its judgment the Board referred to the recent amendment of the Wartime Labour Relations Regulations which provided for conciliation in the negotiations for the renewal of an existing agreement but decided to allow the appeal as the order of the Ontario Board referring the matter to the Minister was made prior to the passage of such amendment. However, in allowing the appeal, the Board declared that in view of the amendment the Ontario Board may again refer the matter to the Minister.

Concerning the status of the employees under the existing agreement, the Board upheld the view of the Ontario Labour Relations Board that an automatic renewal clause such as that contained in the agreement between the Company and the Union was inconsistent with the Wartime Labour Relations Regulations and could not operate as a bar to intervention of the Board pursuant to the request made by the union.

The appellants were represented by Mr. C. P. Dickson, Windsor, Ont., and the respondent union by Mr. J. L. Cohen, K.C., of Toronto, Ont.

The text of the Board's judgment will be found at the conclusion of this article.

4. The Wartime Labour Relations Board (National) considered the application for leave to appeal of the Independent Smelter Workers' Union against the decision of the Minister of Labour for British Columbia in certifying Local 480, International Union of Mine, Mill and Smelter Workers and certain officers and or representatives of the union as bargaining representatives of certain employees at the Trail Plants of the Consolidated Mining and Smelting Company of Canada, Limited. The Independent Smelter Workers' Union contended (1) That it ought to be the right of every individual employee by vote

to say what agency should be constituted his representative in dealings between his employer and himself; (2) That the Provincial Minister of Labour erred in not causing a vote to be taken in Order to ascertain the will of the majority of the employees; and (3) That by the decision of the Provincial Minister of Labour many employees of the Tadanac and Warfield Plants of the Consolidated Mining and Smelting Company of Canada, Limited, are not represented, as under the certification only a certain class of employees are represented by the bargaining agent.

The Board reached the decision that it was not of the opinion that the Minister of Labour of British Columbia was wrong in excluding certain groups of employees from the unit he considered appropriate and, therefore, the application for leave to appeal was denied.

Judgment on Appeal: Local 195 United Automobile, Aircraft and Agricultural Implement Workers of America, U.A.W.-C.I.O., Respondent, and Motor Products Corporation, Appellant

The Wartime Labour Relations Board consisted of the Chairman, O'Connor, J., the Vice-Chairman, Francoeur, J., Messrs, Best, Harmegnies, Hills, Mosher, Taylor, Browne and Deschamps.

Reasons for Judgment

The judgment of the Board was delivered by O'Connor, J.

This is an appeal by the employer from a decision of the Ontario Labour Relations Board who intervened, pursuant to section 11 of the Wartime Labour Relations Regulations, P.C. 1003, and referred to the Minister of Labour for Canada the matter of the negotiations between the employer and the union for a collective agreement so that the Minister might instruct a conciliation officer to confer with the parties and attempt to effect an agreement pursuant to section 12 of the said Regulations. The former collective agreement made between the parties on April 24, 1942, provided that the agreement continue until April 30, 1943, and from year to year thereafter unless either party notified the other between March 1 and March 15 of any year of its desire to terminate the agreement and that within the same period either party might notify the other of its desire to amend the agreement. It also provided that if the parties were unable to agree upon the proposed amendment on or before the 30th of April in any such year the proposed amendment should not come into effect. On March 8, 1944, the union submitted to the employer certain proposals for the amendment of the agreement and negotiations were not completed on April 30, 1944. Subsequently the union applied for the intervention of the Board on the ground that negotiations had continued for thirty days and the union believed that an agreement would not be completed within a reasonable time.

The employer contends that the right of the Board to intervene with a view to the completion of an agreement and refer the matter to the Minister is dependent upon the prior certification of bargaining representatives and relies upon certain provisions of section 10—namely:

> 10. (1) *When bargaining representatives have been certified under these regulations they may give the employer* concerned . . . . ten clear days' notice requiring that he . . . enter into negotiations with a view to the completion of a collective agreement.
>
> (2) The parties shall negotiate in good faith with one another and make every reasonable effort to conclude a collective agreement.

The union relies on section 16 which prior to amendment was in part as follows:

> 16. Either party to a collective agreement may on ten clear days' notice, require the other party to enter into negotiations for the renewal of the agreement . . . . and both parties shall thereupon enter into such negotiations in good faith and make every reasonable effort to secure such a renewal.

The Ontario Labour Board refused to infer from the mere juxtaposition of sections 10, 11 and 12 that the right to intervene was dependent upon prior certification of bargaining representatives for the union.

In the opinion of this Board sections 10 to 13 inclusive should be read together somewhat to the following effect:

> When bargaining representatives have been certified under these regulations they may give the employer ten clear days' notice requiring that he enter into negotiations with a view to the completion of a collective agreement. The parties shall negotiation in good faith with one another and make every reasonable effort to conclude a collective agreement. If negotiations for an agreement have continued for thirty days and either party to the negotiations believes that an agreement will not be completed within a reasonable time, it may ask the Board to intervene with a view to the completion of an agreement. Upon receipt of advice under section 11 the Board shall refer the matter to the Minister who shall within three days instruct a conciliation officer to confer with the parties. If a conciliation officer who has

been instructed to confer with the parties recommends the appointment of a conciliation board the Minister shall forthwith appoint a conciliation board.

Section 16 providing for the renewal of collective agreements does not specifically provide for the services of a conciliation officer or a conciliation board. While this Board quite agrees with the Ontario Board that the parties to negotiations for the renewal of a collective agreement should be entitled to the services of a conciliation officer and, if necessary, of a conciliation board, this Board hesitates to adopt a construction of section 12 which might have the effect of putting in motion conciliation services where there had been no previous collective agreement with the union and where the right of the union to represent the employees had not been established by certification. In other words, if the interpretation placed upon section 12 by the Ontario Board were adopted it might permit a union to obtain conciliation services where the right of the union to act for the employees had not been established by any previous collective agreement or by certification of bargaining representatives. Such a construction would make certification optional and in the opinion of this Board would defeat the object of the Regulations which is to settle differences between employers and employees by the negotiating of collective agreements between the employer and the true representatives of the employees.

The fact that there was no provision for conciliation of negotiations for renewal of collective agreements was drawn to the attention of the Board some months ago and the Board, after consultation with the Provincial Governments and the employer and employee associations interested, requested the Minister of Labour for Canada to recommend to His Excellency The Governor General in Council that sections 15 and 16 of P.C. 1003 be amended. The amendment has now been made and is as follows:

"(15) Every collective agreement, whether made before or after the effective date of these regulations, shall be deemed to run for a period of not less than one year from its operative date and shall not be capable of cancellation by the parties within that period without the consent of the Board; and when any such collective agreement is expressed to run for more than one year, it shall contain or be deemed to contain a provision for the termination thereof at any time after one year from its operative date on two months' notice by either party thereto."

"(16) (1) Either party to a collective agreement may, on ten clear days' notice, require the other party to enter into negotiations for the renewal of the agreement within the period of two months prior to the expiry date, and both parties shall thereupon enter into such negotiations in good faith and make every reasonable effort to secure such a renewal."

"(16) (2) Where either party to a collective agreement has required the other, pursuant to subsection one, to enter into negotiations for the renewal of the agreement, sections eleven, twelve, thirteen and fourteen shall apply to such negotiations for the renewal of the agreement as in the case of negotiations for a collective agreement."

The Order of the Ontario Board referring the matter to the Minister was made before the passing of the amendment and should be set aside. The appeal will be allowed but in view of the amendment the Board may again refer the matter to the Minister.

It is unnecessary to deal with the other grounds of appeal.

The only remaining issue is as to the present status of the parties. The employer contends that the agreement, not having been amended before April 30, remains in force until April 30, 1945.

The Ontario Board held that an automatic renewal clause such as that contained in the agreement under consideration is inconsistent with the regulations and cannot operate as a bar to intervention of the Board pursuant to the request made by the union. This Board adopts the same view.

(*Sgd.*) G. B. O'Connor,
Chairman

Ottawa, September 2, 1944.

Mr. G. P. Dickson for Appellant.
Mr. J. L. Cohen, K.C., for Respondent.

Conciliation Proceedings Under the Wartime Labour Relations Regulations

SECTIONS 12 to 14 of the Wartime Labour Relations Regulations provide for conciliation machinery to attempt settlement of disputes where negotiations for an agreement have been unsuccessfully continued for thirty days following certification of bargaining representatives. Disputes of this nature are referred to the Minister of Labour by the Wartime Labour Relations Board (National) or by the Provincial Boards. A Conciliation Officer is then appointed to confer with the parties and attempt to effect an agreement. If the Conciliation Officer is unable to bring about settlement of the matters in dispute and reports that in his view an agreement might be facilitated by the appointment of

a Conciliation Board, a Board is appointed by the Minister of Labour forthwith. The duty of such a Board is to endeavour to effect an agreement between the parties on the matters in dispute and to report its finding and recommendation to the Minister.

Board Reports Received

During August, reports were received from three Boards of Conciliation:—

Between Ottawa Electric Railway Co., Ottawa, Ont., and its employees.

Between Ontario Malleable Iron Company, Oshawa, Ont., and its employees.

Between the National Machinery Co., Ltd., and National Shops, Ltd., Vancouver, B.C., and their employees.

Boards Fully Constituted

During August, eleven Boards of Conciliation were fully constituted.

Dominion Glass Company, Wallaceburg, Ontario.—The Board of Conciliation established to deal with a dispute between the Dominion Glass Company, Wallaceburg, Ontario and the United Automobile Workers of America, Local 251, was fully constituted on August 9 with the appointment of the Honourable Mr. Justice J. G. Gillanders of Toronto as Chairman. The other two members are Mr. F. P. Dawson of Sarnia, Ontario, appointed on the nomination of the employing company, and Mr. Bora Laskin of Toronto appointed on behalf of the employees concerned.

C. Lloyd & Son, Limited, Wingham, Ontario.—With the appointment on August 8 of Dr. Alexander Brady of Toronto as Chairman, the Board of Conciliation established to deal with a dispute between the C. Lloyd & Son, Limited, Wingham, Ontario, and the International Union of Woodworkers Local No 3 (C.C. of L.), was fully constituted. Dr. Brady was recommended by the other two members, Mr. Norman L. Matthews and Mr. Herbert Orliffe, both of Toronto, appointed on behalf of the employer and employees respectively.

Fairchild Aircraft Limited, Noorduyn Aviation Limited and Canadian Vickers Limited (Aircraft Division), Montreal, P.Q.—On August 24, the Board of Conciliation established to deal with a dispute between Fairchild Aircraft Limited, Noorduyn Aviation Limited and Canadian Vickers Limited (Aircraft Division), Montreal, P.Q. and Lodge 712, International Association of Machinists, was fully constituted.

The personnel of the Board is as follows:—The Honourable Mr. Justice Oscar L. Boulanger of Quebec, appointed by the Minister of Labour, in the absence of a joint recommendation of the other two members, Mr. D. A. Paterson of Montreal, appointed on the nomination of the employing Company; and Mr. Drummond Wren of Toronto, appointed on behalf of the employees concerned.

Breithaupt Leather Company, Ltd., Penetang, Ontario.—The Board of Conciliation established o deal with a dispute between the Breithaupt Leather Company, Limited, Penetang, Ontario, and Local No. 24, National Union of Shoe and Leather Workers, was fully constituted on August 11 with the appointment of Dr. Alexander Brady, as Chairman. Dr. Brady was appointed on the nomination of the other two members, Mr. Norman L. Matthews and Mr. Herbert Orliffe, both of Toronto, the nominees of the Company and of the employees respectively.

Sun Publishing Company, Sun Directories Limited, Vancouver Engravers Limited, and Vancouver Newspaper Guild Local 1; and Vancouver News-Herald Limited, and Vancouver Newspaper Guild Local 2; Vancouver, B.C.—Pursuant to Sections 11 and 12 of the Wartime Labour Relations Regulations, P.C. 1003, and the Agreement between the Dominion and Provincial government for the administration thereof, the Minister of Labour of the Province of British Columbia on August 5 referred to the Minister of Labour for Canada disputes between Sun Publishing Company, Sun Directories Limited, Vancouver Engravers Limited, and Vancouver Newspaper Guild Local 1; and Vancouver News-Herald Limited, and Vancouver Newspaper Guild Local 2. The reference stated that negotiations between the parties had continued for thirty days and that there was no prospect of the completion of agreements. Mr. H. W. Walmsley who had been appointed by the British Columbia Minister as Conciliation Officer to investigate the dispute, recommended a Board of Conciliation.

The Board was established on August 8, with the following personnel:—Mr. J. Howard Harman, of Victoria, Chairman, appointed on the nomination of the other two members; Mr. Walter S. Owen of Vancouver, appointed on behalf of the employers; and Mr. H. W. Herridge of Trail, appointed on the nomination of the employees concerned.

Aluminum Company of Canada Limited, Shipshaw, P.Q.—On August 24, the Board of Conciliation established to deal with a dispute between the Aluminum Company of Canada

Limited, Shipshaw, P.Q., and the National Syndicate of Electric Power employees of Shipshaw, P.Q., was fully constituted.

The personnel of the Board is as follows:—The Honourable Mr. Justice Alfred Savard, appointed on the recommendation of the other two members, Mr. D. A. Paterson of Montreal, appointed on behalf of the employing company and Mr. Philippe Boily of Jonquiere, Quebec, appointed on the nomination of the employees concerned.

Aluminum Company of Canada Limited, Ile Maligne, P.Q.—On August 24, the Board of Conciliation established to deal with a dispute between the Aluminum Company of Canada Limited, Ile Maligne, P.Q., and the National Syndicate of Aluminum Workers of St. Joseph d'Alma, Inc. was fully constituted.

The Chairman of the Board is the Honourable Mr. Justice Alfred Savard, appointed on the nomination of the other two members. Mr. D. A. Paterson of Montreal, is the member appointed on behalf of the Company; Mr. Philippe Boily of Jonquiere, Quebec, was appointed on the nomination of the employees concerned.

Canadian Oil Companies Limited, Petrolia, Ontario.—With the appointment on August 24 of His Honour Judge J. J. Coughlin of Windsor, Ontario, as Chairman, the Board of Conciliation established to deal with a dispute between the Canadian Oil Companies, Limited, Petrolia, Ontario, and the National Union of Petroleum Workers, Local 1 (C.C.L.) was fully constituted. Judge Coughlin was appointed on the nomination of the other two members. Messrs. Charles Weir, of Sarnia and Mr. Herbert Orliffe of Toronto, appointed on the nomination of the employer and employees respectively.

Sitka Spruce Lumber Company Limited, Vancouver, B.C.—Pursuant to Sections 11 and 12 of the Wartime Labour Relations Regulations, P.C. 1003, and the agreement between the Dominion and Provincial governments for the administration thereof, the Minister of Labour for the Province of British Columbia referred to the Minister of Labour for Canada a dispute between the Sitka Spruce Lumber Company, Limited, Vancouver, B.C., and the International Woodworkers of America, Local 1-217. The reference stated that negotiations between the parties had continued for thirty days without indication of the completion of a collective agreement; and that Mr. F. J. R. Whitchelo, who had investigated the case as Conciliation Officer on the instructions of the Provincial Minister had recommended the establishment of a Board of Conciliation.

The Board was established on August 21, on which date the following personnel was appointed. Mr. A. R. MacDougall, Chairman, appointed in the absence of a joint recommendation of the other two members; Mr. Alan M. Russell, appointed on behalf of the employing Company and Mr. William Stewart, appointed on the nomination of the employees concerned.

Granby Consolidated Mining and Smelting and Power Company, Limited, Copper Mountain, B.C.—Pursuant to Sections 11 and 12 of the Wartime Labour Relations Regulations, P.C. 1003, and the agreement between the Dominion and Provincial governments for the administration thereof, the Minister of Labour for British Columbia referred to the Minister of Labour for Canada a dispute between the Granby Consolidated Mining and Smelting and Power Company, Limited, and the Copper Mountain Miners' Union Local 649 (I.U.M.M.S.W.).

The reference stated that Mr. R. J. Clements, who had been appointed Conciliation Officer on the instructions of the Provincial Minister, has recommended the establishment of a Board of Conciliation.

The personnel of the Board is as follows:—His Honour Judge A. M. Harper, appointed on the nomination of the other two members; Mr. A. D. Wilson appointed on behalf of the employing Company; and Mr. William Stewart appointed on behalf of the employees concerned. All three members reside in Vancouver.

Blair Iron Works, New Westminster, B.C.—Pursuant to the agreement between the Dominion and Provincial governments for the administration of the Wartime Labour Relations Regulations a dispute between the Blair Iron Works, New Westminster, B.C., and Local 2354, United Steelworkers of America, was referred to the Minister of Labour for Canada by the Minister of Labour for British Columbia. The reference stated that Mr. W. Fraser, who had investigated the case as Conciliation Officer on the instructions of the Provincial Minister, had recommended a Board of Conciliation.

The Board was established on August 31 with the following personnel:—Mr. F. M. Clements, Chairman, appointed in the absence of a joint recommendation from the other two members; Mr. R. L. Norman, appointed on the nomination of the employing Company; and Mr. Herbert Gargrave, appointed on behalf of the employees concerned. All three members reside in Vancouver.

Boards Established

During the month five Boards of Conciliation were established.

Lake Shore Mines Ltd., Kirkland Lake, Ontario.—The Minister of Labour established a Board of Conciliation to deal with a dispute between the Lake Shore Mines Limited, Kirkland Lake, Ontario, and Local 240, Kirkland Lake Mine and Mill Workers Union. On August 4 the Minister of Labour had been notified by the Ontario Labour Relations Board that negotiations between the parties had continued for 30 days and that there was no indication of a completion of an agreement within a reasonable time. The Minister of Labour then appointed Mr. James Hutcheon of Toronto, as Conciliation Officer to confer with the parties and attempt to effect an agreement. On August 22 Mr. Hutcheon reported that he was unable to facilitate an agreement and recommended the appointment of a Board of Conciliation. Appointed to the Board are: Mr. Bora Laskin, Toronto, on the nomination of the employees concerned and Professor C. G. Williams, Toronto, on the nomination of the employing company. Professor Williams and Mr. Laskin were requested to confer on the nomination of a chairman and third member of the Board.

Page-Hersey Tubes Limited, Welland, Ontario.—On August 5 the Minister of Labour established a Board of Conciliation to deal with a dispute between the Page-Hersey Tubes Limited, Welland, Ontario, and Local 523, United Electrical, Radio and Machine Workers of America. Mr. J. S. D. Tory, Toronto, was appointed on the nomination of the employing company and Rev. Dr. H. G. Forster of Welland, Ontario, was appointed on behalf of the employees concerned. Mr. Tory and Dr. Forster were requested to confer on the nomination of a chairman and third member of the Board.

Electro Metallurgical Company of Canada, Limited, Welland, Ontario.—On August 4 the Minister of Labour established a Board of Conciliation to deal with a dispute between the Electro Metallurgical Company of Canada, Limited, Welland, Ontario, and Local 523, United Electrical, Radio and Machine Workers of America. On the nomination of the employing company Mr. J. S. D. Tory of Toronto was appointed to the Board as was also Rev. Dr. H. G. Forster of Welland, the nominee of the employees concerned. Dr. Forster and Mr. Tory were requested to confer on the nomination of a chairman and third member of the Board.

John Inglis Company, Limited, Toronto, Ontario.—On August 9, a report was received from Mr. F. J. Ainsborough of Toronto, who was appointed as Conciliation Officer to deal with a dispute between the John Inglis Company, Limited, Toronto, Ontario, and the United Steelworkers of America. Mr. Ainsborough reported that he had been unable to effect an agreement and recommended the appointment of a Conciliation Board. On August 19 a Board was established and the parties concerned were requested to submit nominations for membership thereon.

Swift Canadian Company, Limited, Toronto, Ontario.—On August 7 the Minister of Labour was informed by the Ontario Labour Relations Board that negotiations had been proceeding for 30 days between the Swift Canadian Company, Limited, Toronto, Ontario, and Local 208, United Packinghouse Workers of America. On August 9 the Minister appointed Mr. Harold Perkins, Industrial Relations Officer, Toronto, as Conciliation Officer to investigate the matter. On August 24 Mr. Perkins reported that he had been unable to bring about an agreement and recommended the establishment of a Board. On August 29 a Board of Conciliation was established and the parties concerned were requested to submit nominations for membership thereon.

Assignments of Conciliation Officers

Steel Company of Canada, Limited (Hamilton and Ontario Works), Hamilton, Ontario.—On August 4 the Minister of Labour was notified by the Ontario Labour Relations Board that negotiations had been proceeding for 30 days between the Steel Company of Canada (Hamilton and Ontario Works), Hamilton, Ontario, and Local 1005, United Steelworkers of America and that there was no indication of the completion of an agreement. On August 7 Mr. F. J. Ainsborough of Toronto was appointed Conciliation Officer to investigate the dispute.

Cutting Tools and Gauges Limited, Toronto, Ontario.—On August 24 the Minister of Labour was notified by the Ontario Labour Relations Board that negotiations had been continuing for 30 days between the Cutting Tools and Gauges Limited Toronto, Ontario, and the United Steelworkers of America. The dispute was referred to the Minister pursuant to Sections 11 and 12 (1) of the Wartime Labour Relations Regulations, P.C. 1003. On August 25 Mr. F. J. Ainsborough was appointed Conciliation Officer to confer with the parties and to attempt to effect an agreement.

Beardmore and Company, Limited, Acton, Ontario.—On August 15 the Ontario Labour Relations Board referred to the Minister of Labour a dispute between the National Union of Shoe and Leather Workers, Local 26, and Beardmore and Company, Limited, Acton,

Ontario, pursuant to Sections 11 and 12 (1) of the Wartime Labour Relations Regulations, P.C. 1003. On August 19 Mr. F. J. Ainsborough was appointed Conciliation Officer to confer with the parties and attempt to effect an agreement.

Outboard Marine and Manufacturing Company Limited, Peterborough, Ontario.—On August 26 the Minister of Labour was informed by the Ontario Labour Relations Board that it had been notified that the Outboard Marine and Manufacturing Company, Limited, Peterborough, Ontario, and the Employees' Association of the Outboard Marine and Manufacturing Company, Limited, had been negotiating for 30 days without any indication of the completion of an agreement. On August 31 Mr. J. P. Nicol, Industrial Relations Officer, Toronto, Ontario, was appointed Conciliation Officer to confer with the parties and attempt to effect an agreement.

Dartmouth Ferry Commission, Halifax, N.S.—On August 24 the Minister of Labour was notified by the Wartime Labour Relations Board (National) that negotiations had continued for 30 days between the Dartmouth Ferry Commission, Halifax, N.S., and the Canadian Seamen's Union, without any indication of completion of a collective agreement. On September 1 the Minister of Labour appointed Mr. H. R. Pettigrove, Industrial Relations Officer, Fredericton, N.B., to act as Conciliation Officer and to confer with the parties and attempt to effect an agreement.

Motor Products Corporation, Windsor, Ontario.—On June 30 the Minister of Labour had appointed Mr. F. J. Ainsborough, Industrial Relations Officer, Toronto, as Conciliation Officer to confer with the parties concerned in a dispute between Motor Products Corporation, Windsor, Ontario, and Local 195, United Automobile, Aircraft and Agricultural Implement Workers of America (U.A.W.-C.I.O.). At the end of July Mr. Ainsborough's investigation was postponed pending leave to appeal proceedings before the Ontario Labour Relations Board. (L.G., July, 1944, p. 846).

For subsequent proceedings in this case see page 1110 under *Applications for Certification under the Wartime Labour Relations Regulations.*

Report of Board in Dispute Between Ottawa Electric Railway Co., Ottawa, Ont., and its Employees

On August 18 the Minister of Labour received the report of the Board of Conciliation established to deal with a dispute between the Ottawa Electric Railway Company, Ottawa, Ontario, and the Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America.

The Board was under the chairmanship of the Honourable Mr. Justice Ainslie W. Green appointed by the Minister of Labour in the absence of a joint recommendation from Colonel John T. C. Thompson of Ottawa and Mr. John Munro of Toronto, the employer's and employees' nominees on the Board.

The Report of the Board was signed by the Chairman and Mr. Munro. Colonel Thompson submitted a minority report.

The texts of both reports follow:—

Report of Board

To the Honourable Humphrey Mitchell,
Minister of Labour,
Ottawa,
Ontario.

In the matter of the Wartime Labour Relations Regulations, P.C. 1003, and to a dispute between The Ottawa Electric Railway Company (Employer) and Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America, Division 279 (Employees).

The Board of Conciliation appointed by you in connection with the above dispute begs to submit its report as follows:—

The Board held several sittings in Ottawa. At one of the sittings representatives of the Union and the Company presented *viva voce* their views on the matters in dispute. No written briefs were submitted.

The Union was represented by J. A. Robinson, A. Brisbois and W. Waddell, President, Treasurer and Recording Secretary, respectively, of Division 279.

The Company was represented by A. T. Lewis, D. N. Gill, and W. F. Schroeder, K.C., Vice-President, General Manager and Counsel of the Company, respectively.

Some eight or nine points altogether are in dispute but most of them have to do directly or indirectly with the remuneration of employees and accordingly have to be dealt with by the National War Labour Board.

The matters which remain within the jurisdiction of this Board of Conciliation are limited to:

(*a*) Union Shop.
(*b*) Check-off.

The Company has 693 hourly-rated employees of whom the Union claims to have 465 in its membership.

The Union was organized in 1906 and has always been recognized by the Company as the bargaining agent representing the employees although, of course, it was not officially appointed a collective bargaining agency for the employees until recent legislation made that possible. Both the representatives of the Union and of the Company were agreed that the relations between the Company and the Union have always been of a highly commendable nature. This Board desires to express its gratitude to both sides to the dispute for the spirit in which the matters in issue were discussed. Naturally, there were strong differences of opinion but each party to the dispute recognized the right of the other to take a divergent view. There was no rancour in the discussions all of which were conducted upon a high plane.

The Board also feels that both parties gave it all reasonable assistance in co-operating sincerely in seeking a common meeting ground.

During the proceedings the Union agreed to drop its demand for a Union Shop and thereafter negotiations and discussions centred entirely on the question of Check-off.

At the present time, the Company, being duly authorized so to do, makes certain deductions from wages. The Company contends, and there is no doubt, that the deduction of Union dues would increase the Company's clerical work. Owing to the nature of the duties of the hourly-rated employees they are scattered at widely divergent points throughout the city and its neighbourhood. Their hours also are much more irregular than those attained in an ordinary factory or manufacturing establishment. For these reasons the Union operates under more difficulty than would be so in other cases in making the necessary contacts with Union members for collecting of Union dues. The Check-off system would be a real benefit to the Union.

Without making any general finding on the practice of check-off the Board does recommend as a measure of co-operation that a system of voluntary check-off of Union dues be instituted. The Check-off would be voluntary in the sense that each employee desiring to have his dues deducted from his earnings would request the Company to do so in writing and each employee would have the right at any time to notify the Company, in writing, to cease deducting his dues. This recommendation is confined to Union dues and does not include any initiation fee, assessment or fine which the Union might have power to levy on its members.

(Sgd.) AINSLIE W. GREENE,
Chairman.

(Sgd.) JOHN MUNRO,
Member.

Minority Report

To the Honourable Humphrey Mitchell,
Minister of Labour,
Ottawa, Ontario.

In the matter of the Wartime Labour Relations, P.C. 1003 and to a dispute between The Ottawa Electric Railway Company (Employer) and Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America, Division 279 (Employees).

MINORITY REPORT

I consider that the Union Shop and Maintenance of Membership should not be recommended.

CHECK-OFF

I disagree with the Majority Finding. The imposition of the Check-off on the Company, whether voluntary or otherwise, is an imposition of a duty to take part in the administration of an association of the employees. Furthermore, it imposes a heavy duty on a clerical staff which has much additional work owing to the Wartime regulations.

(Sgd.) JOHN THOMPSON,
Member.

Report of Board in Dispute Between Ontario Malleable Iron Company, Oshawa, Ont., and its Employees

On August 29, the report of the Board of Conciliation established to deal with a dispute between the Ontario Malleable Iron Company, Limited, Oshawa, Ontario, and the United Steelworkers of America, Local 1817, was received by the Minister of Labour.

The personnel of the Board was as follows:—Dr. C. A. Wright, Chairman, appointed on the nomination of the other two members, Mr. John J. Robinette, who had been nominated on behalf of the Company; and Mr. Bora Laskin, appointed on the recommendation of the employees. All three members reside in Toronto. The report of the Board was signed by the Chairman and Mr. Laskin while Mr. Robinette submitted a minority report.

The texts of both reports are given below:—

Report of Board

Re: Wartime Labour Regulations, P.C. 1003, and re The Ontario Malleable Iron Company, Limited, and Employees, Members of Local 1817, United Steel Workers of America.

To the Honourable Humphrey Mitchell,
Minister of Labour,
Ottawa, Ontario.

The Board of Conciliation appointed by you pursuant to Section 13 of P.C. 1003, begs to report as follows:—

On August 2, 1944, at a sitting of the Board held in Oshawa, the employer and employees made oral and written submissions concerning the matters on which they were unable to agree in their collective bargaining negotiations. The employees were represented by Paul W. Smith, President of Local 1817, and M. J. Fenwick, International Representative of the United Steelworkers of America, while B. J. Barrell, Plant Manager, appeared for the employer.

The Facts and the Issue

Relations between employer and employees appeared highly satisfactory and a high degree of mutual trust and confidence exists on both sides. Further, the Union has entered upon its eighth year in the Company's plant and the first collective agreement was signed between the parties on May 3, 1937, and has been renewed annually thereafter. Such satisfactory relations, covering both war and pre-war years, have weighed heavily with the Board in considering its recommendations. Further, from 1941 until the end of 1943, the Union claimed one hundred per cent membership among the employees. From that time on there has been a small group of employees from the Province of Quebec ranging up to 25, and at present in the neighbourhood of 10-15 out of the 287 eligible employees represented by the Union, placed in the plant under direction of the Selective Service authorities, who have refused to join the Union. It is admitted that the employment of this group is temporary, and but for that group the Union's claim to membership of all employees is not disputed by the Company.

On the negotiations for the renewal of the existing agreement all matters have been agreed upon between the parties save with regard to the extent of Union recognition or, as it is sometimes referred to, the "union security" clause. This latter phrase is so frequently used without adequate explanation or understanding on the part of those either invoking or opposing it, that this Board prefers to avoid the use of such a phrase as well as any discussion of generalities, and to confine itself to the actual claims as made under the circumstances of this particular case.

While the Company has agreed to recognize "the Union as the sole collective bargaining agency for its employees excepting foremen, watchmen and salaried employees", the Union asked for and the Company refused the following clauses:

> It is agreed that all employees now members of Local 1817, United Steelworkers of America, shall as a condition of employment, remain members in good standing for the duration of this agreement; that those presently employed who are not already members shall join the Union within six weeks after the date of this agreement; and that all employees hired during the life of this agreement shall become members of the Union within one month from the date on which they were hired.
>
> Upon presentation of proper authorization from an employee, the Company agrees to deduct $1 each month as Union dues, such money to be remitted monthly to Local 1817, United Steelworkers of America.

The sole issue before the Board concerned these two clauses of "union shop" and "voluntary check-off".

Arguments

The general arguments made by the Union in favour of such clauses have by now, become familiar, and included, amongst others, the following:

1. To obtain a guarantee of security as to its continued existence and to assure regularity of income.

2. To eliminate friction and discord between Union and non-Union employees, and in particular, to compel persons receiving the benefit of collective bargaining carried on by the Union, to pay their proper share of costs for benefits received.

3. To permit the Union to devote its full time, energy and resources to fundamental problems of employer-employee relations, by saving time spent in the collection of dues and maintaining membership and by allaying the feeling of members of the Union that, until the Company recognizes Union-membership as a condition of employment, the Union must still struggle for existence, which feeling has in some other cases led to periodic—and frequently unnecessary—demands upon employers in order to prove a union's strength to non-members.

4. To assure employees that the Company is impartial as between Union and non-Union employees.

5. To assure a Union the control and authority over all employees which will make for greater responsibility and give powers of discipline co-ordinate with the responsibility which a bargaining agency should assume.

The Company's representative did not seek to challenge any of these arguments but stated that it was a matter of principle with the company not to grant these demands. When

pressed as to the principle involved he indicated that it was the Union's "business" to ensure its own income and support, and that the Company should not be asked to assist in what was the Union's "business".

Without entering into generalities it would seem impossible at this stage of industrial relations, and in particular in this plant where the Union has so firmly established itself over a period of eight years as the collective bargaining agency, to regard the Union's task of representing employees, of servicing grievances, and of assisting to maintain efficiency and discipline as something so foreign or competitive as to be styled the Union's "business" in the sense of denoting a lack of interest or co-operation on the part of management. We can not believe that the Company, in light of its history of amicable relations with this Union seriously intends to oppose the "business" of the Union in this plant to its own. The company's real position we believe is that which has found favour with one member of this Board who has been unable to concur in all the recommendations of the Board, and whose report we have had the opportunity of reading, namely, since relations between Union and employer are now good there is no necessity for doing anything further to improve them.

It is, of course, beyond question that no Board should recommend anything that would "disturb" good relations in the sense of deteriorating them. We believe, however, that even though conditions are good, there is no reason why there should not be guarantees given of their continuance or even betterment.

It is true that but for the small group of Quebec employees before mentioned, the plant is at the present time completely unionized. Even if there were at the present time a 100 per cent membership, and every prospect of that membership continuing in the future, it does not in our opinion follow, that a company should refuse to grant a union shop on the ground that it would be giving nothing more than already obtained.

Collective bargaining is essentially progressive in nature. Every employee who joins a union must, to-day, be taken to look forward to the time when membership in that union is, with the employer's consent, made a condition of employment. A union, new to a plant and untried, should not ordinarily expect to deserve that further confidence on the part of the employer which time and experience may merit. We believe, however, that if a union has proved itself capable of attracting—as it has in the instant case—practically all of the employees of a plant; and if that union has, during such a period as eight years, deserved and enjoyed the confidence of employees and employer alike, the union should be able to look forward to that further expression of confidence which the granting of a union shop implies. Moreover, such an expression of confidence must remove any lingering doubts of hostility of an employer to trade unionism, which the general history of the struggle for union recognition may have engendered.

To refuse a Union's request for some further recognition of its part in the industrial relations of a plant unless the union shows that its existence is in actual jeopardy seems to us unduly narrow and may be attributable to the loose manner in which "union security" is used to cover many diverse and varying situations. We are concerned only with a well-established union which, but for the war, would possibly to-day be maintaining 100 per cent membership, and whose relations with the Company have produced no charges of any irresponsibility. Had the union been irresponsible or failed to obtain the employer's confidence, undoubtedly the union's claim for further recognition should be denied. To deny the claim in the converse case when relations have been good and the union conduct apparently satisfactory is, in reality, to refuse further recognition altogether. We believe that this attitude is not one which will foster good relations between this Union and the Company since it withholds, without adequate reason, the recognition which the history of the Union in this plant would seem to merit.

It must be borne in mind that this Board has no power to order, but merely to recommend with a view to voluntary acceptance of its recommendations. We are not concerned, therefore, with the advisability of any government agency or board ordering a company to give further recognition in the way of union shop or otherwise, and can only express our views concerning the considerations which we believe should actuate two reasonable parties striving to find a basis for future relations which will produce the greatest co-operation, mutual confidence and respect.

Voluntary Check-off

While the company's representative laid the greatest emphasis on the fact that he saw no reason why the company should assist the Union to collect their dues—an argument relevant to the voluntary check-off clause—we believe that this is really a much less serious matter than the clause pertaining to union shop. From its voluntary nature, acceptance of voluntary check-off would be a gesture of co-operation by the company at

the request of individual employees and while involving some additional bookkeeping on the Company's part, we were not given to understand that the Company seriously objected to this additional expense. As a convenience to the employees the Board is unanimous that the Company should agree to a recognition of voluntary authorizations to deduct union dues from wages. Further, in light of the recommendations which the majority of the Board is making with respect to the request for union shop, it would seem to be in the Company's interest to give the voluntary check-off as supplementary to the condition of remaining in good standing as a condition of employment, since one of the common grounds for losing union standing is the non-payment of dues, and the check-off might assist materially in obviating any possible grievance procedure to determine this issue.

Union Shop

With regard to the claim for union shop as put forward by the Union three distinct classes of employees are likely to be affected, and it seems desirable to consider them separately, as the considerations governing them are not the same. The three classes are, (i) present employees who are members of the Union; (ii) present employees who are not members of the Union; (iii) future employees.

With regard to the first class—present employees who are members of the Union—the request is that they shall remain members in good standing for the duration of the agreement as a condition of continued employment. Apart altogether from reasons which may be advanced on behalf of the union as distinct from the employees—reasons which, considering the period during which the union has functioned as bargaining agency, carry special cogency—it seems to us that the Company should be willing to grant this provision—which is in reality a "maintenance of membership" clause—for reasons apart from any claim to "security" for the Union. This request comes from the representatives of the employees themselves and for many purposes may be considered as the request of such employees. As such, what valid reason can the Company have for refusing it? No argument was presented to the Board that shortage of labour made such a condition inadvisable at the present time, nor was any argument raised that as respects existing members there should be an opportunity to "escape" the condition by withdrawing from the Union. Even had these arguments—which have become commonplace—been produced, the Board is of opinion that there is no sound reason why existing members of a Union which is negotiating for a new contract should not be compelled to carry out the obligations which they assumed as Union members in asking for bargaining rights.

If collective bargaining implies a recognition of the right of democratic self government, it would seem not only proper but desirable from the point of view of the employer to insist that such a right carry with it corresponding duties to continue to support and participate in the decisions of the agency in order to emphasize individual responsibility in electing a bargaining agency and to insure full participation in the decisions of the Local, by the employees of the plant. To bring home such duties to employees it would seem sound to hold them to the obligations which they undertook to the Union as a means of obtaining Union recognition. Apart, therefore, from any arguments in favour of the Union as such, we believe that the Company in the present case should be willing to compel existing union-employees to stand behind the Union of their choice for the term of the collective agreement by adding the sanction of loss of employment for failure to support their chosen union. Since the Union has, for a period of eight years, given evidence of its ability to carry on as bargaining agency, and no attack has been made on its responsibility we can see no valid reason for the Company objecting to this provision and the Board therefore recommends that the Company adopt that part of the "union shop" clause concerning existing employees who are members of the Union.

With regard to existing employees, who are not Union members, it is no doubt true that their non-participation in Union activities is a source of irritation and some friction, particularly in view of the previously existing 100 per cent Union membership. As indicated before, however, these non-Union employees were transferred to the Plant by Selective Service authorities and their employment would appear to be temporary only. The Board believes it would be unfair—if not improper as being contrary to Selective Service regulations—to require adherence to a Union by persons who were in a sense forced to enter this plant by Governmental authority at a time when no condition of union membership prevailed. As the only non-union employees in this plant consist of this class of person it is neither necessary nor desirable to express an opinion on the question whether, if such employees had chosen voluntarily to enter a plant which had been solidly Union for the period in question here they should be compelled to abide by

the decision of the majority and contribute their proportion of expense for the benefits received from the bargaining agency. We believe that in view of the existing war situation, and the temporary nature of the employment involved, the Union should drop their request that existing non-Union employees join the Union and this Board recommends that the part of the "union shop" clause dealing with existing non-Union employees be deleted.

This leaves the question of future employees being required to join the Union as a condition of continued employment. Such a clause does not restrict the choice of employee by the Company. It does demand adherence to and support of the Union by such employee after he has been hired. Such a clause, from a purely legal position must, of course, operate subject to Selective Service regulations and can not limit the Selective Service authorities from placing within a plant any person whatsoever. It seems to be generally understood, however, that if such a clause is agreed upon by a Union and Company the Selective Service authorities will generally endeavour to place only persons willing to join the Union in the plant. If such a clause had existed under the previous agreement, it is likely, therefore, although by no means certain, that the present irritation produced by the few non-Union members would not have arisen. If a clause requiring future employees to join the Union within one month of being hired were granted it may be that the Company would wish to state expressly that it operated subject to Selective Service rulings and regulations. Although such provision would not be necessary we can see no reason why it should not be included if a Company so desired.

Apart from Selective Service, the inclusion of a clause of this kind would change the nature of employment in this plant in a theoretically fundamental way. In view of past experience it is doubtful whether practically the result would be in any way altered. Its inclusion would, however, furnish the employees with that objective guarantee of the company's confidence and co-operation which should be the ultimate aim of all collective bargaining. The inclusion of such a clause would, under Section 20 (1) of P.C. 1003, relieve the Company from the embarrassing position of "influencing" or "compelling" a person to join or refrain from joining a Union. There is no suggestion that the Company in this case has ever influenced any employee one way or another, but in view of the 100 per cent membership which existed in this plant prior to its disruption by war conditions, is it not sound for the Company to give what might be called legal recognition to an existing factual arrangement? There can be little doubt that open avowals of confidence in industrial relations as well as in political, international and all human relations may act to remove any lingering suspicions of distrust however ill-founded those suspicions may be. There can be no doubt that the introduction of one non-Union member into a plant as solidly and consistently unionized as this plant has been will make for irritation and possible distrust. There is also no doubt that there will always be persons who refuse to pay their way and who accept the benefits of collective bargaining without participating financially or otherwise. If it is possible to introduce only workers who will eliminate all possible friction of this kind why should not the Company be willing to co-operate? As we have indicated, the inclusion of this clause might well have obviated the friction caused by Selective Service employees. Is it not important to attempt to prevent a recurrence of that situation, as well as to build to the highest degree for the difficult post-war years the mutual confidence and trust that the inclusion of this clause would create between employer and employee?

The difficulty of compelling existing employees hired under an open shop agreement to join a union in which they may not believe does not apply to a situation where an employee enters a new job knowing what is expected of him. In such a case he has a free choice. The only question is whether the employer is willing to co-operate wth the Union in relieving it of the necessity of applying pressure. This Board believes that on the facts of this case, and without expressing any views on matters of general principle, the Company should be willing to recognize union membership as a condition for continued employment of new employees. In reaching this conclusion the Board need only say that the arguments of the Union, the facts of 100 per cent membership, and eight years union experience are all positive arguments in favour of taking the next step in collective bargaining. The Company has advanced no evidence or suggestion of irresponsibility, inexperience, or other ground, save that already mentioned, for refusing to assist in preserving good relations by the inclusion of such a clause. In light of this the Board recommends that the Company agree to the Union's request requiring new employees to join the Union within one month from the date on which they were hired.

It should be mentioned that in considering the recommendation last mentioned, the Board has borne in mind the effect of changing conditions of employment on men on active service in the armed forces. It might be a serious objection to the granting of a union shop clause such as this that it would affect the position of returned men coming back to their old employment. Without expressing any opinion on this matter we need only mention that the problem does not arise in this case, where a 100 per cent union membership existed up to the end of 1943.

RECOMMENDATIONS

To sum up the Board recommends that the collective bargaining agreement for the next year include a clause which provides for

(*a*) existing employees who are members of the Union remaining in good standing for the duration of the agreement as a condition of employment;

(*b*) all future employees hired during the life of the agreement shall become members of the Union within one month from the date of hiring and shall remain members in good standing as a condition of employment;

(*c*) voluntary check-off of Union dues on receipt by the Company of proper authorization from employees.

As the Board has recommended against the necessity of existing employees, who are not members of the Union, joining the Union as a condition of employment, this may be included as a proviso to (*a*) or omitted altogether as the parties see fit.

All of which is respectfully submitted.

Dated at Toronto this twenty-third day of August, 1944.

(Sgd.) CECIL A WRIGHT,
Chairman.

(Sgd.) BORA LASKIN,
Member.

Minority Report

Re: Wartime Labour Relations Regulations, P.C. 1003, and re The Ontario Malleable Iron Company, Limited, Oshawa, Ontario, and its employees, members of Local 1817, United Steelworkers of America.

In this matter the Board of Conciliation established by the Minister of Labour held a sitting at the City of Oshawa on Wednesday, August 2nd and heard the submissions of the parties to the dispute.

The company was represented by B. J. Barrell, plant manager. Local 1817, United Steelworkers of America, was represented by Paul W. Smith, President of Local 1817 and by M. J. Fenwick, international representative of United Steelworkers of America.

Contractual relations have existed between the company and Local 1817 for seven years and an excellent spirit of mutual respect and co-operation exists between the company and Local 1817.

The parties have been negotiating with respect to the renewal of their collective bargaining agreement and as a result of negotiations the following points have been agreed upon by the parties:—

1. Recognition of the union as the sole bargaining agency for all the eligible employees of the company.
2. Wages.
3. Hours of work.
4. Vacation with pay.
5. Grievance procedure.
6. Seniority.
7. Safety and health.
8. Bulletin boards.
9. Duration of agreement.

The union has requested the company to agree to provisions for a union shop and for a form of voluntary check-off of union dues and the company has declined to agree to the suggestions of the union.

Therefore, the only two points for the consideration of the Conciliation Board are:

1. Union Shop clause.
2. Voluntary check-off of union dues clause.

It appears from the representations of the parties that the company is engaged in the production of malleable iron castings and that the number of eligible employees who can be represented by the union is about 287.

To the end of 1943 the union claimed 100 per cent membership but since the beginning of 1944 a small group of employees from the province of Quebec, who were sent to the company by the Selective Service authorities, have declined to join the union. The group of employees from the province of Quebec originally numbered about 25 and at the present time there are only about 10 who have remained in the company's employment and even they are employed on a purely temporary basis.

The representatives of the union frankly admitted that the union had had no particular difficulty in collecting dues, that the company had not in any way interfered with the collection of dues and that the company had co-operated fully with the union.

As to the contention of the union that the bargaining agreement should include a clause permitting voluntary check-off of union dues, I can see no serious objection to the position

of the union. Therefore, I am prepared to recommend that the company should recognize voluntary authorizations signed by union members permitting the deduction of union dues from their wages.

As to the problem of the union shop, the union asserts that the renewal of the collective bargaining agreement should contain the following clause:

> It is agreed that all employees now members of Local 1817, United Steelworkers of America, shall as a condition of employment, remain members in good standing for the duration of this agreement; that those presently employed who are not already members shall join the Union within six weeks after the date of this agreement; and that all employees hired during the life of this agreement shall become members of the Union within one month from the date on which they were hired.

The company refuses to agree to the inclusion of the above quoted clause in the agreement.

This case raises in a direct manner the issue as to the principle of "union shop" and I would like to make some observations as to certain phases of the problem.

It seems to me to be clear that a union shop should not be forced upon a minority of employees who do not wish to belong to the union. Section 4 of The Wartime Labour Relations Regulations, P.C. 1003 of 1944, provides that "every employee shall have the right to be a member of a trade union or employees' organization and to participate in the lawful activities thereof." The right to join a trade union has as its corollary the right to abstain from joining a trade union. There is nothing coercive in the language of Section 4 of the Regulations and I could not in any case concur in a recommendation for a union shop which would deprive a minority of employees, no matter how small, of their fundamental right to determine for themselves whether they wish to belong to a union.

Also, in any discussion of the union shop, regard must be had for the position of employees who are on active service and whom the employer must reinstate under the provisions of The Reinstatement in Civil Employment Act. Such employees when reinstated may or may not wish to join the union, and nothing should be done to affect their freedom of choice. The union shop clause in the form in which Local 1817 submits it for inclusion in the agreement would deprive employees on active service of their essential right on their return to decide for themselves whether they wish to join or abstain from joining the union.

These two objections to the union shop clause, namely, the coercion of a minority and the deprivation of employees on active service of their freedom of choice, could be met by modifying the clause so as to make it applicable only to future employees and so as to exempt any employees on active service from its operation. In its attenuated form the clause would then obligate future employees to become members of the union or, more accurately, would obligate the company to discharge any future employee who declined to become a member of the union within one month from the date on which he was hired.

However, in my opinion, substantial objections still remain to the union shop clause even modified as suggested in the preceding paragraph.

It is common knowledge that at the present time the pool of available labour is at a very low ebb. In the present case the Selective Service authorities had to send approximately 25 men to the company's plant from the Province of Quebec and Mr. Barrell told us that the loss of even five employees would cripple the company's ability to produce. Under these circumstances it does not appear to me to be in the public interest to urge a company to commit itself to a policy of employing in the future only those persons who are prepared to join the union and of rejecting those persons who do not choose to work under union shop conditions. When there are so few persons available to be employed and when the maintenance of production is in the public interest, I do not think it desirable that the company should be asked to assume the risk of not being able to replace existing employees from a depleted manpower pool.

Moreover, apart from the quantity of available manpower, the company is entitled in its own interests to seek to acquire the best quality of employees. Put in its simplest form the modified union shop clause leads to this result—that the company may employ "A" even though he is a poor worker because he is prepared to join the union, but the company may not employ "B" who is a good worker because he declines to join the union. Put in the form of a statement of policy, the union shop clause, even though confined to future employees, interferes with the right of management to operate its own employment practices and to seek to obtain the most efficient employees.

For the foregoing reasons I regret that I can not join in the recommendations of my colleagues in favour of a modified form of union shop clause.

The matter may be looked at from another aspect. In addition to the considerations

already stated the union does not need security of any kind in this case. The relations between the company and the union have been amicable and there have been no serious labour disturbances in the company's plant during the past seven years under the existing type of agreement and I can see no reason why a Conciliation Board should seek to disturb the present placid condition. The union does not assert that it is losing members or that the company is not co-operating with it. It is conceivable that in some cases where a company refuses to co-operate and where by that want of co-operation a lip service recognition of the union renders real recognition nugatory, a modified form of union shop might be recommended in order to protect the union. But in the present case the union has not established that it requires any form of union security clause in its collective bargaining agreement.

I am of the opinion that where a union proves no need for union security and where the existing Orders in Council do not compel a company to adopt a union shop and where no public interest has been proven to be served by the adoption of a union shop a Board of Conciliation should not seek to enforce a union shop on the employer against its will.

I am, therefore, of the opinion that the union's claim for the inclusion of a union shop clause in the collective bargaining agreement should be rejected.

(Sgd.) JOHN J. ROBINETTE,
Employer's Nominee.

Report of Board in Dispute Between The National Machinery Co., Ltd., and National Shops, Ltd., Vancouver, B.C., and their Employees

On August 24, the Minister of Labour received the unanimous report of the Board of Conciliation established to deal with a dispute between the National Shops, Limited and National Machinery Co., Limited, Vancouver, B.C. and Local 2765, United Steelworkers of America.

The personnel of the Board was as follows:—Mr. J. Howard Harman, Vancouver, Chairman, appointed by the Minister of Labour in the absence of a joint recommendation from the other two members, Mr. R. L. Norman, Vancouver, appointed on behalf of the employing companies; and Mr. Herbert Gargrave, Vancouver, appointed on behalf of the employees concerned.

The text of the report of the Board is as follows:—

Report of Board

In the matter of Wartime Labour Relations Regulations, P.C. 1003, and, in the matter of National Shops Limited and National Machinery Company Limited and certain of their employees, members of the United Steelworkers of America, Union, Local No. 2765.

To the Honourable Humphrey Mitchell,
Minister of Labour,
Ottawa,
Canada.

The Board of Conciliation appointed pursuant to the said Wartime Labour Regulations, the 28th day of June, 1944, respectfully reports as follows, namely:—

1. The life of the Board was extended by agreement for a sufficient period to enable all the evidence to be heard and this report prepared.

2. At the first meeting of the Board for hearing of evidence it was agreed between the parties that the only points in dispute were whether or not Sections 2 and 3 of Article 1 of the proposed agreement should be consented to by the employer.

These Sections read as follows:

> Section 2. The Company agrees that all employees covered by this Agreement shall become and remain members of the Union.
>
> Section 3. The Company agrees to deduct from the earnings of all employees covered by this Agreement the sum of One Dollar ($1.00) per month for Union dues and forward total amount deducted to the Acting Secretary of the Union.

Before, after, and during the evidence presented and the representations made on behalf of each of the parties, the Board made all feasible efforts to effect an agreement pursuant to Section 13 (2) of the said Regulations. The Board found it impossible to effect any such agreement.

The Board respectfully recommends that the parties hereto sign an agreement in the terms of the existing agreement with the following amendments, namely:—

1. That Section 2 of Article 1 set out above be deleted and the following substituted therefor:

> The Company further agrees that all employees now members or who become members of Local 2765 of the United Steelworkers of America Union must remain members in good standing of this Union until their present employment is terminated, or until the termination of this contract.

2. That Section 3 of Article 1 be deleted.

The members of the Board are unanimously of the opinion that having regard to the relatively small number of employees con-

cerned, and the other circumstances of the case, that the above settlement can be properly accepted by both sides.

The Board have been impressed with the repeated evidence brought forth during the hearings, of the harmonious relations which have existed between employees and the management of this company. For that reason we feel constrained to offer the comment that in cases of this kind that representatives of the employees would be well advised, at least in the first instance, to carefully consider the advisability of introducing such highly controversial subjects as the check-off and closed shop. In cases where the number of employees is much larger and the relations between employees and employer have been on a strictly impersonal and a less harmonious basis, the justification for negotiation from the outset on the two points mentioned might be more apparent.

Dated at Vancouver, B.C., this 17th day of August, A.D. 1944.

Recent Proceedings under the Industrial Disputes Investigation Act

WITH the coming into effect of Order in Council P.C. 1003; Wartime Labour Relations Regulations on March 20, 1944, the Industrial Disputes Investigation Act, except as to matters pending when these Regulations came into force, was declared to be of no effect.

The Act, therefore, as from that date would apply only to such applications for the establishment of Boards of Conciliation and Investigation as had been received prior thereto.

Conclusion of Proceedings under Industrial Disputes Investigation Act

The proceedings under the provisions of the Industrial Disputes Investigation Act concludes with the report of the Board as given below.

Report of Board in dispute between the Langley Manufacturing Company, Limited, Vancouver, B.C., and its Employees

On August 14, 1944, the Minister of Labour received the report of the Board of Conciliation and Investigation established to deal with the dispute between Langley Manufacturing Company, Limited, Vancouver, B.C., and its employees members of Local 2765 United Steelworkers of America (L.G., March, 1944, p. 285), the personnel of the Board was as follows: His Honour Judge A. M. Harper, Vancouver, B.C., chairman, appointed by the Minister of Labour in the absence of a joint recommendation from the other two members of the Board. Messrs. R. L. Norman and Daniel OBrien, both of Vancouver, appointed on the nomination of the employer and employees respectively.

The unanimous report of the Board was as follows:—

Report of Board

In the matter of the Industrial Disputes Investigation Act and in the matter of a dispute between Langley Manufacturing Company Limited, Vancouver, B.C., and its employees, members of Local 2765, United Steelworkers of America.

To the Honourable Humphrey Mitchell,
Minister of Labour,
Ottawa, Ontario.

The Board of Investigation and Conciliation established by you on the 30th day of May, 1944, under and pursuant to the provisions of the Industrial Disputes Investigation Act begs to report as follows:

Sittings of the Board were held at the City of Vancouver, when representatives of the Company and the Union attended before the Board and called evidence.

The Company was represented by Mr. Walter Owen, and the Union represented by Miss Eileen Tallman.

Disputes

In the application made for the establishment of the Board, the nature and causes of dispute were stated to be: "Failure to agree on the following points, bargaining agency, which includes maintenance of membership, check-off, management of plant, with respect to transfers, promotions, demotions, proper adjustment of grievances procedure, and seniority."

However, on the hearing before this Board, the following were the only two matters upon which the Board were asked to bring in recommendations:

(*a*) Union shop
(*b*) Check-off.

Facts

The Company owns and operates a plant on Granville Island, in the City of Vancouver, and produces certain electrical equipment. The Company is a subsidiary corporation of the Amalgamated Electric Corporation Limited, which is a corporation existing under the laws of the Dominion of Canada, and has its head office and operating plant in the City of Toronto, Province of Ontario.

On a vote being taken on the 27th of July, 1943, as to the wishes of the employees as to whether a collective bargaining agreement should be entered into between the Company and their hourly-rated employees, or the United Steelworkers of America, Local 2765, 54 employees voted, 53 being in favour of an agreement with the United Steelworkers of America, Local 2765, and one employee favoured a contract with the hourly-rated employees.

On the 11th day of July, 1941, the Company entered into an agreement with its employees under which it operated for some two years. In the year 1943, Local 2765, United Steelworkers of America, having enlisted as members of the Union a majority of the employees, requested that the Company conclude an agreement. According to the terms submitted, the Union asked for a closed shop and check-off. The Company did not agree. Negotiations took place during the fall of 1943. During this period, Mr. Meirion Davies, Manager of the Company, devoted considerable time to working on a job evaluation plan. At this time, Mr. Hagman (who was the Union organizer acting at that time in the absence of Mr. James Robertson, the Steelworkers' representative) made an application for increase in wage rates beyond what had been agreed upon, the result being that the relations between the Company and the Union became more or less strained. Through the intervention of the Regional War Labour Board, it was finally agreed by the Company and the Union that a joint application be made to the Regional War Labour Board, and this, accordingly, was done, and on this joint application, the Regional War Labour Board made an order. The joint application was made the 9th of December, 1943, and the decision of the Board was rendered on December 20, 1943, and the new rates of wages were retroactive from December 3, 1943, and were paid before Christmas Day, 1943. The Company faithfully carried out this arrangement. Controversy then arose between Mr. Walter Owen, counsel for the Company, and Mr. James Robertson, the Union organizer, Mr. Owen contending that he had an arrangement with Mr. Robertson that, on the condition of the Company supporting the joint application, the question of union shop and check-off should be laid over for some months. The Board are convinced that the terms of this arrangement were correctly stated by Mr. Owen. Although the relations between the Company and its employees have been fairly harmonious, nevertheless, the Company, from this time on, was averse to continuing any further negotiations, and finally refused to do so. In the result, an application was made by the Union for the establishment of this Board, which was finally done on May 30, 1944.

Since the vote was taken in 1943, as to the recognition of the Union as the bargaining agent, the Company has recognized this Union, and dealt with its officials. However, the stumbling block to complete harmony at all times has been the request for a closed union shop, and for the check-off of Union dues. In principle, the Company had been opposed to both of these demands, stating that in its head plant in Toronto, although an agreement was entered into with the United Electrical Radio and Machine Workers of America, there is no provision providing for a closed union shop or a check-off, and also stating that it was against the policy of this Corporation to agree to the inclusion of either in any contract with its employees. The Company contended that there was a violation of the agreement between Mr. Owen and Mr. Robertson in proceeding with the application for a Board, as Mr. Owen was given to understand that these matters would be dropped for some months, if the Company would agree to the joint application before referred to. It was also charged against the President of the Union, Mr. Marr, that in 1943, he and another member, Kemp, took vacations before the expiry of the 300 days after which an employee would be entitled to vacation with pay, and without proper consultation or authorization by the Company.

Discussion of the Dispute

Both parties discussed the question of closed shop and union shop as applied to the circumstances of this particular case, as a matter of principle. The Board feel that, at the present time, it is undesirable to make any recommendation which would or might limit the manpower otherwise available as employees to a company engaged in war work; and any provision which might make membership in a union a prerequisite to employment would tend to limit available manpower.

In substitution for Article 1, Section 2, of the proposed agreement, the following provision should be inserted:—

The Company agrees that any present employee who, at the date of this agreement was a member of the Union, or who has become a

member of the Union, shall, as a condition of continued employment, maintain membership in good standing, provided nothing herein contained shall make it obligatory for any employee to become a member of the Union.

Check-off

On the principle of check-off, various submissions were advanced on behalf of each of the parties hereto. Your Board consider that, apart from any question of principle, and without relation to the request of the Union, as a union, but based on the request of individual employees, as such, it is recommended that as a measure of compromise, that upon individual employees filing with the Company revocable orders or assignments in satisfactory and sufficient form, that the Company give effect to the provisions of such orders or assignments while in the Company's hands unrevoked, in so far as they may relate to union dues but not including any assessments or fines which the Union might under its Constitution, or otherwise, purport to levy on its members.

The Board desire to express their appreciation to both parties for the thorough manner in which they have submitted their views, and trust that more harmonious relations may exist as the result of our unanimous finding.

Dated at Vancouver, B.C., this 12th day of August, 1944.

(Sgd.) A. M. HARPER,
Chairman.

Dispute at Halifax Shipyards, Limited, Halifax, N.S.

On February 17, 1944, the Department of Labour received an application for the establishment of a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act, to deal with a dispute between the Halifax Shipyards, Limited, Halifax, N.S., and its employees, members of the Industrial Union of Marine and Shipbuilding Workers of Canada, Local No. 1. The dispute arose out of the union's request for the check-off of union dues and a union shop.

On February 17 the Minister of Labour authorized Mr. H. R. Pettigrove, Industrial Relations Officer, Fredericton, N.B., to investigate the case as Industrial Disputes Inquiry Commissioner.

Mr. Pettigrove reported that he had been unable to arrange an amicable settlement of the dispute, and recommended that a Board of Conciliation and Investigation be established. In his report, the Commissioner referred to a vote taken in September, 1943, under the provisions of the Nova Scotia Trade Union Act, to determine the desire of the employees with regard to the check-off of union dues. Of 2,308 employees eligible to vote 1,873 cast their vote; 1,751 being in favour of the check-off and 87 against, with 35 spoiled ballots. The vote established that slightly in excess of 75 per cent of the employees were in favour of the check-off. Following this vote, the union contended that the result warranted the company acceding to the demands of the union in this regard. The company took the position, however, that this did not wholly constitute compliance with the provision of the Nova Scotia Trade Union Act and that the union should establish its right to the check-off through the medium of the courts. Following this the application for a Board of Conciliation was made.

On March 3 the Minister of Labour established a Board of Conciliation and Investigation. The personnel of the Board was as follows:—the Honourable Mr. Justice John S. Smylie, Supreme Court of Nova Scotia, appointed by the Minister in the absence of a joint recommendation from the other members of the Board; Mr. Charles B. Smith of Halifax, appointed on the nomination of the employing company; and Mr. D. W. Morrison of Glace Bay, appointed on behalf of the employees concerned.

The report of the Board was received on June 16. Its text was published in the August LABOUR GAZETTE (p. 985). The majority report, signed by the Chairman and Mr. Morrison, recommended:—(1) that a union shop be not established; (2) that a maintenance of membership clause be included in the agreement; and (3) that a clause providing a check-off of union dues be included in the agreement. The minority report of Mr. Smith recommended against any check-off or maintenance of membership provision. Subsequently, the company management announced that it did not propose to adopt either the maintenance of membership or the check-off in any collective agreement with any group of employees. The union thereupon demanded that the majority findings of the Board be implemented.

The Department of Labour proceeded to take every possible means of preventing a stoppage of work and to this end Mr. H. R. Pettigrove was requested to confer with the parties in an effort to get them to agree upon a mutually acceptable settlement of the matters in dispute.

On July 27 the employees went on strike in support of their demands, insisting upon the full implementation of the recommendations of the Board.

Following a conference at Ottawa between officials of the Department of Labour and the union representatives, the Minister of Labour announced on August 25 that an arrangement acceptable to the Government of Nova Scotia, the Halifax Shipyards Company, Limited, and one which the deputation representing the men was prepared to recommend, had been agreed upon.

The position of the two Governments, namely, the Dominion Government and the Government of the Province of Nova Scotia, was that neither was prepared to exercise authority to interfere with the rights of either the Company or the Union.

The terms upon which work was resumed and which were accepted by the parties were:—

1. The Minister of Labour for the Dominion Government requested the Company to open its shipbuilding yards and asked the men to return to work.

2. The terms of employment were to be those which prevailed at the time the cessation of work occurred.

3. The question as to whether or not the Halifax Shipbuilding Company, Limited, was under a legal obligation to deduct Union dues from employees and pay them to the Union, pursuant to the provisions of the statute of Nova Scotia known as the Nova Scotia Trade Union Act, and following a vote taken thereunder, would be referred by the Nova Scotia Government to the Supreme Court of that Province for decision if the Nova Scotia Labour Relations Board, after first attempting to bring the parties into agreement, so recommended.

The employees returned to work on August 28, at which time the Minister made it clear that the settlement was arrived at as a result of conciliatory negotiations and not through the imposition of any Governmental authority.

Conciliation Work of the Industrial Relations Branch During August, 1944

DURING the month of August officers of the Industrial Relations Branch were called upon to handle 20 industrial disputes or controversial situations involving 12,616 workpeople employed in 26 different establishments. Of these 16 were new disputes which originated during the month while 4 were situations which had been unterminated as at July 31 and received further attention in August. They were dealt with under the provisions of the Conciliation and Labour Act.

Industrial Relations officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal, Fredericton, N.B., and Glace Bay, N.S. The territory of the two officers resident in Vancouver comprises British Columbia and Alberta; two officers stationed in Winnipeg cover the provinces of Saskatchewan and Manitoba and Northwestern Ontario; four officers resident in Toronto confine their activities to Ontario and work in close collaboration with the Provincial Conciliation service; two officers in Montreal are assigned to the Province of Quebec and two officers resident in Fredericton, N.B., and Glace Bay, N.S., represent the Department in the Maritime Provinces. The headquarters of the Industrial Relations Branch and the Director of Industrial Relations and staff are situated in Ottawa.

Classified by industries, the disputes occurred as follows:—

MINING:	
Coal mining	3
MANUFACTURING:	
Metal products	11
Wood products, miscellaneous	1
Shipbuilding	1
Non-Metallic Minerals, Chemicals, Etc.	1
Miscellaneous	1
TRANSPORTATION AND PUBLIC UTILITIES:	
Water	1
Electricity and Gas (mainly utilities)	1

A statistical analysis of the nature of the disputes handled, their cause, disposition, etc., is given below:—

NATURE OF DISPUTE OR SITUATION:	
Strike	11
Threatened strike	2
Controversy	2
Arbitrations	2
Requests to conduct consent elections	1
Services of Commissioners	2
PREDOMINANT CAUSE OR OBJECT:	
Increase in wages	3
Increase in wages and other changes	1
Other causes affecting wages and working conditions	4
Recognition of Union	1
Employment of Union members only	2
Discharge of workers for union activity or membership	2
To secure or to maintain union wages and working conditions	4

PREDOMINANT CAUSE OR OBJECT: *Con.*	
Discharge of workers (other than in connection with Union questions and including refusal to reinstate)	1
Unclassified	2
DISPOSITION:	
Strike terminated by mediation	3
Strike terminated by mediation and matter referred to R.W.L.B.	2
Strike terminated by mediation and matter referred to N.W.L.B.	1
Controversy terminated by mediation, etc.	1
Decision rendered in arbitration	1
Agreement signed	1
Written statement terminating situation.	1
Dispute lapsed or called off; no further action required	3
Referred to Wartime Labour Relations Board	1
Referred to Provincial authorities	2
Disposition pending	4
RESULTS:	
In favour of employees	4
In favour of employer	5
Compromise or partially successful	2
Indefinite or unterminated	7
Not known	2
METHOD OF SETTLEMENT:	
Conciliation or mediation	11
Direct negotiations	3
Arbitration	1
Administrative action	1
Investigation only	1
Settlement pending	3

Brief summaries of a view of the cases of chief interest are given below:—

Coal Miners, Stellarton, N.S.—On July 29 a strike of some 540 miners occurred at the Albion and McGregor collieries of the Acadia Coal Company, Stellarton, N.S. The strike involved the refusal of a rake driver, on instructions of the mine examiner, to ride the forward end of a rake on which a new horse had been placed. The acting mine manager countermanded the instructions of the mine examiner, and when the boy continued to refuse to ride forward on the rake, he was suspended for the day. The mine examiner then turned in his lamp. His place was taken by a Union Committeeman who held mine examiners' papers, with the result that another dispute developed over the acceptance of the mine examiner's position by a member of the Union Committee. The local Union of the United Mine Workers of America, with members of the District Executive and International Board in attendance, demanded a public inquiry by the Mines Department of Nova Scotia under authority of the Coal Mines Regulation Act. This was refused while the men were on strike. Mr. H. R. Pettigrove, Industrial Relations Officer, Fredericton, N.B., who investigated the situation on behalf of the Department of Labour, informed union officials that the strike was a violation of the Wartime Labour Relations Regulations and that the only proper procedure was to resume work and have the dispute adjusted in accordance with the contract between the Union and the Company or the governing statutes. In spite of this the strike spread on August 1 to the Company's No. 7 mine and Allan Shaft, so that about 1,150 miners were involved. Instructions were then issued by the President of District No. 26, United Mine Workers of America, that the men should return to work, and all mines resumed operation on August 3. Later an inquiry was conducted by the Deputy Minister of Mines for Nova Scotia into the alleged violation of the Provincial Coal Mines Regulation Act. As a result of the investigation the management agreed to make certain improvements in working conditions.

Shipbuilding Workers, Prince Rupert, B.C.—On the evening of August 2 about 400 employees of the Prince Rupert Dry Dock Company, members of the Boilermakers' and Iron Shipbuilders' Union of Canada, staged a sit-down strike because 6 men engaged on welding, burning and plating refused to join their Organization. Mr. F. E. Harrison, Western Representative of the Department of Labour, communicated with officers of the Shipyard General Workers' Federation of British Columbia, pointing out that the Agreements between the Company and the various Unions represented in the yard were on an open-shop basis, and had been approved by a vote of the members concerned. An officer of the Federation instructed the men to resume work and operations were restored to normal on August 4.

Coke Oven Workers, Montreal, P.Q.—On August 2 the Department was advised of a threatened strike on the part of employees of the Montreal Coke and Manufacturing Company, Montreal, P.Q. The reason given was that the Regional War Labour Board for Quebec had rejected an application on behalf of 47 coke oven workers for an increase in wages of 25 cents an hour. On August 3 the employees gave the officers of their local union, No. 19397 Gas Workers Union (A.F. of L.), a time limit of 24 hours in which to secure favourable action on their behalf. Mr. R. Trepanier, Industrial Relations Officer, Montreal, promptly arranged to have Union officers meet himself and Mr. C. Miron, Chief Conciliation Officer for Quebec, in the latter's office. A conference with Company officials also took place. Among other things it was pointed out to the workers that there was a reserve of gas sufficient to serve Montreal and vicinity for only 36 hours, and that if a strike should occur there would be great danger of

explosions through the infiltration of air into the gas pipes. It was arranged that the Regional War Labour Board would reconsider the wage demands of the workers during the following week. In view of the extreme heat encountered by the coke oven operators, the Company undertook not to oppose the application of the employees. In spite of these undertakings the workers involved went on strike on the afternoon of August 4, and Union officers were unable to persuade the men to resume their jobs. Messrs. Trepanier and Miron then attended a meeting of the strikers and induced them to resume work pending reconsideration of the case by the Regional War Labour Board. Work was resumed after a stoppage of two hours. The following week an increase of ten cents per hour for the coke oven workers was authorized by the Regional Board.

Metal Products Workers, Oshawa, Ont.—Forty-seven malleable moulders employed by Fittings Limited, Oshawa, Ont., went on strike on August 1 because the Company would not increase certain guaranteed or "target" rates. Demands were also made for the removal of a foreman against whom a number of complaints had been made. The United Steelworkers of America had taken an appeal to the National War Labour Board from a decision rendered earlier by the Ontario War Labour Board in connection with the proposed wage increase, but all documents necessary to a hearing of the appeal had not been filed. Conferences with the parties were held by Mr. F. J. Ainsborough, Industrial Relations Officer, Toronto, as a result of which the Company agreed that the foreman in question would not be continued in charge of the same department, An undertaking was also reached that a study would be made in connection with any piece-work rates which appeared low, and that where the Company and Union investigators could not agree, an impartial arbitrator would review the situation. In order to expedite the appeal before the National War Labour Board the Company agreed to submit its statement in reply without delay. To make up for lost production, the strikers agreed to perform extra work over the week-end.

Metal Products Workers, Sarnia, Ont.—About 324 employees of M. Mueller Limited, Sarnia, Ont., went on strike on August 16 in connection with the alleged delay by the Company in dealing with various grievances and the lay-off of eight female employees who had considerably more seniority than some of the male employees who were retained. Mr. J. P. Nicol, Industrial Relations Officer, Toronto, was assigned to deal with the situation. The Company claimed that the male employees were more capable than the female employees dismissed, and that the work available was not suitable for female workers. After a thorough discussion of the matter, it was found possible to place two female employees in the turret lathe department and two in the polishing department. Four of the dismissed employees were accordingly reinstated and reimbursed for the time lost. Four junior male employees were transferred to other work. Most of the other grievances giving rise to the strike action had to do with piece-work rates. A contributing cause was that certain war contracts had been cancelled and that the wage rates established for domestic production orders were lower than the workers had formerly enjoyed. The Management and the local committee of the United Automobile Workers of America agreed to study the piece-work rates and, if possible, to make a joint application to the Regional War Labour Board for certain revisions. Work was resumed after a stoppage of two days.

Steelworkers, Trenton, N.S.—On August 17, about 75 employees in the shell-forging and finishing departments of the Trenton Steel Company Limited, Trenton, N.S. went on strike over the refusal of one employee to become a member of Local No. 1231, United Steelworkers of America. The strike spread until 302 employees were involved. Discussions with both Company and Union representatives were held by Mr. H. R. Pettigrove, Industrial Relations Officer, Fredericton, N.B. Later, the Union requested the Minister of Labour to have National Selective Service issue an order providing for the dismissal of the employee involved, but this was refused on the ground that it would be an improper procedure. At a meeting on August 20 the employees agreed to return to work pending a conference with Company representatives. When work had been resumed on August 21 the employee who had refused to join the Union voluntarily requested his release from the employ of the Company. He was at once placed by National Selective Service in other employment.

Canadian Railway Board of Adjustment No. 1

Summary of Decisions

REPORTS have been received covering the following cases heard by the Canadian Railway Board of Adjustment No. 1. Summaries of other recent decisions appeared in the LABOUR GAZETTE, July, 1944, p. 862.

The Board was established under a voluntary agreement concluded in 1918, between the several railway companies and certain of the railway organizations. It has power to determine all differences arising between the railway companies and the members of any of the six railway brotherhoods "including the interpretation of wage schedules or agreements having due regard to the rights of the several classes of employees and of the railways respectively."

This agreement was supplemented by a Post-War Agreement continuing the Board's functions entered into April 15, 1921. The text of the Post-War Agreement was published in the Board's eighth triennial report, dated October 1, 1942, together with changes in the personnel of the Board and a tabular summary of the cases adjusted during the preceding three-year period.

The Board consists of six representatives of the railways and six representatives of labour, one from each of the following Railway Brotherhoods: The Brotherhood of Locomotive Engineers; the Brotherhood of Locomotive Firemen and Enginemen; the Order of Railway Conductors; the Brotherhood of Railroad Trainmen; the Order of Railroad Telegraphers; and the Brotherhood of Maintenance of Way Employees and Railway Shop Labourers.

Case No. 527—**Canadian National Railways (Central Region) and Brotherhood of Locomotive Engineers and Brotherhood of Locomotive Firemen and Enginemen.**

As outlined in the Joint Statement of Facts the employees concerned were ordered for extra freight from initial terminal to a point 108·2 miles away, for 6 a.m., with instructions to return with train to be picked up at turnaround point. Train left initial terminal at 6.25 a.m. and arrived at turnaround terminal at 10.55 a.m. There they were required to yard their train, turn engine and switch together the cars for the return trip. Track facilities made it possible to perform these tasks more or less concurrently. The return run was commenced at 2.20 p.m. and arrived at the initial terminal at 7.20 p.m. and the crew was off duty at 8 p.m. Compensation was made on basis of a separate day in each direction plus 3 hours and 25 minutes for switching and yard work at the turnaround terminal.

The point in dispute arose from claims by the engineer and fireman for 20 minutes inspection time and 30 minutes preparatory time at the turnaround terminal, in addition to the terminal time.

In stating their case the employees quoted portions of Article 7 of the schedule governing locomotive engineers and firemen. Clause C provides that "fireman or helpers will report at least 45 minutes before departure time of train and will sign appearance book. The first 30 minutes of this time to be for getting engine ready, and will be paid for as an arbitrary allowance." It was asserted that the schedule governing locomotive engineers was identical with that for firemen. Clause E stipulates: "Final terminal delay will be paid for at pro rata rates for the full delay at the end of the trip . . . . on the minute basis. Time shall be computed from the time engine reaches designated main track switch connecting with yard track . . . . Firemen or helpers will be allowed 20 minutes after arrival on shop track for inspection etc., at pro rata rates, as an arbitrary allowance."

The Company, in its brief, quoted from Clause D of Article 7: "Initial terminal delay will be paid for the full delay on the minute basis, computed from time of leaving shop track until departure from outer switch. Such time to be used in making up a short day." They also quoted Clause E (see above) and from the "Memorandum of Interpretation", Article 2: Question 4: "Is it permissible to pay as a continuous trip turnaround runs of over 80 miles in any one direction?" The answer is "yes, providing trips in each direction do not exceed 100 miles . . . . Turnaround runs of 100 miles or over in each direction will be paid as separate trips, the crews allowed inspection and preparatory time at turnaround point." This would absorb any terminal delay time payable under Article 4 up to 50 minutes. Any time in excess of 50 minutes would be paid for on the minute basis in addition to preparatory and inspection time . . . ."

While admitting that the foregoing referred specifically to passenger service, the Company held that a different basis could not be applied consistently to the freight service.

Further evidence was given orally to the Board by representatives of both sides in the dispute.

The Decision of the Board sustained the employees to the following extent: "In this case the schedule rule provides for payment to the crew upon completion of run of an arbitrary allowance of 20 minutes inspection time and an arbitrary allowance of 30 minutes for preparatory time before commencing the return trip. The payment of these arbitrary allowances, however, absorbs the terminal delay time up to 50 minutes."

Case No. 528—**Canadian Pacific Railway (Western lines), and Brotherhood of Locomotive Engineers, Brotherhood of Locomotive Firemen and Enginemen, The Order of Railway Conductors, The Brotherhood of Railway Trainmen.**

This case involved stated claims of two train crews and, in addition, the Board was asked to determine the course to be followed with all subsequent similar claims by engineers, firemen, conductors and trainmen.

The dispute arose from a disagreement as to compensation for junction switching at a point where rail traffic was frequently transferred to water transport and vice versa, since the exten-

sion of the rail line some 12 years prior to the hearing of the case. The main point at issue was whether or not the station in question could properly be classed as "a junction point" under the schedules for engineers and firemen (Article 7) and that for conductors and trainmen (Articles 1 and 2).

The employees contended that the station was a junction point because "freight is loaded on barges there; sometimes a complete train, including the engine and caboose is moved by barge across the lake, thereby creating a junction point. Based on this assumption, they claimed that road engineers and firemen should be paid for switching at the station in question as provided in Article 7 of the engineers' and firemen's schedule; in this instance, " . . . . at 15 miles per hour at passenger rates, to be paid for at junction from time of arrival until departure of train." In the matter of the conductors and trainmen reference was made to Articles 2 and 3 of the conductors and trainmen's schedules in part as follows: "Through freight rates on the basis of 12½ miles per hour will be paid for all time occupied in switching at C.P.R. junction points and this time will be paid in addition to pay for the trip . . . ."

The company pointed out that "there has been no change in conditions or in the method of operation, nor has there been any departure from the method of payment for services performed at—" during the 12 years since the through rail service was inaugurated. The question had been raised on two occasions during that period, but the company had declined to consider it, on the ground that the station in question was not a C.P.R. junction point within the meaning of any of the wage schedules. It was asserted that representatives of the employees had accepted this ruling in the earlier instances. Representatives of the railway and of the employees appeared before the Board and presented oral evidence.

In its Decision the Board stated that in its opinion the station under review was not a junction point and stated that the proposal made by letter by the General Manager of the company constituted a fair basis for the disposition of the dispute.

Case No. 529—**Canadian National Railways (Central Region) and Brotherhood of Locomotive Engineers and Brotherhood of Locomotive Firemen and Enginemen.**

Claim of an engineer and fireman for continuous time on a run which was broken overnight, on the Company's orders, due to existing weather conditions, severe snowstorms seeming certain to block the line. The employees were compensated on the basis of two separate trips.

The employees based their claim on a portion of Article 31 Clause (*c*) of Engineers' and Firemen's schedule as follows: "When engineers and firemen are tied up between terminals, they will be paid continuous time until engine arrives at arriving terminal", and cited the Board's decision in Case No. 519 L.G. April, 1944, p. 489).

The Railway Company in its brief quoted the same Article 31 Clause (*c*) at some length and placed emphasis on other portions of it: "When engineers are tied up between terminals on account of the line being blocked, they will be paid continuous time on live engines. If the engines are dead, they will be paid 100 miles for each 24 hours so held. Deadhead mileage and time for being so held will not be allowed in the same 24 hours." The Company also declared that case No. 519 was not germane in this instance.

Representatives of the parties appeared before the Board and presented additional evidence.

The Board in its Decision sustained the contention of the employees.

Case No. 530—**Canadian National Railways (Central Region) and the Brotherhood of Locomotive Firemen and Enginemen.**

The Joint Statement of Facts disclosed that an engineer and fireman were ordered in freight service, to take train of 7 loads, 8 empties and caboose from the initial terminal to an objective terminal, approximately 110 miles west. On arrival at the latter terminal they were instructed to set off the loads and empties on a specified track in the "westward yard" and to place the caboose in the track assigned to "eastward cabooses", located in the "east rip yard." Total time on duty, 14 hours, 45 minutes.

The disagreement resulted from the claim of a fireman for 100 miles due to having been required to put the caboose away on eastward caboose siding after arrival at objective terminal.

The employees based their contention on their interpretation of Article 7, Clause (*f*) of Locomotive Firemen, Helpers' and Hostlers' schedule. Except as provided in an earlier clause in the Article referred to "firemen or helpers on arrival at objective terminal, and after putting their train away, will be considered released from duty. Should they be required to perform other work, such as yard switching on short runs out of terminals, they will be paid 100 miles for such service." The putting away of the caboose in eastward caboose siding was considered to be "terminal switching."

The Railway contended that compensation should be made in accordance with the terms of Clause (*e*) of Article 7 which reads as follows: "Final terminal delay will be paid at pro rata rates for the full delay at the end of the trip . . . . on the minute basis. Time shall be computed from the time the engine reaches designated main track switch connecting with the yard track . . . . time shall continue until engine is placed on designated shop track, or is turned over to hostler or inspector. No mileage will be paid for between said point and designated shop track."

The Company maintained that the placing of the caboose in the caboose siding was in conjunction with yarding the train as per the first sentence of Article 7, Clause (*f*) quoted above. Only 15 minutes elapsed from the time the train reached the objective terminal until the locomotive was delivered on the shop track. It was pointed out that "it has been the custom for incoming engine crews arriving with light trains, to put the caboose away . . ." and that the Company did not consider the placing of the caboose on the caboose siding constituted yard or terminal switching.

Representatives of both parties presented additional evidence to the Board.

The Board in its Decision sustained the contention of the employees.

Case No. 531—**Canadian Pacific Railway Company (Western Lines) and the Brotherhood of Railroad Trainmen.**

The dispute arose over the application of Article 16 of Yardmen's Schedule which reads as follows: "Yardmen in transfer service will be supplied with a caboose or other suitable car properly equipped."

According to the Joint Statement of Facts, yard crews stationed at ———— are required to handle traffic between ———— and ————, a distance of three miles; also to perform all the switching at an industrial plant located at one of the terminals.

The employees contended that the service performed by the yard crews at one of the terminals should properly be classified as transfer service within the meaning of the schedule quoted above. Two train crews were assigned to the territory and each crew, during the course of its tour of duty, was required to make two round trips between the initial and objective terminals.

The Company maintained that "transfer service" within the meaning and intent of the Article above quoted "is confined to the movement of cars between designated points to which crews, either road or yard, are assigned . . . . Yard crews, who, in the course of their switching assignments, handle cars between points or groups of tracks within a terminal are not in transfer service."

The Company stressed the point that a former general chairman of the Brotherhood of Railroad Trainmen, had some 14 years before, acknowledged a distinction between the two classes of service, that is transfer service, and what he designated as "extended yard runs" under which assignments required movements of a mile or more between two or more yards within a terminal. The Company claimed that the assignment in question was within yard limits and that this was established 15 years before and continued without change during that time. It was asserted that because of a four per cent grade between the two points that the handling of a caboose was impractical. Because of the grade, movements in both directions were made at slow speed and "yardmen are required to be on top of cars with brake clubs."

Representatives of both parties submitted additional evidence to the Board.

The Board in its Decision stated that it was of "the opinion that the circumstances in this case justify a caboose or other car properly equipped."

Strikes and Lockouts in Canada During August, 1944

DURING the month of August the number of strikes and lockouts in existence in Canada showed an increase of four as compared with the previous month, the number of workers involved and the time loss in man-working days being also higher. As compared with August, 1943, the figures show a substantial decline in strike activity. There were 25 strikes in existence during the month, involving 12,771 workers and causing a time loss of 121,343 man-working days, as compared with 21 strikes in July with 9,696 workers involved and a time loss of 25,968 days. In August, 1943, there were 50 strikes with 35,645 workers involved and a time loss of 240,493 days.

Preliminary figures for the first eight months of 1944 show a total of 151 strikes, involving 69,200 workers, with a time loss of 478,189 man-working days. Comparative figures for the same period last year show 287 strikes, with 149,977 workers involved and a time loss of 822,045 days.

During the month under review two strikes, one of shipyard workers at Halifax and Dartmouth N.S., and the other of street railway employees at Montreal, P.Q., were responsible for almost 54 per cent of the workers involved and about 87 per cent of the total time loss.

Four strikes, involving 4,246 workers, were carried over from July and 21 commenced during August. Of these 25 strikes, all of which were terminated during the month, three were in favour of the workers, seven in favour of the employers, three were compromise settlements, one was partially successful and eleven were indefinite in result, work being resumed pending final settlement.

The record does not include minor strikes such as are defined in another paragraph nor does it include strikes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated.

* Preliminary.

† Strikes unterminated at the end of the previous year are included in these totals.

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is seldom encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout included as such in the records of the Department is a cessation of work involving six or more employees and lasting at least one working day. Strikes of less than one day's duration and strikes involving less than six employees are not included in the published record unless ten days or more time loss is caused, but a separate record of such strikes is maintained in the Department and the figures are given in the annual review. The records include all strikes and lockouts which come to the knowledge of the Department and the methods taken to obtain information preclude the probability of omissions of strikes of importance. Information as to a strike involving a small number of employees or for a short period of time is frequently not received until some time after its commencement.

STRIKES AND LOCKOUTS IN CANADA DURING AUGUST, 1944*

Industry, occupation and locality	Number involved		Time loss in man-working days	Particulars†
	Establishments	Workers		
Strikes and Lockouts in Progress Prior to August, 1944				
MINING—				
Coal miners, Stellarton, N.S.	3	1,146	2,750	Commenced July 29; against suspension of a boy and cancelling of mine examiner's order *re* safety regulations; terminated August 3; conciliation, provincial and return of workers pending investigation; (boy reinstated) compromise.
MANUFACTURING—				
Textiles, Clothing, etc.—				
Hat factory workers, Guelph, Ont.	1	12	60	Commenced July 28; failure of one worker to pay union dues; terminated August 5; conciliation, provincial, and return of workers pending settlement; indefinite.

Strikes and Lockouts in Great Britain and Other Countries

THE latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month, bringing down to date that given in the March, 1944, issue in the review of "Strikes and Lockouts in Canada and Other Countries". The latter included a table summarizing the principal statistics as to strikes and lockouts since 1919 in the various countries for which such figures are available. Statistics given in the annual review and in this article are taken, as far as possible, from the government publications of the various countries concerned.

Great Britain and Northern Ireland

The British *Ministry of Labour Gazette* publishes statistics dealing with disputes involving stoppages of work and gives some details of the more important ones. An order under the Defence Regulations, effective July 25, 1940, provides for the settlement of disputes and the prevention of strikes and lockouts, as noted in the LABOUR GAZETTE, August, 1940, page 760.

The number of work stoppages beginning in June, 1944, was 110 and 10 were still in progress from the previous month, making a total of 120 during the month, in which 24,300 workers were involved and a time loss of 44,000 working days was caused.

Of the 110 disputes beginning in June, 22 arose out of demands for increased wages, 41 over other wage questions, 2 as to questions of working hours, 15 over questions respecting the employment of particular classes or persons and 30 over other questions.

Australia

The number of disputes recorded for 1943 was 785, involving 288,028 workers, with a time loss of 990,151 working days. For 1942 corresponding figures are 602 strikes, involving 166,167 workers, with a time loss of 378,195 working days.

New Zealand

The number of disputes recorded for 1943 was 69, involving 10,935 workers, with a time loss of 15,003 working days. Comparative figures for 1942 are 65 strikes, involving 14,345 workers, with a time loss of 51,189 working days.

United States

Preliminary figures for July, 1944, show 470 strikes beginning in the month, in which 145,000 workers were involved. The time loss for all disputes in progress during the month was 680,000 working days. For June corresponding figures are 500 strikes, involving 155,000 workers, with a time loss of 680,000 working days.

Chinese Seamen on British Ships

Equality of treatment between British and Chinese seamen, established in a former agreement of 1942, was reaffirmed in principle in agreements signed May 19, 1944, by representatives of Chinese seamen and British shipowners employing Chinese crews.

The conditions of employment of Chinese seamen are substantially improved by the new agreement. Wages are to be increased on April 1, 1944, and the hours in the deck department at sea are limited to 56 a week with any excess to count as overtime. Overtime which is not compensated by equivalent time off in port will be paid at the rate of 1s. 9d. per hour for carpenters and 1s. 6d. for other ratings. The only previous limitation had been that the owners undertook to consult with the seamen's representatives to see that the crew should not be required to work unreasonably long hours and, if such hours were worked, they should be paid at 1s. 3d. for carpenters and 1s. for others.

Provision is made for a Joint Investigation Committee to settle disputes so that fewer differences will be referred to the Chinese Diplomatic Representative in the United Kingdom and the Minister of War Transport. Each of these will nominate two members to form the committee which will inquire into any complaint made by the manager of a Seamen's Reserve Pool or by a seaman regarding the carrying out of the agreements or the enforcement of the Pool rules.

Collective Agreements and Wage Schedules

Recent Collective Agreements

COLLECTIVE agreements received in the Department are outlined in the LABOUR GAZETTE from month to month. It is not possible because of limitation of space to include all agreements received. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of the employers and workers are also included. Verbally accepted agreements are so indicated.

Agreements made obligatory under the Collective Agreement Act in Quebec are summarized in a separate article following this.

Manufacturing: Pulp, Paper and Paper Products

THOROLD, ONTARIO.—BEAVER WOOD FIBRE CO. LTD. AND THE BEAVER CO. LTD. AND INTERNATIONAL BROTHERHOOD OF PAPER MAKERS LOCAL 192 AND INTERNATIONAL BROTHERHOOD OF PULP, SULPHITE AND PAPER MILL WORKERS, LOCAL 228.

Agreement to be in effect from May 1, 1944, to April 30, 1945, and thereafter from year to year, subject to notice. Permanent employees on an hourly basis to maintain membership in their respective union; new employees must join the union.

Hours: 8 per day, 48 per week. Overtime for day workers; time and one-half. Tour workers to work overtime at time and one half if such work is for Company convenience due to breakdowns, extra work or other circumstances created by the Company; where such overtime is caused by sickness, accident, absenteeism, vacations and other circumstances not construed as Company convenience it will be worked at regular rates. All work on Sundays and four holidays, at time and one half.

Hourly wage rates for some classes: wood room—sawman 72 cents, labourers 62 cents; grinder room—foremen 77 to 98 cents, grindermen 72 cents, wood handlers 72 cents, screen operator 67 cents; lapping—wet machine operator 65 cents, wet machine cleaner 64 cents; continuous beater—64 and 68 cents; board mill beaters—head beatermen $1.04, others 64 to 79 cents; board machine—shift foreman $1.34, machine tenders $1.09, back tenders 89 cents, other machine hands 68 to 82 cents, others 64 to 67 cents; news machine—machine tenders $1.42, back tenders $1.24, other machine hands 78 cents to $1.01, oilers 69 cents; steam power—engineers 85 cents to $1.06, firemen 76 cents; electric power operators and maintenance 88 cents; sizemen 80 cents; finishers (news) 69 to 88 cents; shippers 69 and 72 cents; mechanical department—millwrights, pipefitters, bricklayers, blacksmiths, 88 cents, painters 76 cents; yard—checker 88 cents, others 62 to 69 cents; varnish makers 72 cents; sweepers 65 cents.

Vacation: employees with at least one year's continuous service, one week with pay; one extra day for every year's service over 5 years to a maximum of two weeks with pay after 10 years' service. Provision is made for the settlement of grievances.

Manufacturing: Printing and Publishing

TORONTO, ONTARIO.—TORONTO GRAPHIC ARTS ASSOCIATION, THE MASTER PRINTERS AND BOOKBINDERS ASSOCIATION OF TORONTO AND THE INTERNATIONAL PRINTING PRESSMEN AND ASSISTANTS' UNION, LOCAL 10.

Agreement to be in effect from July 1, 1944, to June 30, 1945, and thereafter from year to year, subject to notice.

Hours: the basic work week is 44 hours, daily hours not to exceed 9. Night work is payable at 15 per cent higher than the day rate. Overtime is payable at time and one half for the first three hours and double time thereafter; double time for work on Sundays and eight legal holidays. Vacation: one week with pay each year for employees with at least one year's service. Clauses regulating the number of pressmen, assistants, apprentices on each type of press are included.

This agreement is subject to the provisions of the basic agreement between the above employers' association, the above printing pressmen's union and also the International Brotherhood of Bookbinders Local 28, made June 29, 1938, which provided for a joint standing committee and, where necessary, for a conciliation board, which has the final decision on matters of wages and hours. This basic agreement stipulates a minimum rate of 75 cents per hour for skilled journeymen pressmen and bookbinders, and for the settlement of disputes.

TORONTO, ONTARIO.—TORONTO DAILY NEWSPAPER PUBLISHERS AND THE INTERNATIONAL TYPOGRAPHICAL UNION, LOCAL 91.

Agreement to be in effect from April 1, 1944, to March 31, 1945. Only union members to be employed, if available. Others employed must apply to join the union.

Hours: for day shift, 8 per day, 5 days, a 40 hour week; for night shift, 7½ per shift, 5 nights, a 37½ hour week. Overtime is payable at time and one half; work on Sundays and eight holidays, at double time.

Weekly wage rates: for journeymen, $54 per week for day shifts, $55.50 for night shifts; apprentices from $16 during second year to $37 during sixth year.

Vacation: two weeks with pay to employees with at least one year's service. Provision is also made for apprentice regulation and for a joint standing committee for the settlement of disputes.

TORONTO, ONTARIO.—TORONTO DAILY NEWSPAPER PUBLISHERS AND THE INTERNATIONAL STEREOTYPERS AND ELECTROTYPERS' UNION, LOCAL 21.

Agreement to be in effect from July 1, 1944, to June 30, 1945. Only union members to be employed.

The agreement which came into effect June 1, 1937, and was summarized in the LABOUR GAZETTE, September, 1937, was extended to April 30, 1945. From February 1, 1944, the basic wage was increased to include the cost of living bonus, to $58 per week for day work (a 40-hour week), and $63 for night work, (a 37½-hour week).

Vacation: one week with pay to employees with at least one year's service.

Manufacturing: Metal Products

WINDSOR, ONTARIO.—DOMINION FORGE AND STAMPING CO. LTD. AND INTERNATIONAL UNION, UNITED AUTOMOBILE, AIRCRAFT AND AGRICULTURAL IMPLEMENT WORKERS OF AMERICA, LOCAL 195.

The agreement which came into effect May 10, 1943, and was noted in the LABOUR GAZETTE, December, 1943, p. 1699, was amended May 31, 1944, to provide that the union be the sole collective bargaining agent.

WINNIPEG, MANITOBA.—MACDONALD BROTHERS AIRCRAFT LTD. AND INTERNATIONAL ASSOCIATION OF MACHINISTS, LODGE 741.

Agreement to be in effect from January 14, 1944, to December 31, 1944. The company recognizes the shop committee of the union, as the bargaining agent for the union members. No discrimination or coercion by the company or the union against employees because of their union membership or non-membership.

Hours: 8 per day, a 48-hour week. Overtime is payable at time and one half; work on three holidays at double time.

Hourly wage rates: journeymen—tool and die maker, pattern maker, 95 cents; machinist, electrician, fitter, sheet metal worker, welder, painter, moulder, etc. 90 cents; production worker, from 41 cents for beginners (women and boys) to 85 cents for highest class; truck, tractor and crane operators 65 cents; labourers, sweepers and material truckers 59 and 60 cents; miscellaneous light labour 47 and 50 cents; flight inspectors $1.05, other inspectors 59 to 95 cents, examiners 53 and 55 cents; apprentices (females and males under 21) 41 to 85 cents, male apprentices (over 21), 55 to 85 cents; maintenance—engineers 70 to 90 cents, oilers 65 cents, millwrights, steamfitters, electricians, plumbers and riggers 90 cents, helpers 65 cents. Provision is made for seniority rights and the settlement of disputes.

Manufacturing: Shipbuilding

SOREL, QUEBEC.—MARINE INDUSTRIES LIMITED AND THE COUNCIL OF METAL TRADES OF EMPLOYEES OF MARINE INDUSTRIES LTD. (A.F. of L.)

Agreement to be in effect from January 8, 1944, to January 7, 1945, and thereafter from year to year, subject to notice. "Employees will not be subject to a special treatment due to their affiliation to a labour or trade union." The Metal Trade Council of the employees of Marine Industries Ltd. are the sole collective bargaining agency for the employees.

Hours will be fixed by the Company, but overtime at the rate of time and one half to be paid for all hours after 8 in any day; work on Sundays and six holidays, at double time. Work on night shifts, time and one eighth to be paid.

Wages: the basic wage rates are those authorized by federal government Order in Council 629 (LABOUR GAZETTE, May, 1942 pp. 558-561). A joint committee is provided for the settlement of disputes.

Transportation and Public Utilities: Water Transportation

GREAT LAKES.—VARIOUS STEAMSHIP COMPANIES AND THE CANADIAN SEAMEN'S UNION.

Agreement to be in effect from June 30, 1944 to August 1, 1945, and year to year subject to notice. The companies recognize the union as the sole collective bargaining agency for all unlicensed personnel. Preference in employment to be given union members, but the actual selecting and hiring of seamen shall be at the discretion of the master and/or chief engineer of the vessel.

Hours: a deckhand's day to be 12 hours with 2 hours off for meals; only necessary work may be done between 6 p.m. and 6 a.m. on any day and on Saturday afternoon, Sundays and holidays. In laying up or fitting out, the hours not to exceed 9 hours per day, nor 6 days per week; if required to work on Sundays or holidays for laying up or fitting out, overtime to be paid in addition to the regular wage. Overtime is payable at 50 cents per hour.

Monthly wage rates, (retroactive to beginning of 1944 navigation season) including meals and sleeping accommodation; wheelsman $112.10, watchman or lookout or patrol $97.10, deckhand $89.60, oilers $112.10, firemen $107.10, coal passer $89.60, first cook (Canaller) $144.60, first cook (Upper Laker) $154.60, second cook $92.10, porter $80. If a member of the crew is required to do longshoremen's work, he shall be paid the longshoremen's rate (no less than 40 cents per hour) in addition to his regular wage. A war risk bonus is granted to each member of the crew while operating in war zones.

Vacation: members of the crew with one season's continuous service with one company shall after navigation season is over, receive one week's vacation with pay. Transportation from and to their homes at the beginning and end of the season up to a distance of 500 miles is provided by the company. Provision is made for the settlement of disputes.

Collective Agreement Act, Quebec

Recent Proceedings Under the Act

IN Quebec, the Collective Agreement Act provides that where a collective agreement has been entered into by an organization of employees and one or more employers or associations of employers, either side may apply to the provincial Minister of Labour to have the terms of the agreement which concern wages, hours of labour, apprenticeship and certain other conditions made binding throughout the province or within a certain district on all employers and employees in the trade or industry covered by the agreement. Notice of such application is published and thirty days allowed for the filing of objections, after which an Order in Council may be passed granting the application, with or without changes as considered advisable by the Minister. The Order in Council may be amended or revoked in the same manner. Each agreement is administered and enforced by a joint committee of the parties. Further information concerning this legislation is given in the LABOUR GAZETTE, January, 1943, page 86. Proceedings under this Act and earlier legislation have been noted in the LABOUR GAZETTE monthly since June, 1934.

Recent proceedings under the Act include the extension of two new agreements and the amendment of nineteen others, which are noted below. A request for the amendment of the building trades agreement at Montreal was published in the *Quebec Official Gazette*, August 5; and a request for a new agreement for fur manufacturing (wholesale and retail) at Montreal was gazetted August 12; a request for amendment of the agreement for building trades at Sherbrooke was also gazetted August 12; a request for amendment of the paper box industry (uncorrugated paper) agreement for the province was gazetted August 19; and a request for amendment of the agreement for men's and boys' clothing industry for the province was gazetted August 26.

In addition Orders in Council were published in the *Quebec Official Gazette* during August approving the constitution and by-laws of certain joint committees, and others approving the levy of assessment on the parties, or amending previous Orders in Council in this connection, by certain other parity committees.

Mining, Non-ferrous Smelting and Quarrying

BUILDING MATERIALS, PROVINCE OF QUEBEC.

A new agreement for this industry is summarized below under "Manufacturing Non-Metallic Minerals, Chemicals".

Manufacturing: Vegetable Foods

BAKERS, QUEBEC CITY.

An Order in Council, dated August 1, and gazetted August 12, amends the previous Orders in Council for this Industry (L.G., June, 1941, p. 703, Sept., 1943, p. 1253). La Boulangerie National Limitée is treated as a co-contracting party to the agreement.

BAKERS, MONTREAL.

An Order in Council, dated August 1, and gazetted August 5, amends the previous Orders in Council for this industry (L.G., June, 1944, p. 753, and other issues as therein noted).

Minimum weekly wages: oven men and dough men, $28.45; journeymen bakers and pastry cooks, $24.45; helpers, $21.45; apprentices, $15.45; supernumeraries doing the work of journeyman baker, 52 cents per hour; those working as helpers, 45 cents; salesmen, $21.45; inspectors, $28.45. Salesmen and inspectors working over six days a week receive $6 over

minimum wage rate. Vacation: one week with pay for employees with one year's continuous service, or, in smaller bakeries, one day a week for thirteen weeks during summer months.

This decree shall remain in effect to December 31, 1944, and from year to year thereafter subject to notice.

Another Order in Council, dated August 16, and gazetted August 26, amends the previous Orders in Council but does not affect the summary already given.

Manufacturing: Fur and Leather Products

FUR MANUFACTURING INDUSTRY (RETAIL) MONTREAL.

An Order in Council, dated August 1, and gazetted August 5, amends the previous Orders in Council for this industry (L.G., Sept., 1940, p. 971; Dec., 1941, p. 1572; Dec., 1942, p. 1490; Nov., 1943, p. 1529).

Agreement to be in effect to May 1, 1945, or 1946 if no notice given.

Hours: 40-hour week. Overtime is payable at time and one-half. During the months of September, October, November and December, a 48-hour week may be worked at regular rates. Minimum weekly wages including cost-of-living bonus: cutters—Class A, $46, Class B, $40; operators—Class A, $35.60, Class B, $29.20, finisher—Class A, $33.20, Class B, $27.20; blocker—Class A, $29.20, Class B, $20.80; female operator—Class A, $29.20, Class B, $22; female finisher—Class A, $26.80, Class B, $22; apprentices (male or female) from $8.40 per week during the first six months to $16.80 during fifth six months; apprentices (cutters or trimmers) $28 during first six months to $33.20 during sixth six months.

FUR MANUFACTURING INDUSTRY (WHOLESALE) MONTREAL

An Order in Council, dated August 16, and gazetted August 26, extends the term of the agreement (L.G., January, 1943, p. 87; September, 1940, p. 970; May, 1944, p. 637, July, p. 867, August, p. 1005) to October 1, 1944.

WORK GLOVE MANUFACTURING INDUSTRY, PROVINCE OF QUEBEC

An Order in Council, dated July 19, and gazetted August 5, amends the previous Orders in Council for this industry (L.G., June, 1943, p. 812; July, 1944, p. 867). The amendment does not affect the summary already given.

Manufacturing: Textiles and Clothing

MEN'S AND BOYS' CLOTHING INDUSTRY, PROVINCE OF QUEBEC

An Order in Council, dated August 16, and gazetted August 26, corrects the Order in Council of July 19, for this industry (L.G., August, 1944, p. 1005). This correction does not affect the summary already given.

Manufacturing: Pulp, Paper and Paper Products

PAPER BOX (CORRUGATED PAPER) MANUFACTURING INDUSTRY, PROVINCE OF QUEBEC

An Order in Council, dated July 19 and gazetted August 5, amends the previous Orders in Council for this industry (L.G., April, 1942, p. 483, Sept., p. 1097; Jan., 1943, p. 88, April, p. 490, Nov., p. 1529, Feb., 1944, p. 198) by adding band saw operator to wage schedule at 40 cents for first six months, 45 cents thereafter.

PAPER BOX (UNCORRUGATED PAPER) MANUFACTURING INDUSTRY, PROVINCE OF QUEBEC

An Order in Council, dated August 16, and gazetted August 19, amends the previous Orders in Council for this industry (L.G., April, 1939, p. 528; Sept., p. 950; May, 1940, p. 496; Dec., p. 1310; April, 1941, p. 473; June, p. 704; Dec., p. 1572; Jan., 1943, p. 88, Dec., p. 1702).

Vacation: one week with pay after one year's service.

Minimum average wage rates for female employees including apprentices, 28 cents per hour in zone 1, 26 cents in zone 11; for male employees including apprentices, 42 cents in zone 1, and 40 cents in zone 11.

Manufacturing: Metal Products

SHEET METAL PRODUCTS MANUFACTURING, MONTREAL

An Order in Council, dated August 1, and gazetted August 12, extends the term of this agreement (L.G., March, 1943, p. 340, Oct., p. 1381; Jan., 1944, p. 70; April, p. 496; May, p. 637) to August 31, 1944.

Another Order in Council, dated August 16, and gazetted August 19, makes obligatory the terms of a new agreement between the Builders' Exchange, Inc., and the Sheet Metal Workers International Association, local 116. Agreement to be in effect August 19, 1944, to August 18, 1945 and year to year thereafter subject to notice. The agreement applies to the island of Montreal and a radius of fifteen miles.

Hours: 9 per day, 4 on Saturday, a 48-hour week. Overtime is payable at time and one-half, double time on Sundays and eight specified holidays.

Hourly wage rates: journeymen sheet metal mechanics 89 cents; leading hand (in charge of four or more journeymen mechanics) and welders Class A, 97 cents; welders Class B, 87 cents, Class C, 77 cents; production welders, from 57 cents in first six months to 72 cents in fourth six months; machinists 77 cents; toolmakers, 92 cents; painters, 85 cents; blacksmiths, 87 cents; machine operators, 72 cents; assemblers and specialists, 77 cents; production workers, 57 cents, helpers, 52 cents; apprentices and boys under 21 years start at 37 cents with an increase of 5 cents every six months; routine inspectors, truck drivers, store keepers, shipping and receiving, 57 cents; female workers, 39 cents to 47 cents after six months. Employees working on night shifts receive 5 cents an hour over above rates.

One apprentice for each 2 journeymen.

Manufacturing: Non-Metallic Minerals, Chemicals, etc.

PAINT INDUSTRY, PROVINCE OF QUEBEC

An Order in Council dated August 16, and published in the *Quebec Official Gazette* August 26, amends the previous Orders in Council for this industry (L.G., July, 1942, p. 856, Sept., p. 1097; Nov., 1943, p. 1530). The cost-of-living bonus is incorporated in the wage schedule making a general increase of 10 cents per hour for all classes excepting male employees under 18 years in one department and apprentices under 20 years of age whose minimum rate is 35½ cents per hour.

BUILDING MATERIALS INDUSTRY, PROVINCE OF QUEBEC

An Order in Council, dated August 16 and gazetted August 26, makes obligatory the terms

of a new agreement between (1) certain owners and operators of granite quarries and granite cutting plants (2) certain owners of quarries of limestone, sandstone, artificial stone and all other kind of stone except granite and marble, (3) certain owners of marble and terrazzo plants, and La Fédération national catholique des métiers du bâtiment et des matériaux de construction (The National Catholic Federation of Building and Building Materials Trades).

The Order in Council to be in effect from August 26, 1944, to December 31, 1944, and year to year subject to notice.

Minimum weekly wage rates: barbers $22 plus 50 per cent of receipts in excess of $30; hairdressers (female) $12.

Standard Provisions for Collective Agreements for Women Workers in United States

WITH the assistance of women representatives from trade unions with large numbers of women members, the Women's Bureau of the United States has drawn up a number of standard provisions designed to protect the interests of women covered by collective agreements. The provisions relate to sex discrimination, equal pay, seniority, rest and lunch periods and maternity leave. They are published in a leaflet issued by the Bureau in March.

A general clause rules out all discrimination based on sex or marital status. A second provision stipulates that job classifications founded on sex are to be eliminated and a policy of the rate for the job adopted. This is to include identical starting rates for both sexes and the same increases. Another provision declares that women are to be given seniority rights on the same basis as men and are entitled to the same rights of promotion and transfer to other departments.

The clauses relating to rest and lunch periods call for a 30-minute lunch break after not more than five hours of work and two 10-minute rest pauses a day, during which workers may leave the workplace. No deductions from pay are to be permitted for rest or lunch breaks nor is the day to be lengthened because of them.

A final provision declares that pregnancy is not a ground for dismissal. If a pregnant woman's doctor certifies that her work is too dangerous or difficult for her, she is to be transferred to more suitable work. Women workers are to be entitled to maternity leave of six weeks before delivery and two months after, and may be granted additional leave up to a year if a doctor certifies that it is necessary. They will continue to accumulate seniority for the first 3½ months' absence and retain full seniority for a year from the date of leaving. If an employee wishes, she may be paid at the beginning of maternity leave for all unused sick leave and holidays with pay. A woman returning from maternity leave is to be assigned to her former job at the same rate of pay as she formerly received. If the job is no longer available or suitable, she is to be transferred to an equivalent job for which she is qualified.

Canadian Vocational Training

CANADIAN Vocational Training provides the following types of training:—

(1) Pre-employment classes in vocational schools for men and women about to enter war industry;

(2) Part-time classes, principally for the upgrading of persons already employed;

(3) Training plant schools;

(4) Special classes for foremen and supervisors;

(5) Training of enlisted men as tradesmen for the Army, Navy and R.C.A.F.;

(6) Rehabilitation training for persons discharged from the Armed Forces in the present war and referred for training by the Department of Pensions and National Health;

(7) Assistance to certain categories of university students whose services are needed in connection with the war effort.

Canadian Vocational Training is carried on under agreements made by the Dominion Government with each province. The administration is decentralized with a Regional Director in each province. Training is given in technical schools, special training centres and in industrial plants. The provinces and municipalities supply the shop facilities of the technical schools to the Program free of charge. Provincial Governments also pay certain administrative costs and share with the Dominion in the cost of machinery and equipment purchases. All other costs are paid by the Dominion with funds from the War Appropriation.

From its inception up to July 31, 1944, the gross enrolment under Canadian Vocational Training has been as follows:—

Training for Industry	229,329
Army Tradesmen	43.155
Navy Tradesmen	8,259
R.C.A.F. Tradesmen	65,138
Rehabilitation (discharged persons from the forces)	4,010
Students	5,373
Total	355,264

The gross enrolment in all types of classes on July 31, 1944, was 5,398 which constitutes the lowest figure during the operation of the program. Of this enrolment 2,713 were tradesmen from the Army, Navy and Air Force. Very few full-time pre-employment classes for industry were carried on during the month. Out of the total of 139 plant schools that had been approved up to July 31, 1944, 27 were still operating, the others had all met their requirements and had suspended operations.

Regional Representation—Prince Edward Island

To facilitate the increased efforts and needs for vocational training and in particular rehabilitation training, Dr. L. W. Shaw, recently appointed Director of Education, has also accepted the responsibility as Regional Director of Canadian Vocational Training for Prince Edward Island, with headquarters at Charlottetown.

Rearrangement of accommodation at Prince of Wales College, Charlottetown, will provide for technical classroom requirements, and it is felt that additional trades training will have to be provided for, probably with more less temporary buildings being erected adjacent to the college.

Apprenticeship Training

Since January 1, 1944, when authority was given the Minister of Labour to enter into agreements for Apprenticeship Training with the provinces who had or would pass Apprenticeship Acts, seven provinces have entered into an agreement with the Dominion to provide the required Apprenticeship Training. The Dominion allotment for the current fiscal year for this purpose is $250,000 with a maximum of $1,000,000 per year for each of the next nine years. The indications are that considerable activity will result in this field of training as a result of the Dominion's undertaking. The agreements cover the broad policies to be administered by the provinces.

Training of Coal Miners

Recently inaugurated plans for the training of coal miners in the Cape Breton area have grown in favour until now four plant schools are actively in operation.

Supervisory Training

The Supervisory or Foremanship Training Program of the department continues to grow in favour. Recently the Department of National Defence, Army Headquarters, Ottawa, adapted Job Instructor, Job Relations and Job Methods Training to their requirements. More than 300 Army Headquarters staff have received this training to date and plans are now underway to inaugurate this training in an ever widening program.

Activities of Unemployment Insurance Commission

Statistical Analysis of Insurance Operations During July—Interest on Fund Covers Benefit Paid

A TOTAL of 3,106 persons applied for unemployment insurance benefit in Canada during July. This is almost identical with the number of claims filed during June (3,226) but is well above the 1,087 filed during July of last year. All the provinces showed a slight increase over June except Prince Edward Island, Nova Scotia and Alberta, all of which showed a decrease.

The number of persons who signed the live unemployment register during the last six working days of July (4,488) was slightly less than the number who signed during the corresponding period of June (4,707). Thus, during the month of July, the number on benefit and claiming benefit declined more rapidly than did the number of claimants. This is further illustrated in Table 5, where the number of persons who were paid benefit during the month is seen to be 4,753 whereas during June those receiving benefit numbered 7,983.

During July, 3,650 claims were forwarded to insurance officers for consideration and 3,233 were considered entitled to benefit. In handling these figures it is well to remember that filing claims at local offices and forwarding them to insurance offices is a continuous process. The taking of monthly totals at each stage for statistical purposes is, then, a purely arbitrary device. For this reason both the total of claims received at insurance offices and of claims allowed, contain some claims that were received at local offices earlier than the beginning of the current month and some of these claims, as well as some received in the month being considered, were pending at the end of the month reviewed.

The number of persons paid benefit during July was 4,753 compared with 7,983 in June and 1,868 in July 1943. These persons were paid a total of $135,256 for 71,035 compensated unemployed days in July; $247,891 for 128,922 days in June; and $45,581 for 25,166 days in July 1943.

Insurance Registrations

Reports received from Local Offices of the Unemployment Insurance Commission showed that as at August 31, 1944, 2,669,931 employees had paid contributions to the fund since April 1, 1944, an increase of 127,048 since July 31, 1944 and 466,175 since the commencement of the current fiscal year.

As at August 31, 1944, 136,958 employers were registered as having insurable employees, an increase of 1,148 from July 31, 1944.

Registrations as at August 31, 1944, by regions follow:

July, 1944	3,106

Interest on Fund Meets Benefit Payments

Interest received on investments has been great enough to take care of the entire total benefit payments under the Unemployment Insurance Act, Louis J. Trottier, Chairman of the Unemployment Insurance Commission, announced recently. Consequently, all contributions paid by employers, employees and the Government have remained intact in the Fund which, on July 31, 1944, amounted to $216,171,931.

Mr. Trottier stated that the total contributions and interest on investments received during July amounted to $6,585,122. Benefits paid

for the same period totalled $134,432, leaving a net increase to the Fund of $6,450,690.

An increase of $4,902,662, or 11·4 per cent during the first seven months of the year 1944 over the corresponding period in the previous year was recorded.

Under the Unemployment Insurance Act, contributions collected from employers, employees, and the contribution of the Dominion Government, are invested in approved securities under the supervision of an Investment Committee.

TABLE 3—CLAIMS FOR BENEFIT BY PROVINCES, JULY, 1944

Province	Claims Filed at Local Offices			Claims Received at Insurance Offices for Adjudication	Disposal of Claims (includes claims pending from previous months)

Employment and Unemployment

Summary

REPORTS received in the Department of Labour during the past month give the following information concerning employment and unemployment in Canada.

The employment situation at the beginning of July as reported by employers.—A considerable rise in employment at July 1 was reported to the Dominion Bureau of Statistics by employers. The employment index, however, remained slightly below the maximum reached during the summer of 1943

The index number of employment (based on the 1926 average as 100) was 183·5 as compared with 180·5 at June 1, 1944, and 183·7 at July 1, 1943.

The average weekly wage per employee was $31.71, nine cents lower than at the beginning of June, but 74 cents higher than at July 1, 1943.

The Bureau's reports come from firms employing fifteen or more employees, representing practically all industries except agriculture, fishing, hunting and highly specialized business operations. Reports for July were received from 14,688 establishments, with staffs aggregating 1,853,618 men and women.

Unemployment as reported by the Unemployment Insurance Commission.—Claims for unemployment insurance benefit declined slightly. During July 3,106 claims were filed, as compared with 3,226 during June. These figures are well above the total of 1,087 claims filed during July of last year, but considerably below last February's maximum of 12,284.

Applications for employment; vacancies, and placements; July, 1944.—Reports received from Employment and Selective Service Offices of the Unemployment Insurance Commission during the four-week period June 30, to July 27, 1944, showed a decline in business transacted both when compared with the previous four weeks and with the four-week period July 2, to July 29, 1943, this computation being based on the average number of placements recorded daily. Manufacturing was mainly responsible for the decrease under the first comparison and manufacturing and construction under the second, all industries except forestry and logging showing a decrease in placements over the four weeks in July, 1943. Vacancies during the four weeks under review numbered 206,635, applications 192,847 and placements in regular and casual employment 140,507.

Unemployment in trade unions.—The percentage of unemployment in trade unions, as reported to the Department of Labour by local unions across Canada, remained negligible. At the beginning of July the percentage was 0·3, as compared with 0·9 in April (the last previous quarterly date for which returns were submitted) and 0·6 in July, 1943. The July figure was based on returns received from 2,206 labour organizations with a total membership of 415,707 persons.

Total employment in Canada.—An estimate of Canada's total manpower distribution at December 1, 1943, has been made by the Research and Statistics Branch of the Department of Labour. At that date it is estimated that 4,288,000 persons, 14 years of age and over, were gainfully occupied, of whom 3,353,000 were in non-agricultural industry, including 1,104,000 in war industry. An additional 769,000 were in the armed forces. (L.G., May, 1944, p. 575.)

The Employment Situation at the Beginning of July, 1944, as Reported by Employers

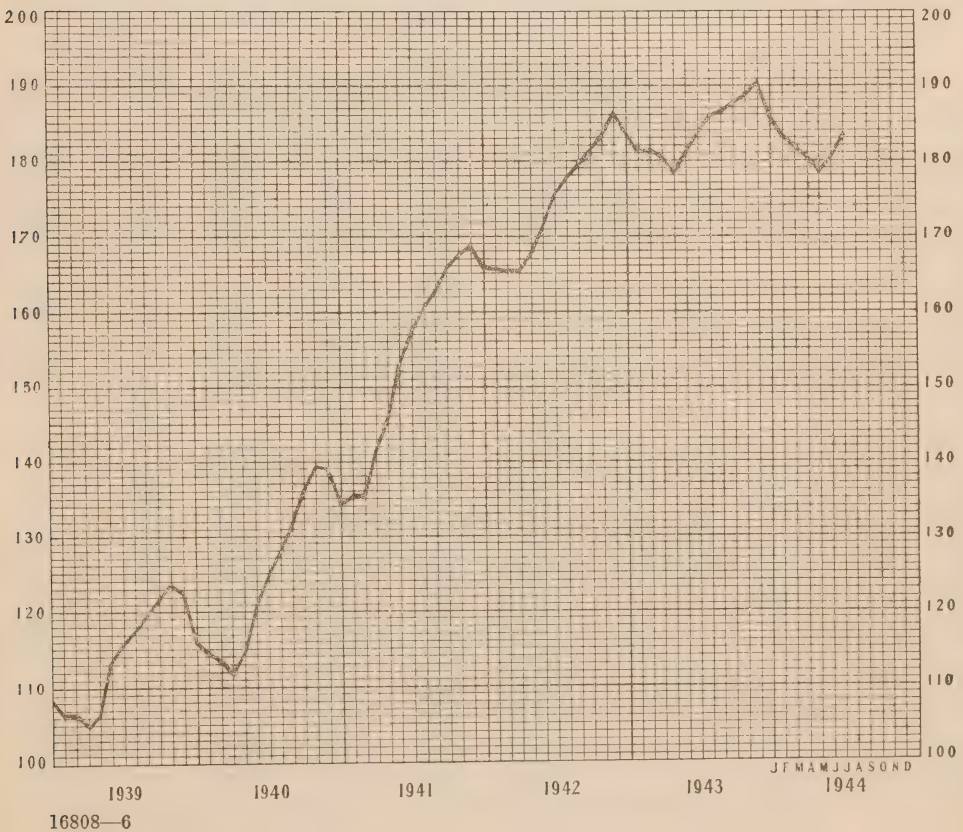
IN conformity with the movement almost invariably indicated at July 1 in the years since 1920, there was a considerable expansion in industrial activity at the beginning of July, 1944, when the 14,668 co-operating employers showed an increase of 31,205 men and women, bringing their staffs to 1,853,618. This gain of 1·7 per cent exceeds that reported at the same date last summer, but is otherwise the smallest advance at July 1 in the period of the war; although the number added to the working forces was above the average for the beginning of July in pre-war years, the percentage gain was below-normal.

The latest increase raised the index of employment, based on the 1926 average as 100,

from 180·5 at June 1, to 183·5 at July 1; it was then fractionally less than that of 183·7 reported at the same date of last year, the maximum for July 1. After adjustment for seasonal variation, the index showed a slight decline, falling from 180·5 at June 1, to 180·0 at the date under review.

The manufacturing and the non-manufacturing industries shared in the expansion indicated at July 1, as compared with June 1. The increase of 13,939 persons, or 1·2 per cent in manufacturing was above-normal for the beginning of July in the experience of the years since 1920. There were also considerable additions to the staffs in construction and transportation, together with smaller gains in mining, communications, services and trade. Except in communications, the percentage advances in the non-manufacturing industries were somewhat smaller than usual for July 1.

A comparison with the figures for the beginning of July of last year shows little general change in manufacturing. Mining was somewhat quieter, and there was a considerable decline in construction. On the other hand, greater activity was indicated in the remaining non-manufacturing industries—logging, communications, transportation, services and trade. In the last two, it is probable that the increase is partly due to the employment of larger numbers of part-time workers.



Payrolls

The expansion in industrial employment at the first of July was accompanied by a rise in the weekly salaries and wages distributed in the eight leading industries; these advanced from $57,960,556 in the last report, to $58,783,879 at the date under review, or by

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

* Based on the 1926 average as 100 per cent.

1·4 per cent. Various circumstances combined to produce the relatively smaller gain in the payrolls than in employment, notably the general observance of the Dominion Day holiday, which fell on Saturday, thus coming within the pay period reported by many employers; in Quebec, the widespread observance of St. Jean Baptiste Day as a holiday was likewise an important factor, as was also the fact that the reported increases in employment in many cases took place in the industries in which earnings are usually below the general average. The occurrence of Dominion Day and St. Jean Baptiste Day at the week-end probably resulted in their more general observance, and in less overtime work, than has been the case in the other years for which statistics of payrolls are available. The weekly average per employee was $31.71, nine cents lower than at the beginning of June, but 74 cents higher than at July 1, 1943. The July 1, 1942, figure had been $28.49, and that at July 1, 1941, $25.49. The latest average is the lowest since that for January 1, 1944, but is otherwise the highest in the record of just over three years.

Table II summarizes the July 1 statistics of employment and payrolls for the leading industrial groups, the provinces and economic areas, and the leading cities; comparisons with June 1, 1944, and July 1, 1943, and 1942, are also given where these are available.

Table I indicates that in the period for which payroll data are available, the number of persons in recorded employment in the eight leading industrial groups has shown an increase of 20 per cent, while the aggregate weekly earnings of those workers are higher by 48·1 per cent. Including finance, the gain in employment from June 1, 1941, to July 1, 1944, amounted to 19·5 per cent, and that in payrolls, to 47 per cent. The explanation previously given for the greater rise in the salaries and wages than in the numbers

July 1	120·0	148·1	31·71	134·4	167·7	32·44

employed may again be stated:—(1) the concentration of workers in the heavy manufacturing industries, where rates of pay are above the average and in addition, there has been a considerable amount of overtime work, (2) the payment of cost-of-living bonuses to the majority of workers; the rates at which these allowances were calculated were increased on more than one occasion before their incorporation in the basic wage-rates as from February

TABLE II—EMPLOYMENT AND EARNINGS

Number of Persons Employed at July 1, 1944, by the Co-operating Establishments and Aggregate and Per Capita Weekly Earnings of Such Employees, Together with Index Numbers of Employment and Payrolls as at July 1 and June 1, 1944 with Comparative Figures for July 1, 1943, and July 1, 1942, where Available, (June 1, 1941=100).

[1] This classification comprises the following:—iron and steel, non-ferrous metals, electrical apparatus, lumber, musical instruments and clay, glass and stone products.

15, 1944, and (3) the progressive up-grading of employees as they gain experience in their work. In an important number of cases, higher wage-rates have also been granted.

As has previously been pointed out, the influence of the war has resulted in particularly marked expansion in employment and payrolls in factories, in which the rate of acceleration during the period of observation has been decidedly greater than in the non-manufacturing industries; the index of employment in the former has risen by 34·4 per cent from June 1, 1941, and that of payrolls has advanced by 67·7 per cent, proportions decidedly exceeding those elsewhere given for the eight leading industries. The factors stated above as influencing the general trends have had an even greater effect in the case of manufacturing.

The growth in employment and payrolls in the durable manufactured goods division has been outstandingly large in the months for which data are available; in this class, the index of employment shows a gain of 52·5 per cent, accompanied by a rise of 93·2 per cent in the salaries and wages distributed between June 1, 1941, and July 1, 1944. In the non-durable goods, the index number of employment at the date under review was higher by 18·1 per cent than that indicated at June 1, 1941, since when there has been an increase of 41·3 per cent in the payrolls disbursed by the co-operating establishments.

In regard to the marked variations in the average earnings of workers in the different industrial classes, it must again be pointed out that the sex distribution of such persons is an important factor, frequently associated with variations in the age groups. In general, the female workers tend to belong to the younger age classes, in which the earnings are naturally lower than among those of greater experience. The matter of short-time or over-time may also considerably influence the reported aggregates and averages, which likewise reflect variations in the extent to which casual labour is used; the degree of skill generally required of workers in the industry is of course also an extremely important factor.

[1] The relative weight shows the proportion of employees reported in the indicated industry, to the total number of employees reported in Canada by the firms making returns at the date under review.

Report on Employment Conditions for August, 1944

THE following summary of employment conditions for the month of August has been prepared by the Research and Statistics Branch, Department of Labour, on the basis of reports received from Local Employment and Selective Service offices across Canada.

Maritime Region

Agriculture.—A dry, hot season has advanced agricultural activities throughout the Maritime Provinces, although adversely affecting the crops, especially those above ground. While the lack of farm labour was felt everywhere during the haying season earlier in August, the grain harvesting is proceeding under less handicap. Soldiers and airmen have been made available to the hard-pressed Prince Edward Island farmers, in the Fredericton area and elsewhere. In some districts forest fires have not only prevented bushmen from joining in the harvesting, but have called many farmers away from the land. However, recent heavy rains have greatly improved the situation.

Logging.—There is little activity in the forest industries for the time being, but camps are preparing to open again after the haying and harvest. Inverness expects to fill the operators' needs with men from local farms, but in the Halifax area the call for choppers is pressing and orders have been placed in clearance. Digby, too, is suffering from a shortage of bushmen. Newcastle and Campbellton report a general lack of labour for pulpwood and logging operations, and orders placed with the Bathurst office for 225 men will be difficult to fill on account of agricultural and fishing demands on the man-power market.

Coal Mining.—The region's coal mines for the most part are operating steadily, although production has been somewhat reduced by the annual vacations granted the miners. New Glasgow reports vacancies for 85 miners and 33 labourers; all miners of the district are on a full-time basis at present, but at the beginning of August all Acadia Coal operations were idle for four days as the result of a strike. Production in the Minto area has been almost doubled by the recently instituted stripping operations, but shaft output has not increased. A fire sweeping the area halted production entirely for five days from August 13: one large stripping machine and 7 shafts were burned, but the shafts not damaged are being organized for production.

Manufacturing.—The prolonged strike in the Halifax Shipyards (now concluded) was the chief development in the manufacturing record of the region for the past month. Orders for the Shipyards are on file but the Halifax office has been unable to refer anyone on account of the strike, which has completely tied up three plants, one in the city itself and two in nearby Dartmouth. H.M.C. Dockyard, employing some 300 to 400 students as apprentices and labourers, has needed no additional workers, but orders will be renewed with school re-opening.

In New Glasgow shipbuilding operations are being curtailed and the considerable number of employees laid off have been placed for the most part in other high priority establishments. Skilled workmen for naval repairs at Pictou and steel plants in Trenton are gradually being supplied from those released in New Glasgow. The procuring of heavy labour is a problem for the Sydney office, which cannot meet locally the 60 orders on file. Workers for the wheel foundry at Amherst are equally scarce.

The shell factory in Campbellton is working to full capacity, with no shortage of labour, but the local box factory, which has resumed operations under government contract, is finding it difficult to secure additional staff. Recruiting for these is proceeding in the sawmills, where the season's work is finished. Conversely, the mills in the Newcastle area are all still operating, but many of them with reduced crews owing to the shortage of man-power.

Textile plants and allied industries in all parts of the Maritimes continue to suffer from a shortage of male and female workers alike. In Kentville a training school is being considered to provide experienced employees for the textile plants, and Truro factories, while quite well supplied with male workers, are calling for more women, and their orders have been placed in clearance. Fredericton is short of inexperienced staff for its shoe and textile factories, and in St. Stephen the exodus of students at the opening of the fall term will necessitate many replacements in the cotton mills, candy and fish processing plants.

Construction.—While man-power needs in the construction industry are far from satisfied, there is no critical lack of labour at present. In the Halifax section some vacancies have been filled by men on strike from the shipyards. Skilled and semi-skilled labourers are needed for the erection of the city's new Victoria General Hospital. Farther north, many orders remain unfilled in the Sussex area, and Moncton reports a brisk demand for carpenters and labourers, of whom none are

available. St. Stephen is in better position, as many men laid off from the shipbuilding plant at St. Andrews have been absorbed locally or transferred out to construction projects in the neighbourhood of Saint John.

Quebec Region

Agriculture—In spite of unfavourable conditions earlier in the season, the farmers of Quebec on the whole are well satisfied with the harvest, which is well advanced except in the northerly Lake St. John area and in the vicinity of Quebec City. While farm help was far from adequate to meet the demands of such districts as Campbell's Bay and Ste. Anne de Bellevue early in August, for the most part there has been no serious lack of labour and farmers have solved their manpower problem by helping each other out.

The Dolbeau office reports that all available women in the area are busy picking blueberries, which are not so plentiful as last year. Soldiers from the neighbourhood of Quebec City have been sent to the Joliette area for five or six weeks to help out with the yellow tobacco harvest there, and at Ste. Therese a request has been made for 50 farm workers to cut hay around a war plant. Temporary permits of two weeks' duration have been granted to some 20 local men for this work. Port Alfred, with no call for farm labour, has some 57 farmers still engaged in other industries, and in many other parts of the region agricultural workers have returned to woods work or war plants on the completion of the harvest in their locality. A large number are also leaving for the western wheat fields, and Montreal alone reports that more than 200 applications have been received.

Logging—As the harvest draws to a close, there are indications of renewed activity in the lumber camps, where the widespread move back to the farm was most keenly felt even during the industry's slack season. In the Gaspé area, the Chandler office has orders on hand from three large contractors for about 2,000 pulp cutters, as well as carpenters and labourers for road and camp construction. Chicoutimi, which has had some 1,000 men at work all summer on pulp cutting and river improvements, will commence more extensive operations in early September. In the Causapscal area logging will not commence in earnest before the end of next month, and in the meantime only about 200 men in all are engaged in bush work.

North of the St. Lawrence, lumber companies in all areas are increasing their demand for bushmen. Megantic is asking for 50 loggers and Jonquiere for 225, while Val d'Or at present requires approximately 350. All three offices report that the needed bushmen are not available locally, and it is not expected that requirements will be met until after the harvest. Orders at Campbell's Bay for opening logging operations total several hundred, but few of this number are available.

Mining—There has been no notable development in the manpower situation of the province's mines during the past month. Val d'Or reports that the base metal mines are in very good labour position at present, but the shortage of underground workers in the gold mines is increasing steadily. Approximately 125 are needed to met the quota of the temporary "B" priority operations. The shortage of labour at the Richmond chrome mines has been somewhat relieved by the employment of nearby farmers finished with their crops.

Manufacturing—The tramway strike, which tied up transportation during the early half of August, had little effect on Montreal's war plants and factories. The only plants to close down as a result of it were the shell-filling establishments at Ville St. Laurent. Many local plants had vacation during the month, thus appreciably lowering the demand for extra workers, but the shortage of heavy labour in all industries continues without abatement. The refitting and repairing of ships in harbour has brought rush demands for a variety of workers, and these, while of comparatively short duration, were hard to fill, as carpenters are all busy on building construction. The serious shortage in one packing plant which existed early in the month was only partially relieved by seamen temporarily drawn from the manning pool, and the labour outlook in Montreal meat-processing houses is little improved.

Aircraft companies in the Montreal area have greatly reduced their hiring of staff, women as well as men, and only one of the larger plants, with orders for 1,000 additional workers, is at all active in this regard at present. The voluntary separations of nearly 2,000 workers since last April has almost eliminated plans for formal lay-offs at the Noorduyn plant, which started recently with the release of 70 women and 40 men. There have been a few other minor manufacturing lay-offs during the month, and the release of 100 labourers from the Eastern Steel Works has helped other foundries in the city.

Calls continue for women workers in Montreal war plants and kindred industries. The Longue Pointe Ordnance depot, in its first large scale hiring of women, has taken on well over 100 girls out of a needed 500 for a repacking job. Shortage of womanpower in

the powder plants is as serious as ever, with Cherrier alone asking for another 1,000, and applications falling far short of demand.

The province's shell program has not yet filled its quota of workers. At Ste. Therese alone there are openings for 700 women; a recruiting campaign has been organized to meet this requirement, and already many placements have been effected. The children's garment trade too is concerned over the lack of some 300 much-needed machine operators.

There is a slight over-all improvement in the labour situation of the textile, clothing, rubber and kindred industries, although skilled operators are in constant demand. Drummondville and Granby, Coaticook and Louiseville record a continuing need for male and female workers alike, and the rubber plant at St. Jerome is handicapped by labour turnover which makes it difficult to fill its requirements.

At Levis the shipyards are pressing for skilled workmen, and orders for these have been placed in clearance. Some 100 students will be leaving shortly, and replacements for these workers are essential to production. Shipbuilding is very active at Quebec City, and skilled workmen of various types are in demand.

Construction—Building activity continues to increase steadily in the province, and the erection of houses in particular is booming. The Montreal office reports that the large number of building permits issued makes the supplying of adequate labour more and more difficult. In Quebec City, Ste. Anne de Bellevue and Sherbrooke the demand for skilled artisans cannot be met and the two former centres are having difficulty in satisfying National Defence needs for the new military hospitals.

Building and electric power repairs at Shipshaw and Chute-au-Galet are going forward apace, and 313 workmen have been placed in the past two months. In Chicoutimi all carpenters and most labourers are engaged on construction work, and 126 have gone to other parts of the province and to Ontario since July.

Ontario Region

Agriculture.—The urgent need for agricultural workers throughout Ontario during the earlier weeks of August was met largely by volunteer workers from surrounding towns and cities, by students and members of the Armed Forces, who did much to relieve the extensive shortage of farm workers. Co-operation among the farmers themselves was another ameliorating factor, and with haying over and the grain harvesting under way in all localities, reports indicate splendid crops.

As the harvesting draws to a close, there is a steady movement of farmers towards the West. Westerners are returning home after lending valuable aid in Ontario, and Easterners freed from their own farms until the beet crops are ripened are going to the prairies to take part in the harvest there. Reports from all parts of the region indicate that the response to the appeal for western harvest helpers will be greater than in previous years, and the request for farmers to handle grain at the Lakehead is also meeting with considerable success.

In Western Ontario the manpower needs of the tobacco farms are the most pressing of the moment. The Simcoe office reports that the harvest started in that area with a shortage of experienced primers and tiers: while it was impossible to fill these requirements at the beginning of the season, enough labour was eventually secured and more than 13,000 males and 15,000 females are now employed on the local farms. Some 108 workers have been transferred through the Windsor office to various tobacco centres in Norfolk and Elgin. In the vicinity of Ingersoll the call for helpers is being met temporarily from factories in the district, and it is hoped to alleviate the shortage in the Aylmer and Rodney areas by labour from Quebec.

The tomato harvest is at present taxing the labour resources of many districts. Over 100 pickers have been placed in the Belleville area during the past week, and in the vicinity of Picton, where the peak tomato crop extends from August 24 to September 15, the annual trek of farmers, wives and daughters from the non-productive sections of North Hastings has begun, alleviating the situation to some extent. Sarnia is calling for a large number of female pickers for the canning crops, and Wallaceburg is also in need of helpers. A considerable amount of help from the Farm Commandos of the district, together with student assistance, has gone far to relieve this seasonal shortage, as well as that of fruit picking and potato digging.

Canning.—As the season advances, the Ontario canneries are stepping up their demands on the region's labour force. Practically all the canning establishments in Hastings and Prince Edward Counties are now operating, and the Belleville office reports that workers have been secured to handle the tomato harvest, which represents about 43 per cent of the entire Canadian tomato crop. The Brantford cannery is very short of both male and female help and 75 men and 41 women are needed immediately for the processing of corn, tomatoes and peaches. Picton has been fortunate enough to secure between 40 and 50 men through the co-operation of the Cornwall

office, but their immediate need for another 50 women will have to be met locally, as no housing accommodation for outsiders is available.

The canning plant at New Toronto is in the full swing of its tomato processing, and is taking on as many men and women, full- and part-time, as can be supplied by the local office. Considerable difficulty has been encountered in procuring male workers in sufficient numbers, but for the time being the Army and Air Force are taking up the slack. The Chatham factory, which employs some 600 or 700 additional staff during the tomato campaign, will require more helpers when the peak of operations is reached. Other plants in the vicinity are securing help from nearby Ridgetown.

In the fruit belt, Niagara Falls reports that the local cannery requires approximately 100 men and upwards of 400 women for the preserving of an expected bumper peach crop. A number of housewives will be available for this seasonal employment. Early in August a successful appeal was made in the St. Catharines area to housewives and others to assist in the peach and tomato processing, but a great many more are needed from now until the end of September.

Logging.—Cooler weather and the termination of harvesting activities is causing an increase in requirements for the logging camps, which have been comparatively quiet during the past several months. Negotiations are afoot to secure 500 prisoners of war for the camps in the Arnprior area where the mill has been forced to close down on account of the lack of logs. The Kapuskasing office reports that contractors in that area do not seem to be suffering a lack of men: a large number of experienced bushworkers from Quebec are arriving daily in the district. At Sault Ste. Marie the demand for loggers and pulp-cutters far exceeds the supply, and the same condition prevails in the vicinity of Timmins, but it is hoped that farmers now returning to the camps may relieve the situation somewhat.

Mining.—Little change is noted in the mines of the province. In northern Ontario experienced miners and beginners alike are in demand throughout the mining country, and Timmins reports that with many experienced farmers gone west for the harvest the situation has become worse. Sault Ste. Marie has placed in clearance its orders for general labourers and skilled miners of all sorts for the iron ore industry. At Dunnville there is an immediate need for gas drillers and tool drillers for the drilling of natural gas in that area.

Manufacturing.—There has been no appreciable change in the manufacturing labour picture, except that the already serious shortage has been increased by the temporary withdrawal of many industrial workers to the tobacco fields. This, together with the anticipated return to school of thousands of teachers and students within the next few weeks, is making it difficult for local offices to fill vacancies.

The demand for heavy labour persists throughout the region, for foundries, factories and munitions plants in particular. No decrease in requirements is recorded at New Toronto and very little at Niagara Falls, although a slackening in production in the abrasive industries in the latter city has resulted in the release of some 60 labourers, who have eased the situation in other plants. Toronto, Brantford, Carleton Place, Guelph, Oshawa and other centres where heavy labour is used extensively are likewise insistent in their call for workers. The exodus of teachers and students now beginning is depriving the Kingston war plants of some 300 workers and increasing the total requirements of that city to 500, with men especially in demand. London's unfilled vacancies at present number less than 800, but orders for replacements for students are beginning to come in, as also at Fergus, where one factory is considering the employment of women willing to work on a part-time shift. The 125 male workers required immediately by one Toronto company to complete a government order are also for the most part replacements of students.

The Dominion's shell program continues to make the heaviest demand on skilled and semi-skilled labour throughout the province. In Hamilton, special efforts have been made during the past fortnight to interest people in this work, especially in shell inspection. The Ingersoll office is making a thorough canvass of the district for female workers for final inspection, and Lindsay, too, is calling for women for the Inspection Board, having filled a large order for the shell plant itself. The shell plant at Ajax is still short some 500 women, and about 300 men are needed for production at Nobel, but the company's outstanding order for 440 females is being reduced at the rate of about 25 a week.

Plants engaged in the manufacture of heavy munitions are similarly handicapped by lack of labour. The Carleton Place foundry is carrying on its war department with the help of high school boys, and in St. Catharines the absence of skilled workmen is seriously slowing down production. Aircraft factories share in the universal shortage.

No change for the better is noted in the under-staffed textile factories, which are unanimous in their plea for workers of all kinds, male and female, skilled and unskilled alike.

Construction.—Throughout Ontario, construction is brisk and building projects are only limited by the shortage of labour. Brantford is in continuing need of carpenters and construction labourers to work on the erection of 100 wartime houses, Orillia has orders in clearance for the same type of artisan, and in Windsor the shortage of carpenters and labourers for the erection of 250 dwellings for families of men in the Armed Forces has been relieved somewhat by the transfer of 50 men from Timmins.

In Toronto the lack of construction labour is great, with many high priority orders on file for tradesmen of all types. Some 20 labourers and 10 carpenters are required for the Petawawa Camp, while at Sault Ste. Marie the necessity for local street paving has been met by the issuance of 57 temporary permits to local men for part-time employment in their leisure hours.

Prairie Region

Agriculture.—Large numbers of full-time workers are still required for harvest operations on the prairies, although the increased use of combines promises to reduce the anticipated needs in some areas, and the temporary leave granted to personnel of the Armed Forces is helping to avert threatened shortages.

In spite of the difficulty of procuring an adequate supply of man-power for the haying, and the fact that in such districts as Port Arthur farmers were forced to work 16 hours of every day of the seven, in order to salvage heavy crops, the season on the whole ended satisfactorily. Moose Jaw reports 66 unfilled orders for monthly farm workers, but in general the original need is for harvesters.

The Winnipeg office reports a heavy demand for harvest help, and Dauphin also is calling for more outsiders than heretofore, although in this vicinity the work of combines is lessening the number required. In the neighbourhood of Regina the grain harvest is well under way and south of the city combining has started over a wide area. Local labour is scarce and all available men have been placed. Saskatoon reports a continued demand for experienced tractor and combine operators, although quite a number of these have already been placed.

From Moose Jaw comes the report that harvest needs are being handled by the Local Harvest Labour Committee, which is providing workers for the enormous acreage of stooking to be done in areas not equipped with combines. At least one large department store in the city is releasing its employees on a regular harvest leave schedule, one week at a time. In North Battleford, where farm orders are increasing daily, a number of members of the Armed Forces have been placed for the duration of their "48's", as well as on regular leave, and 150 men could be placed in the vicinity of Prince Albert, if available.

Reaping has started in widely scattered parts of the Calgary area but the general harvest will not commence until the first week of September. A rush of orders is anticipated before that date, and the military authorities of M.D. No. 13 have agreed to the release on leave of 350 personnel. The Edmonton district cutting is under way but will not be general for another week. Applications for harvest work are not nearly equal to the demand, but some relief is expected from the Armed Forces and an active campaign is under way to induce the farmers of the southern part of the province to come north after their own cutting is completed.

Logging.—Little or no increased activity is evident in the logging industry during the past month. Many bushworkers have returned to their farms for the harvest and the majority of operators are carrying on with more or less permanent personnel. Some 2,578 loggers are still needed in the Port Arthur area and Fort Frances has some 295 vacancies, with few applicants available.

Coal Mining.—The prairie coal mines are beginning to place additional orders for labour as the time approaches for miners working on temporary permits with the railways and packing companies to return to their permanent trade. In every local office throughout the coal mining district orders for labour exceed the number of miners available. The situation in the Edson area is serious, with 6 mines having orders on file for 130 miners, who are unobtainable. The lack of accommodation for married men is a drawback at Red Deer, and Medicine Hat finds it difficult to fill the increasing need of the small coal properties. In the vicinity of Edmonton all but the Lakeside and Wabamun mines are producing steadily, with a continued call for experienced miners.

Base Metal Mining.—Few applicants are coming forward to fill vacancies in the region's base metal mines, and slight change is anticipated until after the harvest, which has been responsible for the steadily mounting requirements. Mill, surface and underground labour are all in demand in the Flin Flon area, where many miners are using their vacations for

harvesting, with transportation furnished to Manitoba farms. Indians working in the Kenora gold mines are also leaving for the blueberry picking, and vacancies are on the increase in consequence. At The Pas surface development is continuing on most of the Herb Lake properties and five prospecting parties are at work in the district.

Manufacturing.—Able-bodied men in fairly large numbers are required throughout the manufacturing industry, and on the prairies, as elsewhere in the Dominion, the demand on the whole exceeds the current supply. In Winnipeg this lack of heavy labour is evident in every sort of industry, and boys, too, are in demand. One local packing plant has increased the proportion of its women employees from 16 to 22 per cent during the past two months, and it is likely that the percentage will be raised again soon. August and September are difficult months for Edmonton packing plants, depleted of agricultural labour, and the flour mills, too, are suffering from a scarcity of suitable workers.

The aircraft plant at Fort William has also been depleted through absenteeism, vacations and the withdrawal of a number of its employees as a result of directive notices issued by the Controller of Grain Handling for the area. The Fort William shell plant, too, still needs a considerable number of machine operators, both male and female, as well as other skilled and semi-skilled workers.

No change for the better is reported in the labour situation of the Port Arthur shipyards, which are still calling for electricians and pipefitters with marine experience. Electricians, skilled machinists and motor mechanics are badly needed for Saskatoon's industries but the urgency of this demand has been eased somewhat by an extension of the date of local school opening.

Construction.—The demand for all types of building labour is much greater than the supply in the prairie region. Early in August the call was chiefly for unskilled carpenters, painters and construction labourers, although there was also a definite shortage of skilled workers and labourers physically fit and young enough for outside work. However, building projects have now reached the stage where the main requirements are for skilled artisans, carpenters and bricklayers in particular.

The lack of heavy labour is still delaying all Port Arthur projects, and present orders on file total 718, while in Winnipeg the absence of qualified and physically fit artisans is holding up construction. Regina is calling urgently for carpenters and bricklayers for high priority building, and Saskatoon for labourers, and in Moose Jaw emergency repairs are seriously handicapped by the lack of bricklayers.

The building boom in the Edmonton area is growing, and the issuance of 299 permits during July has been followed by correspondingly heavy demand in August. The scarcity of skilled tradesmen has made it necessary to direct a considerable number of tradesmen from low to high priority projects.

Pacific Region

Agriculture.—With the completion of the small fruit harvest in British Columbia, agriculture has ceased to make heavy demands on the provincial labour force, and no serious shortage of orchard workers is anticipated until the apple crop is ready in September.

The supply of labour for dairy and general farm work has been adversely affected in some districts by the return of many workers to the prairies. Few applicants can be induced by local offices to accept such work, but the Emergency Farm Labour Service has been making every effort to secure suitable helpers for these needy farmers. New Westminster, too, reports that seasonal help has been well supplied by the Service, except for occasional short rush periods, but the dairy situation on Vancouver Island is still serious, with first-class help impossible to secure.

Canning.—Fruit and vegetable canneries are operating to capacity, but their labour requirements are being filled locally for the most part. Crews for the bean and corn canning factories in Chilliwack are being recruited from small stump ranches where whole families engage in seasonal work, and some 50 Japanese women have been transferred to the Kamloops canneries. At Penticton, some of the women brought in on the Dominion-Provincial Farm Labour scheme and found unsuitable for field work are being utilized in the canning of apricots.

At Vernon, the local cannery, which has been operating two shifts and using about 150 men and 170 women for dehydrating cabbage and beans and canning tomatoes, can take all the women procurable from now on. Fruit shippers of the district, who report deliveries to be 50 to 60 per cent higher than last year, are taking on more staff every day.

Logging.—The demand for forest labour of all kinds is great throughout the province. Many camps which were shut down on account of fire hazard are now operating short-handed, as some loggers have returned to the prairies

and men on deferment are being called up. In all offices orders for replacement remain unfilled, and pulp and paper operations are handicapped by the shortage of heavy labour.

Sawmills.—The loss of student labour at the end of this month will greatly increase the existing shortage of labour in the British Columbia sawmills. New Westminster, heavily hit by recent military call-ups, is one of the greatest sufferers in this regard. One company, which is shutting down another of its "cutting rings" on account of the general dearth of heavy labour, has asked the Mobilization Board for permission to transfer some of the skilled tradesmen thus released to other needy mills.

Coal Mining.—There has been little response to the call for experienced coal miners, with the result that shortages persist. Fernie has still upward of 70 vacancies, and orders for underground workers bring the total requirements to 110. A serious shortage of miners has developed in the Telkoal field in the Prince Rupert area, and no relief for this is in sight. At Nanaimo, No. 8 mine of the Canadian Collieries (D) Limited has now closed down and the crew of 125 are being examined for direction to other coal operations, mainly in the Cumberland area.

Base Metal Mining.—The region's base metal mines are still far short of the experienced muckers needed to maintain satisfactory production, but the closing down of the Kootenay Florence and Roco Mountain mines has improved conditions somewhat. At Kimberley all surface crews are fully manned but another 195 underground workers are needed, and the loss of 100 students during the first week in September will impose a heavy strain on the mines. In the New Westminster area the harvesting and stacking of peat is almost completed. Some 200 or 300 women and children were laid off early in August, and the only present man-power demand is for a few men for the heavier work of harvesting and baling, which will continue for several months more.

Manufacturing.—On the whole, the manufacturing industries in British Columbia are making no heavy new demand on the region's labour force although the call for workers will be increased here, as elsewhere, by the approaching school opening. Vancouver reports that this increased demand is already evident in the aircraft plants, and while replacements are being made steadily, qualified applicants are continuingly scarce. Through increased efficiency of production the number of aircraft workers in Victoria plants has been slightly reduced, habitual absentees being released, and in spite of many voluntary terminations no new employees are presently required.

A slight curtailment in production has reduced the labour needs of the British Columbia shipyards. For instance, the Prince Rupert yard requires no addition to its present staff of approximately 1,000 men and 70 women. The night shift has been discontinued and its workers incorporated in the day shift. The Vancouver office reports that the recent curtailment of the number of berths per yard has eased requirements in the local shipyards, creating a surplus of skilled and semi-skilled female workers, who are unfortunately not qualified to meet the mounting aircraft demands. With the exception of riveting crews and heavy construction labourers, the orders on file for the Victoria yards are not pressing, and the lay-off of women continues.

There are practically no unfilled orders for New Westminster's engineering plants and foundries, except for a few skilled lathe hands and machinists, and while no substantial lay-offs have occurred, no replacements are being made.

The smelter at Trail is the most exigent of the provincial manufacturing industries in its call for labour. While operations are being carried on with the aid of students and female personnel a large number of employees are being lost each month to the Armed Forces and to agriculture. The limit is almost reached in the hiring of women workers, and it has been necessary to close down one or two departments on account of inability to recruit the 160 heavy labourers required.

Construction.—Shortage of materials is causing a slowdown in construction in most areas but in spite of this handicap the call for all types of building and allied tradesmen persists. In Victoria one high priority contract has been calling for carpenters, and steps are being taken to move men employed on low priority jobs, in order to get the project completed. In Prince George and Prince Rupert carpenters and construction labourers are in great demand, with small prospect of securing them locally. Mining and smelting operations at Kimberley and Corbin are benefiting by the gradual reduction of workers on the dam at Nelson, which is nearing completion.

Applications for Employment; Vacancies and Placements; July, 1944.

BUSINESS transacted by Employment and Selective Service Offices of the Unemployment Insurance Commission during the four-week period June 30, to July 27, 1944, as indicated by the average daily placements effected, showed slight decreases both when compared with the previous four weeks June 2, to June 29, and with the four weeks July 2, to July 29, 1943. Under the first comparison, except for a moderate decrease in manufacturing and a minor increase in services, all changes in industrial divisions were fractional. In comparison with the four weeks in July last year, all industrial groups except forestry and logging reported losses, the greatest being in manufacturing though construction showed a considerable decline.

The accompanying chart shows the trend of employment since January, 1942, as represented by the ratios of vacancies notified and of placements effected for each one hundred applications for work, registered at Employment and Selective Service Offices throughout Canada. In viewing the graph it will be seen that the trend of the curve of vacancies in relation to applications followed a decidedly downward trend while that of placements took a slightly upward course. The ratio of vacancies to each one hundred applications was 107·1 during the four weeks ending July 27, 1944, in contrast with 111·1 in the previous four weeks, and 112·8 during the four weeks July 2, to July 29, 1943. The ratio of placements to each one hundred applications was 72·8 as compared with 71·5 in the preceding period and 77·8 during the four weeks ending July 29, last year.

The average number of vacancies reported daily by employers to the offices of the Commission throughout Canada during the four-week period June 30, to July 27, 1944, was 8,984, as compared with 9,619 during the previous four weeks and with 10,650 during the four-week period ending July 29, 1943. The average number of applications for employment received daily by the offices during the period under review was 8,385 in comparison with 8,652 during the preceding four weeks and 9,443 during the four weeks ending July 29, a year ago. The average number of placements made daily by the offices during the four weeks ending July 27, 1944, was 6,109 of which 5,956 were in regular employment and 153 in work of one week's duration or less, as compared with a total daily average of 6,187 during the previous four weeks. Placements in the four weeks July 2, to July 29, 1943, averaged 7,346 daily, consisting of 7,188 placements in regular and 158 in casual employment.

During the period June 30, to July 27, 1944, the offices of the Commission referred 181,481 persons to vacancies and effected a total of 140,507 placements. Of these, the placements in regular employment were 136,991, of which 84,372 were of males and 52,619 of females, while placements in casual work totalled 3,516. The number of vacancies reported by employers was 133,463 for males and 73,172 for females, a total of 206,635, and applications for work numbered 192,847, of which 117,612 were from males and 75,235 from females. Reports for the four weeks June 2, to June 29, 1944, showed 230,868 positions available, 207,653 applications made and 148,478 placements effected, while in the four-week period July 2, to July 29, 1943, there were recorded 255,597 vacancies, 226,622 applications made and 176,311 placements in regular and casual employment.

The following table gives the placements effected by employment offices, each year, from January, 1934, to date:—

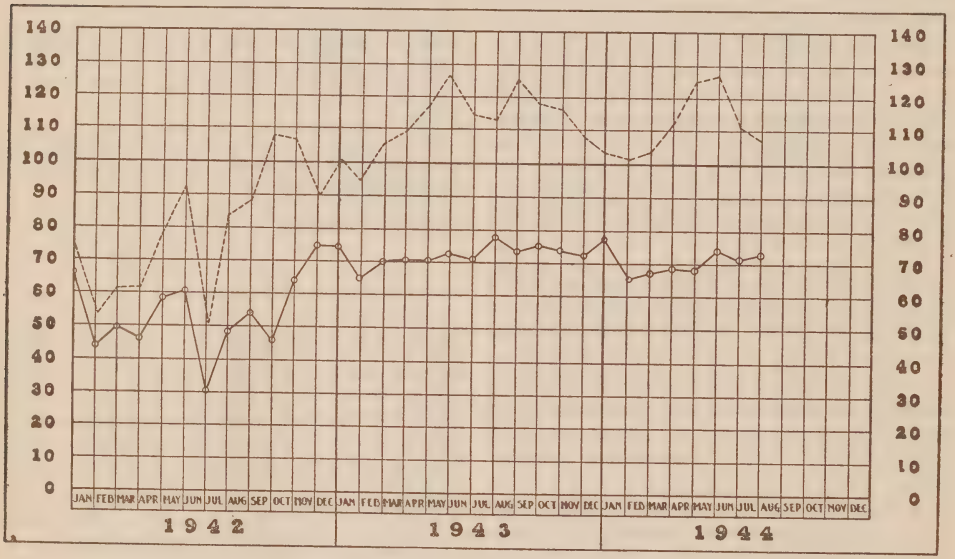
Year	Placements		
	Regular	Casual	Totals
1934	223,564	182,527	406,091
1935	226,345	127,457	353,802
1936	217,931	113,519	331,450
1937	275,300	114,236	389,536
1938	256,134	126,161	382,295
1939	242,962	141,920	384,882
1940	320,090	155,016	475,106
1941	316,168	191,595	507,763
1942	809,983	85,638	895,621
1943	1,890,408	53,618	1,944,026
1944 (30 weeks)	967,937	28,008	995,945

Nova Scotia and Prince Edward Island

The demand for workers on a daily average as indicated by orders listed at Employment and Selective Service Offices in Nova Scotia and Prince Edward Island during the four weeks ending July 27, 1944, was 319, as compared with 316 in the previous period and 478 during the four weeks ending July 29, 1943. The average number of placements effected daily was 254, in comparison with 266 in the preceding four weeks and 319 during the period ending July 29, last year. With the exception of a nominal increase in agriculture, all industrial divisions recorded decreases in placements from the four weeks ending July 29, 1943. The greatest reductions were in construction and manufacturing, while moderate losses occurred in public utilities operation,

services and trade. Industrial groups in which most of the placements were effected were: manufacturing 2,029; services 1,297; trade 908; construction 710; public utilities operation 561 and mining 148. There were 3,574 men and 2,179 women placed in regular employment.

New Brunswick



Employment opportunities, as indicated by orders received at Offices in New Brunswick during the period under review, showed a daily average of 214, compared with 276 in the preceding four weeks and 222 during the period ending July 29, last year. There was a daily average of 188 placements in comparison with 199 in the previous period, but no change when compared with the four weeks ending July 29, 1943. The most significant changes in placements from the period ending July 29, last year, were moderate gains in agriculture, services, and a loss in public utilities operation. The changes in other groups were small and included declines in construction, manufacturing, forestry and logging, and an increase in mining. Placements by industries included: manufacturing 1,376; services 833; trade 604; public utilities operation 526; construction 430; forestry and logging 215; agriculture 180 and mining 121. Regular placements numbered 2,804 of men and 1,496 of women.

Quebec

There was a decrease in the average number of positions available daily at Employment Offices in the Province of Quebec during the four weeks ending July 27, 1944, there being 2,577, in contrast with 2,883 in the previous period and 3,447 during the four weeks ending July 29, 1943. Placements, likewise, showed declines under both comparisons, the daily average being 1,676 during the period under review, as compared with 1,721 in the preceding four weeks and 2,174 during the period ending July 29, last year. The substantial reduction in placements from the four weeks ending July 29, 1943, was mainly due to a marked decrease in manufacturing, with a fairly large decline in construction and moderate losses in services, public utilities operation, mining, trade, finance and insurance.

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

Applications———— Vacancies - - - - - - - - - Placements—o—o—o—o—o—o

The only advancements recorded were a fairly large gain in forestry and logging, and a small increase in fishing and hunting. Industries in which employment was found for more than 500 workers included: manufacturing 16,851; services 5,511; forestry and logging 4,579; construction 4,113; public utilities operation 3,181; trade 2,865; mining 766, finance and insurance 562. There were 26,940 men and 11,501 women placed in regular employment.

Ontario

Orders received at Employment Offices in Ontario during the period ending July 27, 1944, called for an average of 3,603 workers daily, compared with 3,984 in the previous four weeks and 3,884 during the period ending

July 29, last year. Placements decreased under both comparisons, the daily average being 2,423 during the four weeks under review, in comparison with 2,570 in the preceding period and 2,733 during the four weeks ending July 29, 1943. Substantial decreases in placements in manufacturing and construction, augmented by smaller declines in trade, services, public utilities operation and mining were responsible for the loss from the four weeks ending July 29, last year. The only advancement reported was a moderate gain in forestry and logging. Industrial divisions in which the majority of placements were effected included: manufacturing 25,527; services 11,970; trade 6,254; public utilities operation 4,910; construction 3,250; finance and insurance 1,067; forestry and logging 1,058; mining 929 and agriculture 756. Placements in regular employment numbered 31,310 of men and 23,477 of women.

Manitoba

Opportunities for employment at Employment Offices in Manitoba during the four weeks under review, numbered 440 daily compared with 476 during the period ending June 29, 1944, and 479 in the four weeks ending July 29, 1943. There was a daily average of 277 placements compared with 307 in the preceding period and 396 during the four weeks ending July 29, last year. All industrial groups registered declines in placements from the four weeks ending July 29, 1943, the greatest reductions being, in manufacturing, trade, public utilities operations, services and construction. Placements by industrial divisions, included: services 1,868; manufacturing 1,864; trade 1,214; public utilities operation 646; construction 367 and mining 171. Regular placements numbered 2,584 of men and 2,750 of women.

Saskatchewan

Positions offered through Employment Offices in Saskatchewan during the period ending July 27, 1944, averaged 242 daily compared with 217 in the preceding four weeks and 253 during the period ending July 29, last year. The average number of placements registered daily was 170, in comparison with 154 during the previous period and 197 in the four weeks ending July 29, 1943. Placements were less numerous in all industrial divisions than those of the period ending July 29, last year, although the decrease for the province as a whole was not large. Moderate declines were recorded in manufacturing, construction, trade and services. Industrial groups in which most of the placements were effected were: services 1,383; trade 883; manufacturing 571; public utilities operation 549; construction 200 and agriculture 181. During the period under review, there were 1,916 men and 1,692 women placed in regular employment.

Alberta

Orders listed at Employment Offices in Alberta during the four weeks ending July 27, called for a daily average of 519 workers compared with 425 in the previous period and 528 during the four weeks ending July 29, 1943. Placements showed a daily average of 353, in comparison with 255 during the four weeks ending June 29, 1944, and 414 in the period ending July 29, last year. All industrial groups showed reductions in placements when compared with the period ending July 29, 1943, the most important decreases being in services, manufacturing, construction and public utilities operation. Placements by industrial groups numbered: services 2,218; manufacturing 1,605; trade 1,509; construction 1,039; public utilities operation 856; mining 500 and agriculture 231. Regular placements numbered 4,562 of men and 3,203 of women.

British Columbia

During the period ending July 27, 1944, the daily average of positions offered through Employment Offices in British Columbia was 1,069 compared with 1,042 in the preceding four weeks and 1,360 during the period ending July 29, last year. The average number of placements registered daily was 768 during the four weeks under review, in contrast with 714 in the previous period and 926 during the four weeks ending July 29, 1943. Placements in manufacturing and construction were considerably fewer than during the four weeks ending July 29, last year, and accounted for the decline for the province as a whole under this comparison. Moderate decreases shown in agriculture, forestry and logging were partly offset by gains in services and trade. Small changes only were reported in remaining groups. Industrial divisions in which the majority of placements were effected were: manufacturing 5,348; services 3,652; trade 2,713; forestry and logging 1,845; public utilities operation 1,700; construction 1,382 and mining 502. Placements in regular employment numbered 10,682 of men and 6,321 of women.

Labour Law

Labour Legislation Enacted by the Parliament of Canada in 1944

THE Parliament of Canada, which was in session from January 27 to August 14, 1944, passed laws providing for family allowances, for the setting up of departments of Government to deal with reconstruction, veterans' affairs and health and welfare, for veterans' insurance and for better housing.

Family Allowances

The Family Allowances Act provides for the payment of a monthly allowance in respect of every child under 16 years of age who is resident in Canada and registered under the Act and who was born in Canada and resident there since birth, or has been a resident for three consecutive years immediately prior to registration, or whose father's or mother's domicile at the time of his birth and for three years prior thereto was in Canada and has continued to be in Canada up to the date of registration, or who was born while his father or mother was a member of the Naval, Military or Air Forces of Canada or within twelve months after his father or mother ceased to be a member of such forces. The child must be maintained by a "parent", which term includes any person who maintains or has custody of a child. A child who is in Canada contrary to the provisions of the Immigration Act is not eligible.

The allowance is $5 per month for a child under six years of age, $6 from six to ten years, $7 from ten to thirteen years and $8 from thirteen to sixteen years. This amount is reduced by $1 in respect of the fifth child, by $2 in respect of the sixth and seventh children and by $3 in respect of each additional child.

Payment of the allowance is to commence in the first month after registration of the child under the Act and is to cease with the payment for the month in which the child attains his sixteenth birthday or when, if he is over six years of age and fit to attend school, he fails to attend or to receive equivalent training or when he ceases to reside in Canada or, in the case of a girl, on marriage.

The allowance is to be paid to the parent, who must apply it exclusively towards the maintenance care, training, education, and advancement of the child. If the Minister of National Health and Welfare, who is in charge of the Act, or any other authorized person finds that the allowance is not being so applied payment may be discontinued or made to some other person or agency.

Any person who is dissatisfied with any decision on a matter arising under the Act may appeal to a tribunal to be established and conducted in accordance with the regulations. Decisions of the tribunal are not subject to review in any Court. The allowance is not subject to taxation or to the operation of bankruptcy laws and may not be assigned, charged, anticipated or given as security. An adjustment may be made with regard to deductions under the Income War Tax Act to avoid duplication of benefits and also in the case of any person receiving aid from the Government of Canada for the maintenance of a child entitled to an allowance under the Act. It is provided, however, that no reduction in the allowance may be made by reason of a pension under the Pension Act or a dependent's allowance payable in respect of a dependent child of any member of the Canadian Forces.

Allowances are to be paid from the Consolidated Revenue Fund and the expenses of administering the Act from moneys appropriated by Parliament.

The Minister is empowered to do anything necessary for the administration of the Act and may establish committees or boards, arrange with Government departments and their agencies to assist him, appoint persons to conduct inquiries and may also, with the approval of the Governor in Council, make arrangements with the Government of any province to facilitate the carrying out of the Act.

The Governor in Council may make regulations to provide, generally or in respect of any province or any class of cases, that payment of the allowance shall be made to the parent prescribed in the regulations; to

provide that where the person to whom the allowance is payable is disqualified, payment may be made to another suitable person or agency, and that in the case of Indians and Eskimos the allowance is to be paid to a person authorized by the Governor in Council; to prescribe the procedure of the tribunal to be established under the Act and the manner and form of registration of children; and to impose penalties for violation of any regulation not exceeding $200 or imprisonment for a term of not more than three months. No regulation is to have effect until published in the *Canada Gazette* but upon publication it is to have the force of law. The Minister must make an annual report to Parliament.

A fine not exceeding $500 or a prison term not exceeding six months, or both, may be imposed on any person who makes a false or misleading statement in order to obtain an allowance; who cashes a cheque to which he is not entitled; or who fails to report that an allowance has ceased to be payable in respect of any child or, in the case of a parent, that he has ceased to maintain the child.

Vocational Education

The Technical Education Act, 1919, was extended to make available to the provinces until March 31, 1949, any unexpended portion of their share of the $10,000,000 appropriated for technical education under the Act. During the debate the Minister of Labour stated that Manitoba was the only province which had not taken up its allotment and that the amount which may still be claimed by that Province is $147,430.42.

Department of Reconstruction

The Department of Reconstruction Act, which is to be in force from April 1, 1944, until the end of the session of Parliament commencing in the fourth year following the cessation of hostilities, provides for the establishment of such a Department under a Minister of Reconstruction, who is to be responsible for preparing and co-ordinating plans and projects for reconstruction. In particular, it is the duty of the Minister,—to inform himself of the needs for new employment of the men and women in the armed forces and in industry and the opportunities that will be available to meet them; to co-ordinate the work of other departments and agencies of the Dominion Government to ensure as easy a transition as possible from wartime to peacetime economy; to make plans for industrial development and conversion, public works, housing, development of natural resources and, with the authorization of the Governor in Council, to provide for carrying out such plans; and to correlate information relating to plans for reconstruction. For these purposes the Minister may institute inquiries and may, with the approval of the Governor in Council, appoint a person to conduct such inquiry; require the making of returns by any person; establish committees or boards and use existing organizations and agencies to assist him; consult with representatives of primary producers, industry, science, and labour as well as representatives of Dominion, provincial and municipal authorities engaged in or likely to be engaged in any reconstruction plan.

The Governor in Council may make Orders and Regulations to transfer to the Minister of Reconstruction any powers and duties of a Government department or agency; to establish one or more boards or advisory councils; and to provide for efficient administration of the Act. Such Orders and Regulations must be published in the *Canada Gazette* and laid before Parliament.

Other sections provide for an annual report to Parliament and forbid persons who obtain information under the Act relating to any business to disclose it without the consent of the owner of the business.

Department of National Health and Welfare

The Department of National Health and Welfare Act, which will come into force on Proclamation, provides for the establishment of such a Department which will be under the direction of a Minister of National Health and Welfare and will assume such of the duties of the present Department of Pensions and National Health as are not taken over by the Department of Veterans' Affairs. The duties and powers of the Department of National Health and Welfare extend to all matters relating to health, social security and social welfare over which the Parliament of Canada has jurisdiction, including,—the administration of such Dominion Acts or Regulations relating to those subjects as are not assigned to any other Dominion Department or Minister; investigation and research into public health and welfare; inspection and medical care of immigrants and seamen; supervision of railways, ships and other methods of transportation; promotion and conservation of the health of civil servants and other Government employees; enforcement of regulations relating to public health made by the International Joint Commission; administration of certain statutes, including the Public Works Health Act and the National Physical Fitness

Act and regulations made under such Acts; subject to the provisions of the Statistics Act, the collection, publication and distribution of information relating to the public health, improved sanitation and social and industrial conditions affecting the health and lives of the people; co-operation with the provincial authorities for improving public health and providing for social security and welfare.

The Dominion Council of Health, appointed under the Department of Pensions and National Health Act, and the powers of the Governor in Council to make regulations are continued. The penalty which may be fixed for breach of such regulations is now limited to $200 or three months imprisonment. The Governor in Council may also establish such boards, committees and councils as he may consider necessary to assist and advise the Minister and to co-operate with provincial authorities for purposes of the Act.

Veterans' Legislation

Department of Veterans' Affairs.—The Department of Veterans Affairs Act, which will come into force on Proclamation, repeals the sections of the Department of Pensions and National Health Act relating to care and treatment of war veterans. The Act provides for the establishment of a Department in charge of a Minister of Veterans' Affairs who is to be responsible for the care, treatment, training or re-establishment in civil life of ex-members of the armed forces and of persons who have otherwise engaged in pursuits relating to the war, and for the care of the dependents of such persons.

The Minister, with the approval of the Governor in Council, may make regulations for carrying out the Act, providing, *inter alia,* for control of hospitals, workshops and other institutions; for grants or allowances to persons undergoing treatment or training and their dependents; for reciprocal or other arrangements with the Government of any country for such treatment, training or grants and allowances to persons who have served in the forces of such Government, when cared for under this Act, or to their dependents; for the sheltered employment of former members of the forces of His Majesty or any of His allies and unemployment relief to such persons and their dependents, and compensation for industrial accidents.

Veterans' Insurance.—The Veterans' Insurance Act, which will come into force on Proclamation, is a re-enactment, with some changes, of the Returned Soldiers' Insurance Act passed in 1920. The new Act enables the Minister of Finance, or other Minister designated by the Governor in Council, to make a contract of insurance, without requiring medical examination or other evidence of insurability,—with a veteran; with the widow or widower of a veteran, if the Minister has not made a contract of insurance with the veteran; or with any other person who is receiving, under the Pension Act, a pension relating to the present war. "Veteran" is defined as any male or female person who was engaged in service during the present war and has been granted discharge. "Service" means service in the military, naval or air forces of Canada, while in receipt of active service or Permanent Force rates of pay, or active service in the naval, military or air forces of His Majesty by any person domiciled in Canada at the commencement of such service. The contract, in the case of a veteran or the widow or widower of a veteran, may be made at any time within three years of the veteran's discharge from service and in other cases within three years after the date of the award of a pension under the Pension Act or of the coming into force of this Act.

The amount of insurance provided for under the contract may be $500 or any multiple of it but not more than $10,000. A veteran of the war of 1914-18 who took out insurance under the Returned Soldiers' Insurance Act, 1920, and who insures again under this Act, may not be insured for more than $10,000 under the two Acts. The maximum insurance under the 1920 Act was $5,000.

On the death of the insured an amount not exceeding $1,000 is payable, the remainder, or the proportion of it to which any beneficiary is entitled, being payable, at the option of the insured, as a life annuity, or as an annuity certain for five, ten, fifteen or twenty years or as an annuity guaranteed for one of such periods and payable thereafter for the lifetime of the beneficiary. Any option as to the mode of payment chosen by the insured in his application may be varied by him by a declaration during his lifetime or by the beneficiary with the consent of the Minister after the insured's death. Where, at the death of the insured, the insurance money remaining to be paid as an annuity to any beneficiary is less than $500, the Minister, if he considers it to be in the best interests of the beneficiary and the latter requests it, may direct the money to be paid in a lump sum or in any other manner.

The contract of insurance may provide that, if before reaching 60 years of age the insured becomes totally and permanently disabled so that he is incapable of following any substantially gainful occupation and if he is not entitled to a pension for total disability under the Pension Act, the premiums falling due

under the contract may be waived during such disability. The insured may apportion the insurance among such beneficiaries as he sees fit and many name certain other immediate dependents as contingent beneficiaries. If none of the beneficiaries survives him the net premium value of the contract with interest at 3½ per cent is to be paid to his estate. Insurance money is unassignable and is not subject to claims of creditors of the insured or of the beneficiary.

Where, on the death of the insured, a pension becomes payable under the Pension Act or under the pension laws of the United Kingdom or of any British Dominion to any person in the beneficiary classes, the commuted value of the pension is deductible from the amount of insurance and an alternative insurance benefit is payable consisting of the paid up insurance equity with respect to the amount of the deduction.

Premiums are payable, (*a*) for a period of ten, fifteen or twenty years; or (*b*) until the anniversary of the policy nearest the sixty-fifth or eighty-fifth birthday of the insured. Monthly premiums for $1,000 insurance are given in Schedule A to the Act. For a person insuring at the age of 18 years the monthly rate under plan (*a*) is $2.79 a month payable for ten years, $2.04 for fifteen years and $1.68 for twenty years. Under plan (*b*) $1.13 is payable till the age of 65 or $1.09 is payable until the age of 85. The rates for persons insuring at fifty-five years of age range from $4.03 to $6.45 a month and at 65 years from $6.81 to $8.77 a month. Rates for ages over 65 are to be computed on the same basis.

Certain classes of applicants may be refused insurance including those who are seriously ill with a non-pensionable disability, those without dependents seriously ill with a pensionable disability, those who have no reasonable expectation of life and those whose health has become impaired as a result of immoral conduct prior to enlistment or through refusal of treatment during service or after discharge. The Minister may require an applicant to submit to a medical examination in order to determine whether he is insurable.

If an applicant for insurance dies before completion of his contract the contract is to be deemed to have been made if the application is approved by the Minister and the initial premium accepted.

Other sections enable the Governor in Council to make regulations for the carrying out of the Act and require the Minister to make an annual report to Parliament.

War Service Gratuities.—The War Service Grants Act is to come into force on January 1, 1944 or on any date between October 1, and January 1, 1944 which may be fixed by the Governor in Council. The Act provides for the payment of war service gratuities and for the granting of re-establishment credits to members of His Majesty's Forces raised in Canada who have enlisted and to those who have been called up under the National Resources Mobilization Act to serve without limitation as to territory. The Act does not apply to men called up for service in Canada unless and until they have enlisted for general service or the area of their service has been extended to include overseas.

The gratuity amounts to $7.50 for every thirty days of service in the Western Hemisphere and $15 for every thirty days of service overseas and in the Aleutian Islands. In addition, for each six months service overseas or in the Aleutian Islands seven days' pay and allowances of rank are given in lieu of leave which would have been granted if the recipient had been in Canada. "Overseas Service" includes duties performed outside of Canada and the United States and their territorial waters in aircraft, or anywhere in a seagoing ship of war. Where a member of the forces dies on service or after discharge before he has been paid the full gratuity, the balance is to be paid either to a person to or in respect of whom a dependents allowance was payable on behalf of such member immediately prior to his death, or would have been so payable if such person had not been a member of the forces, or to a dependent to whom pay was assigned by him.

The gratuity is to be paid in monthly instalments, not exceeding the amount of pay and allowances for the month immediately preceding discharge and including also, in the case of a member of the Naval forces, lodging and provision allowance and, in the case of a member of the military or air forces, subsistence allowance at the standard rates payable in Canada even if he was not receiving such allowance at the date of discharge.

In addition to the war service gratuity every member of the forces who does not take advantage of the Veterans' Land Act, 1942 or any educational, vocational or technical training provided out of moneys provided by Parliament, is eligible for a re-establishment credit equal to the amount of the war service gratuity, namely, $7.50 or $15, as the case may be, for each thirty days of service. All or any part of such credit may, within ten years from the coming into force of this Act or his discharge, whichever is later, be made available to a member of the forces if the Minister is satisfied that it is to be used for,—the acquisition of a home or the repair or modernization of a home

owned by him; purchase of furniture or household equipment; provision of working capital for his profession, or tools, instruments or equipment for his trade, profession or business; purchase of a business; payment of premiums under an insurance scheme established by the Government of Canada; purchase of special equipment for his education or vocational training; or any other purpose authorized by the Governor in Council.

An officer or man dismissed or discharged from the service owing to misconduct is not eligible for any benefit under the Act.

Where a member of the forces has had all or any of his re-establishment credit, he is not eligible for benefits under the Veterans' Land Act, 1942, or for any training benefits provided out of moneys appropriated by Parliament, except subject to an adjustment equal to the re-establishment credit.

Gratuities or credits under the Act are only to be made on application by or on behalf of the person claiming them. Benefits received from the Government of another British Dominion or of an allied or associated power are to be deducted from benefits under the Act.

Any person who was domiciled in Canada on or after September 10, 1939 and subsequently served on active service with any of the military, naval or air forces of His Majesty other than those raised in Canada, is eligible for benefit under the Act if domiciled in Canada at the time of his application for it, which is to be made within one year of his discharge, subject to deduction of the amount of any similar benefit received from any other Government in respect of his service.

Gratuities and credits are exempt from attachment, levy, seizure or assignment under any legal process and from taxation.

The Governor in Council may make regulations for carrying out the Act.

In moving the Resolution for the War Service Grants Bill the Prime Minister, the Rt. Hon. W. L. Mackenzie King, mentioned the principal measures which had been taken for the rehabilitation of ex-service men and women. These included:

A. Maintenance allowances to veterans and their families in the form of
   1. out of work benefits if employment is not immediately to be had, and unemployment insurance if employment is interrupted;
   2. temporary incapacitation grants;
   3. "awaiting returns" grants to farmers and fishermen;
   4. vocational training grants;
   5. university training grants;
   6. post-graduate training grants;
   7. unemployment insurance benefits.

B. In addition, under the Veterans' Land Act, assistance is given for land settlement and fishing.

C. Employment assistance is afforded through
   1. compulsory reinstatement in previous employment;
   2. preference in civil service competitions;
   3. veterans' welfare officers.

D. The provisions of the National Housing Act are of benefit to veterans as well as civilians.

Housing

The National Housing Act, 1944, is designed to promote the construction, repair and modernization of houses, the improvement of housing and living conditions and the expansion of employment after the war. The Act is divided into five parts and each part is to come into force on Proclamation. Part I, which was proclaimed in effect August 21, 1944, and Part II enable the Minister of Finance to join with approved lending institutions in making loans, on conditions laid down in the Act, to assist in the construction of houses for prospective home owners or to be rented to tenants, and for sharing any losses incurred. Co-operative projects may also be financed under Part I of the Act. The joint loan for home owners' housing or for co-operative projects may not be less than 50 per cent of the lending value of the house nor more than 95 per cent of the first $2,000 of lending value plus 85 per cent of the amount by which the lending value exceeds $2,000 but does not exceed $4,000 plus 70 per cent of the amount of lending value exceeding $4,000. For housing for rental purposes the joint loan may not exceed 80 per cent of the lending value of the project. In both cases the maximum interest rate is 4½ per cent.

The maximum term for a loan is twenty years but in an area adequately protected by community planning and zoning restrictions the loan may be made for thirty years in the case of houses for home owners and twenty-five years in the case of housing for rental purposes. Under Part I an amount not exceeding $100,000,000 may be expended by the Minister in making loans and in paying losses in respect of loans made under Part I or under the Dominion Housing Act, 1935, or, under the National Housing Act, 1938. Under Part II the Minister may make loan payments under guarantee up to $50,000,000.

Part II provides for four types of project: financing ordinary or commercial rental housing; financing of low-cost rental housing through limited divided corporations; authorization of certain life insurance and other

designated lending institutions to invest a limited proportion of their funds in low or moderate cost rental housing projects and to hold and manage them; and assistance in clearance of slums and blighted or sub-standard areas. Loans under Parts I and II are repayable by monthly instalments of principal, interest and taxes.

Part III authorizes loans up to an aggregate of $5,000,000 for rural housing. Such a loan may be consolidated with an existing mortgage and repaid in instalments at times which will accord as nearly as possible with the probable receipt of income by farmers from their farming operations.

Part IV, which provides for home improvement and home extension loans, is a re-enactment with changes of the Home Improvement Loans Guarantee Act, 1937 and enables the Minister to reimburse a bank or an approved instalment credit agency for losses sustained through such loans made on conditions laid down in the Act. The maximum home improvement loan is $2,000 for a single family dwelling, and $2,000 for the first family housing unit and an additional $1,000 for every other family housing unit for a multiple family dwelling. The principal amount of a home extension loan must not exceed $3,000 for the first family housing unit added and $1,000 for each further addition. Loans are for three or five years and interest may not be more than 5 per cent per annum. No fee or other charge may be levied as long as the borrower is not in default. The maximum total of loans that may be guaranteed under Part IV is $100,000,000 but the operation of this Part may be terminated at any time by the Minister, with the approval of the Governor in Council.

Part V authorizes the Minister to investigate housing conditions in Canada and abroad, to study the more economical building of houses, to prepare and distribute plans for low-cost housing and to co-operate with local authorities in investigating local problems of land utilization and community planning. The Minister may also, with the approval of the Governor in Council, undertake, directly or in co-operation with other authorities, technical research to improve housing accommodation and lower costs.

Part VI of the Act, which applies generally, provides for the making of regulations for carrying out the Act, and for annual reports. It also enables a borrower under any Part of the Act to take out reducing term insurance to pay the outstanding amount of his loan in case of his death before the loan is fully repaid. In certain cases this insurance may be made mandatory.

Income Tax

An amendment in the Income War Tax Act provides that if the Minister of Finance is satisfied that any payment, other than payments under a superannuation or pension plan, made by an employer to an employee on the latter's retirement, is in recognition of long service, one-fifth of the amount shall be taxable in the year the payment is received and one-fifth in each of the four succeeding years. The income of a limited dividend housing corporation is exempt from taxation under the Act. The section which permits deduction from income of certain moneys paid into a superannuation fund was revised and now provides for deduction of an amount, not exceeding $300 in the taxation year, actually retained by the employer from the employee's remuneration for an employee's superannuation or pension fund or plan in respect of services rendered in the taxation year or paid by a taxpayer who is a member of a trade union as part of his union dues, and a like amount paid to such a fund or plan by the taxpayer in respect of services rendered by him previous to the taxation year when he was not a contributor.

Dominion Elections

Provision was made to enable persons on war service and prisoners of war to vote in a Dominion general election.

Industrial Development Bank

The Industrial Development Bank Act, which will come into force on Proclamation, provides for the establishment of a Government Bank, under the management of the Board of Directors of the Bank of Canada, with a capital of $25,000,000, for the purpose of lending or guaranteeing loans to manufacturers, shipbuilders, electrical power utilities and business carried on for the refrigeration of goods. In case of the bankruptcy or assignment of any person who has received a loan from the Bank and has given security for it upon his goods or merchandise, the amount of three months wages or salaries of the employees of such person, employed in connection with the business concerned, is to be a charge upon such goods and merchandise, in priority to the rights of the Bank, and if the Bank takes possession or disposes of such goods it is to pay the wages for the prescribed period.

Civil Service Superannuation

A number of amendments were made in the Civil Service Superannuation Act including a

section giving right to election for a period of one year from August 15, 1944, to persons who are eligible to become contributors under the Act but who failed to elect prior to July 19, 1927.

Bill Not Passed

A private member's Bill which was introduced but failed to pass would have repealed the Wartime Wages Control Order in Council (P.C. 9384) December 9, 1943.

Recent Regulations under Dominion and Provincial Legislation

PROVISION has been made for payment of one-way transportation costs incurred in transferring equipment for the 1944 harvest in Alberta, Saskatchewan and Manitoba. Registered longshoremen are to receive a weekly credit wage rate when the men apply for work at a dispatching period, but are not assigned. A consolidating Order has been made governing prisoner-of-war employment on labour projects, dividing the responsibility for employment and security between the Minister of Labour and the Minister of National Defence and making provision for a 50-cents per day wage rate. Whenever a workman in receipt of a military pension is eligible for workmen's compensation under a provincial Act, the Workmen's Compensation Board or the employer, is to be reimbursed, for the amount of compensation paid.

Among provincial Orders: Alberta has approved regulations governing the construction and operation of places of amusement and the licensing of projectionists. British Columbia has made new regulations concerning the appointing of additional bargaining representatives, the procedure for application for the certification of bargaining representatives, machinery for settling disputes, and has prescribed the forms to be used when a union applies for the certification of a bargaining representative. British Columbia has changed the wording of and added to the Workmen's Compensation Act Schedule of Industrial Diseases. Under the Ontario Hours of Work and Vacations with Pay Act general regulations were made and rulings issued for hotels, restaurants and retail shops.

Dominion

Agriculture

By an Order in Council (P.C. 6301) gazetted August 21, the Minister of Labour is authorized to extend the terms of farm labour agreements entered into by the Dominion with the provinces of Alberta, Saskatchewan and Manitoba (L.G. 1944, June, p. 713) to provide for payment of one-way transportation costs incurred in transferring, in the province and under the direction of provincial authorities, harvesting equipment to be used for the 1944 crop. The rates are to be agreed to by the Dominion Minister of Labour and the province, and the costs are to be shared equally by the Dominion and the province. The same provision was made last year in connection with the 1943 crop (L.G. 1943, p. 1213).

Longshoremen at Halifax

An order in Council (P.C. 6300) of August 11, 1944, amends P.C. 5161 of June 25, 1943, (L.G. 1943, p. 901) which is designed to maintain an adequate force in the Port of Halifax for the duration of the war and the fixing of a minimum weekly wage in return for the constant availability of longshoremen for loading and unloading operations.

The new Order replaces two sections of the 1943 Order, which provided for the establishment of a Reserve Labour Pool and required a member to be available at any time for any kind of longshore labour to which he might be assigned, and in addition, to report daily at the regular dispatching periods and to work for any employer to whom he might be assigned. He was entitled to three hours' pay for every regular dispatching period at which he reported to the Central Dispatching Agency for work but was not assigned.

The new Order stipulates that every member of the Reserve Labour Pool is entitled to a credit towards the guaranteed weekly wage of $1.68 for every time he reports at a dispatching period but is not assigned to any work, provided he does not refuse to accept or perform any work assigned by the Agency.

The new Order also makes provision for a man registered on the Surplus Board or any other dispatching board to receive credit towards the guaranteed weekly wage of $2.52 for every time he reported to the Agency for work, at an 8 a.m. or 1 p.m. dispatching period, but was not assigned to work. A man assigned to the night shift is entitled to a

weekly credit of $5.04 for every time he reports for work at 7 p.m. but is not assigned, provided he receives no benefit for any week in which he refuses to accept or perform any work assigned to him.

Prisoner-of-War Employment

An order in Council (P.C. 6495) governing the employment of prisoners of war on labour projects was made August 18, 1944 and gazetted August 28. It consolidates P.C. 2326 of May 10, 1943 (L.G. 1943, p. 741); P.C. 5864 of July 24, 1943 (L.G. 1943, p. 1070); P.C. 5550 of July 29, 1943 (L.G. 1943, p. 1070); and P.C. 9793 of December 24, 1943.

The Order applies to members of the Armed Forces or Mercantile Marine of any Powers at war with Canada and civilian internees who are interned in Canada. The Minister of Labour and the Minister of National Defence may provide employment for such prisoners of war outside internment camps and for their security and discipline. Only those members of the Mercantile Marine and civilian internees who volunteer for labour projects are subject to this arrangement.

The Department of Labour is responsible for the employment, accommodation, supply and welfare of prisoners of war employed outside internment camps. The Department of National Defence is responsible for their security and discipline, and for the supply of a necessary guard.

Wage rates for prisoners of war are established by the Minister of Labour, at either a maximum of 50 cents for a working day, or piece-work wage rates which will permit earnings to equal approximately 50 cents a day. The Department of National Defence is not required to provide guards for prisoners employed on individual farms. Each labour detachment of prisoners of war must be attached to an internment camp.

Workmen's Compensation for Disabled Veterans

To encourage the employment of handicapped ex-service men, an Order in Council (P.C. 102/3275) of May 3, 1944, under the Department of Pensions and National Health Act, continues a policy adopted on December 29, 1921, and modified from time to time of Dominion assistance in providing workmen's compensation for war veterans who are employed in industry and who are receiving pensions on account of military disability.

Whenever a workman in receipt of a military pension is eligible for workmen's compensation under a provincial Act, the Dominion regulations provide that the Workmen's Compensation Board, or the employer if he is individually liable, is to be reimbursed in whole or in part for the amount of compensation paid, upon submitting a certificate of payments to the Department. The amount of compensation must be regulated so that, in addition to the pension received, the total for any one month does not exceed a 100 per cent disability pension under the Pension Act. Reimbursement must be by continuing remittances or by a lump sum, whichever method has been used by the Board. In case of an accident in the course of employment to which a provincial Workmen's Compensation Act does not apply, the Department of Pensions and National Health may submit full particulars to the Workmen's Compensation Board of the province in which the accident occurred, to ascertain the amount which would be payable if the industry were within its jurisdiction. Reimbursement will not be made in respect of an accident compensatable under another Act or Order in Council.

Where an employer insures his liability in an insurance company, the Department may refund to the employer the amount of premium paid in respect of such a pensioner for the year in which the accident occurred.

Any claims for compensation submitted to the Department must contain full particulars regarding date, place, and nature of the accident, the attending physician, the hospital, prognosis, and whether permanent or temporary disability is likely to result. The Department may furnish the Board or employer with information respecting the war disability. After the Department assumes responsibility for payment of compensation, it must provide continued treatment for the accident victim. Where surgical treatment is necessary the operation must be performed at a place designated by the Department, and the services of the Department's specialists may be placed at the disposal of the Board. Monthly progress reports must be furnished by the Board to the Department or vice versa. Notice of any accident must be given to the Department within three months. The Department, after reviewing a case, may disclaim further liability.

Other Orders

Tht following recent Orders in Council are summarized elswhere in the LABOUR GAZETTE: P.C. 6226 amending National Selective Service Mobilization Regulations concerning aliens; P.C. 6410 concerning grain handling regulations; P.C. 6492 concerning the including of a representative of the Department of Labour on the External Trade Advisory Committee; and P.C. 6893 amending the Wartime Labour Relations Regulations. P.C. 6416 regarding the Montreal Tramways was included in the August issue of the LABOUR GAZETTE.

Provincial

Alberta Amusements Act

New regulations under this Act, governing the construction, operation and public safety of places of entertainment; motion picture equipment; the licensing of projectionists; film reports, and the confiscation of films, were approved by Order in Council on July 19, 1944, and gazetted July 31.

Plans for construction or alteration, giving complete information as to the extent and nature of the proposed work, must be submitted by the owner to the Chief Inspector of Theatres before work is begun. Specifications regarding entrances, exits, doorways, stairs, seats and aisles, heating and ventilation, sanitary arrangements, fire-precautions, stage construction, etc., are laid down in the regulations. Every owner or occupier of an entertainment hall must provide and keep in good repair at least two doorways of which the width, fastening, wiring and lighting are set out, with details regarding stairways and fire-apparatus.

Stipulations are made regarding the dimensions of projection rooms, their ventilation and fire apparatus, and electrical equipment.

Apprenticeship and projectionist qualifications are laid down in the regulations with particulars regarding applications, examinations, and licenses. Film reports must be submitted after each theatre or film run is completed. Defective films must not be redistributed by the film exchange. Any apprentice or projectionist is liable to a suspension of his certificate if he fails to comply with the restrictions regarding behaviour while on duty.

British Columbia Wartime Labour Relations Regulations Act

Regulation 4 under this Act, made August 3 and gazetted August 10, permits, on the approval of the Minister of Labour for British Columbia, any employees' organization or trade-union, which has been certified under the Act, to increase or reduce the number of bargaining representatives previously certified.

Where the majority of the employees affected are not trade-union members, proof must be submitted that it is the desire of this majority that additional bargaining representatives be appointed or that certain representatives, previously certified, no longer have authority to act, the decision being made at an official meeting where the majority of members affected vote. Where the employees concerned belong to a trade-union, a similar meeting must be called and a majority vote taken.

Regulation 5 made August 8 and gazetted August 17 lays down the procedure for application for the certification of bargaining representatives; application for assistance when the parties fail to arrive at a collective agreement; application for the establishment of machinery for the settlement of disputes arising during the life of an agreement, and application for leave to prosecute under the Wartime Labour Relations Regulations.

Application for the certification of bargaining representatives must be submitted in duplicate upon the forms provided and must be verified by statutory declaration.

Where the employer and employees cannot reach an agreement, one or other party may apply to the Registrar, Wartime Labour Relations, in Victoria, for the appointment of a Government conciliation officer or board. Such an application must contain a complete statement of the persons concerned and the conditions encountered. Additional information may be requested by the Minister.

In the case of a dispute concerning the interpretation or violation of a collective agreement, application may be made to the Registrar for the establishment, by the Minister, of an appropriate procedure for its settlement. The regulations stipulate that the application must include particulars of the agreement and a statement that it provides no appropriate machinery for the consideration and settlement of disputes concerning the interpretation or violation of the agreement. A copy of the collective agreement must be filed with the application.

An application for leave to institute a prosecution under the regulations may be made to the Registrar. The application must specify the provision of the regulations alleged to have been violated, and must include full particulars regarding the violation.

A person directly affected by any decision of the Provincial Minister of Labour and seeking appeal to the National Board, should file an application to the Minister setting forth full details. The time-limit for such an appeal is set forth in the regulations of the Wartime Labour Relations Board (National), of June 7, 1944, and subsequently amended (L.G., June 1944, p. 738). Where the Provincial Board grants leave to appeal, request for such leave must be made within thirty days. If the National Board grants such leave, request must be made within sixty days.

Regulation 6 was made August 16, 1944. It prescribes the forms for trade union members to use to indicate the union which they wish to represent them in collective bargaining. These forms must be submitted to the British Columbia Labour Relations Board when a union applies for the certification of bargaining representatives under the Labour Relations Regulations.

British Columbia Workmen's Compensation Act

New regulations of August 22, 1944, amend the Schedule of Industrial Diseases compensated under this Act. They came into effect July 1, 1944.

Changes have been made in the wording in connection with certain diseases to extend or make more precise the definition of the industrial process concerned. The italicised words have been added in the following: Aseptic inflammation affecting the sheaths and tendens of the wrist, contracted in any process involving constant vibration or excessive use of muscles of the *arm,* forearm *or hand*; dermatitis, contracted during any process or industry involving contact with cutting-oil in machine work, *or any process or industry involving contact with an oil containing such irritating preservatives as alcohol, formaldehyde, phenol, or phenol derivatives;* dermatitis, contracted in any process involving contact with *hides or with* uncooked meats, *uncooked* fish or *uncooked* poultry.

Added to the list are: dermatitis contracted during any process in the manufacture or use of rock-wool, slag-wool, or glass-wool; and dermatitis contracted during any process involving the use of cyanide.

Ontario Hours of Work and Vacations With Pay Act

Regulations under this Act (L.G. July, 1944, p. 906) were approved by Order in Council July 6 and gazetted July 15, 1944. The Act limits working hours in any business or industry to eight per day and 48 per week except where a written permit for longer hours has been given by the Industry and Labour Board or under Regulations of the Board authorizing exemptions. The Act also provides for an annual holiday with pay for employees in such undertakings.

The Regulations made special provision for establishments working less than 6 days in a week or for longer than 8 hours in a day. An employer who, by custom or practice, has established a "work-week" of 48 hours or less with daily hours exceeding eight may continue such hours until otherwise ordered. Where an employer has reduced the hours in the "work-week" to 48 and wishes to operate less than six days in a week, he may, with the approval of the Board, exceed the eight-hour day.

In special circumstances, where the Board is satisfied that the nature of the work or the perishable nature of the raw material being processed requires longer daily or weekly hours, it may issue a special overtime order.

An employer, with the written consent of the Board, "may adopt one or more overtime work-periods" in his undertaking providing the hours of overtime are not in excess of 120 hours in a calendar year. Wherever an employee works overtime, the permitted number of overtime hours are reduced by the amount of his overtime. The granting of a permit by the Board does not mean that any employees may not refuse to work overtime.

Where overtime work is performed as a result of accident or emergency conditions, the employer must report at once to the Board, giving the reasons. Overtime under these conditions does not affect the amount of overtime which the Board may permit in a year.

The Regulations dealing with holidays with pay provide that every employee granted such a holiday shall be entitled to receive at least two per cent of his total annual earnings. In the construction industry where workers are employed by different employers, every employee is to receive a "vacation with pay credit" and is to be given, at cost, a record book in which vacation credit stamps issued by the Minister of Labour and purchased by the employer, are to be affixed by the employer at the end of each work-day or "work-week". These stamps are to be equivalent to two per cent of the earnings during such period. On or after June 30 in each year, an employee must present his record book to a provincial savings office, where, upon proper identification, he may receive the amount accruing to him as a vacation credit.

Records giving full particulars of the number of hours worked by each employee, including overtime, must be kept by every employer, but this rule does not apply to employees occupying managerial, supervisory or confidential positions.

On June 2 the Ontario Minister of Labour announced that, owing to the acute labour shortage for war industries, the Industry and Labour Board was authorizing the continuance of existing working hours in all industries operating on priority war material. This decision was made at the request of the Dominion Department of Munitions and Supply. Undertakings engaged in "agriculture,

horticulture, fishing and the production of foods and farm products, dairying industries, including cheese and butter-making, firms engaged in the building and upkeep of roads, construction, transport, textiles, and other undertakings which can be considered essential to the maintenance of the war effort are to be considered in the category of war industries in so far as their present working hours are concerned."

It was further stated that preparations for the application of the Act would go forward immediately but that these preparations would not be permitted to interfere in any way with existing working conditions in vital industry as long as the present crisis exists.

After conferences with representatives of the hotel industry, retail trade, and the Canadian Restaurant Association, rulings have been made, according to press reports, for the application of the Act to these places of business. For hotels, the maximum "work-week" excludes meal-times and overtime may be worked as required, subject to agreement as long as the labour shortage continues.

In shops, the hours of work on one or more days of the week may be more than eight provided the 48-hour week is not exceeded. Overtime is permitted up to the 120 hours a year allowed by the general regulations.

For restaurants, the 48-hour week is to apply but employees who receive meals from the employer must be on the premises for 9 hours in a day. Special consideration in the matter of overtime is accorded because of the acute shortage of labour. From September 1 to December 1, 1944, overtime may be worked in any restaurant up to 100 hours.

Recommended Standards for Australian Foundries

A survey of 76 foundries employing 7,312 persons in Australia was recently made by the Commonwealth Department of Labour and National Service. Serious shortcomings were revealed in general plant conditions, provision of amenities and dust control. A pamphlet on *Dust Hazards in Australian Foundries* was published earlier in the year by the Department (L.G., June, 1944, p. 799). It has now been followed by a more comprehensive bulletin on foundry working conditions.* This publication contains minimum standards for ensuring the health and safety of foundry workers. The standards are drawn from the practice of the well-run foundries observed in the survey, but are, in some cases, below what would be considered necessary in peace-time. However, it is pointed out that "the adoption of even these minimum standards will help considerably to increase production."

Detailed specifications for plant and equipment are laid down. Emphasis is placed on good housekeeping and the elimination of dust. The main recommendations of the earlier pamphlet on Dust Hazards are included. Adequate guarding and inspection of machinery and danger points and the provision of protective equipment such as goggles, spats or leggings, safety shoes and welding screens are strongly urged. Grinding wheels and cranes, hoists and lifting tackle should conform to recognized codes.

A maximum temperature of 82 degrees is proposed for foundries when the outside temperature is below 72 degrees. Otherwise the foundry temperature should be kept within 10 degrees of the outside temperature. The area of ventilation openings should be 15 per cent of the floor area, with the inlets placed lower than the outlets. Hoods should be installed over furnaces, core ovens and other sources of heat. Adequate passageways must be maintained and equipment not in use should be properly stored and stacked in an orderly fashion. Particular recommendations are made concerning the construction and equipment of core rooms, the moulding floor and furnace areas. The use of buggy ladles is recommended for repetition moulding as they permit an economical use of manpower and reduce the physical exertion required.

It is pointed out that "good health partly depends on the proper provision and maintenance of messrooms, lockers and changing rooms, washing and toilet accommodation, adequate facilities for casualty treatment and so on." Minimum standards for these amenities are suggested. Particular stress is laid on the importance of providing adequate washing facilities including showers, basins or troughs, warm water, soap and clean towels. Firms are urged to make use of the technical advice on cafeterias and messrooms offered by the Department which is now operating more than 120 cafeterias in Government-owned war plants and has prepared pamphlets on the subject. Special facilities such as seats and rest couches are urged for women workers. As regards weight-lifting, the load-limits proposed in the Code of Working Conditions for Women Workers drawn up by the Department early in 1943 (L.G., 1943, p. 464) are recommended.

The pamphlet is illustrated with photographs showing good and bad conditions observed in various foundries.

**The Australian Foundry, Working Conditions and how to improve them,* Department of Labour and National Service. Industrial Welfare Division, Bull. No. 3, Melbourne, 1944.

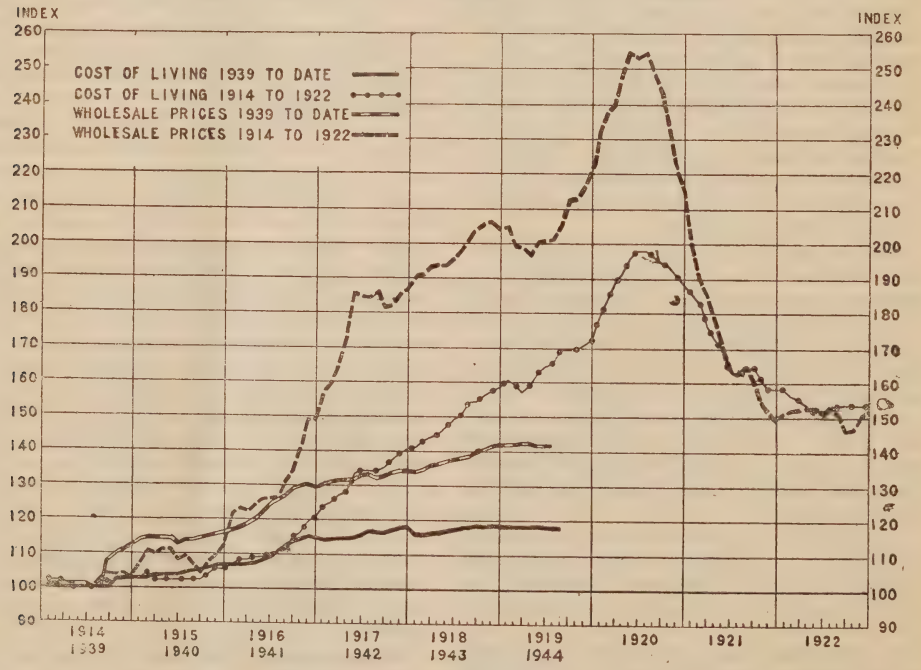
Prices

Prices, Retail and Wholesale, in Canada, August, 1944

Cost of Living, Prices of Staple Articles, and Index Numbers, as Reported by the Dominion Bureau of Statistics

THE Dominion Bureau of Statistics official cost-of-living index on the base 1935-39=100 declined 0·1 to 118·9 between July 3 and August 1, 1944. Weakness in foods, the index for which fell 0·5 to 131·5, was primarily responsible, though the fuel and lighting index fell from 108·9 to 108·7 in the same interval, due to further decreases in electricity rates in Ontario and Quebec. In the food group, lower quotations occurred for onions, cabbage, carrots, potatoes and lamb, while eggs, lemons and oranges advanced. Scattered increases affecting items of furniture, textile furnishings and hardware were reflected in a gain of 0·2 to 118·5 in the homefurnishings and services series. Other groups remained unchanged, rentals at 111·9, clothing at 121·5, and miscellaneous items at 109·0.

Movements of cost-of-living indexes (August 1939=100) for eight regional cities between June 1 and August 1 were mixed. Higher food prices were responsible for advances of 0·8 points to 119·6 in the Saint John series, and of 0·7 points to 119·0 in the Halifax index. Similarly three western centres, Edmonton, Saskatoon and Winnipeg recorded gains of 0·4, 0·3 and 0·2 points to close at 116·1, 119·6 and 115·7 respectively. The Toronto index remained unchanged at 117·1, while both Montreal at 120·2 and Vancouver at 116·9 moved 0·5 lower. In both the latter cities, lower food prices predominated, but in Montreal there was also a reduction in electricity rates.



Retail Prices

The accompanying table on retail prices of staple foods, coal and rentals (Table IV) is prepared each month by the Dominion Bureau of Statistics. It shows the prices of these commodities in 64 cities across Canada at the date under review.

The prices of the staple food items included in the table are all used in the calculation of the index of the food group in the official cost-of-living index, and give a reasonably com-

COST OF LIVING AND WHOLESALE PRICES IN CANADA 1914-1922 AND 1939-1943

BASE: PRICES IN JULY, 1914 and in AUGUST, 1939=100

plete picture of prices throughout Canada as used in the calculation of the index of this particular group. They are the averages of prices of goods reported to the Bureau by independent stores. They do not include prices from chain stores. As the movement of chain store prices agrees closely with the movement of independent store prices it was considered that the extra work and cost involved in compiling and printing a separate table for chain store prices were not warranted although chain store prices are used in the calculation of the index.

The coal and rental figures given are also used in the official cost-of-living index. Quotations are shown for anthracite coal in the provinces of Ontario and Quebec, and for bituminous coal in the rest of Canada, where this type of coal is more generally used.

Rental figures given in the table are typical of rents being paid by tenant households in each city. In some cities, flats and apartments are more numerous than single houses; in such cases rents for flats and apartments are shown while figures for other cities represent single-house rentals. In all cases figures represent rents being paid, not the rent asked for vacant dwellings. The basis of these figures is the record of rents for every tenth tenant-occupied dwelling collected in the 1941 census of housing. The movement of rents since that time has been determined from reports submitted by real estate agents. The 1941 census averages have been adjusted in accordance with the change indicated by these reports, and the printed figures show a $4 spread centred around each city average.

Table III is designed to show the variation in the retail prices of commodities since the beginning of the war. Taking the Dominion average retail price of each of the commodities at August, 1939, as 100, the table shows the percentage changes in prices since that date; also the actual price on the first of the current month.

The Dominion Bureau of Statistics issues an index number of retail prices of commodities included in the cost-of-living index excluding rents and services. This index is now being included in Table I.

The accompanying chart shows the trend of the cost of living and wholesale prices since the beginning of the present war compared with the trend in the period of 1914-1922.

Explanatory Note as to Cost-of-Living Index

The index number of the cost of living was constructed on the basis of a survey of expenditure by 1,439 families of wage-earners and salaried workers with earnings between $600 and $2,800 in 1938. The average expenditure was $1,413.90, divided as follows: food (31·3 per cent, $443; shelter (19·1 per cent), $269.50; fuel and light (6·4 per cent), $90.50; clothing (11·7 per cent), $165.80; home furnishings (8·9 per cent), $125.70; miscellaneous (22·6 per cent), $319.40.

The last-named group includes health (4·3 per cent), $60.80; personal care (1·7 per cent), $23.90; transportation (5·6 per cent), $79.30; recreation (5·8 per cent), $82.10; life insurance (5·2 per cent), $73.30. Other expenditure not directly represented in the index brought the total family living expenditure to $1,453.80.

A description of the cost-of-living index, how it is calculated, and the complete list of items included in each of the principal groups, food, fuel, rent, clothing, home furnishings, etc., with their weights, was published in the Labour Gazette for July, 1943, page 1057.

The control of prices under an Order in Council of November 1, 1941, P.C. 8527, became effective on December 1, 1941 (L.G., 1941, page 1371). The order provided that no person should sell any goods or supply services at prices higher than during the period September 15 to October 11, 1941, except under the regulations of the Wartime Prices and Trade Board. The activities of the Board in the operation of the price control policy are summarized from time to time in the Labour Gazette under the title, *Activities of the Wartime Prices and Trade Board.*

Wholesale Prices, August, 1944

The Dominion Bureau of Statistics composite index of wholesale prices declined 0·2 to 102·3 between July and August, 1944, due to weakness in vegetable products. The vegetable group fell 0·5 to 94·6, reflecting lower quotations for rye, potatoes, onions and rosin which more than outweighed an authorized increase of 25 cents per bushel in flax, effective August 1, for the 1944-45 crop year. Animal products were fractionally firmer, gaining 0·1 to 106·0 on higher prices for calves, hogs, butter and eggs, although steers and lambs were lower. A gain of 0·3 to 100·3 was recorded for chemicals and allied products, while other groups were unchanged at 91·7 for textile products; 118 for wood products; 117·0 for iron and its products; 79·7 for non-ferrous metals and 102·3 for non-metallic minerals.

Canadian farm product prices also declined slightly in August, the composite index falling 0·8 points to 101·2 during the month. Animal products moved 1·1 points lower to 117.9; declines in live stock were more important than increases, and advances in egg prices were moderate. Lower prices for potatoes and onions were responsible for a drop of 0·6 to 91·2 in field products.

(a) Inclusion of all sales taxes.

(b) The basis of these figures is the record of rents collected in the 1941 census of housing. The movement since then has been determined from reports from real estate agents, the census averages being adjusted in accordance with the changes indicated by these reports.

(c) Rents marked (c) are for apartments or flats. Other rent figures are for single houses. Apartment and flat rents have been shown where this type of dwelling is more common than single houses.

Old Age and Blind Pensioners in Canada

Financial and Statistical Summary as at June 30, 1944

IN the accompanying tables, which have been prepared by the Department of Finance, information is given concerning the Old Age Pensions Act and the amendment to that Act for the payment of pensions to blind persons.

Old Age Pensions

The Act provides for the establishment of a Dominion-provincial pensions system to be effective in such provinces as might enact and give effect to special legislation for this purpose. All the provinces are now participating.

Under the Old Age Pensions Act a pension is payable to any British subject of 70 years and over who is not in receipt of an income of as much as $425* a year and who has resided in Canada for the 20 years, and in the province in which the application is made for the five years immediately preceding the date of the proposed commencement of pension. The Act also provides that an applicant must not have assigned or transferred property for the purpose of qualifying for a pension. Indians, as defined by the Indian Act, are not eligible to receive old age pensions.

The maximum amount of pension payable under the Act is $300* yearly. In cases where pensioners have a private income the amount of their old age pension is subject to reduction by the amount that their private income exceeds $125* a year.

Under the provisions of the Act as it was first passed, the Department of Labour of Canada (then the administering Department) paid quarterly to each province one-half of the net sum paid by the provincial pension authority during the preceding three months. At the 1931 session of the Dominion Parliament, however, the Act was amended, the amount of the Dominion contribution being increased from fifty to seventy-five per cent of the net sum.

In order to avoid duplication of departmental activities and to secure centralization of responsibility in carrying out the provisions of the Act, which involves accounting control and supervision, the administration of the Old Age Pensions Act was by Order in Council dated March 1, 1935, transferred to the Department of Finance from April 1, 1935.

Pensions for the Blind

An amendment to the Old Age Pensions Act, assented to on March 31, 1937 (L.G., May, 1937, p. 503) provides for the payment of pensions to blind persons who have attained the age of 40 years and have fulfilled other conditions set forth in the Act. Such persons must be so incapacitated by blindness as to be unable to perform any work for which eyesight is essential, and must not be in receipt of a pension or allowance in respect of blindness under the Pension Act or the War Veterans' Allowance Act.

The maximum pension payable to a blind person, whether married or unmarried, is $300* per annum. If, however, a blind person marries another blind person after March 31, 1937, the maximum pension is reduced to $150*. If a pensioner is unmarried the maximum pension is reduced by the amount of his income from earnings or other sources in excess of $200* a year. If a pensioner is married to a person not receiving a pension in respect of blindness, his income is deemed to be the total income of himself and his spouse (including any old age pension payable to the spouse) less the sum of $225*, and the maximum pension is reduced by the amount by which his income, so calculated, exceeds $400*. If a pensioner is married to a person receiving a pension in respect of blindness, his income is deemed to be one-half the total income of himself and his spouse (excluding the pension in respect of blindness payable to his spouse) and the maximum pension is reduced by the amount by which his income, so calculated, exceeds $200*.

Under agreements negotiated between the Dominion and the Provinces, the Dominion contributes 75 per cent of the cost of pensions to blind persons, the provinces assuming the remainder of the cost of such pensions.

The accompanying tabular statistics indicate the extent of operations under this amendment to the Old Age Pensions Act.

---

* Amended by Orders in Council P.C. 6367, August 10, 1943, and P.C. 3377, May 29, 1944, passed under the authority of the War Measures Act.

Co-operative Organizations and Post-War Relief

REHABILITATION and relief for the countries wrecked by war are being given careful consideration by economists and social workers in all of the Allied countries. Foremost among the problems to be encountered as soon as the war is over are "famine, bodily wretchedness and epidemic disease, and the crying need for their relief. Next will be the immense and hardly less urgent task of restoring economic life, rebuilding what has been destroyed, and setting free the latent forces of democracy and culture." Whatever plans may be decided upon to cope with these tasks it is essential that adequate administrative machinery be provided.

As a contribution to the discussion of this latter phase of these perplexing questions, the International Labour Office has issued a treatise entitled *Co-operative Organizations and Post-War Relief*. It is pointed out in the introduction that "the search for institutions capable of immediate adaptation, with a minimum of administrative apparatus, to urgent needs of the moment, and, at the same time, able to reconcile the claims of both order and liberty in any lasting organization of social life, has led many minds towards the co-operative movement . . . There is an increasing, though, as yet unformed body of opinion which looks to co-operative institutions to play a decisive, or at least a very important part, in the solution of post-war social and economic problems. Such a view is not only held by co-operative leaders, . . . but by prominent representatives of governments, churches and educational organizations."

World-wide Organization of Co-operatives

It is recalled that the co-operative movement is "nationally and internationally a coherent and organic entity," which "in its totality exhibits a carefully fashioned federal structure."

The latest issue of the International Directory of Co-operative Organizations, published by the I.L.O. in 1939, lists more than 400 federal co-operative bodies of one type or another spread over 61 countries. Moreover, it is asserted that "federalization in its various forms proceeds steadily upwards. In many countries several different categories of society have been moved to establish among themselves confederative bodies—in a kind of super-federation—for the study and solution of common problems. This process even reaches into the international field." Not only are co-operatives organized on a world-wide scale, but they share in a varied range of activities. In addition to the original consumers co-operatives there are extensive co-operative wholesales, a wide variety of industrial projects, housing, banking, insurance co-operatives, etc.

It is asserted that much the largest international co-operative organization is the International Co-operative Alliance, which was founded nearly 50 years ago. Its functions have been mainly the promotion of the ideals of co-operation, notably, co-operative banking and trading, as well as other international co-operative activities.

It is recalled that in 1922 the International Banking Committee was established in Paris as an auxiliary of the Alliance and in the same year the Insurance Committee set up a permanent secretariat at Brussels. Two years later, rules were adopted governing the International Co-operative Wholesale Society, which has headquarters at Manchester, England. The latter, is mainly an educative project, designed to facilitate world co-operative trade. As recently as 1938, the International Co-operative Trading Agency was established in London to "act as selling agents and representatives of overseas shippers for co-operative trade" and as brokers, selling agents and purchasing agents for member societies. At the outbreak of the present war the Alliance comprised 171,300 societies with 71,588,000 members in 35 countries. The important co-operatives of Germany and Italy are not included in these figures as they had withdrawn from the Alliance some time earlier.

Functions of International Organization

The purpose and effect of this federal structure "is to place at the disposal of its smallest component units all the benefits normally conferred by large-scale financial, administrative and technical concentration." The necessity is emphasized for distinguishing between the concentration process of co-operative undertakings and the apparently similar process among capitalistic enterprises. This is necessary for a proper understanding of "the contribution that co-operative organization can make to economic order in general and to the post-war economy in particular." It is pointed out in the treatise that a characteristic of the co-operative structure is that it "is built upon the most numerous and smallest economic units," such as individual households and other places of ultimate production and consumption activities. Each co-operative society, large or small, "is a free federation of primary economic units, which have united for some definite common purpose, but are not merged in a new organism."

Co-operative Organizations in Relief Operations

Part III of the treatise is devoted to a discussion of the contribution that can be made by co-operatives in solving the problems of the early post-war period.

Attention is drawn to two main phases of the immediate undertaking that will demand attention: (1) "The most immediate and urgent task when the war ends will be the rapid provision of the minimum physiological requirements of life and health, with the bare elements of physical comfort to those who lack them. This problem will here be termed *relief.*" (2) The next "most urgent task, the restoration of economic activity and of psychological and social normalcy in regions where the life of the people has been disrupted by the war, will be termed *rehabilitation.*" Beyond these, but outside the scope of this study, is *reconstruction at large,* which involves national and international policies in the social and economic fields.

The problem of relief "is confined to the two questions of the distribution of relief supplies and the sources of relief supplies, and to these only in so far as they bear upon the role of co-operative organizations in relief operations." It has been estimated that "when the war ends Europe will require delivery, within one year, of 24 million tons of bread grains, rice, peas and beans and at least seven million tons of animal and oil fats." Outbreaks of malaria, typhus, plague, yellow fever and other diseases must also be guarded against and provision made for emergencies arising from the uncontrolled movements of populations seeking to return to their homes. Help must be prompt, adequate, impartial and "avoid the stigma of charity."

Co-operatives Already Relief Agencies

The co-operative movement has already begun relief activities on its own account. Swedish consumer co-operatives for instance have already devoted several million crowns to helping Sweden's Scandinavian neighbours in Finland and Norway. In Great Britain the co-operative press has drawn the Government's attention to the possibility of utilizing agricultural and consumers' societies in the task of supplying food and other necessities to the European countries after the war. In the United States the Co-operative League of the U.S.A. has indicated its willingness to assist in the task of relief and reconstruction, pointing out "the long experience in local, national and international commerce of the co-operatives, the fact that they carry on business for service, and that they represent no political, racial or sectarian groups." Then too, the International Co-operative Alliance, with a prewar membership of 71,500,000 in 35 countries, has recently called on its affiliated organizations in all lands "to prepare energetically to play their part in the restoration of national and international life after the war."

Reasons why Co-operatives Useful Relief Agents

Some of the principal reasons mentioned in the treatise why co-operatives have been considered capable of playing a useful part in post-war relief are:

(1) The co-operative movement is an "established, experienced and proved organization ready for use." A new organization would require time to become established and to gain experience.

(2) The co-operative movement "can rely on the experience of tens of thousands of employees and workers, trained for social service, and a great number of democratically elected functionaries, who have close contacts with the masses of consumers, as well as experts in all fields connected with the production and distribution of consumers' goods."

(3) "The consumers' co-operative movement, in many of its activities, is habitually concerned with needs that are the same as, or very similar to, those requiring satisfaction under relief conditions."

(4) The co-operative movement is "an active self-help and mutual-aid organization, through which people, generally of low income, help themselves and one another to satisfy their needs for goods or services as economically as possible."

(5) "Co-operative organizations are not run for profit, but for service . . ."

(6) Co-operative organizations are "to a large extent self-supervisory, thus reducing the need for inspection and control by government or other relief authorities." It is stated however, that in a relief program where other bodies will be concerned, "there is likely to be some degree of external supervision."

(7) Co-operative societies, "originally set up for relief or emergency purposes have developed into economic and social institutions of a permanent character and of recognized importance."

(8) Co-operative agencies "would prepare the way . . . to the co-operative solution of the more complex social and economic problems of rehabilitation and reconstruction."

(9) Co-operatives are, to a considerable extent, the product of distressful conditions and have shown that " in common action, based on the principle of self-help through mutual aid," a solution to post-war relief may be provided.

(10) Co-operative organizations have been effective in providing relief in distressed areas in the past, as for example, in connection with Jewish relief and also in providing health services for Serbian children after the first Great War. Then too, many of the Chinese co-operative credit societies had their origin in crisis conditions, such as the great flood in the northern provinces of China in 1922.

THE LABOUR GAZETTE

PREPARED AND EDITED BY

THE DEPARTMENT OF LABOUR, OTTAWA, CANADA

Minister—Hon. HUMPHREY MITCHELL

Deputy Minister—ARTHUR MACNAMARA

Editor—HARRY J. WALKER

VOLUME XLIV] OCTOBER, 1944 [NUMBER 10

Notes of Current Interest

Canada's first Minister of Labour, Sir William Mulock, passes

On Sunday, October 1, death came to the Right Honourable Sir William Mulock, K.C.M.G., Canada's first Minister of Labour. The "Conciliation Act of 1900", which provided *inter alia* for the establishment of a Department of Labour and the publication of a Labour Gazette, was introduced in the House of Commons by the Hon. William Mulock, then Postmaster General, in June, 1900. The Act was given Royal assent on July 18 of that year, and the next day Mr. Mulock, by Order in Council, was made Minister of the new Department, a portfolio which he held, in addition to that of Postmaster General, until 1905, when he retired from political life.

Among his first official actions as head of the new Department was the founding of the LABOUR GAZETTE and the appointment of Mr. W. L. Mackenzie King, the present Prime Minister of Canada, as Editor. The first issue of the LABOUR GAZETTE appeared the following September and the publication has appeared monthly ever since.

Sir William was born in Bondhead, Ontario, in January, 1843, and throughout his long life contributed greatly to the progress of Canada and the Empire. He distinguished himself as a student, lawyer, educationist, legislator, cabinet minister and jurist. As Minister of Labour at the opening of the century he gave far-seeing leadership towards a better understanding of the problems of Canadian labour and their relationship to the national economy.

Decline in strike activity

During the month of September, 1944, strike activity in Canada reached its lowest ebb in over a dozen years. Time loss in man-working days was only 800 days. This is the lowest figure recorded for any month since August, 1930.

There were nine strikes reported during the month, involving 1,034 workers. Some of the strikes lasted less than a day.

So far this year there have been approximately half as many strikes as occurred during the corresponding period last year, involving about half as many workers, and half as much time loss (*see* p. 1241).

Union security and check-off clauses in collective agreements

Thirteen disputes arising from a union's request for union security and check-off clauses in a collective agreement have been investigated since January, 1944, by Boards of Conciliation appointed under the Wartime Labour Relations Regulations or under the now superseded Industrial Disputes Investigation Act.

In these cases the union has generally asked for a closed shop or a union shop. In no case has a closed shop been recommended

18544—1½

by a Board of Conciliation. In one instance a modified form of union shop was proposed in the majority report of a Board, with the employer's nominee disagreeing (Ontario Malleable Iron Company, Oshawa, Ontario, and its employees; L.G., Sept., 1944, p. 1117).

A more common Board recommendation has been the compromise arrangement that company and union agree to a maintenance-of-membership clause. Such a clause has been unanimously recommended in three cases; and in a majority report four times; with the employer's representatives dissenting. On one occasion the majority report recommended against maintenance of membership, the employees' nominee favouring it. The union voluntarily dropped its demand for a union security clause in two instances; while in another case the Board unanimously ruled against such a clause, on the grounds that the union concerned had had less than a year's experience of collective bargaining. (In this latter case the Board unanimously recommended a check-off.) The Board's report in the final case recommended that a union security clause be conditional on the result of negotiations by the union with other employers in the same vicinity.

The recommendations of the various Boards (which are not binding on either party to the dispute) may be summed up as follows:—

Union shop recommended in majority report	1
Maintenance of membership recommended unanimously	3
Maintenance of membership recommended in majority report	4
Maintenance of membership opposed in majority report	1
Union security issue voluntarily dropped by union	2
Union shop opposed unanimously	1
Union security to be conditional on success of negotiations with other employers	1
Total	13

Requests for the check-off of union dues have generally accompanied a union's demand for a union security clause. Of the thirteen cases mentioned above, the check-off was an issue in eleven. It was unanimously recommended four times, and in two instances Boards reported that it had been voluntarily agreed to by the company. The check-off was also recommended in three majority reports, with the employer's nominee disapproving. On one occasion it was opposed by the majority, and in the final case it was unanimously opposed, "having regard to the relatively small number of employees concerned, and the other circumstances of the case." (In this latter case the Board unanimously recommended maintenance of membership.)

The type of check-off clause generally favoured by Boards requires each employee to make a written submission to the employer, authorizing him to deduct each month the amount of the union dues, and to remit the amount to the union treasurer.

A summary of the recommendations concerning the check-off follows:

Check-off unanimously recommended	4
Voluntarily agreed to by employer	2
Recommended in majority report	3
Opposed in majority report	1
Unanimously opposed	1
Total	11

The various Board reports analyzed in this article have all been published in full in the LABOUR GAZETTE since February, 1944.

An article on maintenance of membership in Canada, containing definitions of the various union security clauses, appeared in the LABOUR GAZETTE for July (p. 871). The article referred to a recent survey of 194 collective bargaining agreements which indicated that 32·5 per cent contained a union security clause of one kind or another.

Applications to Wartime Labour Relations Board

From the time of establishment of the Wartime Labour Relations Board last spring until September 25, 150 applications for certification had been dealt with. Forty-eight unions had been granted certification by the Board and 17 applications had been rejected. Ten applications had been withdrawn. Twenty-two applications had been referred to provincial boards, and the remainder were either being investigated (43), awaiting decision of the Board (8), or in abeyance (2).

Provincial boards had dealt with 784 applications. Certification had been granted in 447 of these cases and withheld in 53 others, with the remainder awaiting final disposition. Eight appeals had been made to the National Board.

The British Columbia Board had dealt with 490 applications, granting certification in 339 cases and refusing it in 53 cases. The Ontario Board had handled 169 cases, granting certification in 20, refusing it in 35, with the remainder awaiting final disposition. Manitoba had handled 40 cases, Saskatchewan 46, New Brunswick 16, Quebec 15, and Nova Scotia 8. In explanation of the large number of cases dealt with in British Columbia it should be mentioned that recertification was given of certifications previously made under the provincial Industrial Conciliation and Arbitration Act.

Employment and industrial statistics

The table below shows the latest statistics available reflecting industrial conditions in Canada. Figures published by the Dominion Bureau of Statistics show increased industrial employment at August 1, when the number of persons added to the payrolls was rather above normal according to pre-war experience, although it was smaller than at the beginning of August in any of the last five years. The index was 184·6 at August 1 and 183·5 at July 1 as compared with 185·9 at August 1, 1943, and 117·5 at August 1, 1939. The 14,725 establishments reporting to the Bureau showed a total working force of 1,864,925 at August 1, which was 0·6 per cent greater than at July 1. The total weekly wages and salaries paid to

* Many of the figures in this table with an analysis are included in the Monthly Review of Business Statistics issued by the Dominion Bureau of Statistics, price $1.00 per year.

† Week ended September 28, 1944.

(1) Base, 1926=100. (2) Figures are for the end of the preceding month. (3) Base, June, 1941=100. (4) Base, 1935-1939=100. (5) Adjusted, where necessary, for seasonal variation. (6) Notes in the hands of the public at the end of the preceding month. (7) Figure for four weeks ended September 23, 1944, and corresponding previous periods. (8) Maclean's Building Review.

these employees increased by 0·3 per cent to $58,969,610 at August 1. Per capita weekly earnings receded from $31.72 at July 1 to $31.62 at August 1. The mid-summer reduction may be explained partly by the incidence of vacations and partly by the fact that the considerable increase in the number in recorded employment during this season ordinarily takes place in industries in which earnings tend to be less than average.

The increase in recorded employment took place among the non-manufacturing industries which ordinarily are responsible for most of the mid-summer expansion. The largest contra-seasonal curtailment of employment in manufacturing took place in iron and steel. Textiles and non-ferrous metals declined also. Food, lumber, pulp and paper, beverage and chemical factories showed increased activity. There was a below-average seasonal decline in logging. Increases in services, trade, communications, transportation and mining were moderate. Construction showed the largest gain, an increase of 12·4 per cent, which took place largely on highway work in Quebec.

The index of the physical volume of business recorded an increase in August to 233·1 from 232·2 in July. This compares with 241·0 for August 1, 1943. The indexes for the distribution of goods, construction and mineral production averaged lower for August, although coal production showed substantial increase. Manufacturing and electric power production advanced above the levels of the previous month.

Fractional decrease in index of cost of living

The Dominion Bureau of Statistics cost-of-living index declined from 118·9 for August 1 to 118·8 for September 1, 1944. Further seasonal declines in prices for potatoes and other fresh vegetables were largely responsible for this fractional decrease. The food index fell from 131·5 in August to 131·2 in September, as lower prices for potatoes, carrots, onions, cabbage, and turnips overbalanced increases in eggs and butter. The home furnishings and services index, down from 118·5 to 118·4, was the only other group index to show any movement. Decreases in this group occurred in the hardware and furniture sections. Other indexes remained unchanged at the following levels: rentals 111·9, fuel and light 108·7, clothing 121·5, and miscellaneous items, 109·0. After adjustment to the base August, 1939 as 100·0 the index was 117·9 at September 1.

Extension of day nursery plan

Day care for children of war-working Toronto mothers, provided for by the Dominion - Provincial Nursery Agreement, has been extended to include children between two and fourteen years of age, it has been announced by the Dominion Department of Labour.

Under the revised program, children up to age five can be placed under trained supervision in the wartime day nurseries. The new junior day care centres will take care of five and six year olds after kindergarten hours, and school age boys and girls, up to fourteen years of age, will be provided for in before- and after-school care programs.

The new plan was developed when it was found that a number of children over five years, who were too young to fit into the regular school day care program, were not included in the Nursery Agreement. Benefits to the children include visits to museums and public libraries, supervised games and outdoor sports, and planned, balanced diets.

There are 28 day nurseries, 38 school centres for day care of children, and six kindergarten units now operating in the Province of Ontario. Additional nursery units are being developed in those centres where war plants require this facility for their workers.

Conventions of labour organizations

Recently the three major Canadian labour organizations, the Trades and Labour Congress of Canada, the Canadian Congress of Labour, and the Canadian and Catholic Confederation of Labour, held their annual conventions. Accounts of the proceedings of these conventions and of the resolutions adopted, will appear in next month's issue of the LABOUR GAZETTE.

Canada Year Book 1943-1944, now available

The 1943-1944 edition of the Canada Year Book was issued recently by the Dominion Bureau of Statistics, under the authorization of Hon. James A. MacKinnon, Minister of Trade and Commerce.

Prior to 1943, the Canada Year Book was published annually from the earliest years of the Dominion's history. It has been the official statistical record of the development of the country—its resources, institutions, and social and economic conditions.

On grounds of wartime economy, however, the 1943 edition of the Year Book was not published and the one distributed in September covers developments over a two-year period, perhaps more important from the standpoint of the changes in the country's internal econ-

omy, than any other period in the history of Canada.

To include all necessary new material and at the same time condense the volume to a convenient size, references have been made in this one to earlier editions for standard material. The feature articles cover a variety of topics such as: Canada's Present Status in the British Commonwealth; Meteorology as it is Related to the Science of Aviation; The Development of Marshlands in Relation to Fur Production and the Rehabilitation of Fur Bearers; and the Canadian Government's Reindeer Experiment.

As evidence that the war has cut deeply into the nation's economic structure, the statistics of almost every chapter of the current edition of the Year Book reflect the extent to which war production and wartime controls have played their parts in maintaining output and supporting the price structure against growing pressures from all sides. The subject of National Income has been given new and extended treatment and Dominion, Provincial and Municipal Finance has been carefully reviewed. Outstanding developments in taxation have been considered, but owing to the reorganization of income tax statistics, made necessary by the changes in the basis and manner of payment of this tax during the past two years, this subject could not be covered as fully in this edition as in former ones.

The detailed tables, compiled to show combined Dominion and Provincial succession duties on sample estates, will, no doubt, prove informative and useful.

Special material has also been introduced in many other chapters to co-ordinate and explain the effects of the war. The following are typical: The War and Canadian Agriculture; The Influence of the War on the Pulp and Paper Industry; The Effects of the War on the Canadian Fisheries; The Influence of the Present War on Manufacturing; Wartime Controls Affecting Distribution and Trade; The Wartime Control of Transportation; and The Activities of the Wartime Prices and Trade Board in Controlling Prices, Rents and Supplies.

The advanced plans for the establishment of the new Departments of Social Welfare, Reconstruction and Veterans' Affairs render the collation of the work already done in Canada in connection with Social Welfare and the Post-War Rehabilitation of Personnel from the Armed Forces of considerable interest and value. In previous editions the treatment of such subjects was scattered among the various administrations carrying on work of this character, rendering it difficult to get a co-ordinated picture from former Year Books.

The 1943-1944 Canada Year Book extends to over 1,000 pages and deals with all phases of national life, especially those that lend themselves to statistical measurement. As complete a picture of the 1941 Census as was possible when the Year Book was in preparation has been given in the chapter on Population and a complete analysis of the occupations of the Canadian people has been included in an appendix.

Persons requiring the Year Book may obtain it from the King's Printer, Ottawa, as long as the supply lasts, at the price of $2 per copy. A limited number of paper bound copies have been set aside for ministers of religion, teachers, and bona fide students, at one dollar each. In the latter case application must be made to the Dominion Statistician, Dominion Bureau of Statistics, Ottawa.

Annual meeting, Canadian Institute of Public Affairs

Described in the *League of Nations News* as "an effective instrument of popular education" the Canadian Institute of Public Affairs held its annual meeting at Geneva Park, Lake Couchiching, from August 19 to 26.

The program dealt with international questions and domestic Canadian problems in about equal proportions. Four round-table conferences on (1) World Monetary Problems; (2) Russia, (3) The British Commonwealth; and (4) Canadian National Unity, were held each day and "illustrated the rapidly growing interest of Canadians in public questions". Three hundred and sixty seven persons attended the conference.

Canada's fire losses in 1943

Canada's Annual Fire Prevention Week was observed October 8 to 14. The purpose of this annual observance is to bring into focus the loss of life and property as a result of fire and to promote every effective method for curtailing such losses in future.

According to the Canada Year Book the property losses in Canada, caused by fire in 1943, amounted to $31,464,710. This was the heaviest annual loss since 1933. The loss per capita was $2.67 as compared with $2.70 in 1942. In 1943, the per capita loss was greatest in British Columbia, where it stood at $4.45. The uninsured losses amounted to $7,069,720, or 22·3 per cent of the total. Of the 47,594 fires reported in 1943, 1,355 were the subject of official inquiry, 84 prosecutions were instituted and 60 convictions were registered. In addition to the property losses 319 deaths were due to fires in 1943.

Employment for "unemployables" in Great Britain

It is stated in an article in the *Labour Press Service* (London) for September 6, that in 1940 there were 200,000 people in Great Britain classed as "unemployable." "That figure has been cut to 18,000 which means that 182,000 have been placed in productive work" in the past four years.

To accomplish this result the Ministry of Labour headquarters revealed that first of all the term "unemployable" was discarded. There might be neglected members of the community but no considerable number were regarded as totally unemployable. Then in the second place, all on the "unemployable" list were carefully and individually interviewed. It was found that some had been out of work for years and had lost their old skill. For these a period of rehabilitation and training was suggested and many took advantage of this offer. A living wage was paid during training and, it is asserted, "in a remarkably short time most were able to return to the workshops at their old trade."

Others again were no longer fit for their old jobs but were willing to undertake some different or lighter work. These, too, were given special training, etc. and many of them "fitted admirably into their new occupations."

It is declared that "some limbless and other handicapped persons were found capable after training of holding down jobs which, at first sight, seemed impossible for them to carry on." Most of the training was for war industry and included all types of engineering. Other persons who had no regular occupation, or who had never been in industry before, were also given special training courses and many of these too, were soon in productive employment.

Industrial tribunal for government railways in New Zealand

A Government Railways Industrial Tribunal has been provided for in New Zealand by an amendment of last April in the Government Railways Act, 1926. The legislation was requested by the four organizations of railway employees which include engine-drivers, firemen, cleaners, shop men, railway officers and tradesmen. The Tribunal is empowered to make orders prescribing wage scales, hours and other conditions of work. Its orders are binding on the Crown and on all railway employees whether or not they belong to one of the railwaymen's organizations. It may also make recommendations in respect of any matters concerning which the Minister of Railways has power to issue regulations.

The three-man Tribunal is to include one person nominated by the workers' organizations, one by the Railway Department and a Chairman selected jointly by the Minister and the employees' organizations. In default of agreement on the Chairman or the workers' representative, the Minister may appoint any person he deems fit. No member of the Tribunal may be employed by the Railways Department or by one of the railwaymen's organizations. Members are appointed for three-year terms.

Any railway employees' organization or the General Manager of the Government Railways may make application to the Tribunal for an order or a recommendation on subjects under its jurisdiction. The respondent in the case—either the General Manager or a workers' organization—is given an opportunity to submit to the Tribunal a statement regarding the claims in the application before the case is heard. Each party may appoint assessors who take part in the hearing of a case as if they were members of the Tribunal but who have no vote or share in the decisions of the Tribunal. The parties and other railwaymen's organizations not directly concerned may also appoint advocates to represent them before the Tribunal. Only a member of the Railways Department or an Assistant General Secretary of a railwaymen's organization may be an assessor or advocate.

If both parties are agreed on the matters in the application, the Tribunal may issue an order without holding an inquiry. Applications for a new order to replace an existing one cannot be made until at least 10 months after the effective date of the first order, and the new order may not come in force until a year after the former order became effective. Amending orders may be made by the Tribunal at any time on matters upon which all parties have agreed.

There is no appeal from the Tribunal's orders and they may only be challenged in a Court on the ground of lack of jurisdiction. All orders are subject to the limitations in regard to varying existing wage rates imposed by the Economic Stabilization Emergency Regulations, 1942 (L.G., 1942, p. 657).

Legality of wage strikes in United States

The National Labour Relations Board of the United States has recently clarified its interpretation of the protection due wartime strikers under the Wagner Act, (L.G. 1935, p. 343 and L.G. 1943, p. 561). It is stated in *The Labour Relations Reporter* of September 18, that despite governmental wage controls, workers are entitled to strike for wage

increases after collective bargaining negotiations have failed, and strikers will not be deprived of their rights under the Wagner Act unless such strikes are "precipitated by an unlawful demand that agreed wage increases be put into effect prior to approval by the War Labour Board."

The Board's interpretation was given in an amendment to a decision involving a furniture manufacturing company in the middle states and the United Furniture Workers, members of which had gone on strike to force the company to agree to their demand for a wage increase. The company had discharged the strikers and refused to reinstate them upon termination of the strike, even though replacements had not been made. In ordering reinstatement of the workers with back pay, the Board pointed out that "the government's power of review over wages . . . . was not intended to curtail or impair the employees' right to bargain collectively concerning wages . . . . or to lessen the employer's obligation under the National Labour Relations Act to bargain collectively in good faith on wage matters, except in so far as such provisions for wage stabilization made wage agreements subject to War Labour Board approval as a condition of their becoming effective."

Recent discussions of "no-strike pledge" by conventions of U.S. Unions

News articles in the New York papers in mid-September drew attention to debates in conventions of three important unions with respect to the continuance of the no-strike pledge given to President Roosevelt shortly after the United States entered the war.

At the convention of the United Automobile Workers, controversy ensued over reaffirming the pledge, despite appeals to the convention by President Philip Murray of the C.I.O. and R. J. Thomas U.A.W. President, for its retention. After a two-day session of debates, a resolution's report calling for re-affirmation of the pledge was finally passed, subject to a referendum vote among the membership within 90 days after the Convention.

Mr. Murray also called on the convention of the United Rubber Workers of America to retain their pledge to bar strikes and not "disregard a commitment to the country."

The delegates to the convention of the United Mine Workers of America, and the President John L. Lewis failed to recognize a telegraphic appeal from the Secretary of the Interior urging the adoption of a no-strike pledge for the duration of the war. President Lewis in an answering telegram, approved by the convention, rebuked the government for its treatment of mine workers in general and particularly the soft coal mine supervisors. The telegram also criticized the seizure of mines by the government as designed to deprive coal miners of their rights.

Manpower and job controls in United States

The Chairman of the War Manpower Commission at Washington, Paul V. McNutt, stated before the Senate War Investigating Committee recently that "with the ending of the war in Europe . . . . the required hiring of male labour through the United States Employment Service and the fixing of employment ceilings will cease."

He pointed out that the 48-hour week requirement could not be relaxed in all plants immediately after the defeat of Germany. However "since 4,000,000 workers will be released from their present employment, any controls that hereafter become necessary will be established locally to meet specific problems." It is the announced intention of the W.M.C. officials to consult with management-labour committees and procurement officials in localities where action may be necessary. But even with the regulatory controls removed, it was stated that "there will still remain the major functions and programs of the non-regulatory type." Included among these will be the continued function of area management-labour committees, which could formulate necessary manpower programs designed to overcome urgent manpower problems in the community on a voluntary basis." Then too, there would also be retained an expanded United States Employment Service counseling office.

Mr. McNutt emphasized the seriousness of the current manpower situation and the "desperate need" for increased production of certain items. He stated that "most of the discontinued production will be on items that are now in comfortable supply." Continuing he said, "I do not wish to convey the impression that manpower problems will disappear with the collapse of Germany. They will change sharply in character and in many ways become infinitely more complex. Until Japan is defeated, manpower requirements for war production must continue to have priority over all (other) demands."

Reconversion to civilian production in United States

A report to the President of the United States on the subject of industrial reconversion has been submitted by the Director of War Mobilization, Mr. James F. Byrnes. The report contains plans and recommendations for

the period following the defeat of Germany and during the continuing war with Japan.

With the defeat of Germany, the report states, the requirements of the procurement agencies for war materials and supplies will be reduced by approximately 40 per cent. A certain amount of war production will thus be continued, but it is anticipated that the situation will permit the resumption of maximum civilian production without delay, "thus preventing extended unemployment."

As between qualified war contractors, privately-owned plants, not normally engaged in production of a military character, will be given first priority to cease war production and reconvert to civilian production; government-owned plants will be kept in operation or reserve "until their production is clearly no longer required for military needs."

Control of materials by the War Production Board will be modified as rapidly as possible, as soon as supplies become more plentiful, the report states.

A committee is at present interviewing war contractors in government-owned plants to ascertain which of them are planning to exercise their option to buy or lease the plants for civilian production. Attempts are being made to have these plants put to use, by private capital, after the war as a means of aiding employment.

Manpower controls will be abandoned with the defeat of Germany, the report states, indicating that this is considered a means of facilitating the transfer of manpower from war to civilian production. However "the services available through the War Manpower Commission and the United States Employment Service will continue."

Unemployment compensation is considered as the "first line of defense against unemployment." Failure of Congress to provide for more liberal benefits than are at present allowed under the unemployment compensation systems of the various states, is criticized in the report.

With a reduction in war production of 40 per cent it is considered that a reduction in hours of labour is necessary in order to spread the work. A return to the 40-hour week is urged following victory in Europe, to replace the present 48-hour week necessitated by war needs.

In regard to public works, the report recommends that the Federal Government "time its expenditures of federal funds for road construction and work projects to relieve unemployment." The report does not, however, contemplate any control over the timing of expenditures by state and local governments such as is being planned in Great Britain, according to the White Paper on *Employment Policy* (L.G., August, 1944, p. 942).

Other sections of the report deal with vocational training, price ceilings, tax policy to induce the employer to invest and expand by encouraging him as to the "prospects of his making a profit," rationing, the food program, and other aspects of the return to a civilian economy.

40 cent minimum wage established in United States

A minimum rate of 40 cents an hour is now in effect in the United States for all industries subject to the Fair Labour Standards Act of 1938. The Act regulates the wages and hours of persons employed in interstate commerce or in the production of goods for interstate commerce. The 40-cent minimum has been reached a year in advance of the deadline fixed by the Act. The latter provided for a gradual raising of the minimum rate from a floor of 25 cents an hour fixed when the Act came into force in October, 1938, to 30 cents an hour in October, 1939, and 40 cents by October, 1945. It also made provision for the appointment of tripartite committees representing the public, employers and workers for each industry covered by the Act. The function of an industry committee was to recommend "the highest minimum wage rates for the industry which it determines, having due regard to economic and competitive conditions, will not substantially curtail employment in the industry." On the recommendation of a committee, wage orders establishing minimum rates in excess of the statutory minimum and up to 40 cents an hour could be made for an industry by the Administrator of the Act. All industries are now covered by such orders.

A total of 69 industry committees have been appointed. During the past five and a half years they have made 113 recommendations for raising minimum rates. More than half the recommendations were adopted by unanimous vote in the committees. The last two committees to recommend the 40-cent minimum were for the finance, insurance, real estate, motion picture and miscellaneous industries and the communications, utilities and miscellaneous transportation industries. Wage orders embodying their recommendation became effective July 17, 1944.

In announcing the new wage orders, the Administrator of the Wage and Hour Division of the U.S. Department of Labour pointed to the importance of the universal 40-cent minimum in the post-war world:—

> After the last war there was no anchor by which wage slashes could be held in check and the result was disastrous. This time minimum

wage rates and payment of overtime after 40 hours must be enforced. The Fair Labour Standards Act can be the foundation for a stable post-war wage structure.

Effect of long hours on women workers

A group of employers in New York State recently reported to the State Labour Department that lengthening of the work week for women workers had proved to be unsatisfactory and a loss of efficiency had resulted. In a survey made by the Department of 300 companies that had been granted permission to lengthen weekly working hours of women beyond the statutory forty-eight, it was found that less than one-third of the women were now working on an extended schedule. The companies surveyed employed 70,000 women, according to a report in the New York *Times*.

Labour turnover in United States

For every 1,000 workers on factory pay rolls in June, 1944, 54 quit, seven were discharged, five were laid off, four left to enter the armed services, and one left for other reasons, according to recent figures of the United States Department of Labour.

The military separation rate of four per thousand is the lowest since the United States entered the war.

The accession rate for all manufacturing was 75 per thousand, the highest during the current year.

Overconfidence as to the early end of the war prompted some workers to quit and go home to their peace-time jobs, it is stated.

The separation rate for women in manufacturing was 84 per thousand as compared with 61 for men. However, women were hired at the rate of 95 per thousand as compared with 62 for men.

Hours and earnings of workers in United States, July, 1944

Total hours worked per week in all manufacturing industries in the United States were 570 million in July, almost 15 million less than in June, due to the decline of ·8 of an hour in work-week, occasioned by the Independence Day holiday, the Secretary of Labour, Frances Perkins, reported recently. "The average work-week, while shorter than in June, was more than one half hour longer than in July, 1943," she said.

"Average hourly earnings were higher in July than in June due to the payment of time and a half by firms which were in operation on the holiday. However, weekly earnings were almost 75 cents below the June level. Each of the durable goods groups reported a shorter work-week, indicating that the holiday was not confined to plants in any one industry or group but rather cut across industry lines. In all but two of the durable goods groups, the shorter work-week was coupled with declines in employment. The increases in employment in the lumber and furniture groups only partially offset the drops in hours.

"The pattern for the non-durable groups closely resembled that for the durable. Average hours per week declined in all groups except tobacco, printing, and petroleum. The work-weeks in these groups remained unchanged. Employment increases in the food, printing, and petroleum groups are reflected in the rises in aggregate hours.

"The average hours per week in bituminous coal mining were 39·5 and in anthracite mining, 35·8. The work-week in each of these industries was considerably below the June level partly because of observance of the holiday but chiefly because of the occurrence of strikes."

Longevity among industrial workers

Statistics from the Metropolitan Life Insurance Company indicate that the average length of life among the Company's industrial policy holders is continuing at a high level, in spite of additional risks brought about by the war situation.

After increasing without interruption for 13 years, the longevity of America's industrial population experienced a setback in 1943 from the all-time high record established a year ago, the report states, but the decline was slight. In 1943 the average life expectancy from birth was 63½ years, as compared with 64 years in 1942.

This compares with an average life expectancy from birth of 60 years in 1935, 55 years in 1921, 46 years in 1911, and 34 years in 1889, among the industrial policy holders of the Company.

Representation of I.L.O. at international conferences.

One of the resolutions adopted at the Philadelphia Conference of the International Labour Organization last May, sought to assure close collaboration and a full exchange of information between the I.L.O. and other public international organizations.

In accordance with this policy, the Acting Director of the International Labour Office, Mr. E. J. Phelan, represented the I.L.O. as an official observer at the United Nations Monetary and Financial Conference held at Bretton Woods, N.H., last July, and also at the second session of the Council of the United Nations Relief and Rehabilitation Administration, held recently at Montreal.

Manpower

Review of Canadian Manpower Situation

Director of National Selective Service Describes Allocation of Workers to Meet War Needs

IN a speech delivered recently before editors of business publications, Mr. Arthur MacNamara, Director of National Selective Service, reviewed the manpower situation in Canada, describing the imposition of controls to meet war needs, and making brief mention of the potential role of selective service in the post-war period.

Pointing out that manpower shortages under the impact of war were not peculiar to Canada, Mr. MacNamara indicated that the task of mobilizing the country's men and women had been largely a pioneering job and stated that Canada had met the war's manpower demands in a democratic and practical way.

"The word 'manpower'," he said, "has only crept into common usage within the last three or four years. I say crept—leaped might be better, to express the suddenness with which the word manpower and the problems that it represents forced themselves upon us.

"Canada has never been a highly centralized country. It is a young country, where individuals have had a chance to escape from the confines of a set order of society and to pioneer, make their own way, live the kind of life that they want to build for themselves. Controls of any kind have been foreign to our way of life.

"When war broke out, however, Canada was faced with a job that had to be done on a national scale. That job was to build an army and to provide the materials to equip it.

"Manpower was at that time plentiful. In fact there was a larger body of unemployed than any of us find it pleasant to remember. And so we set to work to build an army and supply it without interfering any more than necessary with the course of peacetime production. But with the invasion of France and the Lowlands the situation suddenly took on a startling urgency. Our individualistic way of doing things definitely had to be shelved. Production of war goods was stepped up. Production of automobiles, radios, refrigerators and many other goods for civilian use was halted. The pool of available workers was absorbed as rapidly as machines could be provided for men and women to operate.

"Presently the position began to be reached where the supply of workers was smaller than the number of jobs available.

"It was then that the organization known as National Selective Service was formed, And it was then that editorials were written about Canada's manpower situation, and a new word was on everybody's lips.

Basic Task of National Selective Service

"The task that National Selective Service was called upon to perform was basically as follows: First, to supply men for the armed forces. Second to supply men for war industry. Third, to supply men for the essential services, such as food and clothing, necessary to maintain the army and the civilian population.

"How was the task to be done? The answer in principle was easy. Make everybody who was already in an essential job stay there. Transfer as many people as possible out of non-essential jobs and into war industry—maintaining meanwhile the flow of young men into the forces. In principle, as I say, the answer was easy. But in practice we were venturing into uncharted seas, attempting to do something to our men and women that had never been done before.

"What were the tools we had to work with? Well, we had to make them as we went along. The basis of our system was the network of local offices of the Dominion Employment Service, operating under the Unemployment Insurance Commission. But these offices had never been designed for such a task as this.

"In a normal peacetime year the offices used to place some two hundred and thirty thousand people in regular employment. Last year they had to place almost two million,[1] and do it, moreover, in accordance with rigidly-laid-down instructions and while carrying on also their functions in regard to un-

[1] See table on age 1273.

employment insurance. Dozens of new offices had to be set up and staffed. Staffs had to be trained.

Early Manpower Control Orders

"We embarked upon a set of orders designed to allocate the very human individuals who make up our country's manpower into the positions where they could be of most service in their country's hour of need. We moved slowly at first, keeping pace with the development of the employment offices.

"We began by forbidding workers to enter certain specified non-essential occupations without a permit. We moved, in June, 1942, to the important point where all changes in employment had to channel through selective service offices. In September of the same year, workers planning to leave their jobs were required to give seven days' notice, the same restriction being imposed on employers. All these regulations were intended as a determent to labour turnover, without being an actual bar. Selective service had not yet 'got tough'. But employers and the general public were becoming accustomed to the offices, and the office staffs were gaining valuable experience. Moreover, through records kept at local offices, we at headquarters were able to tell what the manpower situation actually was, and where the workers were being placed.

"Meanwhile a survey of industry was made, and each company was assigned a labour priority according to the importance of its work to the war effort. A manpower survey in January, 1943 completed our picture of the supply of workers in the country and where they were located.

Compulsory Transfers

"We were now ready to act in the matter of compulsorily moving workers into essential jobs, and the first in a series of employment transfer orders was issued in May, 1943. Each of these orders listed certain industries and occupations, in which workers were required to report to National Selective Service with a view to transfer to more urgent work. In working out this procedure, the human factor again became prominent. To begin with all of these men in non-essential work had some physical defect, whether serious or minor, or merely a question of age, to prevent their entry into the armed services. So not many of them could be placed in heavy work. Many had family responsibilities which could not easily be disregarded—though in some cases we helped with moving expenses or paid a small separation allowance to the man's family. Some had acquired a particular skill, valueless elsewhere, which brought them higher wages than they could hope to receive at their new jobs. But then too, on the other hand, there were some who had everything to gain by changing their employment, and had only failed to do so previously by reason of inertia. A few, a very few, flatly refused to budge, and became subject to our prosecution.

Other Controls

"Among other techniques devised, I would mention that of requiring men to remain on their jobs unless they got a permit from a Selective Service Office to leave and also requiring an employer to obtain a permit before anyone was laid off. This became known as the 'freeze' order.

"500,000 men have been rejected for service in the Army. This year we have been sending for these men to interview them to see whether they are suitable for jobs other than the jobs they are doing.

"We have built up a staff of experienced men who have been actually visiting plants to see that employers are not hoarding manpower by providing a shelter from Army service or keeping more men than the product being turned out warrants.

"Up to the end of August there have been interviewed at least 170,000 individual men who were checked under the Compulsory Transfer Order system or under the examination of 'rejects' plan.

"In examining these men we found that less than ten out of one hundred examined could be transferred to some more essential job. To put it in another way 90 per cent of the men interviewed were already doing jobs which were quite essential.

"In addition to the general employment system we have developed special campaigns to recruit labour for specific industries. Our plan to deal with farm labour has had outstanding success. I say without hesitation that it would have been impossible for farmers and other growers to take off the crops which have been taken off in the grain fields, fruit lands, tobacco fields, sugar beet fields and others too numerous to mention, had it not been for the assistance given by National Selective Service. We have made labour in Canada mobile. We have moved farmers from the West to the East and the East to the West.

"During the present Prairie harvest season we have transferred in one way or another no less than 25,000 people into the harvest fields. This may seem like a lot of people but we must remember there are over 200,000 farmers.

"Other special plans had to be developed for coal mining, stevedoring, lumbering and

logging, handling grain at the Head of the Lakes, packing plants and many others.

"I have not so far referred to the part played by the women of Canada, but their services have been splendid. They have gone into jobs never before invaded by women. Some with family responsibilities, have yet managed to give part of their time to the war effort. And they have done it all with a keenness and freshness of spirit that makes us honour their effort all the more. The magnitude of their efforts may be illustrated by the fact that the number of women in the Armed Forces or gainfully occupied increased from 638,000 in August, 1939 to practically double that total to-day.

Statistics of Manpower Allocation

"How have these plans worked? May I give you just a few figures:

PLACEMENTS EFFECTED BY EMPLOYMENT AND SELECTIVE SERVICE OFFICES

Year	*Male*	*Female*	*Total*
1939	270,020	114,862	384,882
1943	1,239,900	704,126	1,994,026

"The volume of placements during the year 1943 was about 5 times greater than in 1939.

"In June, 1939, the total in gainful employment including about 10,000 in the Armed Forces was 3,693,000.

"In June, 1944, this total had been increased to 5,016,000.

"This number of over 5,000,000 gainfully employed or in the Armed Forces is an 'all time high' for Canada and represents 56·5 per cent of the men, women and youths, 14 years of age and over. The figures constitute the proud record of accomplishments of National Selective Service.

Mobilization for the Armed Forces

"Our task of keeping industry supplied with workers is, of course, secondary to the necessity of filling the needs of the Armed Forces. The Mobilization Boards across Canada have done an outstanding job and I call your attention to the fact that during the last year or so there was very little complaint voiced by newspapers or others in regard to the actions of Mobilization Boards.

"Some mistakes were made and I would say the principal one was that in the early years of the war the magnitude of the job was not appreciated. The National Registration of 1940, for example, was done on a voluntary basis and one very definite mistake made was that those who registered were not given an individual number.

"The Labour Department has had responsibility for the mobilization for the army for about two and one-half years. In the earlier months it was uphill work. We have been ably assisted, I would say, by our critics who have not been too gentle in calling attention to the shortcomings.

"We are at the point where we can be proud of the accomplishments and we have just about completed the calling up of all men in the designated age classes.

"We still have a number of delinquents. The last figure I saw was under 35,000. I am not sure what it is to-day. The total manpower pool in the designated age classes was approximately one and three-quarter million and we have not yet located some 2 per cent of them.

"I think you will agree with me that this is not a bad record.

Increasing Productivity of Labour

"One way of offsetting a dwindling supply of workers, of course, is to increase the productivity of those who are left. Our most significant venture into this field is to encourage the formation of labour-management production committees. In plants where these committees are functioning smoothly, representatives of workers sit right down with management, and the practical ideas that emanate from these meetings are most stimulating to both sides and to the war effort. Suggestion systems are set up, by means of which workers' ideas are utilized in production. The problem of absenteeism, which is usually dozens of individual problems lumped under one name, is attacked with a new understanding, and the spirit of co-operation and high morale that may be born out of these joint endeavours is the sort of thing that one hopes to see more of in the world of the future. . . .

Changing Production Program

"Illustrative of the varied nature of the problems that we have had to cope with in mobilizing the nation's manpower, is the fact that no sooner had we completed our plans for bringing workers into essential jobs, than a brand new set of circumstances arose. As production difficulties in particular industries were overcome, and the supply of weapons became sufficiently great, workers were laid off, sometimes whole plants closed down. With the overall war production program by no means complete our problem became one of switching suddenly available workers into new jobs—with concomitant difficulties again resulting from the human factor.

"The task performed by National Selective Service has not been an easy one. It is my conviction that a contribution to the war effort has been made through the medium of this organization. It is a gratifying fact that the Canadian Institute of Public Opinion has within the last day or two completed a public inquiry. One question was 'Do you think this control (Selective Service) is necessary in wartime?' Sixty-nine per cent answered that control is necessary.

"We have a compact organization of closely integrated units each charged with important divisions of the work.

"In the building of this organization I freely admit that there was something of the process of trial and error; however, we were breaking new ground. Often, too, the development was done under a storm of abuse, which there was no time to answer and, indeed, we did not always know the answer.

Organization of National Selective Service

"The governing body of National Selective Service is the National Selective Service Advisory Board. No significant regulations concerning manpower are recommended to the government without approval of this Board. It is probably the most democratic Board in Ottawa and on it are representatives of workers, farmers, employers, the departments of National Defence, Munitions and Supply, Wartime Prices and Trade Board and Civil Service Commission, plus the Associate Directors. I have enjoyed my work as Chairman of this Board because I believe the activity of the Board has proven, over a two and a half year period, that results can be obtained by following a democratic plan even when the beliefs and interests of the individuals around the table create divergent views.

"The Advisory Board deals with policy.

"The administration is controlled by the Administration Board composed of Associate Directors. This Administration Board carries the burden of day to day administration problems.

"Decentralization has been provided by the appointment of regional directors and Regional Advisory Boards in the Maritimes, Quebec, Ontario, the Prairies and Pacific."

In further description of the work of National Selective Service Mr. MacNamara gave an outline of the work performed by the various Associate Directors during a typical week.

Future of National Selective Service

Mr. MacNamara then proceeded to a brief discussion of the future of National Selective Service. Pointing out that there were many unpredictable factors to be considered, he declared:

"The problems of preparing for peace contain in essence those same potentialities that necessitated the strong organization to mobilize the nation's manpower for war.

"Without meaning to be too vague I would say that Selective Service will now have to operate in reverse by gearing itself to take manpower out of war industries and place it into industries that will supply the pent-up demand for civilian goods—both for domestic consumption and the needs of war-ravished Europe through the functions of UNRRA.

"As to the controls which have been instigated, these controls will be dropped when it becomes evident the need has disappeared. I believe it will be necessary to maintain some measure of control for some time after the war.

"The Employment Service and National Selective Service will be amalgamated. We will develop an efficient National Employment Service with a minimum of compulsory control. We will probably wind up with the simple requirement that placements will have to be recorded.

"With the government responsible for social security will come the need for a definite and accurate record of placements and job opportunities. This record will be available through the National Employment Service.

"The objective will be full employment. With an expanding demand for civilian goods and an expanding export trade the objective should not be too difficult.

"Nevertheless, 2,000,000 people will have to be re-allocated. I refer to those in the Armed Forces and in war work. During the process of re-allocation there will be periods of temporary unemployment. We will thank our good fortune for unemployment insurance.

"During the last few months I have taken time off to visit many of our Employment Offices. In all of these Offices I have shaken hands with each individual from the telephone operator to the manager. I believe we have a keen efficient staff which can be expanded into an organization which will take up the mighty task of rehabilitating our men and women from the Armed Forces and from war work.

"The Labour Department will administer the Re-instatement in Civil Employment Act —it will be responsible for all placements— it will have the direction of training programs—it will continue to deal with evacuating Japanese—it will deal with labour relations and such wage control as may be decided upon and the Department is preparing for the work ahead.

"In conclusion I wish to pay tribute to the Canadian people for their understanding and patience and tremendous industry."

Index Numbers of Wage Rates in Canada, 1901-1943

Annual Survey Shows Continued Increase in Wage Rates During 1943

GENERAL wage rates in Canada have reached their highest level in the last forty-three years, according to the annual survey recently completed by the Department of Labour.

The general index number of wage rates for all of the industries covered in 1943 was 139·5 as compared with 129·6 in 1942, an average increase of 7·6 per cent. This compares with an increase of 7·7 per cent in 1942 over 1941 and 10 per cent in 1941 over 1940. The increase in wage rates from 1939 to 1943 was 32·0 per cent.

For the period August 1939, to December, 1943, the index of the cost of living advanced 18·4 per cent.

By occupational or industrial groups in order of appearance in the table, the percentage increases in 1943 over 1942 were as follows: Building Trades 8·8, Metal Trades 5·5, Printing Trades 1·9, Electric Railways 8·9, Steam Railways 9·8, Coal Mining 5·3, Common Factory Labour 12·1, Miscellaneous Factory Trades 6·9, Logging and Sawmilling 9·7, Metal Mining 3·6, Steamships 3·1, Laundries 7·9 and Telephones 5·6 per cent.

The wage data on which the above calculations are based apply mostly to June, 1943. Any cost-of-living bonus paid has been included throughout, including the last bonus ordered by the National War Labour Board which became effective in November, 1943.

A table of index numbers of wages has appeared since 1921 in the annual report on *Wages and Hours of Labour in Canada* issued by the Department of Labour as a supplement to the LABOUR GAZETTE. The last report in the series published was No. 25 (supplement to the October, 1942, LABOUR GAZETTE) and covered the years 1929, 1940 and 1941. Since no report in this series was published covering the year 1942, the index numbers for that year appeared in the LABOUR GAZETTE of December, 1943.

The accompanying table of index numbers of rates of wages contains figures showing changes in wages for the main occupational and industrial groups from 1901 to 1943, and certain additional groups which were added in 1911, 1913 and 1920. The base period used (wage rates in 1935-39 as 100) is the same as that used for the official cost-of-living index number issued by the Dominion Bureau of Statistics, thus making possible direct comparisons between numbers in both series.

For the period prior to 1939 the group indexes were given weights based on the number of workers in each industry as shown by the census of 1921 and 1931. For the years 1939 to 1943, weights are based on the 1941 census, made available since the last index numbers were computed. The use of the 1941 Census data made necessary a revision of the general index figures previously published for the years 1939 to 1942. The percentage changes from year to year as shown by the revised numbers are about the same as shown by the figures previously published.

The weights are as follows: Building Trades 9·0, Metal Trades 15·6, Printing Trades 1·5, Electric Railways 0·6, Steam Railways 5·9, Coal Mining 1·4, Common Factory Labour 13·9, Miscellaneous Factory Trades 39·3, Logging and Sawmilling 7·6, Metal Mining 2·5, Steamships 1·6, Laundries 0·4 and Telephones 0·5 per cent.

Wages in the Primary Textiles Industry

A supplement to this issue of the LABOUR GAZETTE is entitled *Wages in the Primary Textiles Industry* in Canada, 1943. It contains statistics on wages and hours collected as the result of a co-operative arrangement involving the primary textiles industry, the National War Labour Board, and the Department of Labour.

INDEX NUMBERS OF RATES OF WAGES FOR VARIOUS CLASSES OF LABOUR IN CANADA, 1901-1943
(Rates in 1935-39=100.)

Preventing Accidents from Abrasive Wheels

A COMPREHENSIVE monograph on safety in the use of abrasive wheels has just been published by the International Labour Office.*

The study was prepared at the request of the I.L.O. Correspondence Committee on Accident Prevention by Mr. G. Stevenson Taylor, Deputy Chief Inspector of Factories in Great Britain. Although the study was begun in 1932, publication has been delayed until 1944 because of the time required for making changes and additions suggested by the Committee at its 1934 and 1935 sessions, financial troubles and the war. The delay has permitted the insertion of considerable new material on recent experience and of the 1943 revision of the American Safety Code for the Use, Care and Protection of Abrasive Wheels (L.G., April, 1944, p. 439).

The composition and manufacture of the different types of abrasive wheels are described in the monograph. It is pointed out that most injuries from abrasive wheels are caused by flying particles when the wheels burst. Bursting may result from a wide variety of factors such as a flaw or crack in the wheel, excessive speed, lack of balance, improper mounting, undue pressure of work on the wheel, etc. Accidents may also arise from the operator's hand or clothing coming in contact with the revolving wheel. Serious eye injuries may result from flying particles of hot abrasive or metal and lung diseases may be caused by inhaling the fine dust produced in grinding operations.

Safety precautions recommended in the monograph include the provision of adequate guards for the wheels and all projecting nuts, screws, spindle ends and belts. Wheel guards should be capable of adjustment as the wheel is worn down, properly anchored, provided with side wings and constructed with peripheral members of adequate thickness in accordance with a table given in the publication. In selecting wheels, consideration should be given to the abrasive and bonding material most suited to the operation. Wheels should be examined for flaws and cracks when received, before mounting and regularly while in use. If not needed immediately, they should be carefully stored in a dry place.

Several recommendations relate to correct mounting, and it is suggested that newly mounted wheels should, before use, be run for a few minutes with no one in dangerous proximity. Wheels should be kept true by judicious dressing with proper implements. Chipping or hacking of wheels should be prohibited and side grinding reduced to a minimum. It is desirable to adjust the wheel rests as the wheel wears, so as to have it close to the face of the wheel. Prolonged immersion of an idle wheel in water or lubricant should be avoided. Particular care must be exercised in grinding heavy articles. It is recommended that a special person or persons should be made responsible for the mounting of wheels and maintenance of the grinding machinery, guards and dust-removal equipment.

While observing that "the methods of manufacturing and using abrasive wheels are so various that it is impossible to fix any general safe limit of wheel speed", the author recommends the following specific limits: bakelite and similar resinous bonded wheels, 9,000 feet per minute (46 m/sec.); elastic bonded wheels for cutting off, 8,000 feet per minute (40 m/sec.); ceramic bonded wheels, for rough grinding, 5,500 feet per minute (28 m/sec.) or for precision grinding, 6,000 feet per minute (30 m/sec.); magnesite or oxy-chloride bonded wheels, 4,000 feet per minute (20 m/sec.) with special precautions. Attention is drawn to the fact that "doubling the speed of revolution of a wheel increases fourfold its tendency to burst; but the diameter of the wheel must equally be taken into account". It is suggested that all wheels should have the safe working peripheral speed marked upon them in metres per second or feet per minute and grinding machines should have a notice affixed stating the maximum size of wheel permissible with safety.

To prevent eye injuries, operators engaged in dry grinding should wear suitable goggles or face screens or the wheels should be fitted with transparent screens. Dust generated in grinding can be satisfactorily removed only by localized exhaust ventilation. The efficiency of an exhaust installation is greatly increased if the heavy dust, burrs, fins and miscellaneous material is separated from the lighter dust by gravity.

Appendices to the monograph include, in addition to the American Safety Code, the text of safety regulations for abrasive wheels issued in Great Britain and Germany, a summary of the mathematical studies on the strength of abrasive wheels made by Dr. Vitaliano Colombo, Director of the Italian Association for the Prevention of Accidents, and a report on the research sponsored by the Norton Company in the United States on the stresses in rotating discs.

**The Safe Installation and Use of Abrasive Wheels*, International Labour Office, Studies and Reports, Series F, Second Section (Safety), No. 9, Montreal, 1944.

Decisions of National War Labour Board

DURING the month of September, the National War Labour Board issued decisions in the following cases:—

Price Brothers and Company Limited, Jonquière, P.Q., and International Brotherhood of Pulp, Sulphite and Paper Mill Workers and International Brotherhood of Paper Makers.

Northern Construction Company and J. W. Stewart, Limited, Vancouver, B.C.

Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, Local 650, and Canadian Consolidated Grain Company, Limited; Eastern Terminal Elevator Company, Limited; Fort William Elevator Company, Limited; Federal Grain, Limited; McCabe Brothers Grain Company, Limited; N. M. Patterson & Company, Limited; Ogilvie Flour Mills Company, Limited; United Grain Growers Terminal, Limited; Western Grain Company, Limited; Saskatchewan Pool Terminals, Limited; Manitoba Pool Terminals, Limited.

The B.C. Independent Theatres Association and British Columbia Projectionists' Society, Local 348 of the International Alliance Theatrical, Stage Employees and Moving Picture Machine Operators.

Okanagan Telephone Company, Vernon, B.C., and Interior B.C. Telephone Operators' Union.

McNamara Construction Company, Limited, and The Parity Committee of the Construction Industry for the Counties of Roberval, Lac St. Jean, Chicoutimi and Charlevoix-Saguenay.

Anaconda American Brass Limited.

Standard Lime Company, Limited, Joliette, Que., and Union Canadienne des ouvriers des produits de la chaux, Local No. 1.

Coast Building Corporation Limited, Vancouver, B.C.

Canadian Tube and Steel Products, Limited (Montreal) and United Steelworkers of America, Local 2423.

Bell Asbestos Mines, Limited (Thetford Mines, Que.), and Canadian Union of Asbestos Workers, Local No. 5.

Re: Price Brothers and Company Limited, (Jonquière, P.Q.), *and* International Brotherhood of Pulp, Sulphite and Paper Mill Workers and International Brotherhood of Paper Makers

Reasons for Decision

By leave of the Quebec Regional Board this appeal is taken from decision dated January 25, 1944, made under P.C. 5963, on an application for an increase in the base rate from 45 cents to 56 cents per hour. At the same time application was made with respect to the Kenogami and Riverbend mills of the same Company for a like increase. The rate in the latter mills was increased to 50 cents, while the rate in the Jonquière mill was increased to 47½ cents. The Jonquière mill is a board mill, while the other two were recognized as newsprint mills.

A differential in rates between newsprint mills and what are called specialty or board mills has been recognized in previous cases (E. B. Eddy Company and J. R. Booth Limited) and confirmed by the National Board (L.G., July, 1944, p. 837). The Regional Board saw fit to introduce this differential as between the Price Brothers mills located in the Lake St. John area.

In our view the matter is one of fact, and we should not interfere.

The appeal will be dismissed, except that the Regional Board's Finding and Direction will be amended to make it effective with the first payroll period beginning on or after October 20, 1943.

September 12, 1944.

Re: Northern Construction Company *and* J. W. Stewart, Limited (Vancouver, B.C.)

Reasons for Decision

This is an appeal from a decision of the Regional War Labour Board for British Columbia, dated June 3, 1944, refusing an application by the Companies for permission to pay employees engaged on dredging operations at Powell River up to two dollars and twenty-five ($2.25) cents per day for board and lodging.

The Regional Board followed its established practice and authorized the Companies to pay the actual cost of board and lodging in excess of one dollar and thirty-five ($1.35) cents per day.

The rule followed in the decision under appeal is one which is intended to protect employees from excessive charges and its application to this case would appear from this distance to be rather unnecessary. However, the Regional Board is fully aware of what would be the probable effect of the granting of this application upon the local situation. We have not got that knowledge and consequently we do not think that our intervention can be justified.

The appeal must therefore be dismissed.

September 19, 1944.

Re: Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, Local 650, *and* Canadian Consolidated Grain Company, Limited; Eastern Terminal Elevator Company, Limited; Fort William Elevator Company, Limited; Federal Grain, Limited; McCabe Brothers Grain Company, Limited; N. M. Patterson & Company, Limited; Ogilvie Flour Mills Company, Limited; United Grain Growers Terminal, Limited; Western Grain Company, Limited; Saskatchewan Pool Terminals, Limited; Manitoba Pool Terminals, Limited.

Reasons for Decision

This is an appeal from a finding and direction of the Ontario Regional War Labour Board dated the 5th day of April, 1944. The said finding and direction inter alia directs as follows:—

"Upon consideration of all material filed and of the representations made by all parties, the Board has come to the conclusion that it is necessary for it to rescind its decision, communicated to you under date of September 11, 1943, insofar as it affects monthly rated employees below the rank of general foremen, and the Board has directed me to advise you that it has directed the companies to increase the rates of remuneration of such employees in an amount equivalent to 10 cents per hour over their monthly rates in effect immediately prior to the date of such rescinded decision. Resulting adjustments in salary rates shall be effective from the 1st day of August, 1943. .....

(*a*) The Board considers that the proposed amendment to Rule 1 is not one which affects wages or working conditions and therefore it does not lie within the purview of the Board to make any order in this regard.

(*b*) With regard to the request for amendment to Rule 3, I am directed to advise you that the Board has approved and directs the companies to establish a standard work day of eight hours and a standard work week of forty-eight hours.

(*c*) The Board has approved of the amendment of Rule 4 as requested.

(*d*) With regard to the requested amendment to Rule 5, I am directed to advise that the Board approves and directs the payment of overtime after eight hours per day and after forty-eight hours per week in accordance with the terms of the enclosed formula. .....

I am directed to advise you further that with regard to monthly rated employees overtime for such employees is to be paid on a straight time pro rata hourly basis."

The appeal of the employers is as follows:—

(1) That the increases to the monthly employees should not have been directed.

(2) That the effective date should not have been August 1, 1943.

(3) That an eight-hour day should not apply to the monthly employees and that the general working hours provided in Clause 4 of the agreement of September 20, 1941, as amended by the order appealed from should not apply to the monthly employees.

Before considering the above-mentioned directions appealed from, it is helpful to note some of the earlier applications made by the parties concerned to the said Regional War Labour Board. Early in 1943 the employees asked the employers that the hourly and monthly employees of the Elevator Companies concerned receive an increase of 10 cents per hour in their basic wage rates. This the employers declined to grant. However, in July, 1943, an application was made by the Company, and endorsed by the employees, for an increase of 10 cents per hour to certain hourly employees. The employees in their letter to the Chairman of the Elevator Committee stated with respect to this application that:—

"In joining the Companies in application to Board for basic sixty cent rate for hourly employees, it is with the understanding that the Companies will meet us promptly for dis-

cussion of proposals we shall make on monthly rates. Our action in joining Companies in request for increased hourly rates is without prejudice to our later application to Board for monthly increases in the event we cannot reach settlement with Companies."

This application was approved by the said Regional War Labour Board on or about July 28, 1943.

Subsequently, the Company requested that the wage rates of 55 cents per hour for other hourly employees be increased to 65 cents per hour. This request was also approved. On or about July 30, 1943, the employers sought from the said Regional War Labour Board authority to pay certain increases to the monthly employees. On September 11, 1943, the said Regional War Labour Board authorized the said employers to increase the monthly salaries of the monthly employees by various amounts from $0 to $20 per month. The employees subsequently received copies of the authorizations of September 11, 1943, but they say that such authorizations constituted the first notice they had received that any increase had been applied for by the employers for their monthly employees. In short, they say that this increase was granted on an ex parte application by the employers and that they should have been notified of the application in order that their representations could have been submitted before any determination respecting the same had been made by the said Regional War Labour Board. On November 22, 1943, the employees applied to the Regional War Labour Board requesting amendments to several paragraphs of the agreement of September, 1941, between the employers and employees concerned in this appeal, and requesting a finding and direction that an increase equivalent to 10 cents per hour be given to all monthly employees. The employers also sought a further increase of 10 cents per hour to the hourly employees. On April 5, 1944, the said Regional War Labour Board issued its finding and direction with respect to this application.

Consideration will now be given to several directions appealed from. First, it was argued on the hearing of this appeal that the increase of 10 cents an hour to the hourly rated employees, granted in July, 1943, had not been justified as a result of proper comparisons pursuant to Section 25 of Order in Council P.C. 5963. After hearing the parties there is very good reason to believe that neither the employers nor the employees supported their application for an increase by offering comparisons as contemplated by said Section, but no sufficient reasons were given by the appellants to justify this Board in concluding that the said Regional War Labour Board disregarded the provisions of this Section either in granting the increases to the 50 cents per hour employees or the 55 cents per hour employees. Likewise, sufficient reasons were not submitted to warrant the conclusion that the said Regional War Labour Board did not apply to the facts and special conditions and special circumstances submitted to it and within its knowledge, the proper comparisons when considering this application by the Company on behalf of the monthly employees, and, before issuing its authorization of September 11, 1943. It is unfortunate that the said Regional War Labour Board did not, before determining the matter, notify the employees of this application and thus have afforded them an opportunity to make representations respecting it.

The result of all these applications, authorizations, and findings and directions is that much confusion and differences of opinion have resulted as to the methods employed by the Regional War Labour Board in reaching its final direction of April 5, 1944, and, while as a consequence, there may be some reason for suspecting that the comparative basis provided for in Section 25 of Order in Council P.C. 5963, may not have been at all times properly followed by the said Regional War Labour Board, the appellants have nevertheless failed to satisfy this Board that in the final result the said Regional War Labour Board erred in principle, disregarded important facts, or failed to come to the reasonable solution of the problems involved. Insofar as this part of the appeal is concerned, this Board declines to interfere with the decision of the Regional War Labour Board to grant a uniform increase equivalent to 10 cents per hour to all monthly employees, and the appeal against this portion of the finding and direction is, therefore, dismissed.

Second, as to the effective date, while generally undere P.C. 5963 the usual practice has been to limit the effective date of a finding and direction to the date of the application, nevertheless in all the circumstances of this case, and having regard to the several applications that were made, and the relation of each to the others, and having regard to the fact that August 1, 1943, was fixed as the effective date for the employers' own proposals with respect to the increases to the monthly paid employees, this Board is of the opinion that the Regional Board did the proper and sensible thing when it made the revised increase to these employees effective from August 1, 1943. The appeal against this portion of the said finding and direction is, therefore, dismissed.

Third, as to the direction respecting the eight-hour day and fixing the limits of work

for each day, this Board is of opinion, that, notwithstanding the assumption by both employers and employees that the direction of the Regional War Labour Board resulted in establishing an eight-hour day for the monthly rated employees, the language used by the said Regional War Labour Board in its said finding and direction is not sufficient to achieve this result.

After careful consideration of the effect of the Regional War Labour Board's decision not to modify Section 1 of the agreement in the manner requested by the employees, this Board is satisfied that the amendments to Clauses 3, 4, 5 and 6, as provided for in the finding and direction, do not apply to the monthly employees. In like manner the monthly employees are not affected by the provision in the finding and direction amending the general working hours. This Board wishes to add that in any event on the evidence before it and on the material submitted to the Regional War Labour Board it would not have directed that the eight-hour day be made applicable to the monthly employees. For the same reasons this Board would not have made applicable to the said monthly employees the amendment to Clause 4 of the agreement. This Board therefore allows the appeal against that portion of the said finding and direction which ordered or purported to order that an eight-hour day should be applicable to the monthly employees and fixed or purported to fix the general working hours applicable to the monthly employees.

It follows, therefore, that any direction by the Regional War Labour Board with respect to overtime for the monthly rated employees should not have been made and this appeal is also allowed with respect to the following clause in the finding and direction by the said Regional War Labour Board, namely:—

"I am directed to advise you further that with regard to monthly rated employees overtime for such employees is to be paid on a straight time pro rata hourly basis."

Cross Appeal

The employees in their application of November 22, 1943, sought also an increase of 10 cents for the hourly employees. This request was not granted by the Regional War Labour Board and there is a cross appeal by the employees to this Board in which this increase is sought. It is apparent that the Regional War Labour Board had all the relevant facts before it when it rendered its finding and direction. No additional facts have been presented to this Board to justify the increase so sought. This Board, therefore, dismisses the cross appeal.

September 20, 1944.

Re: The B.C. Independent Theatres Association *and* British Columbia Projectionists' Society, Local 348 of the International Alliance Theatrical, Stage Employees and Moving Picture Machine Operators

Reasons for Decision

This is an appeal by the Association on behalf of the owners of four theatres located in Vancouver and New Westminster who were directed by the Regional Board on March 27, 1944, under the provisions of P.C. 5963 to increase the hourly rate for projectionists by ten (10) cents.

The matter was considered under Section 25 of the former Order and the Regional Board apears to have made comparisons on the basis of location and seating capacity. The appellant urges that this Board should recognize a differential between chain and independent theatres and preserve the pre-existing difference in rates.

The Regional Board had the advantage of first-hand information and we are not prepared to say that it proceeded upon a wrong basis.

The appeal must be dismissed.

September 20, 1944.

Re: Okanagan Telephone Company (Vernon, B.C.), *and* Interior B.C. Telephone Operators' Union

Reasons for Decision

The Union appeals from a decision of the British Columbia Board dated June 3, 1944, refusing its application for the establishment of a range of wage rates for telephone operators of from eighteen dollars ($18) to twenty-five dollars ($25) per week. P.C. 9384 is the applicable Order in Council; leave to appeal was granted by the Regional Board.

On March 9, 1944, the Regional Board directed a general 10 per cent increase in wages but the Union considered the increase insufficient because it did not give the operators the rates paid by the British Columbia Telephone Company at Vancouver.

The Company respondent operates throughout the Okanagan Valley and comparison with a large company serving a metropolitan area is perhaps unreasonable. In any event, under the current Order in Council the matter is not necessarily one of comparison, as it was under Section 25 of P.C. 5963; it must now be shown that the increase requested is "neces-

sary to rectify a gross inequality or gross injustice".

The Regional Board does not appear to have made an error in ordering the 10 per cent increase rather than establishing the range applied for. It has not been shown that it wrongly exercised its discretion and we must dismiss the appeal.

September 20, 1944.

Re: McNamara Construction Company, Limited, *and* The Parity Committee of the Construction Industry for the Counties of Roberval, Lac St. Jean, Chicoutimi and Charlevoix-Saguenay

Reasons for Decision

(Oral Decision)

The Board has considered the representations made this morning as to lack of jurisdiction on the part of the Quebec Regional War Labour Board to make the order dated January 5, 1944, which is appealed from.

The Board is satisfied, having heard the representations made by counsel on behalf of the Company and by counsel on behalf of the Parity Committee that the Quebec Regional War Labour Board had no jurisdiction to make the order appealed from and the appeal is therefore allowed, and the order of the Quebec Regional War Labour Board, appealed from, is hereby vacated.

September 15, 1944.

Re: Anaconda American Brass Limited

Reasons for Decision

This is an appeal from the decision of the Regional War Labour Board for Ontario. In its application the appellants sought from the said Regional War Labour Board approval of a range of wage rates for a classification which would comprise its Technical Supervisor, Production Supervisor, Mechanical Supervisor, Economy Supervisor and Labour Supervisor. The said Regional War Labour Board, however, was not satisfied that a single classification would be applicable to the said employees and refused to approve the range of rates asked for. On the argument and material submitted to this Board it is apparent that the decision of the said Regional War Labour Board should not be disturbed in this regard.

The appellants then sought to increase the wage rates being paid to the Economy Supervisor and the Labour Supervisor from $5,166.40 to $5,600 per annum. On behalf of the appellants it was urged that these officials would suffer a gross injustice if the increases were not granted. This Board, however, is satisfied that the said Regional War Labour Board came to a proper decision on all the relevant facts in respect to the alleged injustice and refused to approve the suggested increases. It should be noted also that no sufficient evidence was submitted to this Board to indicate that the said officials suffered a gross injustice.

As to the request submitted to the said Regional War Labour Board by the appellants respecting the position of assistant production supervisor, this Board is of opinion that, first, insufficient information was submitted by the appellants to warrant approval of the rate asked for and, second, that it was clear from the evidence submitted to this Board that the position of Assistant Production Supervisor was definitely above the rank of foreman and that any application with respect to the occupant's salary should not have been made to the said Regional War Labour Board in the first instance, but should have been considered under the Wartime Salaries' Order.

With respect to all officers and officials whose salaries were under discussion on this appeal, it appeared very clear to this Board on the evidence submitted that all of them were above the rank of foreman and that they should have been so determined by the said Regional War Labour Board.

This appeal is dismissed.

September 27, 1944.

Re: Standard Lime Company, Limited (Joliette, Quebec), *and* Union Canadienne des ouvriers des produits de la chaux, Local No. 1

Supplementary Reasons for Decision

A 5-cent increase was ordered in this case by our decision dated August 3, 1944.[1] The appellant Union requests that the increase be payable from the date of its application, namely December 21, 1943; while the Company urges that the effective date be August 1, 1944 when it indicated its willingness to pay the increase. We have come to the conclusion that the date should be March 1, 1944 when the Regional Board rendered the decision from which the Union appealed.

Finding and Direction accordingly.

September 26, 1944.

[1] L.G., Sept., 1944, p. 1101.

Re: Coast Building Corporation Limited (Vancouver, B.C.)

Reasons for Decision

Leave having been refused below, this is an application for leave to appeal from a decision of the British Columbia Regional Board dated April 5, 1944 under the provisions of P.C. 9384.

On October 16, 1943 the Company applied for permission to pay elevator operators $90 per month and the Regional Board, instead of giving an authorization, issued a direction to pay that rate.

On March 28, 1944 the Company applied for permission to establish a new classification for what it considered to be a different type of employee and to pay a monthly rate of $80. This application was refused and is the subject matter of this appeal.

The rate applied for is quite in line with the going rate in the area and had it not been for the direction issued in October of 1943, which, to use a legal expression, was *ultra petita,* the appellant could probably now pay the lower rate without recourse to the Regional Board.

In these circumstances, we are of opinion that leave should be granted and that the appeal should be allowed and a range from $80 to $90 be authorized for the classification described in the application.

September 28, 1944.

Re: Canadian Tube and Steel Products Limited (Montreal), *and* United Steelworkers of America, Local 2423

Reasons for Decision

The Union appeals from a decision under P.C. 5963 of the Quebec Regional Board dated December 14, 1943 refusing the following increases in basic rates:

Labourers from 45 to 55 cents per hour
Machinists from 70 to 85 cents per hour
Roll Turners from 75 cents to $1.00 per hour

The Regional Board had dealt with the matter on two previous occasions. First on October 19, 1943 it found that there was no comparative basis permitting an increase under section 25. Then on November 16, 1943 the Regional Board directed payment of the increased rates upon a finding that they had been approved by the National Board and the Regional Boards for Ontario and Nova Scotia. Later, by the decision now under appeal, the Regional Board reversed itself again and refused the application on the ground of the Company's inability to pay.

Apparently the Regional Board had in mind the National Board's decision in the Steel case (L.G., 1943, p. 439) when it issued the second decision on November 16, 1943. We think the Regional Board misdirected itself in applying that decision, because the basic rate then established at Sault Ste. Marie and Sydney was 50 cents. In any event there was no evidence that the plant operated by the appellant was comparable to the "basic steel" mills involved in the Steel case.

Our conclusion is that, on the evidence of the Regional Board's three successive decisions the correct one under P.C. 5963 was the first.

The appeal must, therefore, be dismissed.

September 28, 1944.

Re: Bell Asbestos Mines, Limited (Thetford Mines, Que.), *and* Canadian Union of Asbestos Workers, Local No. 5

Reasons for Decision

This is an application by the Union for a 15 cents hourly increase in wage rates.

With the exception of this company, the entire asbestos mining industry was dealt with in the case decided by the National Board on April 13, 1944 when a general increase of 4 cents was awarded (Canadian Johns-Manville Company Limited and others, L.G., May, 1943, p. 602).

The applicant laid stress upon the injury which it alleges asbestos mining causes to the health of the employees. Particular reference was made to "asbestosis" as a hazard of employment peculiar to this industry. The evidence, however, does not satisfy us that there are any circumstances to justify an increase in this case beyond the rate of increase granted to the employees of the other companies.

There will be a finding and direction providing for a 4 cent increase, effective from the date of application, namely May 10, 1944.

September 29, 1944.

Industrial Disputes and Conciliation

Introduction

THE *Industrial Disputes and Conciliation* section contains monthly articles dealing with proceedings under the National Wartime Labour Relations Regulations, Conciliation Work of the Department of Labour, and Strikes and Lockouts in Canada, Great Britain and other countries.

Recent Proceedings under the Wartime Labour Relations Regulations.—Under the Wartime Labour Relations Regulations, P.C. 1003, the Government has extended its jurisdiction over employer-employee relations which are normally exclusively within the provincial field, to the extent considered necessary to cover adequately employers and employees in industries "essential to the efficient prosecution of the war", but without attempting to include other industry which has not a direct bearing on war production. In so far as these latter industries are concerned, each province can make its own decision as to whether or not they shall be brought under the Regulations.

Agreements have been made under the Regulations between the Dominion and every province, except Alberta and Prince Edward Island, providing for the setting up of provincial agencies for the administration of the Regulations.

The work of the Wartime Labour Relations Board (National) is here described in two separate articles. The first deals with applications made by unions for certification and their disposition by the Board; the second describes conciliation proceedings under the Regulations and includes the reports of Boards of Conciliation.

Conciliation Work of the Industrial Relations Branch.—Conciliation proceedings are carried on by the Industrial Relations Branch of the Department of Labour under the provisions of the Conciliation and Labour Act which empowers the Minister to inquire into the causes and circumstances of a dispute, to take such steps as seem expedient for the purpose of bringing the parties together, and to appoint a conciliator or an arbitrator when requested by the parties concerned.

Strikes and Lockouts.—The latest information concerning strikes and lockouts in Canada is published monthly in tabular form, with a summary appearing once a year. The summary of strikes and lockouts in Canada and other countries during 1943 appeared in the LABOUR GAZETTE for March, 1944.

The latest available information as to strikes and lockouts in Great Britain and other countries appears from month to month.

Applications for Certification under the Wartime Labour Relations Regulations

THE Wartime Labour Relations Board (National) met for three days during the month of August. During this period the Board received twenty-three applications, held three public hearings, issued three certificates designating bargaining representatives, approved the withdrawal of one application, referred two applications to provincial jurisdiction and gave decisions in four appeal cases.

Certifications Issued

(1) Montreal Harbour Staff Employees' Association and National Harbours Board, Montreal, P.Q. (L.G., July, 1944, p. 845).

The Association and Messrs. W. E. McCarthy, Ed. Eustace, F. G. Laroche, D. H. White, J. A. Bouthillier, William Dixon, G. McCulloch, William Jamieson, G. J. Smith, Mrs. M. Stanley and Miss F. Sullivan were certified as bargaining representatives for employees engaged on a stated monthly or annual salary basis and certain employees paid on a weekly salary basis, excepting department heads, professional engineers, confidential employees and certain other small groups.

Certification of bargaining representatives followed an examination of the Association's membership records by officers of the Board. A public hearing was also held.

(2) Commercial Telegraphers' Union, Canadian Pacific System Division No. 1, and Canadian Pacific Railway Company (Communica-

tions Department) (L.G., Aug., 1944, p. 967). Following a preliminary investigation of the application and a public hearing, the Board ordered that a representation vote be taken. Out of 212 eligible employees, 158 voted in favour of the applicant union and 38 against. The union and Messrs. G. R. Pawson, C. J. Judge, H. J. Moreau, C. W. Pethick, C. J. Murphy, C. A. Huffman, W. A. Whyte, Ian Burns, and W. D. Brine were certified as bargaining representatives for certain supervisory employees on morse and automatic services, wire chiefs, mechanical staffs and installers, broadcast supervisors and attendants, repeater chiefs, supervisors and attendants of the Communications Department of the Canadian Pacific Railway Company, except chief operators, assistant chief operators, early night chief operators, and all-night chief operators, morse traffic supervisors, printer traffic supervisors, RS traffic chiefs (Montreal and Winnipeg), managers of branch offices, "B" Montreal, "GX" Winnipeg, "CX" Calgary, and "VX" Vancouver.

(3) Employees Welfare Board of the Hudson Bay Mining and Smelting Company Limited and the Hudson Bay Mining and Smelting Company Limited, Flin Flon, Manitoba, and three subsidiary companies namely: Emergency Metals Limited (Mandy Mines) Hudson Bay Air Transport Limited, Flin Flon, Manitoba and Churchill River Power Company Limited, Island Falls, Sask., (L.G., August, 1944, p. 967). Following the preliminary investigation of the application and a public hearing the Board ordered that a vote to elect bargaining representatives be taken of the employees of the company and the three subsidiary companies. Out of 1,872 eligible employees of the Hudson Bay Mining and Smelting Company Limited, 919 voted for the bargaining representatives nominated by the Welfare Board and 579 against. Since a majority of those eligible to vote in this instance did not support the election of the bargaining representatives their application for certification was rejected. Of the 51 eligible employees of Emergency Metals Limited, 33 voted for the bargaining representatives nominated by the Welfare Board and 11 against. All three eligible employees of the Hudson Bay Air Transport Limited voted for the bargaining representatives nominated by the Welfare Board. Of the 77 eligible employees of the Churchill River Power Company Limited, 59 (all those voting) favoured the bargaining representatives nominated by the Welfare Board.

The Employees Welfare Board and Messrs. Thomas Russel, C. G. Snyder, R. M. Locker, R. L. Booker, A. Imrie, Murray Ferg, J. Eidt, and H. Ressor were certified as bargaining representatives of the employees of the said three companies engaged in production or office work, exclusive of shift bosses, foremen and superintendents.

Application for Certification Withdrawn

Constables and Special Agents, Canadian National Railways Federal Union No. 131, (T. and L.C.) and the Canadian National Railways (Investigation Division) Montreal, P.Q., (L.G., July, 1944, p. 845). On the request of the Secretary Treasurer of the applicant union, the application for certification of bargaining representatives was withdrawn.

Applications Referred to Provincial Jurisdiction

(1) The application of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees for certification of bargaining representatives of certain employees of the Essex Terminal Railway Company of Walkerville, Ontario (L.G., Sept., 1944, p. 1109) was referred to the Ontario Labour Relations Board, as the Wartime Labour Relations Board (National) lacked jurisdiction.

(2) The application of the International Brotherhood of Electrical Workers, Local B825 for certification of bargaining representatives of certain employees of the Gatineau Power Company, Grand Falls, N.B., was referred to the New Brunswick Wartime Labour Relations Board as the Wartime Labour Relations Board (National) lacked jurisdiction.

Applications for Certification under Investigation

(1) National Association of Marine Engineers of Canada, Incorporated, District Council No. 4, on behalf of Marine Engineers of Union Steamships Limited, Vancouver, B.C.

(2) National Association of Marine Engineers of Canada, Incorporated, District Council No. 4, on behalf of Marine Engineers of Canadian National Railways (B.C. Coast Steamship Service), Vancouver, B.C.

(3) National Association of Marine Engineers of Canada, Incorporated, District Council No. 4, on behalf of Marine Engineers, employees of the Canadian Pacific Railway Company (B.C. Coast Steamship Service), Vancouver, B.C.

(4) Brotherhood of Maintenance-of-Way Employees, on behalf of employees engaged in maintaining and repairing of track motor cars (gasoline) of the Canadian National Railways, Winnipeg, Man.

(5) International Brotherhood of Electrical Workers, Local B344, on behalf of employees in the electrical department of the Prince Rupert drydock and shipyard, Grand Trunk Pacific Development Company, Prince Rupert, B.C.

(6) Canadian Brotherhood of Railway Employees and Other Transport Workers, on behalf of the employees of the engineers department of the Fort Garry Hotel, Canadian National Railways, Winnipeg, Man.

(7) Vancouver Harbour Employees' Association (affiliated with the Civil Service Federation of Canada), on behalf of certain employees of the National Harbours Board, Vancouver, B.C.

(8) International Union of Operating Engineers, Local 882, on behalf of the heating plant employees of the Canadian Pacific Airlines Limited, Sea Island, B.C.

(9) Canadian Seamen's Union, on behalf of the unlicensed personnel of "S.S.F.V. Massey," Foote Transit Company Limited, Toronto, Ontario.

(10) Canadian Brotherhood of Railway Employees and Other Transport Workers, on behalf of all monthly and hourly rated employees below the rank of general foreman of the Canadian Pacific Railway Company (grain elevator employees), Port McNicol, Ontario.

(11) Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, on behalf of all unlicensed personnel of the British Columbia Lake and River Service (Kootenay, Arrow and Slocan Lakes, B.C.) of the Canadian Pacific Railway Company.

(12) International Association of Machinists, Lodge No. 1848, on behalf of machinists, mechanics, repair men, pipe fitters, blacksmiths, their helpers and apprentices of the Hudson Bay Mining and Smelting Company Limited, Flin Flon, Man.

(13) International Brotherhood of Electrical Workers, Local B1405, on behalf of electricians, substation operators, power-house operators, etc., of the Hudson Bay Mining and Smelting Company Limited, Flin Flon, Man.

(14) United Brotherhood of Carpenters and Joiners of America, Local 1614, on behalf of carpenters, bridgemen, their helpers and apprentices of the Hudson Bay Mining and Smelting Company, Limited, Flin Flon, Man.

(15) International Brotherhood of Boilermakers, Iron Shipbuilders and Helpers, of America, Local 451, on behalf of boilermakers, welders, riggers, repairmen, their helpers and apprentices of the Hudson Bay Mining and Smelting Company Limited, Flin Flon, Man.

(16) Brotherhood of Painters, Decorators and Paperhangers of America, Local 1497, on behalf of the brush painters, sign painters and helpers of America.

(17) Trades and Labour Congress of Canada Federal Union No. 172, on behalf of mine, mill, smelter and zinc plant workers, surface labourers and truck drivers of the Hudson Bay Mining and Smelting Company Limited, Flin Flon, Man.

(18) International Union of Operating Engineers, Local 882, on behalf of the heating and power plant employees, Vancouver Hotel, Canadian National Railways, Vancouver, B.C.

(19) Canadian Brotherhood of Railway Employees and Other Transport Workers, on behalf of certain employees of the Royal Alexandra Hotel, Canadian Pacific Railway Company, Winnipeg, Man.

(20) British Columbia Seamen's Union, on behalf of unlicensed personnel (deck, engine room and stewards' department) M.V. "Unacana" of the United Oil Company of Canada, Limited, Vancouver, B.C.

(21) Canadian Seamen's Union (Superior-Winnipeg Branch), on behalf of the unlicensed personnel of the barges operated by the United Towing and Salvage Company Limited, Port Arthur, Ontario.

(22) Canadian Navigators Federation, St. Lawrence Division, on behalf of captains, first and second officers of Branch Lines Limited, Sorel, P.Q.

(23) International Union of Operating Engineers, Local 510, on behalf of locomotive crane and compressor operators, staff house engineers and firemen of the Grand Trunk Pacific Development Company Limited at the Prince Rupert Drydock and Shipyard, Prince Rupert, B.C.

Decisions of Board in Appeal Cases

The following appeals from decisions of Provincial Labour Relations Boards and application for leave to appeal therefrom were considered by the Wartime Labour Relations Board (National) and judgment given.

(1) The Wartime Labour Relations Board (National) allowed the appeal of the Dominion Forge and Stamping Company, Limited, Windsor, Ont., against the decision of the Ontario Labour Relations Board establishing a procedure for consideration and settlement of disputes.

Counsel for the Company contended that the Ontario Board's power to establish a procedure was limited by subsection (2) of Section 18 of the Regulations and that it did not have jurisdiction to establish a procedure for final

settlement "concerning a grievance arising under the collective agreement." Counsel for the union contended that grievances may arise under the agreement which could not be said to be concerning the interpretation or violation of the agreement and that the Ontario Board had power to specify that all grievances arising under the agreement concerned the interpretation or violation of the collective agreement.

In allowing the appeal the Wartime Labour Relations Board (National) amended the grievance procedure by striking out the words "concerning a grievance arising under" and substituting the words of the subsection of the Regulations, namely "disputes concerning the interpretation or violation of the collective agreement".

(2) The Wartime Labour Relations Board (National) also allowed the appeal of Western Grocers, Limited, Prince Albert, Sask., from a decision of the Saskatchewan Labour Relations Board and set aside the certificate granted by the Saskatchewan Board to the Retail Clerks' Protective Association.

The Saskatchewan Labour Relations Board ruled that production employees should be permitted to form their own union but if these production employees wished to take in office employees by mutual consent, then the Board would consider this group to be an appropriate bargaining unit. On the other hand, where office employees desired to form a union and force a minority group of production employees into that union, the Saskatchewan Board would not consider the whole group to be an appropriate bargaining unit, as the production employees would be dominated by the office staff.

The company contended that male employees commence work in the warehouse and are promoted to the office, also, that the decision of the Saskatchewan Board compelled the company to negotiate with two unions for a small staff of twenty-three and that warehousemen are not a craft separate from office workers and salesmen.

The National Board decided that the warehousemen were not engaged in production and that they were subject to the same terms and conditions of employment as the other employees. In view of this and of the fact that the total number of employees is only twenty-three, the Board decided that the bargaining unit should be all the employees of the Prince Albert Branch, except those employed in a confidential capacity or who have authority to hire and discharge.

(3) The Wartime Labour Relations Board (National) granted leave to appeal from an order of the Ontario Labour Relations Board to eight International craft organizations, as interveners, in connection with an application for certification of bargaining representatives for employees of the Port Arthur Shipbuilding Company, Limited, Port Arthur, Ont., submitted by Local 11, Industrial Union of Marine and Shipbuilding Workers.

The Ontario Board refused leave to appeal on the ground that the decision sought to be appealed from was an interlocutory decision or ruling—namely an Order directing a separate vote of the employees of the Port Arthur Shipbuilding Company, Limited, in eight crafts as to which union they desire to represent them.

The National Board decided that it could not prevent an interlocutory appeal because of the provisions of subsection (1) of Section 5 of the agreement between the Dominion and the Province of Ontario which was confirmed by Order in Council, P.C. 2911 of April 27, 1944 and an Order in Council of the Lieutenant-Governor in Council for Ontario dated the 18th day of May, 1944. By these provisions the decisions or orders from which an appeal may be taken with leave is not limited to a final order.

The Board decided that a vote of the employees would not be taken pending the appeal, a hearing on which was set for Tuesday, October 10, at 10 a.m.

(4) A vote of certain employees of Vivian Diesels and Munitions, Limited, Plant No. 3, Vancouver, B.C., was ordered by the Board following an appeal by Lodge 692, International Association of Machinists, against the certification by the British Columbia Minister of Labour of the officers of the United Steelworkers of America, Local 2952 as bargaining representatives for certain employees of the company (L.G., Sept., 1944, p. 1110). Of the 243 eligible employees of the company, 92 voted in favour of International Association of Machinists, Lodge 692 and 103 voted in favour of the United Steelworkers of America, Local 2952. Owing to the fact that the steelworkers organization failed to obtain a majority of the ballots of the eligible employees of the company, the certification of bargaining representatives of that organization was set aside by the Wartime Labour Relations Board (National).

Conciliation Proceedings Under the Wartime Labour Relations Regulations

SECTIONS 12 and 14 of the Wartime Labour Relations Regulations provide for conciliation machinery to attempt settlements of disputes where negotiations for an agreement have been unsuccesfully continued for thirty days following certification of bargaining representatives. Disputes of this nature are referred to the Minister of Labour by the Wartime Labour Relations Board (National) or by the Provincial Boards. A conciliation officer is then appointed to confer with the parties and attempt to effect an agreement. If the conciliation officer is unable to bring about settlement of the matters in dispute and reports that in his view an agreement might be facilitated by the appointment of a Board of Conciliation, a Board is established by the Minister of Labour forthwith. The duty of such a Board is to endeavour to effect an agreement between the parties on the matters in dispute and in the event of failure to report its findings and recommendations to the Minister.

Board Reports Received

During September reports were received from five Boards of Conciliation.

Between Dominion Glass Company, Wallaceburg, Ont., and its employees.

Between Pedlar People Limited, Oshawa, Ont., and its employees.

Between Russell Bros. Limited, Owen Sound, Ont., and its employees.

Between Sitka Spruce Lumber Co. Limited, Vancouver, B.C., and its employees.

Between Vancouver News-Herald and Vancouver Newspaper Guild, Local No. 2.

Boards Fully Constituted

During September three Boards of Conciliation were fully constituted.

Electro-Metallurgical Company (Canada) Limited, Welland, Ont.—The Board of Conciliation established to deal with a dispute between the Electro-Metallurgical Company (Canada) Limited, Welland, Ontario, and the United Electrical Radio and Machine Workers of America, Local 523, was fully constituted on September 8 with the appointment as chairman of Dr. Alexander Brady of Toronto. Dr. Brady was appointed by the Minister in the absence of a joint recommendation from the other two members. The other two members are Mr. J. S. D. Tory, of Toronto, appointed on the nomination of the employing company, and Rev. Dr. H. G. Forster, of Welland, appointed on behalf of the employees concerned.

Page-Hersey Tubes Limited, Welland, Ont., and *United Electrical Radio and Machine Workers of America, Local 523.*—The Board of Conciliation established to deal with a dispute between the Page-Hersey Tubes Limited, Welland, Ontario, and Local 523, United Electrical Radio and Machine Workers of America, was fully constituted with the appointment as Chairman on September 8 of Dr. Alexander Brady of Toronto. Dr. Brady was appointed by the Minister of Labour in the absence of a joint recommendation from the other two members. The company nominee on the Board is Mr. J. S. D. Tory of Toronto, while the nominee of the employees is Rev. Dr. H. G. Forster of Welland, Ontario.

Lakeshore Mines Limited, Kirkland Lake, Ontario.—With the appointment on September 30 of His Honour Judge T. Mulcahy of Pembroke, Ontario, the Board of Conciliation established to deal with a dispute between Lakeshore Mines Limited, Kirkland Lake, Ontario, and Local 240, Kirkland Lake, Mine and Mill Workers Union was fully constituted. Judge Mulcahy was appointed by the Minister of Labour in the absence of a joint recommendation of the other two members. The nominee of the employer is Professor C. G. Williams of Toronto, while the member appointed on behalf of the employees is Mr. Bora Laskin, also of Toronto.

Boards Established

During the month four Boards of Conciliation were established.

Corporation of the Township of York Hydro System.—On September 14 the Minister of Labour established a Board of Conciliation to deal with a dispute between the Township of York Hydro System, Toronto, Ontario and the Canadian Electrical Trades Union (Branch No. 1). As reported in the LABOUR GAZETTE for August, 1944 (p. 976) Mr. F. J. Ainsborough of Toronto had investigated the dispute as Conciliation Officer. Mr. Ainsborough's report indicated that the parties were prepared to resume negotiations and that there was every possibility of the successful conclusion of an agreement. But Mr. Ainsborough again reported on September 6 to the effect that a settlement had not taken place as expected, and he thereupon recommended a Board.

Appointed to the Board are Mr. J. D. McNish, K.C., Toronto, on the nomination of the employing company and Mr. Drummond Wren, Toronto, on the nomination of the

employees concerned. Mr. Wren and Mr. McNish were requested to confer on the nomination of a third member and chairman of the board.

Steel Company of Canada Limited (Hamilton and Ontario Works) Hamilton, Ontario.—On September 7 the report of Mr. F. J. Ainsborough, who was appointed Conciliation Officer in a dispute between the Steel Company of Canada Limited (Hamilton and Ontario Works) and Local No. 1005, United Steelworkers of America, indicated that he considered that the settlement of the matter would be facilitated by the establishment of a Board of Conciliation.

The Board was established on September 8 and those appointed to it are Mr. John J. Robinette, Toronto, the nominee of the employing company and Mr. Drummond Wren also of Toronto whose name was submitted on behalf of the employees concerned. Mr. Robinette and Mr. Wren have been requested to confer on the nomination of a chairman and third member of the Board.

Beardmore and Company Limited, Acton, Ontario.—On September 7 the Minister of Labour received the report of Mr. F. J. Ainsborough who investigated the dispute between Beardmore and Company Limited, Acton, Ontario, and Local No. 26, National Union of Shoe and Leather Workers. Mr. Ainsborough indicated that he considered that the settlement of the dispute would be facilitated by the establishment of a Board. The Board was established on September 8. The members appointed are Mr. Louis Duncan, K.C., Toronto, appointed on the nomination of the employees, and Mr. Norman L. Matthews, Toronto, appointed on behalf of the employing company. Mr. Matthews and Mr. Duncan have been requested to confer on the nomination of a chairman and third member of the Board.

Noranda Mines Limited, Noranada, P.Q.—On September 7 the Minister of Labour received a communication from the Quebec Wartime Labour Relations Board indicating that the Noranda Mines Limited and Local 688, International Union of Mine, Mill and Smelter Workers had negotiated for thirty days and had failed to come to an agreement. On September 8 the Minister of Labour appointed Mr. J. P. Nicol, Industrial Relations Officer, Toronto as Conciliation Officer to confer with the parties and to attempt to effect an agreement. On September 15, Mr. Nicol's report was received in which he recommended the establishment of a Board of Conciliation.

On September 27 the parties concerned were requested to submit nominations for membership on the Board.

Assignments of Conciliation Officers

Outboard Marine and Manufacturing Company of Canada Limited, Peterborough, Ont.—Mr. J. P. Nicol, Industrial Relations Officer, Toronto, who had been appointed Conciliation Officer in connection with a dispute between the Outboard Marine and Manufacturing Company of Canada Limited, Peterborough, Ontario, and the Employees' Association of the Outboard Marine and Manufacturing Company of Canada Limited (L.G. Sept., 1944, p. 1116), has reported that negotiations for a collective agreement are continuing and may be completed to the satisfaction of both parties within a reasonable time.

Dartmouth Ferry Commission, Halifax, N.S.—On September 25 the Minister of Labour received a report from Mr. H. R. Pettigrove, Industrial Relations Officer, Fredericton, N.B., who had been appointed Conciliation Officer in connection with a dispute between the Dartmouth Ferry Commission, Halifax, N.S., and the Canadian Seamen's Union. Mr. Pettigrove reported that agreement had been reached on all matters in dispute.

Broughton Soapstone Quarry Company Ltd., Leeds Station, P.Q.—On September 11 the Minister of Labour received a communication from the Quebec Wartime Labour Relations Board indicating that negotiations had been proceeding for thirty days between the Broughton Soapstone Quarry Company Limited, Leeds Station, P.Q., and the Canadian Union of Soapstone Workers, Local No. 1.

On September 12, Mr. L. Pepin, Industrial Relations Officer, Montreal, was appointed Conciliation Officer to confer with the parties and to attempt to effect an agreement.

On October 3, Mr. Pepin reported that conciliation was successful and that an agreement had been signed.

Dominion Wire, Rope Company, Lachine, P.Q.—On September 13 the Minister of Labour was advised by the Quebec Wartime Labour Relations Board that negotiations had been continuing for thirty days between the Dominion Wire, Rope Company Limited, Lachine, P.Q., and Lodge 1288, International Association of Machinists, and that there was no indication of the successful completion of a collective agreement.

On September 14 Mr. R. Trepanier, Industrial Relations Officer, Montreal, was appointed Conciliation Officer to confer with the parties and to attempt to effect an agreement.

Palm Dairy Limited, Regina, Saskatchewan.—On September 15 the Minister of Labour was advised by the Saskatchewan Wartime Labour Relations Board that negotiations had

been unsuccessfully proceeding for thirty days between Palm Dairy Limited and Local 385, Milk Wagon Drivers' Dairy Employees, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers.

On September 19 Mr. H. S. Johnstone, Industrial Relations Officer, Winnipeg, was appointed Conciliation Officer to confer with the parties and to attempt to effect an agreement.

Senator Rouyn Mines Limited, Rouyn, P.Q.—On September 19 the Minister of Labour was advised by the Quebec Wartime Labour Relations Board that negotiations between the Senator Rouyn Mines Limited, Rouyn, P.Q., and Local 688, Rouyn Mine, Mill and Smelter Workers' Union had been continuing for thirty days and that there was no indication of the successful completion of an agreement. Mr. R. Trepanier was then appointed Conciliation Officer to confer with the parties and to attempt to effect an agreement.

The Steel Company of Canada Limited, Gananoque, Ontario.—Advice was received on September 20 from the Ontario Labour Relations Board to the effect that negotiations had been continuing for thirty days between the Steel Company of Canada Limited, Gananoque, Ontario, and the United Steelworkers of America, Local 3208.

On September 22, Mr. H. Perkins, Industrial Relations Officer, was appointed Conciliation Officer to confer with the parties and to attempt to effect an agreement.

Canada Packers Limited, Toronto, Ontario.—On September 20 advice was received from the Ontario Labour Relations Board to the effect that negotiations had been proceeding for thirty days between the Canada Packers Limited, Toronto, Ontario, and the United Packinghouse Workers of America and that there was no indication of the successful completion of a collective agreement.

On September 22 the Minister of Labour appointed Mr. J. P. Nicol, Industrial Relations Officer, Toronto, as Conciliation Officer to confer with the parties and to attempt to effect an agreement.

Golden Manitou Mines Limited, Val d'Or, P.Q.—On September 25 the Minister of Labour was advised by the Quebec Wartime Labour Relations Board that negotiations had been proceeding for thirty days between Golden Manitou Mines Limited, Val d'Or, P.Q., and Local 654, Val d'Or Mine and Mill Workers' Union.

On September 25 Mr. R. Trepanier, Industrial Relations Officer, Montreal, was appointed Conciliation Officer to confer with the parties and to attempt to effect an agreement.

Regina Sash and Door Company, Limited, Regina, Saskatchewan.—On September 25 the Minister of Labour was advised by the Saskatchewan Wartime Labour Relations Board that negotiations had been continuing for thirty days between the Regina Sash and Door Company Limited, Regina, Saskatchewan, and the United Woodworkers Union, and that there seemed to be no indication of the successful completion of an agreement.

On September 27, Mr. H. S. Johnstone was appointed by the Minister of Labour as Conciliation Officer to confer with the parties and to attempt to effect an agreement.

Barrymore Cloth Company Limited, Toronto, Ontario.—On September 27 the Minister of Labour was advised by the Ontario Labour Relations Board that negotiations had been proceeding for thirty days between the Barrymore Cloth Co. Limited, Toronto, and the National Union of Textile Workers, but that there was no indication of the successful completion of an agreement.

On September 28, Mr. F. J. Ainsborough, Industrial Relations Officer, Toronto, was appointed Conciliation Officer to confer with the parties and to attempt to effect an agreement.

Modern Tool Works, Limited, Toronto, Ontario.—On September 28, advice was received from the Ontario Labour Relations Board to the effect that negotiations had been continuing for thirty days betwen the Modern Tool Works Limited, Toronto, Ontario, and the United Steelworkers of America.

On September 29 the Minister of Labour appointed Mr. F. J. Ainsborough, Conciliation Officer, Toronto, to confer with the parties and to attempt to effect an agreement.

Globe Furniture Company Limited, Waterloo, Ontario.—On September 28 a communication was received from the Ontario Labour Relations Board, indicating that negotiations had been continuing for thirty days between The Globe Furniture Company Limited, Waterloo, Ontario, and Local No. 7, Canadian Aircraft Workers' Association.

On September 29 Mr. H. Perkins, Industrial Relations Officer, Toronto, was appointed Conciliation Officer to confer with the parties and to attempt to effect an agreement.

Report of Board in Dispute Between Dominion Glass Company, Wallaceburg, Ontario, and its Employees

On September 13, the Minister of Labour received the report of the Board of Conciliation established to deal with a dispute between the Dominion Glass Company, Wallaceburg, Ontario, and the United Automobile Workers of America, Local 231. A minority report was submitted by Mr. Bora Laskin, employees' nominee.

The Board was under the chairmanship of the Honourable Mr. Justice J. G. Gillanders, appointed by the Minister of Labour in the absence of a joint recommendation of Mr. F. P. Dawson and Mr. Bora Laskin, both of Toronto, the employer's and employees' nominees on the Board.

The text of the report of the Board and of the minority report is as follows:—

Report of Board

Re: *Wartime Labour Relations Regulations, P.C. 1003, and* Re *Dominion Glass Company, Wallaceburg, Ont., and United Automobile Workers of America, Local 251.*

To: The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ontario.

The Board of Conciliation appointed by you in this matter begs to make its report.

On arrangement the Board met with representatives of both the Company and the Union in Wallaceburg where the Plant in question is situated. Representatives of both parties discussed the matters in question with the Board and made such oral and written submissions as they desired. At these sittings the Company was represented by—

R. A. Carscallen, as counsel.
E. Daves, Manager of the Company's Wallaceburg Plant.
M. Offer, Secretary of the Company.

The Union was represented by—

Fred Joyce, International Representative.
R. Brown, International Representative.
George Burt, Regional Director.
R. Hysted, an Employee and Chairman of the Bargaining Committee of the Local Union.
D. Forgie, E. Blair, E. Penell, H. McPhail, all Employees and Members of the Union Committee.

Although unnecessary under the present order in council, it may be noted in passing that Union representatives recorded their consent that Mr. Carscallen represent the Company as counsel.

Subsequent to the sittings of the Board in Wallaceburg the parties, at the request of the Board, negotiated in connection with certain matters discussed, after which both parties filed written memoranda with the Board indicating the extent to which agreement has been reached, and making such further comments as they desired on the various matters still in dispute. The Board members then held sittings in Toronto with the object of discussing and drafting a complete Collective Bargaining Agreement which it could recommend for acceptance by the parties.

THE FACTS

The Head Office of the Company is in Montreal, and it has several Plants in Canada, but this dispute is concerned only with the Plant at Wallaceburg, Ontario. Following proceedings in the Ontario Labour Court the applicant Union was certified by that Court on October 20, 1943, in pursuance of the provisions of the Collective Bargaining Act, 1943, s. 13, in respect of a unit of employees consisting of the hourly and piece rate employees in the Plant with the exception of the mould makers in the mould making department and the skilled glass workers in the furnace department who are all working on all glassware except bottles, jars and containers. Subsequent to this certification there were various meetings between representatives of the Company and the Union with a view to negotiating a Collective Bargaining Agreement until May 24, 1944, when it is said negotiations between the parties broke down. Following this the parties had two meetings assisted by a conciliation officer from the Department of Labour, and subsequently were before the new Ontario Labour Relations Board but failed to reach agreement, and this Board of Conciliation was finally constituted in pursuance of the provisions of P.C. 1003.

From discussion with the parties it developed that there were few, if any, major matters in dispute, but that there were numerous small points, some being only matters of terminology, on which the extended negotiations had failed to provide agreement. Both parties had prepared draft agreements which in large part made provision for the same matters but differed in minor provisions and matters of expression. For example, both parties agreed that the Union should be recognized as the Bargaining Agent but had

failed to find common expression of the extent of such recognition; in providing for seniority there seemed to be agreement as to the proper principles to be applied but differences on such minor matters as whether departmental seniority lists should be posted in the department, or available in the Company's office, and the exact terminology to be used in defining the basis of job progression. In defining the rights of management to discharge employees there was again agreement in principle but strong differences of opinion as to the extent to which the rights should be specifically defined. The parties were in agreement that Union activities should not be engaged in on Company premises during working hours, but the Union objected to a provision (upon which the Company insisted) ruling out such activities on Company premises at times other than during the working hours of the employees concerned. It was, of course, conceded that the Union should appoint a Union Committee, but the parties differed as to the number of members; their qualifications and the amount of time which should be allowed per day to committeemen to adjust and deal with current grievances. The parties agreed that the agreement should provide in ordinary cases for compensation for employees reporting to work on Company instructions when no work was available, but again differed as to the exact definition of this right and as to the exceptions that should be provided.

The matters mentioned are not exhaustive of the various differences between the parties but are indicative of the matters which apparently stood in the way of reaching unanimity on an agreement.

Recommendations

Under the circumstances mentioned, the Board felt with some reluctance that the only practicable course to take was to go through the draft agreements clause by clause with a view if possible to having the parties agree on the form in which the agreement should be settled, and endeavour to find unanimity on the various points in dispute. This was done. In connection with some of the matters on which difference of opinion prevailed, the parties were able to find agreement at the time. In connection with others, the parties found common ground in their negotiations following the Board sitting, and in connection with the remaining matters the Board has suggested in the draft agreement attached the provisions it recommends the parties to adopt.

Under the circumstances it seems unnecessary to further discuss the varied points of dispute, and the Board recommends that the parties enter into a Collective Bargaining Agreement in the form of the draft attached hereto as Schedule "A".

Before parting with the matter the Board respectfully observes that it would seem highly desirable that where parties negotiating for a Collective Bargaining Agreement are agreed on the proper principles to be applied they should during the negotiations make every effort to reach agreement on comparatively minor matters and the terminology to be used in settling the written agreement in respect of such matters. If it is found necessary to seek the assistance of a Board of Conciliation, it should not be expected that the Board should assume the task of drawing and settling the precise form and wording of the agreement recommended to the parties for execution.

All of which is respectfully submitted.

Dated at Toronto, this 11th day of September, 1944.

(*Sgd.*) J. G. Gillanders,
Chairman.

(*Sgd.*) F. P. Dawson,
Member.

Minority Report

The Honourable Humphrey Mitchell,
Minister of Labour,
Ottawa, Canada.

I concur in the Report in this matter and, save for two points of difference, I join in the recommendation that the parties execute a collective agreement in the form of the draft annexed to the Report.

With the utmost respect for the opinions of my colleagues, I cannot subscribe to article 5, clause (*a*) of the draft which prohibits union activities on the company's premises or during working hours; and, secondly, I, unlike my colleagues, would recommend the inclusion in the draft agreement of a clause giving preferential seniority, in connection with lay-offs only, to the union committe-men during their term of office.

I readily agree to the prescription of union activities during working hours, but I cannot see that the ban should be extended to cover such activities on the company's premises outside working hours. The company can hardly expect its employees to maintain a frigid silence during lunch hour or other periods when they are not on tours of duty, even though they may be on the company's premises. If, considering the "continuous process" feature of the company's operations, it fears that union employees will overstep

reasonable bounds in engaging in union activities outside of working hours, it should be a simple matter to come to an arrangement with the union which would define the limits of permissible action. My views in this connection are reinforced by section 20 (2) of the Wartime Labour Relations Regulations.

My reasons for suggesting preferential seniority for union committee-men in connection with layoffs are based on the fact that the commitee-men are responsible for discharging the union's obligations under the agreement; they must see that it works. The company has been insistent in excluding union representatives who are not employees from any participation in the grievance procedure until its final stage. If it is so desirous of dealing directly and solely with employees, it ought to offer them some protection against layoffs, both to ensure the integrity of the union, with which by law it must deal, and to dissipate any fears which the committeemen might have relative to their complete independence in discharging their duties on behalf of their fellow employees.

All of which is respectfully submitted.

Dated at Toronto this 11th day of September, 1944.

(*Sgd.*) BORA LASKIN,
Member.

Schedule "A"

This Agreement made this day of , 1944, between Dominion Glass Company Limited, hereinafter called "the Company" and United Automobile, Aircraft and Agricultural Implement Workers of America through its Local 251, hereinafter called "the Union".

Witnesseth that whereas the Labour Court (Ontario) ordered and certified on 20th October, 1943, after taking a vote of the Employees of the Company at its Wallaceburg Plant on July 20, 21, 1943, that Employees at Wallaceburg in the following unit form a Unit appropriate for the purposees of Collective Bargaining, namely: hourly and piece rate employees in the Wallaceburg Plant, with the exception of the mould makers in the mould making department and the skilled glass workers in the furnace department who are working on all glassware except bottles, jars and containers.

And whereas the said Labour Court further ordered and certified that the United Automobile, Aircraft and Agricultural Implement Workers of America, represents a majority of the employees in such unit within the meaning of the Collective Bargaining Act, 1943 (Ontario).

Now therefore the Company acknowledges that the Employees in the unit hereinbefore mentioned have selected the Union as their sole and exclusive Bargaining Agent and the Company recognizes the Union as such for all Employees in the said unit.

ARTICLE 1—DURATION

(*a*) This agreement shall be effective and binding upon both parties hereto for the term of one year from the date hereof.

ARTICLE 2—EXCLUSIONS

(*a*) Employees within the following classifications shall not be subject to the provisions of this agreement; employees in a supervisory position and office workers.

ARTICLE 3—SENIORITY

(*a*) Fundamentally the rules herein respecting seniority are designed to give employees an equitable measure of security based on length of continuous service with the Company consistent with consideration of capability to properly fill the available jobs.

(*b*) The expression "occupational group" when used herein shall mean one or more groups of employees within a department, the members of which are qualified to perform any certain operations or duties therein as specified by the Company, subject to grievance procedure.

(*c*) An employee upon completion of six months' continuous employment or six months' intermittent employment within any period of 24 consecutive months, if such intermittent employment is due to layoff or sickness or leave of absence authorized by the Plant Superintendent, shall be entitled to have his name placed either on the seniority list of the occupational group of the department in which he is employed or on the seniority list pertaining to employees of such department whose names are not included on any occupational group seniority list thereof.

Provided and it is hereby agreed that for the purposes of seniority the hand forming and automatic forming operations shall be treated as one department. Provided further that employees shall rank for seniority from the date six months prior to the date upon which seniority is attained.

(*d*) Employees shall be considered probationary employees until they have become eligible for the seniority list as above provided, and probationary employees shall not have any seniority rights.

(*e*) Employees' names shall appear on the seniority lists in the order of their respective dates of hiring.

(*f*) Seniority rights of employees shall be exercised as follows:—

(i) An employee in an occupational group shall be entitled to seniority over an employee in that group having less seniority and also over an employee with less seniority who is not included in an occupational group in the same department provided he is able and willing to do the different type of work required of him.

(ii) An employee who is not included in an occupational group shall be entitled to seniority over a like employee having less seniority in the same department.

(iii) An employee in any department shall be entitled to seniority over an employee in any other department having less seniority if capable and willing to do the different type of work required of him, provided that such seniority rights referred to in this sub-clause (iii) shall only be exercised in the event of permanent discontinuance of a specific major operation or of a department, or in the event of a layoff which is likely to exceed two months.

(*g*) Seniority rights shall cease for any one of the following reasons:—

If the employee quits;

If the employee is discharged and such discharge be not reversed through the grievance procedure;

If the employee is absent for three days without advising the company's Personnel Department, giving reasons satisfactory to that department;

If the employee fails to return to work within three days after notification so to do to his address on record with the Company unless he furnished reasons for such failure satisfactory to the Personnel Department;

In case of non-employment by the Company for a period of twelve consecutive months.

(*h*) A revised seniority list for each department shall be posted by the Company in such department each three months.

(*i*) A master seniority list showing the seniority status of each employee will be kept in the Personnel Department of the Company where it will be available for inspection by any member of the committee for purposes pertaining to his duty as such.

(*j*) When there is a decrease in working force all probationary employees in departments affected shall be the first to be laid off; thereafter lay off shall take place according to seniority procedure.

(*k*) If there be an increase in force after a layoff employees shall be returned to work according to seniority procedure.

(*l*) If an employee be transferred from one department to another the employee shall incur no loss of seniority provided, however, that the employee so transferred shall for a period of 60 calendar days after the date of his transfer retain his seniority in the department from which he was transferred and until expiration of such 60-day period he shall acquire no seniority in the department to which he has been transferred.

(*m*) Promotion to higher paid jobs or better jobs with equal pay are based primarily upon merit and ability. When other factors are equal (except in effecting promotions to supervisory positions) employees having the greatest seniority will receive the preference. Employees transferred from classifications not subject to the provisions of this agreement, shall, when transferred, be placed upon the seniority lists in the order of their respective dates of hiring and shall enjoy seniority rights accordingly, subject in all respects to the provisions of this agreement.

In the event of an employee suffering a major disability exception may be made to the seniority provisions of this agreement in favour of such employee.

(*n*) If an employee feels that improper judgment has been exercised by the Company in determining who is to be laid off, the matter may be taken up in accordance with the procedure set up in this agreement for handling grievances.

(*o*) Once an employee has established seniority it shall continue to accumulate during a period of sickness or authorized leave of absence.

Article 4—Hiring, Releasing and Discharge

(*a*) The right of the Company is hereby acknowledged to select and hire employees from any source.

(*b*) An employee who decides to quit work shall give notice as required by law to his foreman in writing.

(*c*) If the Company decides to release an employee or employees, it shall give individual or general notice (as the case may require) as required by law, in writing to such employee or employees.

(*d*) It is understood that nothing in this agreement affects the right of the Company to determine the time and duration of layoff of any employee, made necessary by a lack of orders, lack of materials, lack of equipment, repairs or other causes.

Article 5—Union Services

(*a*) It is understood that no activities of the Union are to be carried out on the Company's premises or during working hours except the activities of committeemen as hereinafter mentioned.

(*b*) The Union shall appoint and the Company shall recognize a committee which shall not be in excess of seven members, all of whom shall be employees of the Company having a minimum of 12 months' service prior to their appointment. Provided that the committee which shall confer with the Management under Clause (*e*) of Article 6 herein shall not be in excess of five members, all of whom shall be members of the committee first mentioned.

(*c*) It is understood and agreed that committeemen as well as other employees have regular duties to perform. The committeemen with the approval of the foremen of the department where they are respectively employed shall be permitted during their working hours without loss of time or pay, to leave their regular duties for a reasonable length of time to adjust and present grievances, subject to a maximum absence from their regular duties of one hour within the hours comprising any one working day. Whenever in the opinion of the foreman concerned more than a reasonable period of time shall have been taken by a committeeman to accomplish such adjustment and presentation, the foreman of the department in which the committeeman is employed shall decline to approve payment to such committeeman for such excess time.

(*d*) The Secretary of the Union shall notify the Company in writing from time to time of the names of the committeemen, including the alternate committeemen, the respective effective dates of their appointment and the names, if any, of those former committeemen who are being replaced, and the name of the Chairman of the Committee, and the Company shall keep the Union advised of the names of the foremen and others in supervisory positions.

Article 6—Grievance Procedure

(*a*) No grievance shall be considered which usurps Management's function.

(*b*) Any employee may present his grievances to his foreman in writing through a member of the committee providing the alleged circumstances of the said grievance originated or occurred within five working days prior to presentation to the foreman, and the foreman shall render his decision in writing within two days of the presentation to him of the grievance.

(*c*) If a satisfactory settlement is not arrived at with the foreman, the employee may refer the matter to a member of the committee who may within two working days of the foreman's decision present the matter in writing to the Factory Superintendent for hearing and adjustment, and the Factory Superintendent

shall render his decision within two days of the presentation to him of the grievance.

(*d*) If the decision of the Superintendent be not satisfactory to the employee concerned he may appeal therefrom by lodging an appeal in writing with the Manager through the chairman of the committee within two working days of the delivery of the decision of the Factory Superintendent.

(*e*) If an appeal has been lodged through the Chairman of the committee it shall be placed upon an agenda for consideration at the conference next following between the Management and the committee and said conferences shall be held not more than once in every two weeks providing there is an agenda, or under special circumstances when agreed upon between the Management and the committee. Appeals, if any, shall be supplied to the Manager in writing at least 24 hours before the conference and only such appeals shall be considered.

(*f*) Either the Regional Director or International Representative of the Union so designated from time to time by the Union for the purpose may be present and take part in such conference.

Article 7—Holidays

(*a*) As of the date of the execution of this agreement the recognized holidays are as follows:—

New Year's Day—7 p.m., Dec. 31, to 7 a.m., Jan. 2.
Time and one-half for those working.
Dominion Day—12 midnight to 12 midnight.
Time and one-half for those working.
Labour Day—12 midnight to 12 midnight.
Double time for those working.
Christmas Day—7 p.m., Dec. 24, to 7 a.m., Dec. 26.
Double time for those working.

Article 8—Reservations to Management

(*a*) The Union recognizes the right of the Company, to hire, promote and demote, transfer, suspend or otherwise discipline and discharge any employee, subject to the right of the employee concerned, to lodge a grievance in the manner and to the extent herein provided.

(*b*) It is understood the causes for which the Company may discharge employees include the following, (1) intoxication, (2) disorderly conduct, (3) insubordination, (4) unauthorized absenteeism, (5) neglect of duty, (6) carelessness endangering the safety of others.

Article 9—Employees' Freedom of Choice

(*a*) There shall be no discrimination, interference, restraint or coercion by or on behalf of the Company regarding any employee because of membership in the Union, and the Union, its members, and/or its agent or the Company shall not intimidate or coerce or attempt to intimidate or coerce employees into membership.

Article 10—Hours of Work

As of the date of the execution of this agreement the recognized hours of work are as follows:—

(*a*) 8 hours per day and 48 hours per week shall constitute the working hours for all persons engaged in work regulated by the rotation of shifts and any work beyond the above hours will be on the basis of time and one-half.

(*b*) Persons employed permanently on day or night shifts shall be on a 9-hour basis per day, after which time and a half will be effective. Six days or six nights will constitute a week's work. Time and a half shall be paid for all work on the seventh day.

(*c*) Starting and quitting time shall be left to the option of the Management.

(*d*) Any emergency call shall be for not less than three hours' pay. An emergency call is when an employee is specifically and unexpectedly notified to report to perform work of an emergency nature. It is understood that a minimum emergency charge of three hours entails no overtime. In the event the work would require two hours and the employee had previously worked the regular number of working hours in that day, the two hours of overtime would entitle the employee to receive the equivalent of three hours' time and the regular rule governing overtime would apply for such an emergency call after two hours.

(*e*) In case of a breakdown an employee shall be notified, if possible, not to return to work.

(*f*) In case of sickness or inability to work employees shall make reasonable effort to notify their foreman promptly, and also previous to returning to work after absence in order to facilitate resumption of work.

(*g*) An employee reporting for work on instruction of the Company, but for whom no work is available at his regular job, will be offered at least two hours' employment at other work at his regular hourly rate, or at the Company's option will be paid two hours' time at his regular hourly rate. This provision shall not apply when such lack of work is due to a labour dispute, fire, flood or any other cause beyond the control of the Company.

Article 11—Leave of Absence

With the written permission of the Company leave of absence without pay may be granted for such period as it may consider justified for legitimate personal reasons including illness and accident and for legitimate labour or Union activities. Seniority shall continue to accumulate during the period of any such leave of absence.

Article 12—General

(*a*) As far as reasonably practicable overtime and extra time will be equitably distributed among those normally performing the relevant work to be done without prejudice to the right of Management to increase or reduce the working force.

(*b*) The Company agrees that it will not cause or direct any lock-out of its employees, and the Union agrees that there will be no strikes or other collective action which will stop or interfere with production, and that if any such collective action should be taken it will instruct its members to carry out the provisions of this Agreement and to resume work and perform their duties in the usual manner.

(*c*) The rights of discharged members of His Majesty's Forces who were employees of the Company for a period of at least one month when accepted into His Majesty's Forces shall be governed by the provisions of the Reinstatement in the Civil Employment Act, 1942, 6 Geo. VI, c. 31, and any amendments thereto.

(*d*) Employees handicapped by physical or health conditions may upon agreement between the committee and the Factory Manager receive a special rate so as to provide work for them.

(*e*) A member of the committee, after obtaining the permission of the Manager or Factory Superintendent may enter the plant at any time to adjust grievance.

(*f*) The committee may have the use of one bulletin board to be erected, located and designated for the purpose by the Company. Provided and it is hereby agreed that the use by the committee of such bulletin board shall be restricted to the posting thereon of only such notices as have received the approval of the Company prior to the posting thereof and that the subject matter of all such notices shall be restricted to notices pertaining to recreational or social activities, notices of meeting or notices of election for the Union. Provided further that no notice shall be posted by the committee on such board containing advertising or political matter.

(*g*) Throughout this agreement where the masculine pronoun is used it will be construed as including the feminine where the context or the nature of the case required.

(*h*) In the event of a difference between the parties concerning any alleged misinterpretation or violation of this agreement the same shall be referred to the appropriate Conciliation services of the Province of Ontario for final settlement and pending such settlement there shall be no stoppage of work.

In witness whereof the parties hereto have executed this agreement the day and year first above written.

Report of Board in Dispute Between Pedlar People, Limited, Oshawa, Ontario, and Its Employees

On September 15, the Minister of Labour received the unanimous report of the Board of Conciliation established to deal with a dispute between Pedlar People Limited, Oshawa, Ontario, and Local 2784, United Steel Workers of America.

The personnel of the Board was as follows:—Dr. Cecil A. Wright, chairman, appointed on the nomination of the other two members, Mr. J. S. D. Tory, appointed on the nomination of the employer, and Mr. Bora Laskin, the nominee of the employees concerned.

The text of the report of the Board is as follows—

Report of Board

Re: Wartime Labour Relations Regulations, P.C. 1003 and re dispute Between Pedlar People, Ltd., Oshawa, Ont., and Local 2784, United Steelworkers of America.

To The Honourable Humphrey Mitchell,
Minister of Labour,
Ottawa, Canada.

The Board of Conciliation established in this matter begs to submit the following report.

Meetings of the Board to hear the submissions of the parties were held in the City of Oshawa, the locale of the dispute, on August 3 and August 14, 1944. The Union was represented on both occasions by Mr. P. R. Clark, President of the Local, Mr. G. Thomson, Vice-President, and Mr. M. J. Fenwick, an International Representative of the United Steelworkers of America. The Company was represented by Mr. J. G. Geikie, Managing Director, Mr. J. A. Morphy, Factory Manager, and Mr. J. C. Adams, K.C., Counsel.

At the meeting of August 3, the Union took a preliminary objection to the presence of Mr. Adams as counsel for the Company. The Board could see no merit in the objection in view of the explicit terms of section 31(5) of the Wartime Labour Relations Regulations, P.C. 1003, requiring a Board of Conciliation to "give full opportunity to all parties to present evidence and make representations."

The Issues

The dispute between the parties involves the Company's hourly paid and piece rate workers and revolves around the Company's refusal to agree to the inclusion in the renewal collective agreement between them of clauses providing for a union shop and for a voluntary check off of union dues, drafts of such clauses having been put forward by the Union. The parties made their submissions to the Board on these issues through written briefs supplemented by oral statement and argument.

At the conclusion of the Union's case, counsel for the Company sought an adjournment for two months on the grounds (1) that time was required to prepare a reply to the Union's submissions, and (2) that the Company was a member of an employers' institute which hoped to evolve by that time a sound policy to guide its membership on such union proposals as the union shop and check-off. In view of the Union's refusal to agree to such an adjournment and having regard to the provisions of s. 13(2) which require an earlier report by this Board, the Board rejected the application for such an adjournment but, with the consent of the Union, did grant a short adjournment of ten days to enable the Company to prepare a brief in reply.

The Facts

The written and oral submissions of the parties revealed that the Company and the

Union had collective bargaining relations only since August 20, 1943, the date of the Union's certification by the Ontario Labour Court, an event followed by the signing on October 5, 1943, of a first collective agreement. True, the Union claims to have initiated organization among the employees of the Company in 1941, and while it claimed credit for some improvements in working conditions put into effect by the Company prior to its recognition as the employees' exclusive bargaining agent, the evidence establishes that the Union did not command a working majority among the Company's employees until June, 1943.

The Company manufactures sheet metal products and cartridge cases. Its normal peacetime employee force numbered about 130, but by August, 1940, it had raised its employee force to about 550 or more and has maintained this number on its payroll ever since. Approximately 97 per cent of the Company's production falls into the category of war work.

At the time of its certification, which followed upon a vote directed by the Ontario Labour Court, the Union represented approximately 63 per cent of the employees. The Union now claims a membership of 90 per cent of the eligible employees and its progress since certification has been rapid. Furthermore, the Union stated that there have been only two defections from the Union in the months preceding the hearings before the Board, and alleged that new adherents have been gained as a result of new hirings by the Company. Relations with the Company have been quite amicable and what differences there have been can be characterized as normal irritants in the early stages of collective bargaining experience.

The Union Shop

The foregoing recital of facts indicates what in the Board's view are the decisive considerations in assessing the merits of the Union's claim to a union shop. The Union has had less than one year's experience in collective bargaining with the Company. This by itself renders it unnecessary for this Board to deal with any other considerations either for or against a recommendation for a union shop.

The Board feels that it is premature for a Union whose collective bargaining experience extends over a period short of a year to advance a claim for a union shop in an industry and in a locality where such a condition is in no way general. Such limited experience in collective bargaining does not afford an opportunity for assessing either the Union's stability or its responsibility, matters decidedly relevant to the issue of the union shop. A Union which serves as the exclusive bargaining agency of an employment force undoubtedly looks forward to the time when the employer will agree to make membership therein a condition of continued employment. While collective bargaining should be essentially progressive in nature, this Board expresses no opinion or prediction as to the time when, if ever, or the circumstances under which, the present Union might reasonably seek the establishment of a union shop relationship with the Company. As this Board, being one of conciliation, can only express its views as to what it feels might be reasonable in the circumstances, it is sufficient to say that in any event the period in the present case has been much too short for the employer to acquire that high degree of confidence which should exist on its part before it could reasonably be asked to agree to union membership as a condition of employment. The expression by the parties of their mutual confidence in their future amicable relations is a hopeful sign that they will themselves find the solution to this and other problems which may confront them. The Board therefore feels that it must recommend that the Union drop its present demand for the union shop.

Similar considerations, reinforced by the evidence of the Union's steady growth, militate against any recommendation at this time in favour of some lesser form of security such as maintenance of membership.

While the Board's conclusions regarding the request for a union shop make it unnecessary to deal with any general principles, it may not be out of place to refer to one argument of the Company put forward as a ground for rejecting the Union's claim. That argument was based on purely legal grounds and was to the effect (1) that a Company could not legally enter into an agreement for a union shop inasmuch as the corporation had no capacity, in the absence of express authorization so to do; and (2) that in any event, and apart from lack of corporate capacity, no employer could legally coerce employees through a collective agreement to become members of a Union and thereby to recognize what, on its face, might appear to be voluntary authorization of employees to submit to a check-off of Union fees, since such voluntary authorization was in reality tainted with the "coercion" which compelled the employees to join the Union.

The first argument would seem to ignore the general doctrine of unlimited capacity of letters patent corporations and in addition, and contrary to existing law, would assume a collective bargaining agreement to be a legally enforceable contract.

The second argument, based on coercion, seems to be based on the fear that a Company which changed the conditions of existing employees' contracts of employment, might be exposed to liability to such employees, notwithstanding the apparent voluntary agreement of the employee to remain in the employ on the new conditions contained in the collective bargaining agreement. This novel straining of the doctrine of "coercion" ignores the "voluntary" aspect of an employee's choice to remain with an employer on new terms proposed by the latter, whether pursuant to a collective bargaining agreement or otherwise. It is certainly true that the Courts have never considered economic compulsion as sufficient to deprive an employee of his freedom of action in accepting terms of employment imposed by an employer. It would be exceeding strange if that doctrine were to be recognized today simply because the terms offered a prospective employee were the result of co-operative effort between an employer and a trade union, which, like all trade unions presumably, owes its existence to the now well recognized necessity of removing economic compulsion on an individual employee due to his unequal bargaining position. There is, of course, an economic compulsion on a non-union employer if a union shop is agreed upon, but the Board is unable to appreciate why an employer should today fear that economic compulsion arising from joint agreement between employer and a majority of its employees would carry any more or further potential legal liability to itself than if it arose from the conduct of the employer alone. Further, the evidence in the present case disclosed that the employment relationship between the Company and its employees was terminable at the will of either party. In light of these facts there does not appear to the Board any substance in the Company's fear of legal involvement should it agree some time in the future to a union shop relationship which might affect the terms of employment of existing non-union employees.

The Voluntary Check-Off

The second branch of the Union's case concerned a demand for inclusion in the renewal collective agreement of a clause whereby members of the Union could, by a revocable voluntary authorization to the Company, have their union dues deducted from wages and forwarded by the Company to the Union. The promotion of collective bargaining, in pursuance of existing statutory directions, envisages stable unions through which employer-employee co-operation may be fostered. It was not suggested that any onerous burden would be cast upon the Company were it to honour revocable voluntary authorizations to check off Union dues. Such authorizations stand in no very different position than ordinary assignments of debts in private commercial relations. While the Union did not suggest that there was any great practical difficulty involved in collecting dues by Union officers, acceptance by the Company of a provision for voluntary dues check off will not only be a convenience to the Union, but should also serve to cement and promote friendly relations between the parties by acting as a gesture of good-will to the Union to which it should not fail to respond.

Recommendation

The Board, therefore, recommends (1) that the renewal collective agreement between the parties contain a clause providing for the check off by the Company of Union dues upon revocable voluntary authorizations by the employees; (2) that the Union drop its demand for a union shop clause.

All of which is respectfully submitted.

Report of Board in Dispute Between Russell Bros., Limited, Owen Sound, Ontario, and its Employees

On September 15, the Minister of Labour received the unanimous report of the Board of Conciliation established to deal with a dispute between Russell Brothers Limited, Owen Sound, Ontario, and the United Steelworkers of America, Local 2837.

The personnel of the Board was as follows:—Dr. Cecil A. Wright, chairman, appointed on the nomination of the other two members, Mr. John J. Robinette, appointed on behalf of the employing company, and Mr. F. Andrew Brewin, appointed on behalf of the employees.

The text of the report of the Board is as follows:—

Report of Board

Re: *Wartime Labour Relations Regulations, P.C. 1003, and* Re *Dispute Between Russell Brothers, Limited, Owen Sound, Ontario, and Employees, Members of Local 2837 United Steelworkers of America.*

To: The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ontario.

The Board of Conciliation established by you in connection with the above matter begs to report as follows:—

A meeting of the Board was held in Owen Sound on July 31 for the purpose of hearing the submissions of the parties. The Company was represented by N. E. Hipwell, Vice-President, E. S. Brent, Personnel Manager and F. G. Mackay, K.C., Counsel. The Union was represented by P. England, President of Local 2837, J. M. McGill, Vice-President and P. G. O'Donovan, International Representative of the United Steelworkers of America.

The present Local negotiated a collective bargaining agreement for the first time with the Company in December, 1942. In the course of negotiating the new contract in January, 1944, the Local asked for a "union shop" or a "maintenance of membership" clause as well as a clause providing for "check-off" of Union dues, on "receipt of signed authority of a substantial majority of the employees". In the course of the negotiations, on February 20, the Union received a memorandum which the Company admitted was drafted by Mr. Colin Russell, President of the Company, Mr. Brent, Personnel Manager and Mr. C. A. Rollings, Plant Superintendent and which was signed by Mr. Rollings only, to the effect that "the Company will favourably consider the following clause in place of Article XV—check-off, as shown in the Union's proposed 1944 Agreement". The following clause was then set out:—

"The Company agrees, upon the receipt of signed authority of any individual employee of the Company to deduct from his first pay period of each month the sum of ($1) one dollar for dues to be in turn turned over by cheque to the accredited representative chosen by the Union. The employee, however, has the right to cancel such an agreement by giving one week's notice in writing to the Personnel Manager."

This memorandum was apparently received by the Union as embodying the results of negotiations in which the Union dropped their claim to any form of "Union-shop" or "maintenance of membership" provision in return for the Company granting the form of voluntary check-off set out in Mr. Rollings' memorandum, and on February 23 the Union wrote a letter to the Company indicating that the Negotiating Committee was prepared to sign the new agreement with the modified form of check-off clause and omitting any union shop or maintenance of membership clause.

In a letter dated February 29, and signed on behalf of the Company by Mr. C. Russell, and which purported to be in answer to the Union's letter of February 23, the Company stated that the question had been discussed by the directors and the Company refused to incorporate any "check-off" or "union shop" clause in the new agreement. The present Board was applied for as a result of these proceedings and the Union put forward the following clauses which it wished to have inserted in the new collective bargaining agreement and which the Company refused.

"As a condition of employment, the Company agrees, all hourly rated employees, at present members of the Union, shall remain members in good standing for the duration of this agreement. The Company also agrees that all hourly rated employees at present not members of the Union shall become members two weeks after the adoption of this agreement, and that all new hourly rated employees hired after the adoption of this agreement shall become members of the union upon the completion of thirty days satisfactory service to the Company."

"The Company agrees, upon the receipt of signed authority of a substantial majority of the employees of the Company, to deduct from the first pay period of every month the sum of one ($1) dollar for dues to be in turn turned over by cheque to the accredited representative chosen by the Union."

Before the Board the question whether the memorandum signed by Mr. Rollings was made as an offer on behalf of the Company with proper authorization, or, as the Company maintained, was only a personal suggestion made by Mr. Russell to be placed before the Board of Directors, was much discussed. In any event the Union believed it to be an offer by the Company as the Union's letter of February 23 shows. Fortunately, in the light of subsequent events before this Board, it is not necessary for the Board to express an opinion on the question whether the Union was reasonable or justified in its belief or whether there was mistake on the part of

either the Company or the Union. If the Union was mistaken one can understand why the Company should refuse demands in excess of those referred to in the letter of February 23, while on the contrary, one can readily understand resentment on the part of the Union by the Company's refusal to consider a concession obtained by what the Union felt was a conciliatory offer on the part of the employer.

In light of this the Board felt the purpose of conciliation could best be achieved if the possible grounds of resentment arising from this unfortunate episode on both sides could be wiped out. The best method of doing this appeared to be a reversion to what the Union had agreed to accept in February and what the Union, rightly or wrongly believed the Company (in addition to certain of its officers) had agreed. A suggestion to this effect was made to both parties.

After an adjournment for the parties to consider their position, the Company made an offer to include a voluntary check-off clause as set out in Mr. Rollings' letter of February 20 if the Union would give up their claim for a union shop or maintenance of membership clause. The offer was to be accepted within 10 days and the Chairman of the Board was notified within that period of its acceptance or rejection and a copy of the completed agreement was to be furnished the Board.

By letters of August 10 (attached hereto) both the Union and the Company notified the Chairman that the Union had agreed to the Company's offer made before the Board. The execution of the new agreement is, as the Company's letter shows, held up pending clarification of a ruling of the Regional War Labour Board concerning wages. As this is not a matter before us, and as the sole issue before this Board has been settled by mutual agreement of the parties, the Board is pleased to report that no recommendations from it are necessary.

All of which is respectfully submitted.

Dated at Toronto this 31st day of August, 1944.

Report of Board in Dispute Between Sitka Spruce Lumber Co. Ltd., Vancouver, B.C., and Employees

On September 29, the Minister of Labour received the unanimous report of the Board of Conciliation established to deal with a dispute between the Sitka Spruce Lumber Co. Ltd., Vancouver, B.C., and Local 1-217, International Woodworkers of America.

The Board was under the chairmanship of Mr. A. R. MacDougall, appointed by the Minister in the absence of a joint recommendation from the other two members, Mr. Alan M. Russell and Mr. William Stewart, appointed on behalf of the Company and employees respectively.

The text of the Board's report follows:—

Report of Board

In the Matter of the Wartime Labour Relations Regulations, P.C. 1003, and in the matter of Sitka Spruce Lumber Company Limited, Vancouver, B.C. (Employer), and International Woodworkers of America, Local No. 1-217 (Employees).

To:

The Honourable the Minister of Labour,
Parliament Buildings,
Ottawa, Ontario.

SIR:

We, Albert Reginald MacDougall, Chairman, Alan M. Russell, and William Stewart, established as a Board of Conciliation by you in pursuance of provisions of Section 13 (1) of the Wartime Labour Relations Regulations, P.C. 1003, to endeavour to effect an agreement herein, report herewith the result of our endeavours and our findings and recommendations as follows:

1. We have made every effort to conciliate the parties by interviewing officers of the Employer and of the above-mentioned Union, but have been unable to offer any suggestion acceptable to both parties.

2. At a public session of the Board held on the 21st of September, 1944, both the Employer Company and the International Woodworkers of America, Local No. 1-217, were represented by Counsel.

3. Counsel for both parties admitted:

(*a*) That the following are the bargaining representatives of the Employees, having been duly certified under date of June 1, 1944, pursuant to Section 8 (1) and (2) of the Wartime Labour Relations Regulations, P.C. 1003:

Harold Pritchett, 505 Holden Building, Vancouver.
B. J. Melsness, 504 Holden Building, Vancouver.
Mrs. G. Shunaman, 506 Holden Building, Vancouver.

Don Watts, 506 Holden Building, Vancouver.
Nigel Morgan, 504 Holden Building, Vancouver.

(*b*) That both the Employer and the Union are satisfied with the standard form of agreement, I.W.A., C.I.O. District No. 1, which was filed as Exhibit 1, and which accompanies this report.

4. Counsel for the employer stated that the aforesaid agreement would have long since been signed by the Employer had it not been for the fact that a petition was received by such Employer signed by 54 employees, requesting that the Employer refrain from signing any agreement with the International Woodworkers' Association, such petition being in terms following:

> We, the undersigned employees of Sitka Spruce Lumber Company, believing that the certification of the I.W.A. as bargaining agent at this plant does not meet with the approval of the majority of your employees at the present time, respectfully request that you refrain from signing any agreement with the I.W.A., as we prefer to negotiate directly with the management by a committee of our choosing.

5. The Employer states that the number signing such petition represents 62 per cent of the employees.

6. The Board asked Counsel for the Union the following question:

> If evidence were adduced at the hearing that satisfied you that a majority of the employees were opposed to the signing of the proposed agreement, would the Union accede to the wish of the majority of the employees?

Counsel for the Union did not answer this question categorically, but stated in effect that in his experience as Counsel for the I.W.A., he had never heard of the Union asking for a collective agreement which was not desired by a majority of the employees.

7. Counsel for the Employer stated that if a bare majority of the employees wished an agreement to be entered into with the International Woodworkers of America the Employer would subscribe to an agreement in the terms of Exhibit 1, and submitted as evidence of the Employer's good faith a proposal that a secret ballot be taken immediately, the result of which the Employer agreed would be binding upon it. He further stated that the Employer had already signed a similar agreement in connection with the Employer's logging operations.

8. Following upon this proposal a short adjournment of the Board was had in order to enable Counsel for the Union to seek instructions from his client.

9. Upon reconvening, Counsel for the Union refused the proposal of Counsel for the Employer, stating that it was felt that such a move would, in effect, be re-opening the question of bargaining representatives who had already been certified in accordance with the terms of the Order in Council, and would be a very dangerous precedent, and stated that he stood on the provisions of P.C. 1003.

10. After this decision of the Union, as expressed through Counsel, the Board then inquired of both parties whether or not they wished to adduce any evidence, and upon receiving a negative reply the proceedings were then brought to a close, the Chairman of the Board stating that the Board would report its findings and recommendations to the Minister in accordance with P.C. 1003.

11. Having in mind the provisions of Section 10 (1), and in particular Section 10 (2) of the Regulations, the fact that the Employer admits that the persons mentioned in Section 3 of this Report are the certified bargaining agents within the meaning of the Wartime Labour Relations Regulations, the fact that these bargaining representatives wish an agreement to be signed in the form of Exhibit 1, and the further fact that the Employer, through its Counsel, agrees that the terms of such agreement are satisfactory, we are of the opinion that the petition on which the Employer bases its refusal to sign the agreement must be deemed to be irrelevant, and we therefore recommend that the said agreement be executed by the Employer.

All of which is respectfully submitted.

(*Sgd.*) A. Reg. MacDougall,
Chairman.
(*Sgd.*) W. Stewart.
(*Sgd.*) Alan M. Russell.

Report of Board in Dispute Between Vancouver News-Herald, Limited, and Vancouver Newspaper Guild, Local No. 2

On September 20, the Minister of Labour received the report of the Board of Conciliation established to deal with a dispute between the Vancouver News-Herald, Limited, and the Vancouver Newspaper Guild, Local No. 2. A minority report was submitted by Mr. H. W. Herridge, M.L.A., employees' nominee. This same Board was also appointed to deal with a dispute between the Sun Publishing Company, the Sun Directories, Limited, and Vancouver Engravers, Limited, and the Vancouver Newspaper Guild, Local No. 1.

The personnel of the Board is as follows:—Mr. J. Howard Harman, Victoria, B.C., chairman, appointed on the nomination of the other two members, Mr. W. S. Owen, Vancouver, appointed on behalf of the employers and Mr. H. W. Herridge, M.L.A., Trail, B.C., appointed on the nomination of the employees.

The proceedings in this case have been reopened since the report was made, and the matter is still under consideration by the Board.

The text of the report of the Board and of the minority report is as follows:—

Report of Board

210-211 Pemberton Building,
Victoria, B.C.
September 14, 1944.

The Honourable Minister of Labour,
Ottawa, Canada.

Re: Vancouver News-Herald Ltd., and certain of its employees, members of Vancouver Newspaper Guild, Local No. 2; and re: Wartime Labour Regulations, P.C. 1003.

Sir: The Board of Conciliation appointed to inquire into the matters of dispute herein, by Order in Council dated August 8, 1944, passed pursuant to the above regulations, begs to report as follows:—

On September 13, at the commencement of the hearing, Mr. O'Brien, acting as chief representative of the Employees, stated that before dealing with the disputed articles of the proposed collective agreement or other points of actual dispute, he wished the Board to first report as to whether or not the Employer had been guilty of certain infractions of Section 19 of P.C. 1003. Later this statement was amplified to indicate that the request was that the Board should make a report to you on this issue alone, prior to dealing with the dispute referred to it.

After hearing argument on this point, the Board adjourned to formulate its ruling. The ruling made by the Board appears in the transcript of the proceedings appended to and forming a part of this report. * We would direct your attention to the fact that Mr. Herridge, M.L.A., the appointee of the Employees, did not agree with the ruling of the Board, and that his signature to this report does not indicate any agreement with the ruling in question.

On the 14th September the Board reconvened, and Mr. O'Brien stated that if the Board was not prepared to deal with the charges made first and quite apart from the matters in dispute between the parties, that the Employees were not prepared to present any evidence.

The Chairman drew to Mr. O'Brien's attention that the Board would include in its report such recommendations relative to the desirability of prosecution as the evidence justified and would give full weight to any evidence of prejudice against the Employees' case. Mr. O'Brien reaffirmed that he was still of the opinion that his clients could not safely proceed unless the Board could see its way clear to hear and deal with the matter of the charges first. As a consequence, no evidence was submitted by either party and the Board adjourned to make this report.

The Board therefore reports that it was unable to effect a conciliation and is unable to make any recommendations on the merits of the matters referred to it.

Each of the members of the Board regrets the fact that an impasse was reached.

All of which is respectfully submitted.

(*Sgd.*) J. H. HARMAN
(*Sgd.*) W. S. OWEN
(*Sgd.*) HERBERT W. HERRIDGE.

Minority Report

To:
Honourable George S. Pearson,
Minister of Labour,
Parliament Buildings,
Victoria.

Re: P.C. 1003, Vancouver News-Herald Ltd., employer, and Vancouver Newspaper Guild, Local No. 2, employees.

Dear Sir:

In my opinion the representatives of Vancouver Newspaper Guild, Local No. 2, cannot properly be asked to proceed with the hearing of the union shop and other clauses which formed the original matters in dispute, until certain very serious matters, which the Guild charges transpired since the Board was constituted, have been completely cleared up.

These matters are, if true, illegal, and include a number of instances of intimidation by the company of certain employees, including, it is alleged:

(1) The discharge of the Guild president on a "trumped-up" charge.
(2) The circulation by the company of a letter addressed to the board chairman,

*Due to the lack of space the text of the transcript of evidence is not here reproduced. The majority of the Board ruled that it did not have jurisdiction to hear these matters separately from the dispute. "We are of the opinion," the Chairman's statement continued, "that the Board can, and should properly, add in its report such supplementary recommendations as it sees fit after it hears all the evidence."

which was signed by some employees and expressed opposition to the union shop.

(3) The company's solicitor's behaviour in interviewing Guild members about the letter, and in seeking to have them make declarations that they had voluntarily signed the letter in question.

All these matters are, if substantiated, a serious violation of P.C. 1003, and the Guild has, in my opinion, solid grounds for its refusal to have the case for the union shop heard until these alleged violations of the law of this country have been investigated. To me also, it appears obvious that unless these charges are first disposed of, there will be no possible chance of effecting a conciliation.

The matter is of such serious and general importance to the administration of labour legislation that I am forced to dissent from the majority decision of the Board, whose opinion it was that they had no jurisdiction to hear these matters separately from the dispute before them.

However, it is my opinion that the question is still within the jurisdiction of the Board, and it is also my opinion that the Minister of Labour should state that the Board has power to deal with such violations previous to the hearing of the dispute.

Failing this, it is my further opinion that the Minister of Labour should take necessary steps to have these charges fully investigated.

Respectfully submitted,

(*Sgd.*) HERBERT W. HERRIDGE, M.L.A.,
Member of the Board.

Almer Hotel, Vancouver,
Sept. 14, 1944.

Conciliation Work of the Industrial Relations Branch During September, 1944

DURING the month of September officers of the Industrial Relations Branch were called upon to handle 25 industrial disputes or controversial situations involving 6,216 workpeople employed in 26 different establishments. Of these 19 were new disputes which originated during the month while 6 were situations which had been unterminated as of August 31 and received further attention in September. They were dealt with under the provisions of the Conciliation and Labour Act.

Industrial Relations officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal, Fredericton, N.B., and Glace Bay, N.S. The territory of the two officers resident in Vancouver comprises British Columbia and Alberta; two officers stationed in Winnipeg cover the provinces of Saskatchewan and Manitoba and Northwestern Ontario; four officers resident in Toronto confine their activities to Ontario and work in close collaboration with the Provincial Conciliation service; two officers in Montreal are assigned to the Province of Quebec and two officers resident in Fredericton, N.B., and Glace Bay, N.S., represent the Department in the Maritime Provinces. The headquarters of the Industrial Relations Branch and the Director of Industrial Relations and staff are situated in Ottawa.

Classified by industries, the disputes occurred as follows:—

MINING AND SMELTING, ETC.:	
Coal mining	1
Metal mining	2
MANUFACTURING:	
Animal foods	1
Metal products	12
Fur and leather and other animal products	1
Textile, clothing products, etc.	1
Wood products, miscellaneous	3
Non-metallic minerals, chemicals, etc.	2
TRANSPORTATION AND PUBLIC UTILITIES:	
Miscellaneous	1
SERVICE:	
Business and personal	1
NATURE OF DISPUTE OR SITUATION:	
Strike	2
Threatened strike	2
Controversies	9
Arbitrations	4
Requests to conduct consent elections	1
Services of Commissioners	7
PREDOMINANT CAUSE OR OBJECT:	
Increase in wages	1
Other causes affecting wages and working conditions	1
Recognition of Union	2
Discharge of workers for union activity or membership	14
To secure or to maintain union wages and working conditions	3
Refusal to employ for union activity or membership	1
Unclassified	3
DISPOSITION:	
Strike terminated by mediation	1
Controversy terminated by mediation, etc.	4
Decision rendered in arbitration	4
Election or vote conducted	1
I.D.I.C. appointed under P.C. 4020	1
Agreement: verbal	1
Referred to Wartime Labour Relations Board	2
Referred to Provincial authorities	4
Pending	4

RESULTS:	
In favour of employees	4
In favour of employer	3
Compromise or partially successful	5
Indefinite or unterminated	8
Not known	5
METHOD OF SETTLEMENT:	
Conciliation or mediation	5
Arbitration	4
Administrative action	6
Investigation only	4
Pending	5
Technical services	1

Brief summaries of a few of the cases of chief interest are given below:

Metal Products Workers, London, Ont.—In the latter part of August, the Department of Labour was asked to investigate charges that Sparton of Canada Limited, London, Ont., had dismissed two employees because of union membership and activity on behalf of the United Steelworkers of America. A preliminary investigation was made by Mr. F. J. Ainsborough, Industrial Relations Officer, Toronto. The Company reinstated one of the two employees involved in another Department, but refused to re-employ the second man. Under the provisions of Order in Council, P.C. 4020, His Honour Judge W. T. Robb of Orangeville, Ontario, was appointed an Industrial Disputes Inquiry Commission to conduct a formal investigation of the case. His findings were that the man in question was not dismissed for the reason that he was a member of or working on behalf of the union.

Metal Products Workers, Montreal, P.Q.—During August the Minister of Labour was asked to appoint the Chairman of an Arbitration Committee to deal with a dispute between the R.C.A. Victor Company Limited of Montreal and its hourly-paid employees represented by Local 1028-B, International Brotherhood of Electrical Workers. Professor B. S. Keirstead, of the Department of Economics, McGill University, was appointed as Chairman, while Messrs. R. Haddow and D. A. Paterson were appointed as members by the union and employer respectively. The issue to be arbitrated was the interpretation in practice of the clause in the collective agreement which provided that in all cases of promotion, lay-off or increase of staff, consideration would be given to length of service, which factor would govern providing the employee's ability, skill and experience were relatively equal. After argument from both parties was heard at one sitting of the Committee, it appeared that a compromise solution could be reached by direct negotiation. Under the guidance of the Arbitration Committee, the two parties achieved common ground and signed a new agreement relating to seniority.

Metal Miners, Noranda, P.Q.—During September the Minister of Labour appointed District Magistrate Honoré Achim, of Hull, P.Q., as an Industrial Disputes Inquiry Commission to investigate a charge made by Local No. 688 of the International Union of Mine, Mill and Smelter Workers that union membership and activity had been the reason for the dismissal of an employee by Waite Amulet Mines Limited, of Noranda, P.Q. The appointment followed a preliminary investigation by Mr. R. Trepanier, Industrial Relations Officer of Montreal. At the end of the month, the report of the Commissioner had not been received.

Metal Products Workers, Toronto, Ont.—On September 18 the Department received a request for the appointment of an Industrial Disputes Inquiry Commission to investigate the dismissal by Philco Corporation of Canada Limited, Toronto, Ont., of an employee who was a representative on the bargaining committee of Local 512, United Electrical, Radio and Machine Workers of America. A preliminary investigation was conducted by Mr. H. Perkins, Industrial Relations Officer, Toronto, following which the decision was reached that the circumstances did not warrant the appointment of a Commission.

Leather Workers, Toronto, Ont.—Early in September the Department received a request from the International Fur and Leather Workers' Union to appoint an Industrial Disputes Inquiry Commission to investigate the dismissal by the Anglo Canadian Leather Company Limited, of Toronto, of six employees, allegedly because of union membership and activity. Following a preliminary investigation by Mr. H. Perkins, Industrial Relations Officer of Toronto, the Minister of Labour appointed His Honour Judge Ian Macdonnell as an Industrial Disputes Inquiry Commission under the provisions of Order in Council, P.C. 4020. At the conclusion of a formal inquiry, the Commissioner reported that, on the weight of evidence, he found that three of the employees in question were dismissed for the reason that they were members of, and working on behalf of, the trade union. He reported that he was unable to find that the other employees involved were dismissed for the same reason. Under the authority of the War Measures Act and the provisions of Order in Council, P.C. 4020, the Minister of Labour ordered the Company to reinstate the three employees whom the Commis-

sioner found to have been improperly dismissed, in their former positions, at no lesser rates of pay, and with the same rights and privileges which they formerly enjoyed. The Company was also required to reimburse these employees for lost wages.

Aircraft Workers, Montreal, P.Q.—Early in September a request was made to the Minister of Labour to appoint the Chairman of an Arbitration Committee to deal with the dismissal by Noorduyn Aviation Limited of the Shop Committee of Lodge 712, International Association of Machinists. Mr. B. Rose, of Montreal, who was nominated as Chairman of the Arbitration Committee, ruled that the Arbitration Committee could not entertain the matter of discrimination, as a result of which the Union representative withdrew the case without prejudice to the rights of the Organization. The Department then referred the case to Mr. L. Pepin, Industrial Relations Officer, Montreal, for preliminary investigation. After a study of all the evidence, the parties were notified of the decision of the Department that the appointment of a Commissioner was not justified in the circumstances.

Foundry Workers, Montmagny, P.Q.—A complaint that an employee of the Belanger Foundry Limited, Montmagny, P.Q., had been dismissed because of union activity was made to the Department early in September by the District Representative of the International Moulders' and Foundry Workers' Union of North America. A preliminary investigation was conducted by Mr. L. Pepin, Industrial Relations Officer, Montreal, at the conclusion of which the Minister of Labour appointed the Honourable Mr. Justice Alfred Savard, of Quebec, P.Q., as an Industrial Disputes Inquiry Commission under the provisions of Order in Council, P.C. 4020. At the beginning of October the report of the Commissioner had not been received.

Union Representation Votes

Munitions Workers, Nobel, Ont.—By joint consent of the parties, a Union representation vote was conducted on September 6 and 7 among employees of Defence Industries Limited, Nobel, Ont., under the supervision of Mr. H. Perkins, Industrial Relations Officer, Toronto. The ballot was taken to determine whether the employees desired to be represented for the purposes of collective bargaining by Defence Workers' Union, Local No. 1 (C.C.L.). There were 829 employees eligible to vote, of whom 533 cast their ballots. A total of 341 voted in favour of representation through the Union and 183 voted against, there being 9 spoiled ballots.

Canadian Railway Board of Adjustment No. 1

Summary of Decisions

REPORTS have been received covering the following cases heard by the Canadian Railway Board of Adjustment No. 1. Summaries of other recent decisions appeared in the LABOUR GAZETTE, September, 1944, p. 1131.

The Board was established under a voluntary agreement concluded in 1918, between the several railway companies and certain of the railway organizations. It has power to determine all differences arising between the railway companies and the members of any of the six railway brotherhoods "including the interpretation of wage schedules or agreements having due regard to the rights of the several classes of employees and of the railways respectively."

This agreement was supplemented by a Post-War Agreement continuing the Board's functions entered into April 15, 1921. The text of the Post-War Agreement was published in the Board's eighth triennial report, dated October 1, 1942, together with changes in the personnel of the Board and a tabular summary of the cases adjusted during the preceding three-year period.

The Board consists of six representatives of the railways and six representatives of labour, one from each of the following Railway Brotherhoods: The Brotherhood of Locomotive Engineers; the Brotherhood of Locomotive Firemen and Enginemen; the Order of Railway Conductors; the Brotherhood of Railroad Trainmen; the Order of Railroad Telegraphers; and the Brotherhood of Maintenance of Way Employees and Railway Shop Labourers.

Case No. 532—**Canadian Pacific Railway Company (Western lines), and the Brotherhood of Railroad Trainmen.**

The case arose from a claim of a conductor for all time lost during some 200 days he was out of service.

The joint statement disclosed that the conductor reported for work following a six-months period during which he had been undergoing medical treatment. He presented medical re-

ports from the doctors who had been treating him. He was allowed to make one trip and was then officially notified that it would be necessary for him to be examined by the Company's chief medical officer. For some days the conductor refused to agree to this, but subsequently submitted to the examination. He was then permitted to resume duty as conductor in freight service, but was refused duty on a passenger train "unless he trimmed his whiskers." He refused to accept any restrictions of his seniority rights and remained out of service for over five months longer.

The employees claimed that holding the conductor out of service and requiring the further medical examination was virtually charging the conductor with physical or mental disability and that this charge was not proven. Article 10 of the schedule states: "Should the charge not be proven, the trainman will be reinstated at once and paid for all time lost at schedule rates and reasonable actual expenses." Further, Article 7, clause E reads in part: "The promotion of conductors will be to any runs in either work, freight, mixed or passenger service to which their seniority as conductors entitles them."

The Company claimed that it was customary to require a report from the Company's medical officer following an extended absence due to illness or accident. Consequently, practically all of the time lost by the conductor was due to his defiance of constituted authority. The Company pointed out also that the conductor could have appealed from the Company's ruling restricting his service, but neglected to do so.

Representatives of both parties in the dispute presented further evidence to the Board, orally.

The Board in its Decision gave as its opinion that there were faults on both sides for the condition that developed and ruled that the conductor be paid for one-half of the time actually lost.

Case No. 533—**Canadian National Railways (Central Region) and Brotherhood of Locomotive Engineers.**

This case involved the claim of an engineer for a separate trip for running an engine, light, from his objective terminal to a repair shop nearly ten miles distant, after completing his regular run.

The employees claimed that the engineer should be paid for a separate trip as per Article 5 of the Engineers' Schedule, inasmuch as running the light engine back to the shop for repairs could not, in their opinion, be considered part of the assignment.

The Railway, in its contention, quoted Article 5 of the Current Schedule for locomotive engineers as follows:

"Should engineers be used out of or at initial or distant terminal after completing their regular assignment, a new day or trip will commence, except in cases where special duties, such as watching engines, etc., are required in connection with the run."

The Company claimed that the run in dispute fell within the category of "special duties in connection with the run."

Representatives of both parties appeared before the Board and presented further evidence.

The Board in its Decision sustained the contention of the employees.

Strikes and Lockouts in Canada During September, 1944

DURING the month of September there was a substantial decline in strike activity in Canada as compared with the previous month and with September, 1943. Preliminary figures for September, 1944, show a decrease of 12 strikes as compared with August, 1944, while the number of workers involved decreased sharply and the time loss in man-working days was the lowest recorded for any month since August, 1930. There were 9 strikes in existence during the month, involving 1,034 workers and causing a time loss of 800 man-working days, as compared with 25 strikes in August with 12,771 workers involved and a time loss of 121,343 man-working days. In September, 1943, there were 38 strikes with 10,305 workers involved and a time loss of 37,598 days.

Preliminary figures for the first nine months of 1944 show a total of 160 strikes, involving 70,234 workers, with a time loss of 478,989 man-working days. Comparative figures for the same period last year show 322 strikes with 159,774 workers involved and a time loss of 859,643 days.

There were no strikes carried over from August and the nine strikes which commenced during September were all terminated during the month. Of these nine strikes, three resulted in favour of the workers, two in favour of the employers, one was a compromise settlement and three were indefinite in result, work being resumed pending final settlement.

The record does not include minor strikes such as are defined in another paragraph nor does it include strikes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated.

* Preliminary.

‡ Strikes unterminated at the end of the previous year are included in these totals.

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is seldom encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout included as such in the records of the Department is a cessation of work involving six or more employees and lasting at least one working day. Strikes of less than one day's duration and strikes involving less than six employees are not included in the published record unless ten days or more time loss is caused, but a separate record of such strikes is maintained in the Department and the figures are given in the annual review. The records include all strikes and lockouts which come to the knowledge of the Department and the methods taken to obtain information preclude the probability of omissions of strikes of importance. Information as to a strike involving a small number of employees or for a short period of time is frequently not received until some time after its commencement.

STRIKES AND LOCKOUTS IN CANADA DURING SEPTEMBER, 1944*

Industry, occupation and locality	Number involved		Time loss in man-working days	Particulars†
	Establishments	Workers		
Strikes and Lockouts Commencing During September, 1944				
LOGGING—				
Longshoremen, Campbellton, N.B.	1	70	115	Commenced September 19; for increased wages; terminated September 20; conciliation, federal, and return of workers pending joint application to RWLB; indefinite.
MINING—				
Coal miners, Drumheller, Alta.	1	87	87	Commenced September 8; for delivery of pay statements to wash house; terminated September 8; negotiations; in favour of workers.
Coal miners, Stellarton, N.S.	1	37	37	Commenced September 15; protest against one miner, with wet clothes, quitting work without notifying his helper; terminated September 15; return of workers; in favour of employer.
Coal miners, Florence, N.S.	1	600	225	Commenced September 18; refusal of onsetters to repair main haulage rope; terminated September 18; return of workers; in favour of employer.
Coal miners, Bellevue, Alta.	1	19	19	Commenced September 21; for transportation between office and bus garage; terminated September 21; negotiations; compromise (bus to return miners direct to office).
Coal miners, Cambria, Alta.	1	100	100	Commenced September 23; for re-measurement of five disputed places (payment for impurities in coal seam); terminated September 23; negotiations; in favour of workers.
MANUFACTURING—				
Printing and Publishing—				
Pressmen and binders, Montreal, P.Q.	1	34	57	Commenced September 11; for a 40 hour week; terminated September 12; negotiations and further reference to RWLB‡; in favour of workers.
Miscellaneous Wood Products–				
Furniture factory workers, Owen Sound, Ont.	1	80	130	Commenced September 7; against employment of three non-union workers; terminated September 8; conciliation, provincial, and return of workers pending settlement; indefinite.
CONSTRUCTION—				
Buildings and Structures—				
Bricklayers, Cap de la Madeleine, P. Q.	1	7	30	Commenced September 13; for increased wages; terminated September 18; negotiations and return of workers pending reference to RWLB; indefinite.

* Preliminary data, based where possible on direct reports from parties involved, in some cases incomplete; subject to revision for the annual report.

† In this table the date of commencement is that on which time loss first occurred, and the date of termination is the last day on which time was lost to an appreciable extent.

‡ RWLB—Regional War Labour Board.

Strikes and Lockouts in Great Britain and Other Countries

THE latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month, bringing down to date that given in the March, 1944, issue in the review of "Strikes and Lockouts in Canada and Other Countries." The latter included a table summarizing the principal statistics as to strikes and lockouts since 1919 in the various countries for which such figures are available. Statistics given in the annual review and in this article are taken, as far as possible, from the government publications of the various countries concerned.

Great Britain and Northern Ireland

The British *Ministry of Labour Gazette* publishes statistics dealing with disputes involving stoppages of work and gives some details of the more important ones.

The number of work stoppages beginning in July, 1944, was 67 and two were still in progress from the previous month, making a total of 69 during the month, in which 19,900 workers were involved and a time loss of 63,000 working days was caused.

Of the 67 work stoppages commencing in July, 15 arose out of demands for increased wages, 28 over other wage questions, three on questions as to working hours, four over questions respecting the employment of particular classes or persons and 17 over questions respecting working arrangements.

New Zealand

The number of industrial disputes recorded for the three months ended March 31, 1944, was 55, involving 10,149 workers, with a time loss of 29,051 working days.

United States

Preliminary figures for August, 1944, show 485 strikes beginning in the month, in which 190,000 workers were involved. The time loss for all disputes in progress during the month was 935,000 working days. Corresponding figures for July are 470 strikes, involving 145,000 workers, with a time loss of 680,000 working days.

Training for Metallurgical Industries in Great Britain

The Educational Supplement from the *London Times* of July 22 gives an account of an apprenticeship scheme for the metallurgical industries. The scheme, promoted by a Midland firm for its associated companies, came into effect in September, and has been devised to allow the apprentice to attain a high educational standard in addition to training which will fit him to be a highly trained craftsman.

The scheme is divided into two periods, totalling five years, and beginning when the apprentice is 16. The first period (three years) will be spent in giving a general knowledge of his craft, a working knowledge of the basic technical background and an introduction to the higher branches of the industry. This period will enable him to decide in which branch of the industry he wishes to specialize, and the remaining two years are to be devoted to such specialization. During the first period, two of the three annual terms are spent in the works department, while the third is spent at the technical college. After the first period, specialization may proceed along craft lines, or along technical or commercial lines.

Under the scheme the apprentice is not required to pay a fee or a premium but he receives wages at rates agreed upon by the Employers' Federation and trade unions. Further opportunities are available to apprentices showing special aptitude.

Collective Agreements and Wage Schedules

Recent Collective Agreements

COLLECTIVE agreements received in the Department are outlined in the LABOUR GAZETTE from month to month. It is not possible because of limitation of space to include all agreements received. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of the employers and workers are also included.

Agreements made obligatory under the Collective Agreements Act in Quebec are summarized in a separate article following this.

Manufacturing: Textiles and Clothing

CORNWALL, ONTARIO.—COURTAULDS (CANADA) LIMITED AND UNITED TEXTILE WORKERS OF CANADA, LOCAL NO. 3 (RAYON FACTORY WORKERS).

Agreement to be in effect from September 10, 1944, to September 9, 1945, and thereafter from year to year, subject to notice. This agreement is similar to the previous agreement which was summarized in the LABOUR GAZETTE, February, 1944, p. 195, with these exceptions:

The maintenance of membership provision, formerly applying only to permanent male employees, is to be extended to female employees and boy employees provided these two classes of employees vote in favour of such a clause.

The cost-of-living bonus is not mentioned in this agreement. It is provided that hours of work, rates of wages and conditions of work as presently prevailing shall continue unless otherwise decided by mutual agreement. In the case of female employees or boys, the rate of pay for two shift workers shall be the departmental day rate plus 2 cents per hour. Subject to the approval of the National War Labour Board, specialists in the engineering department are to receive 2½ cents per hour additional.

Manufacturing: Printing and Publishing

WINNIPEG, MANITOBA.—CERTAIN JOB PRINTING FIRMS AND THE INTERNATIONAL TYPOGRAPHICAL UNION, LOCAL 191.

Agreement to be in effect from February 2, 1944, to January 31, 1945, and thereafter subject to notice. All employees must be union members. If none available when more help required, others employed are to apply to join the union.

Hours: 44 per week for day work; 42 for night work. Overtime is payable at time and one-half for the first three hours and double time thereafter; double time for all work on holidays.

Wages for job compositors, composing machine operators and proof readers: $39.60 per week (90 cents per hour) for day work, $43.60 per week ($1.04 per hour) for night work.

Provision is made for regulation of and wage rates for apprentices and learners, and also for the settlement of disputes.

WINNIPEG, MANITOBA.—CERTAIN JOB PRINTING FIRMS AND THE INTERNATIONAL PRINTING PRESSMEN AND ASSISTANTS' UNION LOCAL 87.

Agreement to be in effect from February 2, 1944, to January 31, 1945, and thereafter subject to notice. Only union members to be employed, if available. Others hired must apply to join the union.

Hours: 44 per week for day work; 42 for night work. Overtime is payable at time and one half for the first three hours and double time thereafter; work on Sundays and holidays, at double time. Weekly wage rates: journeymen pressmen $39.60; automatic, job, cylinder pressmen (machines not larger than 17 x 22 sheet size) $34.75, offset pressmen $39.60 and $44, platen pressmen $28.60 and $34.75, assistant pressmen $28.60; night rates are $4 per week over the day rates.

Provision is made for the regulation of apprentices and for the settlement of disputes.

Manufacturing: Metal Products

HAMILTON, ONTARIO.—INTERNATIONAL HARVESTER CO. OF CANADA LTD., HAMILTON HARVESTER WORKS AND UNITED STEEL WORKERS OF AMERICA, LOCAL 2868.

Agreement to be in effect from August 9, 1944, to August 31, 1945, and thereafter subject to 30 days' notice. This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, August, 1943, p. 1130, with these exceptions:

Some changes are made to prevent the breaking in of an inexperienced employee on a group operation from lowering the earnings of the other members of the group operation. Changes are also made in seniority provisions and in grievance procedure.

Construction

TORONTO, ONTARIO.—TORONTO BUILDERS' EXCHANGE AND CONSTRUCTION ASSOCIATION AND THE WOOD, WIRE AND METAL LATHERS' INTERNATIONAL UNION, LOCAL 97

Agreement to be in effect from April 6, 1944, to March 31, 1945, and thereafter from year

to year, subject to notice. Only union members to be employed.

Hours: 40 per week (a 5-day week). Overtime is payable at time and one half except when required to set hangers for pouring of concrete which is at straight time on Saturday morning and at time and one-half on Saturday afternoon; all other work on Saturdays and all work on Sundays and holidays, double time.

Minimum wage rate for lathers: $1.17 per hour. On shift work the second and third shifts are paid time and one-seventh. Provision is made for the regulation of apprenticeship and for the settlement of disputes.

Service: Public Administration

SYDNEY, N.S.—CITY OF SYDNEY AND THE SYDNEY CIVIC WORKERS' UNION.

Agreement to be in effect from February 18, 1944, to February 18, 1945, and thereafter from year to year, subject to notice. The city recognizes the union. A check-off of union dues from the pay of employees who authorize it is provided for.

Hours: 8 per day. Overtime is payable at time and one-half; double time for all work on Sundays and statutory holidays. Vacation: one week with pay to employees with at least one year's service.

Hourly wage rates including the 9 cents per hour cost-of-living bonus: labourers 59 cents, truck drivers 68 cents, water foreman 70½ cents, water helpers 61 cents, painters 71½ cents, carpenters 90 cents, carpenters' helpers 75½ cents, timekeepers 71½ cents, concrete construction foreman 90 cents, subforemen 70½ cents, gardener 73 cents, roller operator 85½ cents, shed mechanic 87½ cents, sewer maintenance 76½ cents, asphalt mixer and raker 75½ cents.

Provision is made for seniority rights and for the settlement of disputes re suspensions, discharges, etc.

HAMILTON, ONTARIO.—THE CORPORATION OF THE CITY OF HAMILTON AND THE INTERNATIONAL FIREFIGHTERS ASSOCIATION, No. 288.

Agreement to be in effect from July 1, 1944, to December 31, 1944, and thereafter from year to year, subject to notice.

Hours: fire fighters work on the two platoon system, consisting of 10 hours of day work, followed by 14 hours off duty, and 14 hours of night work followed by 10 hours off duty. A change of shifts to take place every week, shifts to be changed weekly by the day shift working 24 hours and the night shift off duty for 24 hours. Each fire fighter is entitled to one day off duty every week. Alarm operators to work 8 hour shifts, rotating weekly, with one day off per week.

Annual salaries: district chiefs $2,350 plus $154 bonus; master mechanic, electrician and captains $2,250 plus $147 bonus; lieutenants and inspector $2,150 plus $171.20 bonus; assistant mechanics and assistant electricians $2,100 plus $167.70 bonus; fire fighters—first class $2,000 plus $160.70 bonus, second class $1,762 plus $144.04 bonus, third class $1,657 plus $136.69 bonus; alarm operators $1,400 plus $163.20 bonus. Third class fire fighters to advance to second class after one year's service, second class to first class after two years' service.

Vacation: three weeks vacation each year with pay. Uniforms are supplied by the city. Sick leave: 15 days with pay and 15 days with half pay each year, this to be cumulative for 5-year periods. Provision is made for seniority rights and for the settlement of disputes.

Collective Agreement Act, Quebec

Recent Proceedings Under the Act

IN Quebec, the Collective Agreement Act provides that where a collective agreement has been entered into by an organization of employees and one or more employers or associations of employers either side may apply to the provincial Minister of Labour to have the terms of the agreement which concern wages, hours of labour, apprenticeship and certain other conditions made binding throughout the province or within a certain district on all employers and employees in the trade or industry covered by the agreement. Notice of such application is published and thirty days allowed for the filing of objections, after which an Order in Council may be passed granting the application, with or without changes as considered advisable by the Minister. The Order in Council may be amended or revoked in the same manner. Each agreement is administered and enforced by a joint committee of the parties. Further information concerning this legislation is given in the LABOUR GAZETTE, January, 1943, page 86. Proceedings under this Act and earlier legislation have been noted in the LABOUR GAZETTE monthly since June, 1934.

Recent proceedings under the act include the extension of three new agreements, which are summarized below. A request for the amendment of the agreement for the bakery industry at Granby was published in the *Quebec Official Gazette*, September 9, and a request for a new agreement for the embroidery industry at Montreal was published September 30. A request for the amendment of the building trades agreement at St. Jerome was gazetted September 16, and for the amendment of the building trades agreement at St. Hyacinthe, September 23. A request for amendment of the building trades agreement at Montreal was gazetted September 30. A request for a new agreement for garages and service stations at Sherbrooke

was published September 16. A request for amendment of agreement for municipal employees at Joliette was gazetted September 9.

In addition, Orders in Council were published in the *Quebec Official Gazette* during July approving or amending the constitution and by-laws of certain joint committees and others approving the levy of assessment were published during September.

Manufacturing: Metal Products

Can and Metal Utensil Manufacturing, Province of Quebec

An Order in Council, dated September 28, and gazetted September 30, makes obligatory the terms of a new agreement between the American Can Company of Montreal and the Canco Social Committee and the Continental Can Makers Association of Montreal.

The agreement covers the establishments of these companies and those engaged in similar operations, throughout the province. Agreement to be in effect from September 30, 1944, to September 29, 1945.

Hours: 48 per week. Overtime is payable at time and one-quarter for general and specialized employees, at time and one-half for mechanical employees and stationary enginemen and firemen. No overtime premiums for supplementary, office or salaried employees. Double time for work on holidays.

Minimum hourly wage rates for general employees: boys of 16 years of age 22½ cents, of 17 years 25 cents, of 18 years 27 cents, of 19 years 30 cents, of 20 years 32½ cents, on reaching 21 years 35 cents per hour to be increased by 2½ cents per hour each six months until he reaches his classification rate; female employees 25 cents per hour for beginners, 27½ cents after six months and 30 cents after one year; janitors, etc. 35 to 37½ cents; production operators, either hand or machine, including hand solderers, 37½ to 40 cents; can pilers, packers and checkers 37½ to 40 cents; routine dippers and sprayers, building maintenance labourers and millwright helpers 40 cents; operators and setters who set machines or tools and operate same 40 to 42½ cents, electric truck drivers 42½ cents. Minimum hourly rates for specialized employees: machine and tool setters and lithograph press feeders, from 42½ cents to 45 cents after first six months and 47½ cents after one year; maintenance men on machines who watch, adjust and repair same from 45 cents to 47½ cents after six months to 50 cents at the end of one year; picklers, skilled in all phases of this trade, galvanizer and tinner helpers 45 cents; galvanizers and tinners principal attendants 55 to 60 cents; building and maintenance men 55 cents; painters and sprayers 50 to 55 cents; acetylene welders and electric welders 57½ cents, deep draw press operators, 47½ to 50 cents. Minimum hourly wage rates for mechanical employees: millwrights 61 to 66 cents; journeymen machinists, including tool-makers, die-makers and general machinists 77½ cents to 80 cents; journeymen lithographers, including lithograph pressmen, photo compositors, transfermen and etchers 87½ cents to 92½ cents; apprentice machinists begin at 25 cents with increase of 5 cents per hour for each six month period until receiving journeymen's wages; apprentice lithographers beginning at 45 cents also receive an increase of 5 cents for each six months period until receiving journeymen's rates. Minimum hourly wage rates for supplementary employees: watchmen from 30 to 35 cents; motor truck drivers and field service men 45 cents. Minimum weekly salaries for office employees $10 for office boys and messengers, $12.50 for other employees.

For stationary enginemen and firemen, the province is divided into three zones: Zone I, Montreal, Longueuil, St. Lambert, Laprairie, Laval des Rapides and municipalities entirely or partly situated on the Island of Montreal; Zone II, Chicoutimi, Granby, Hull, Joliette, Levis, Quebec, Shawinigan Falls, Sherbrooke, Sorel, St. Hyacinthe, St. John, Thetford Mines, Three Rivers, Salaberry de Valleyfield, Iberville and Quebec West; Zone III, the rest of the province. Minimum wage rates: chief enginemen, first class $51 per week in all zones; second class $42 in Zone I, $40 in Zone II, and $38 in Zone III; third class $36 in Zone I, $34 in Zone II and $32 in Zone III: enginemen working as second class enginemen 66 cents per hour in Zone I, 63 cents in Zone II and 60 cents in Zone III; third class enginemen 55 cents in Zone I, 53 cents in Zone II and 50 cents in Zone III; fourth class 50 cents in Zone I, 48 cents in Zone II and 45 cents in Zone III; firemen (stokers) 40 cents in Zone I, 38 cents in Zone II and 35 cents in Zone III.

Trade

Retail Stores, Windsor

An Order in Council, dated September 21 and gazetted September 30, makes obligatory the terms of an agreement between various retail stores, in Windsor and L'Association des Employés de Magasin de Windsor. Agreement to be in effect from September 30, 1944 to September 29, 1945 and year to year thereafter, subject to notice. This decree applies to the town of Windsor and all territory within a radius of three miles.

Hours: in industrial and commercial establishments a 52-hour week. There are 14 holidays observed during the year and employees are paid for these.

Minimum weekly wage rates—in small ware shops, drapery and fancy goods stores, hardware stores, department stores and ready made shops: for 25 per cent of employees $15 per week, 25 per cent $12, 25 per cent $10, 25 per cent $8; in all other establishments 25 per cent $20, 25 per cent $15, 25 per cent $12.50, 25 per cent $10. Apprentices' wages are 25 per cent lower than these but after six months they receive the wage rates to which they are assigned.

Vacation: employees with one year's service to have one week's vacation with pay.

Service: Business and Personal

Barbers and Hairdressers, Quebec

An Order in Council, dated September 1, and gazetted September 9, makes obligatory the terms of an agreement between "Le Syndicat catholique des Maîtres-Barbiers et Coiffeurs de Québec inc.", and "L'Union catholique des Compagnons Barbiers de Québec, inc."

Agreement to be in effect from September 9, 1944 to September 1, 1945 and year to year thereafter, subject to notice. The territorial jurisdiction is divided into Zone I, the city

of Quebec, Quebec West, Saint-Colomb de Sillery, Sainte-Foye, Petite Rivière, Charlesbourg and Giffard; Zone II, city of Levis, and a radius of 25 miles from its limits, and territory within a radius of 25 miles from limits of Quebec City excepting municipalities included in Zone I; Zone III is the city of Thetford Mines and radius of ten miles from its limits, Zone IV city of Rivière-du-Loup and the territory included in a radius of four miles; Zone V the town of Montmagny and within a radius of four miles.

Overtime is payable at regular rates. Vacation: one week with pay to employees with one year's service.

Barbers

Minimum wage rates for barbers (regular employees): $20 per week in zones I and III plus 50 per cent of receipts exceeding $29; $17 in zone II plus 50 per cent of receipts exceeding $26; $12 in zone IV plus 50 per cent of receipts exceeding $22; $14 in zone V plus 50 per cent of receipts exceeding $23; occasional hands to receive $4 per day in zones I and III and $3 in zones II, IV and V excepting Saturdays and the eves of holidays when they receive $4.

Hours: Zones I and III 54½ hour week; zone II 62 hour week; zone IV, 59 hour week; zone V a 63 hour week.

Hairdressers

Hours: a 48 hour week.

Wages for male hairdressers: zones I and III $20 per week plus 20 per cent of receipts of his work exceeding $30; $17 in zone II plus 20 per cent of receipts of his work exceeding $27; $12 in zone IV plus 50 per cent of receipts of his work exceeding $22; $14 in zone V plus 20 per cent of receipts of his work exceeding $24. Wages for female hairdressers $12 in all zones but zone IV where she receives $10 plus 10 per cent of receipts of her work exceeding $20; occasional hands (female) 30 cents per hour and 10 per cent of receipts of their work exceeding twice the amount of wages earned.

Vacation: six days with pay after one year's continuous service.

For both barbers and hairdressers, a schedule of minimum rates to be charged for services is included, and apprentice regulations are set forth.

Protection from Dust, Fumes and Gases

"PROTECTING Plant Manpower through the Control of Air Contaminants" is the title of Special Bulletin No. 14 of the Division of Labor Standards of the U.S. Department of Labor. There are three articles: Finding and Appraising the Hazards, Keeping the Air Harmless, and Protecting Workers against Temporary and Emergency Exposures.

Since the most common means of absorption is through respiration, the primary objective is to locate the source of contamination and install as near to it as possible a mechanical exhaust device to remove dust, fumes or gases as the case may be. Safe limits of concentration of some 40 gases or vapours are set out in the bulletin. In parts per million, the limit considered safe for benzene is 100; for carbon bisulphide 20; carbon monoxide 100 or, for one hour or less, 400; Hydrochloric acid 10; hydrogen cyanide 20; hydrogen sulphide 20; nitrogen oxides 10; and toluene 200. For lead ·15 milligrams per cubic meter is the maximum concentration permissible, for manganese 6 milligrams, and for mercury ·1 milligram.

As regards dust, it is suggested "that dusts with less than 10 per cent free silica should not exceed concentrations of 100 million particles per cubic foot while less than 10 million is advisable if the free-silica content exceeds 10 per cent."

The second article describes an efficient exhaust system. The four major parts are discussed in detail: exhaust hoods or enclosures at the several points of release of the contaminating substance, exhaust piping connecting the hoods into the system with a single discharge point, the exhaust fan or other air-flow producing equipment, and the air-cleaning equipment and final discharge stack.

Both in the case of workers normally working under conditions which expose them continually or repeatedly to small doses of harmful substances and of those who are actually, or who may be, exposed for a limited time to a high concentration of such substances, measures are necessary to obviate the danger. Indeed, it has become increasingly apparent that more serious results may follow neglect in the first case than in the second where the actual or potential danger as well as the consequences are more obvious.

Where there is either discomfort or a chronic type of infection or poisoning after repeated exposure of several hours daily, workers should be given adequate personal protection, if ventilation fails to render atmospheric conditions harmless. The importance of proper respiratory equipment for workers of the first class is emphasized by the writer. A detailed description of effective masks and respirators for different classes of work, their proper care, cleaning and storage is given as well as means of inducing workmen to wear them.

Canadian Vocational Training

CANADIAN Vocational Training provides the following types of training:—

(1) Pre-employment classes in vocational schools for men and women about to enter war industry;

(2) Part-time classes, principally for the upgrading of persons already employed;

(3) Training plant schools;

(4) Special classes for foremen and supervisors;

(5) Training of enlisted men as tradesmen for the Army, Navy and R.C.A.F.;

(6) Rehabilitation training for persons discharged from the Armed Forces in the present war and referred for training by the Department of Pensions and National Health;

(7) Assistance to certain categories of university students whose services are needed in connection with the war effort.

Canadian Vocational Training is carried on under agreements made by the Dominion Government with each province. The administration is decentralized with a Regional Director in each province. Training is given in technical schools, special training centres and in industrial plants. The provinces and municipalities supply the shop facilities of the technical schools to the Program free of charge. Provincial Governments also pay certain administrative costs and share with the Dominion in the cost of machinery and equipment purchases. All other costs are paid by the Dominion with funds from the War Appropriation.

From its inception up to August 31, 1944, the gross enrolment under Canadian Vocational Training has been as follows:—

Training for Industry	232,595
Army Tradesmen	43,718
Navy Tradesmen	8,390
R.C.A.F. Tradesmen	65,138
Rehabilitation (discharged persons from the forces)	4,300
Students	5,373
Total	359,514

On August 31, the total enrolment in all types of projects showed a still further decline to 4,895. The full-time pre-employment classes for war industries have practically ceased in all provinces except Ontario and Quebec where a few classes are still operating. During the month, approval was given to the opening of six new plant schools and several others that had been temporarily closed were re-opened to train additional groups of employees.

The end of August marked the termination of the training of tradesmen and pre-aircrew personnel for the R.C.A.F. The first of these classes were started in June of 1939 and have been in operation continuously since that time. The enrolment in the classes for Navy and Army tradesmen showed a small decrease during the month.

Rehabilitation Training of Ex-service Personnel

The enrolment here showed a small increase and it is expected that this increase will be much more marked in the coming months. The second group of two classes to train instructors for rehabilitation classes that have been in operation at Calgary and Hamilton, finished. No new classes of this nature are contemplated, at least for the time being. Additional field representatives have been appointed in various provinces to carry on the work of locating opportunities for training on the job in industry and to supervise and inspect the training that is being given to those already placed in this way. Country-wide arrangements have been made with half a dozen national and international organizations to provide correspondence courses that have been approved by the Department of Pensions and National Health for discharged persons. A substantial percentage of those undergoing vocational rehabilitation training at the present time, particularly among the women, are enrolled in private business colleges in various types of commercial courses.

Activities of the Unemployment Insurance Commission

Statistical Analysis of Insurance Operations During August—Survey of Employment Situation for September

DURING August, the number of applications for Unemployment Insurance benefit in Canada, 3,241, was almost identical with the number recorded in June and July. 3,226 and 3,106 respectively. Although the number of applicants each month is not large, the figures for 1944 continue substantially higher than those for the corresponding months of 1943. For example, during August of last year a total of 1,370 applications was filed.

A slight increase is recorded in the number of persons who signed the live unemployment register during the last six working days of August (5,408) compared with July when 4,488 persons signed. All persons who are reporting unemployed days in accordance with the provisions of the Act must sign the live unemployment register once a week.

A total of 4,746 persons received one or more benefit payments during August, compared with 4,753 during July and 1,104 during August last year. These 4,746 persons were paid a total of $108,688 for 57,547 unemployed days in August as against $135,256 for 71,035 days paid the 4,753 persons in July and $28,393 for 16,467 days paid the 1,104 persons last August.

The average number of days paid per beneficiary was then, 12·1 days in August, 14·9 days in July and 14·9 days in August, 1943. The average amount of benefit paid per beneficiary was $22.90 during August, $28.46 during July and $25.72 during August last year. The average amount paid per compensated day of unemployment was $1.89 in August, $1.90 in July and $1.72 in August, 1943.

Tables 1 to 8 present the latest available data with respect to the operations of the insurance branch of the Unemployment Insurance Commission.

August, 1944	3,241

Table 7 shows the occupations and Table 8 the ages of claimants for benefit. These new tables will appear regularly in the LABOUR GAZETTE.

Notes Respecting Tables 5 and 6

It may be noted that the amount of benefit paid each month, as given in the last column of Table 5, differs slightly from that shown in the second last column of Table 6. Table 5 presents the gross amount paid out by warrant or cash by provinces and is used to get a figure comparable with the number of man-days benefit paid and the number of beneficiaries. Table 6 gives the net amount paid for all Canada after overpayments have been recovered and omissions corrected.

The tables are intended to serve two distinct purposes. Table 5 is a statistical presentation designed to provide data from which the

average duration and the *average* amount paid per compensated day of unemployment can be obtained. Since the factors of overpayment etc. are present in all columns of Table 5, their influence on the averages is negligible. A total figure, such as the one presented in Table 6 can be refined for monthly presentation, but when reports must be received from offices across the country to get provincial figures (as in Table 5) pressure of time does not permit complete refinement monthly.

On the other hand, Table 6 is concerned *only* with presenting a precise accounting of the Unemployment Insurance fund at given dates. In order to remove the "overpayment and omission" discrepancies the basic time covered by the table varies slightly from that used in the preparation of Table 5.

Insurance Registrations

Reports received from Local Offices of the Unemployment Insurance Commission showed that as at September 30, 1944, 2,746,760 employees had paid contributions to the fund since April 1, 1944, an increase of 76,829 since August 31, 1944, and 541,004 since the commencement of the current fiscal year.

As at September 30, 1944, 138,728 employers were registered as having insurable employees, an increase of 1,770 from August 31, 1944.

Registration as at September 30, 1944, by regions follows:

TABLE 3.—CLAIMS FOR BENEFIT BY PROVINCES, AUGUST, 1944

Contributions in respect of services in the armed forces	241,582 13
Miscellaneous	1,549 11
	$ 246,409 92

Employment Conditions by Industries During September as Reported by Employment Service, Unemployment Insurance Commission

A SURVEY of the employment situation for the past month shows that conditions generally are quite favourable.

Agriculture.—In agriculture, good harvest weather in Eastern Canada during September made it possible for crops in this area to be removed with little loss of time and with better than usual dispatch. Workers are engaged in taking off late crops such as potatoes and roots. The fruit harvest is progressing favourably. While there is not an abundance of fruit pickers, particularly for apples, it is believed that the labour supply is sufficient to take care of this situation unless some emergency develops.

At the conclusion of the grain harvest in Eastern Canada workers were recruited from agriculture, industry and the Civil Service in Ontario and Quebec to assist with the harvest in Western Canada. The response to the appeal for workers for this activity was particularly encouraging and the harvesters arrived in the western fields several weeks prior to that of last year. The following data gives a summary of the harvest labour excursions:

	Ontario	*Quebec*	*Total*
Number from Farms ..	4,227	742	4,969
Number from Urban Industries	737	251	988
Number of Women Harvesters	498	29	527
Number of Harvesters dispatched	5,462	1,022	6,484

The grain harvest in Western Canada has been hampered quite considerably by rain and in some cases by snow. This bad weather tended to delay harvesting and threshing but it is believed that sufficient workers are on hand to take care of the western harvest.

To assist in harvesting Canada's big 1944 crop the lumbering and pulp industry also co-operated to the fullest possible extent in allowing many of their employees leave of absence during harvesting operations.

Logging and Lumbering.—More and more lumber will be required in the next five years, to rebuild homes in Britain and Europe and for Canada's own post-war building and construction programs.

Preparations have been made after interviews with Provincial Committees across Canada, for the recruitment of thousands of bush, saw-mill and pulp-wood workers, in order that production in the lumbering industry may be increased. Since 1938, production has increased nearly 100 per cent and the demand for lumber is still increasing.

Mining.—In the mining industry the production of nickel and copper is down for the first seven months of 1944, as compared to the corresponding period of last year. In 1943, the production of the above metals reached a new all-time record. The production of nickel and copper has been maintained at the expense of development work. A program has been initiated for the recruitment of off-seasonal workers for these essential operations.

The production of base-metals other than nickel and copper is being maintained and is able to supply amply the demands of our war industries.

The labour requirements of the metal industries will be furnished, as far as possible, from the ranks of the off-seasonal workers who are mainly farmers.

Several gold mines have stopped milling operations, due mainly to lack of sufficient labour and are using available manpower for development work.

The production of coal to date this year is down, as compared to the corresponding period of 1943. In the Maritimes, lack of sufficient workers is one reason and in Alberta the shortage of railway cars has caused a decrease in production.

Manufacturing.—In the field of aircraft production the manpower situation has been eased considerably as a result of cut-backs in production programs and also by a number of important lay-offs which are in progress, and scheduled to continue progressively until early spring of 1945.

Readjustments in production programs have permitted the Aluminum Company of Canada to take care of satisfactorily their normal requirements for potmen from within their organization, with the result that the usual acute emergency due to the seasonal heavy demand for potmen has not been experienced this year.

The continued shortage of heavy labour in the rubber industry is holding up to some extent in the production of tires urgently required for war vehicles and essential civilian transportation. Men and women are also required for the production of rubber footwear.

Some improvement in this industry is anticipated, however, now that labour is being made available from agricultural areas where harvesting operations have been completed.

In base metal manufacturing the demand for labour in the steel plants remains in excess of supply. After harvest-time some

relief may be obtained through the release of farm labour and the curtailment of different programs in the shipyards which may make some of that type of worker available.

In the foundries the need is for heavy labour. It is hoped that release of men from the farms after harvest will help to meet the necessary requirements.

In the manufacturing of munitions small calibre shell programs have been and are still being curtailed. The heavy demand is for the larger and special calibre shell and for shell filling plants. At the present time this labour demand is being met chiefly by transfer from one munition plant to another.

A steady demand for certain types of shipbuilding labour such as electricians, engine fitters, etc., still exists. This demand is mostly from the Halifax area where operations were considerably retarded by the recent strike in the Halifax shipyards. The cut-back in the number of building berths in other shipyards would not materially affect the employment situation. The men who were engaged on the discontinued berths were placed elsewhere in the respective shipbuilding yards which had the effect of relieving the demand for labour which had existed in these particular areas.

There exists an urgent demand for labour in the brick and tile industry. This has been partly met, in some instances, by the employment of prisoners of war by some of the firms and the possibilities of other firms in this industry using this type of labour is being explored, particularly by firms who operate on a year-round basis.

Construction.—There continues a very tight labour situation in the construction industry. This is particularly noticeable in the trowel trades, such as bricklayers, plasterers, etc. The damage caused by the recent earthquake at Cornwall intensified the demand for this type of labour and indications at present are that the work of repairing the damage caused by the earthquake is well in hand. Steady progress is being made on the construction of hospitals for the Department of Pensions and National Health, as well as on the conversion of a number of buildings for use as military hospitals for the Department of National Defence. The supply of construction labour was particularly serious in the Toronto area and was causing some concern, but the situation is showing signs of steady improvement.

Transportation.—A brisk demand still exists for various types of labour in the transportation industry. The freezing of lake seamen to the respective companies operating on the Great Lakes appears to be working very satisfactorily. There is still an urgent demand for men for railway track maintenance. This demand is particularly acute in the Province of Ontario and steps are being taken to relieve this situation by the employment of farmers who have completed their operations on the land. The grain elevator situation at the head of the Great Lakes has improved considerably since the appointment of a Controller of Grain Handling.

Employment of Women

In regard to the employment of women, the harvest season brought increased demands for women workers. Students and teachers who left their summer employment in industry or agriculture must be replaced and in addition more women are needed for processing the crops of fruits and vegetables.

The heavy ammunition program is still of the greatest importance and every available source of woman power in Canada is being explored in order to meet the requirements of the companies engaged in this work. In addition to intensive local recruiting, as many women as were available from the prairie region were brought into Ontario and Quebec for employment in war industries.

Intensive recruiting of women in the Maritime provinces for the food processing plants in the Annapolis valley has resulted in an adequate supply of workers.

In the latter part of August approximately 350 women from industry, farms and the Civil Service took part in the harvest excursion to the Prairies. This was the first time that women had been included in the harvest excursions and the experiment proved very successful.

Women workers are also being called upon to work in the textile plants to supply clothing for the armed services and essential civilian needs.

The hospital situation is causing general concern. Shortages in the provincial and non-provincial staffs of mental hospitals and tuberculosis sanatoria are particularly acute and careful consideration is being given to various plans designed to meet these needs.

Seasonal Transference of Farm Labour to Other Essential Industry

NATIONAL Selective Service has opened a campaign to secure over 100,000 men from the farms for work in other essential industries during the fall and winter months, it was announced recently by the Honourable Humphrey Mitchell, Minister of Labour.

While care will be taken not to encourage men to leave dairy or live-stock farms where they are needed during the winter, the effort will be to secure men for vacancies in other industries just as soon as the fall work is completed. The largest single group of the farm workers will be asked to take work in the woods on cutting sawlogs, pulpwood cutting and other forest operations. It is estimated that at least 60,000 men will be required in the woods for the fall and winter.

Meat packing plants, base metal mines, foundries, coal mines, heavy ammunition and shell filling, railway track maintenance work, construction and feed and flour milling, are all included in the industries requiring men from the farms during the winter time, in addition to woods work.

Meetings have been held across Canada by Officers of National Selective Service with Provincial Officers, to lay plans for locating the men needed and transferring them to the jobs. The Dominion-Provincial Farm Labour Agreements under which several thousands of men were secured for the farming industry for seeding and harvesting operations, also provide for the transfer of men from the farms during the slack months for employment in other essential industries.

Recruiting of the men for woods operations started about October 1 in Quebec and Ontario, while in the Western Provinces the campaign will not be pushed until threshing is nearing completion. In the Maritime Provinces as soon as the potato and apple crops have been harvested, efforts will be made to secure the men from the farms.

In commenting upon the campaign, the Minister of Labour said: "Last year and the year before the labour supply situation was eased very substantially by the help we got from farm workers during the fall and winter. Last winter we secured over 100,000 men from the farms, and this year we will need even more".

Pointing out that young farmers on postponement of military training would be given a continuance of their postponement while in other essential work during their slack season, the Minister continued: "Men will, of course, be free to return to the land whenever their services are again needed there. Actually, the work which awaits the farmers in other industries during the off-season is of vital importance to the farmers themselves. In part, it involves the processing of their own products, as in meat packing and feed and flour milling. In part, also, it ensures supplies that the farmers themselves must have. Generally, the work for which the farmers are now needed is vital to Canada's welfare and our war effort at this time".

The Minister further predicted that whatever the course of the war in Europe, the quota of workers from the farms will still be urgently necessary for Canadian industries.

Employment and Earnings in Canadian Sugar Industry

A report recently issued by the Dominion Bureau of Statistics on the sugar industry in Canada provides the following figures with respect to employment and earnings during the years since the outbreak of the war:

	Male Employees	Female Employees	Salaries and Wages
1939..	2,234	165	$3,467,367
1940..	2,349	189	3,623,661
1941..	2,421	221	3,834,639
1942..	2,054	272	3,772,431
1943..	1,842	432	4,068,473

In 1942, the average work-week for men in the industry was 56·0 hours and for women 46·1. In 1943, it was 50·3 hours and 44·6 hours respectively. The average weekly earnings for men in 1942 were $31.67, which declined to $30.27 in 1943. On the other hand, the average paid women increased from $16.90 to $20.10 in the same period. The monthly average of employment remained fairly constant, with a slight rise during the closing quarter in each year.

Although there was a slight falling off in total employment in 1943 as compared with the earlier war years, the output of the sugar refining industry increased by nearly $69,500,000 pounds. The expansion in the cane sugar industry overcame a decline of nearly 60,000,000 pounds in the production of beet sugar.

Employment and Unemployment

Summary

REPORTS received in the Department of Labour during the past month give the following information concerning employment and unemployment across Canada.

The employment situation at the beginning of August as reported by employers.—Industrial activity showed a further upward movement at August 1 as reported to the Dominion Bureau of Statistics by employers. The employment index rose slightly from that of the previous month, but was slightly below that of August, 1943.

The index number of employment (based on the 1926 average as 100) was 184·6 as compared with 183·5 at July 1, 1944 and 185·9 at August 1, 1943.

The average weekly wage per employee was $31.62, nine cents lower than at the beginning of July, but 56 cents higher than at August 1, 1943.

The Bureau's reports come from firms employing fifteen or more employees, representing practically all industries except agriculture, fishing, hunting and highly specialized business operations. Reports for August were received from 14,725 establishments with staffs aggregating 1,864,925 men and women.

Unemployment as reported by the Unemployment Insurance Commission.—Claims for unemployment insurance benefit increased slightly. During August, 3,241 claims were filed as compared with 3,106 during July. These figures are well above the total of 1,370 claims filed during August last year, but considerably below last February's maximum of 12,284.

Applications for employment; vacancies, and placements, August, 1944.—Reports received from the Employment and Selective Service Offices of the Unemployment Insurance Commission during the five-week period July 28, to August 31, 1944, showed declines both when compared with the previous four weeks and with the five weeks July 30, to September 2, 1943, this computation being based on the average number of placements recorded daily. Under the first comparison agriculture showed an appreciable gain but all other industrial groups recorded losses, the greatest being in manufacturing and services. When compared with the five week period a year ago, except for gains in agriculture and forestry and logging, all industrial divisions registered losses, the most noteworthy being in manufacturing though a fairly substantial reduction was noted in construction. During the period under review there were 265,146 vacancies reported, 226,032 applications for employment and 159,117 placements effected in regular and casual employment.

Unemployment in trade unions.—The percentage of unemployment in trade unions, as reported to the Department of Labour by local unions across Canada, remained negligible. At the beginning of July the percentage was 0·3, as compared with 0·9 in April (the last previous quarterly date for which returns were submitted) and 0·6 in July, 1943. The July figure was based on returns received from 2,206 labour organizations with a total membership of 415,707 persons.

Total employment in Canada.—An estimate of Canada's total manpower distribution at June 1, 1944, has been made by the Research and Statistics Branch of the Department of Labour. At that date it is estimated that 4,232,000 persons, 14 years of age and over, were gainfully occupied, of whom 3,232,000 were in non-agricultural industry, including 975,000 in war industry. In addition, there were 784,000 persons in the Armed Forces.

18544—5½

The Employment Situation at the Beginning of August, 1944, as Reported by Employers

INDUSTRIAL activity showed a further upward movement at August 1, when the number of persons added to the payrolls was rather above-normal according to pre-war experience, although it was smaller than at the beginning of August in any of the last five years; the latest percentage increase was also less than the average in the years since 1920. The Dominion Bureau of Statistics received information from 14,725 establishments employing 1,864,925 men and women; this number exceeded by 10,537 persons, or 0·6 per cent, the total reported at the beginning of July. The amounts disbursed in weekly payrolls were greater by 0·3 per cent.

Based on the 1926 average as 100, the index of employment, at 184·6, was a little higher than that of 183·5 in the last report, but was slightly below the August 1, 1943, index of 185·9, the maximum for midsummer. Since the increase in the index between the first of July and the first of August was below-normal, the seasonally-adjusted index showed a decline, falling from 180·0 at the former date to 179·6 at August 1.

The increase in recorded employment at the date under review took place among the non-manufacturing industries, which ordinarily are responsible for most but not all of the expansion at midsummer; however, there was contra-seasonal curtailment in manufacturing at August 1, 1944. This largely resulted from curtailment in iron and steel, from which some 6,500 persons were released. Textiles and non-ferrous metal plants also showed reduced activity, the loss in the former being seasonal

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

* Based on the 1926 average as 100 per cent.

in character. On the other hand, food, lumber, pulp and paper, beverage and chemical factories afforded more employment. In some cases, the gains were seasonal; those in animal food, lumber and pulp and paper were above the average, while the expansion in vegetable foods was less than usual at midsummer.

With the exception of logging, the trend in the non-manufacturing industries was favourable. The seasonal decline in bush work was somewhat below-average in extent. The increases in services were slight; those in trade, communications, transportation and mining were also moderate. Construction reported the largest gain, that of 17,295 persons. This increase of 12·4 per cent, which exceeded that reported at August 1 in any preceding year since 1931, took place largely in highway construction and maintenance in Quebec.

Payrolls

The amounts expended by the co-operating employers in salaries and wages at August 1 were given as $58,969,610, an average of $31.62 per employee. At July 1, these firms had reported the disbursement of $58,808,956, a per capita figure of $31.72. The mean at August 1, 1943, had been $31.06, and that at August 1, 1942, $28.62. It is probable that under normal circumstances, there is a falling-off in the general average per employee at midsummer, partly because of vacations, and partly because the considerable increase in the number in recorded employment ordinarily takes place in the industries in which the earnings tend to be less-than-average. Loss of working time as a result of vacations affected the latest payrolls to a greater extent than at

August 1 in any other year for which the payroll statistics are available, i.e., since the spring of 1941.

As compared with August 1, 1943, there was a rise of 0·6 per cent in the index of payrolls, while the general index of employment was lower by 0·3 per cent. The weekly average earnings of those in recorded employment have increased by 1·8 per cent in the 12 months.

If the statistics of employment and payrolls for financial institutions are added to those given above for the eight leading industries, the latest survey depicts the situation reported by firms employing a total personnel of 1,930,-

[1] This classification comprises the following:—iron and steel, non-ferrous metals, electrical apparatus, lumber, musical instruments and clay, glass and stone products.

095, as compared with 1,919,350 at the beginning of July. The aggregate weekly payroll in the nine leading industries (viz., manufacturing, logging, mining, communications, transportation, construction and maintenance, services, trade and finance), was $61,097,154, as compared with $60,935,473 at July 1. The per capita average in the nine industries was $31.65, a figure somewhat lower than that of $31.75 at July 1. The average at the beginning of August, 1943, was $31.08.

Table II summarizes the latest statistics of employment and payrolls for the leading industrial groups, the provinces and economic areas, and the leading industrial cities, and gives comparisons as at July 1, 1944, and August 1, 1943, where these are available.

Table I indicates that in the period for which data are available, the number of persons in recorded employment in the eight leading industrial groups has shown an increase of 20·7 per cent, while the aggregate weekly payrolls of those workers are higher by 48·4 per cent. Including finance, the gain in employment from June 1, 1941, to August 1, 1944, amounted to 20·2 per cent, and that in payrolls, to 47·4 per cent. The explanation previously given for the much greater rise in the salaries and wages than in the numbers employed may again be stated: (1) the concentration of workers in the heavy manufacturing industries, where rates of pay are above the average and in addition, there has been a considerable amount of overtime work, (2) the payment of cost-of-living bonuses to the majority of workers; the rates at which these allowances were calculated were increased on more than one occasion before their incorporation in the basic wage-rates as from February 15, 1944, and (3) the progressive up-grading of employees as they gain experience in their work. In a great many cases, higher wage-rates have also been granted.

It may again be pointed out that the influence of the war has resulted in particularly marked expansion in employment and payrolls in factories, in which the rate of acceleration in the period of observation has been decidedly greater than in the non-manufacturing industries; the index of employment in the former has risen by 33·9 per cent from June 1, 1941, to August 1, 1944, and that of payrolls

[1] The relative weight shows the proportion of employees reported in the indicated industry, to the total number of employees reported in Canada by the firms making returns at the date under review.

had advanced by 66·8 per cent, proportions decidedly exceeding those elsewhere given for the eight leading industries. The factors stated above as influencing the general trends have had an even greater effect in the case of manufacturing.

Employment and payrolls in the production of durable goods in the period of observation have shown especially marked growth, there being an increase of 51 per cent in the index of employment, and of 90·6 per cent in the salaries and wages distributed by the co-operating employers from June 1, 1941, to August 1, 1944. In the non-durable goods industries, the index number of employment at the date under review was higher by 18·7 per cent than at June 1, 1941, since when there has been an increase of 42·4 per cent in the payrolls disbursed by the co-operating establishments.

In regard to the marked variations in the average earnings of workers in the different industrial classes, it must again be pointed out that the sex distribution of such persons is an important factor, frequently associated with variations in the age groups. In general, the female workers tend to belong to the younger age classes, in which the earnings are naturally lower than among those of greater experience. The matter of short-time or overtime may also considerably influence the reported aggregates and averages, which likewise reflect variations in the extent to which casual labour is used; the degree of skill generally required of workers in the industry is of course also an extremely important factor.

Report on Employment Conditions for September, 1944

THE following summary of employment conditions for the month of September has been prepared by the Research and Statistics Branch, Department of Labour, on the basis of reports received from Local Employment and Selective Service offices across Canada.

Maritime Region

Agriculture—Grain harvesting in the maritime provinces is almost over, except on Prince Edward Island, where heavy rains have retarded operations. Farm workers are still in demand on "The Island", where Charlottetown and Summerside both report that a considerable quantity of grain remains to be harvested, and early potatoes are ready for digging. The Charlottetown area is profiting by the arrival of an additional 73 soldiers, and Summerside reports that 125 members of the Armed Forces on farm duty are being placed through the Provincial Farm Labour Board.

The Kentville office reports that harvesting in that area is in full swing, and the peak need for apple pickers is expected by the beginning of October. Campbellton, anticipating no shortage of potato pickers, has transferred out some 20 workers to alleviate the situation in other parts of the region. Fredericton as yet has very few orders on file for this harvest, and a canvass of the larger growers is being made to ascertain what their needs will be.

Logging—Plans are now being completed for the necessary winter supply of bushworkers, and operations will be in full swing in a few weeks' time. The Truro office has one order on hand for 50 loggers, and operators in the Liverpool area are hoping to obtain some returned soldiers. Saint John reports a consistent demand for first class loggers, with very few suitable men available. Some operators in the Minto neighbourhood have already placed crews in the woods, on yarding work, and it is indicated that there will be a 30 per cent increase in logging activity in the area over last year, due largely to the necessity of salvaging timber from lands destroyed by fire during the past summer.

Coal Mining—The maritime coal mines continue on a full-time production schedule, and the shortage of skilled miners also persists. Present vacancies in the New Glasgow area total 95 miners and 35 workers, while farther north, production in the vicinity of Minto has been considerably increased as a result of the use of more stripping machines. The new shafts to replace those destroyed by fire in August are almost completed and a good season is anticipated.

Manufacturing—Textiles, candy and shoe factories and kindred industries throughout the region continue to call for additional workers and potato dehydration and fertilizer plants, pulp mills and sawmills are similarly exigent. For the most part, however, the story of manufacturing plants is one of lessening labour requirements.

One shipyard at Bridgewater is approaching the completion of its current contract and another is already laying off some of its workers. The Pictou shipyards are also curtailing operations, as are a number of other war industries in the New Glasgow area.

Construction—Construction labour is still scarce throughout the region. Orders for all types of building labour for the Debert Camp are still unfilled. Saint John is still in the market for good carpenters, painters and general building tradesmen, and Fredericton is continuingly short of labourers.

Transportation—No alleviation of the manpower shortage in the transportation industry is apparent, and everywhere in the maritime provinces the railways are in need of maintenance gang workers.

Quebec Region

Agriculture—As the harvest draws to a close, there is an ever-increasing tendency on the part of farm workers to leave the land for off-season employment, bush work for the most part, but railway maintenance labour also. Fine weather has resulted in a bountiful harvest throughout the region. There has been a good response from every section to the call for western harvest help, and altogether some 900 men left Quebec for the prairie provinces.

Logging—Many logging operators are still carrying out improvements on rivers, roads, camps, etc., preparatory to the heavy cutting program planned for the winter months. On the lower Saint Lawrence sawmill operations have been completed at Matane, and part of the 350 men released have reverted already to bush operations in the vicinity, while some are enjoying a well-earned holiday and still others have left for northern logging camps. All the contractors in the area are calling for men, and their representatives are already on the lookout for labour. The Chicoutimi office reports that in addition to some 1,300 presently engaged in the bush, another 1,550 are required to fill winter pulp-cutting requirements. Roberval, too, anticipates difficulty in filling the local logging manpower demands, with one operator alone asking for some 1,200 to 1,500 workers.

Mining—No appreciable change is recorded in the consistently undermanned position of the region's mines. The general shortage in the gold mines persists, and more than 150 are required to fill the quota of the district under the temporary "B" rating.

Manufacturing—A downward trend in production is evident in Quebec's manufacturing establishments, insofar as war plants are concerned. The Montreal office reports that while it is as difficult as ever to meet the demands for heavy labour for foundries, flour warehouses, etc., light and medium labour becomes more plentiful daily. All aircraft plants in the area are reducing staff and openings for male employment are chiefly for unskilled workmen, with only skilled mechanics now seriously short of the demand.

Lay-offs are proceeding at the Fairchild and Noorduyn aircraft plants. The Fairchild Company has notified the Montreal office of a lay-off of 1,300 women employees. While openings are plentiful for female labour in shell filling and textile plants, tobacco factories, laundries and hospitals, it is reported that a large number of those laid off are taking a vacation before going to other employment.

In Quebec City skilled men and women for the shoe factories are hard to find, and the garment industry requires tailors, pressers and labourers. With shipbuilding contracts approaching completion, no new employees are being engaged by the local shipyards.

At Three Rivers an annex to the local steel works is now completed and some 250 to 300 workers have been engaged. More machinists are needed and a corresponding number of labourers will be taken on as the work progresses. The Levis local office reports 155 new vacancies during the past fortnight, mostly for skilled workers, and these are being filled by men released from the local shipyards.

Garment factories and kindred industries throughout the region continue to call for labour and these are benefitting to some extent from the labour freed by decreasing war production.

Construction—The construction industry is still active in all parts of the province, and this activity will continue until late in the fall. The lack of bricklayers is delaying military hospital building in Montreal, and all carpenters in that area are being utilized for most essential high priority construction, with the result that none are available for private housing and repairs.

Transportation—The manpower needs of the transportation industry remain unsatisfied in the province, and little relief is anticipated until the agricultural season ends. Some 250 maintenance workers are required by the Canadian National Railway in the vicinity of Levis, and another 200 track gang labourers and freight men for the Canadian Pacific Railway in the Megantic area. Some 30 or 40 men are needed to man the grain boats at Three Rivers, and there is also a scarcity of workers for the boats in the vicinity of

Matane. All these requirements have been placed in clearance, as they cannot be met locally.

Ontario Region

Agriculture.—Except for the year-round demand for dairy workers, the farm labour requirements of the region have steadily decreased during the past month. Some 5,200 volunteers from Ontario went West to assist in the harvest there. While not many farmers have as yet left home to enter other essential industry, permits are being issued for their employment in factories and on railway maintenance gangs, and many will shortly be going to the lumber camps for the winter months.

Local offices in general were successful in meeting the demand for helpers for the peach and tomato harvest, except in the St. Catharines district, where the reopening of the secondary schools created a temporarily serious situation. Some loss of crop was unavoidable, but local citizens worked day and night to make up for the loss of the services of the girls of the Farm Service Force camps. The need of Trenton orchardists for 120 apple pickers and packers was met by pressing every available part-time worker into service.

Inclement weather delayed the tobacco harvesting in western Ontario, and 2,700 acres were totally destroyed and another 2,300 acres damaged by hail in the Simcoe area. The greater part of the crop has now been picked, although St. Thomas is still short of workers. Hawkesbury is calling for potato pickers, and students are helping out after school and at the weekends.

Canning.—Throughout the province, canneries worked to full capacity during the earlier part of September, although handicapped by the loss from their staffs of hundreds of students. While the peak of operations has been passed, the industry continues to make fairly heavy demands on the province's labour force. The rapid ripening of an exceptionally large crop of peaches in the St. Catharines neighbourhood was responsible for a shortage of 500 women throughout Lincoln County canning establishments, and a similar maturing of tomatoes has renewed the need for peelers in Essex County. Collingwood has called for additional aid in tomato processing and Brantford requires another 60 women for peach, pear and tomato canning.

Logging.—Orders for loggers are pouring into every local office in the lumbering areas, but few bushworkers are available as yet. Pembroke, with orders on hand for 600 men, reports that placements are slow, and in the Kirkland Lake area 300 bushworkers are needed. The lack of woods labour in the camps near Timmins, North Bay and Sault Ste. Marie has not been alleviated, and Peterborough, too, is far short of the necessary manpower.

Kapuskasing reports that a general movement of men from Quebec during the past month has lightened logging labour problems. Men are also coming into the district from "The Sault" and Port Arthur. An order has been received from a Spruce Falls Company for 150 dam builders and river cleaners. The lack of such workers now would handicap operations next spring. A shortage of bilingual tallymen is most pressing, and the Kapuskasing office is trying to fill this through clearance.

Mining.—The manpower situation in the mines shows little improvement. Timmins reports a continuing shortage for all mines in the district, and Kirkland Lake is still calling for first-class miners. North Bay continues to transfer men to International Nickel, but is itself short of workers for the local mica operations.

Manufacturing.—Skilled and unskilled workers are in constant demand in the manufacturing plants all over the province, but there is no prospect of filling these orders for some time to come. Toronto alone reports overall vacancies of 11,116 males, of whom 7,355 are in the "A", "AE" and "B" categories, and other manufacturing centres are correspondingly handicapped. Packing houses, ironworks and textile mills are the most needy industries, and all alike are looking for partial relief when farmers return to the factories for the winter months.

At Midland, skilled workmen of all sorts are required for the steel shipbuilding trade, but these are not available locally.

Calls for women workers are mounting along with those for men. The Welland local office reports that it is unable to meet the requirements of a textile factory and the British Supply Board. One Welland Company is filling its needs by the employment of 100 Midland housewives, on a 24-hour week basis. Other local industries are also adopting this policy, with good results.

In Hamilton, the increase in the net labour demand is largely due to the exodus of students from the city's factories. One large glass manufacturing plant is losing one-third of its staff in this way, and in consequence is closing down two furnaces. However, to balance the rise in vacancies, the Hamilton office states that the number of women seeking

employment is on the increase. About 300 are still required for shell production work, but until 200 male labourers can be obtained for machine work, women cannot be hired for inspection.

Construction.—The keen demand for building tradesmen and labourers continues, and in most cases any satisfactory number is unobtainable. Little change in the outlook throughout the region is noticeable during the past month, and construction in general is being slowed down by the lack of adequate workers. Special efforts are being made to find the labour necessary for the erection of military hospitals, and this endeavour is meeting with a fair measure of success.

Transportation.—Men for the transportation industry are still scarce and freight handlers and extra gang labourers present the most pressing need.

Prairie Region

Agriculture—In spite of the rain which delayed agricultural work in the western provinces, the threshing is almost 75 per cent completed in most southern portions of the territory, and will be finished entirely in another week or ten days if the weather is fine. The movement of eastern harvesters from southern to northern prairie areas has relieved what earlier threatened to be a serious shortage of workers. Medicine Hat reports that approximately 200 farmers from that area were sent to help with the harvest in Saskatchewan, and orders now on file are for short-time jobs on the root crops and late haying operations. In the vicinity of Edmonton, too, the situation is fairly well in hand, although temporary shortages may yet occur in some districts.

Throughout the region there has been a concerted effort to render assistance to the hardpressed farmers during the harvesting activities. Some 63 natives of Fort Frances, and 100 from The Pas, were despatched to the harvest fields, and Medicine Hat, with local needs handled by prisoners of war in the irrigated districts, sent between 100 and 150 to other sections. Farmers in the vicinity of Yorkton received aid from the local airport. Prince Albert, which experienced the most pressing need, reported that carloads of townspeople were going out from the city every afternoon to stook grain on the surrounding farms. City workers and students also lent a helping hand in the Regina neighbourhood, and eastern harvesters and Air Force personnel solved Estevan's manpower problem.

Logging—As yet, few orders for logging labour have been placed, and few, if any, applicants for such work are available. Concern is felt in the Kenora area over this scarcity, and farther north the orders of Fort Frances contractors for some 350 bushworkers of all types have been placed in clearance. One operator is preparing to fly men into the territory within several weeks.

Mining—There is little change in the manpower situation of the region's coal mines. The shortage of miners and the consequent scarcity of fuel in the mining areas is causing concern to the managers of these operating properties: in general, the placing of coal mining orders is being delayed until the close of the agricultural season. The Lethbridge office reports a large number of unfilled orders: an effort is being made to bring about the return of ex-miners, but these will not be sufficient to fill the vacancies. Edson operations are short 150, and Edmonton, with all its local mines running full time, can use all the certificated miners procurable, as well as trucks and drivers for delivery.

The already undermanned base metal mines have suffered considerably through the exodus of students and school teachers engaged during the summer months, and there is a general need of surface and underground workers throughout the mining areas.

The gold mining companies in the Port Arthur district are again appealing for underground workers. To maintain production and increase development, a minimum of 259 underground workers is needed for the group of mines in this area.

Manufacturing—No relief from labour shortages in the manufacturing industry can be expected until after the harvest season is over. The region's steel mills in particular are feeling the shortage, as many of their workers are recruited from among the prairie farmers, but the number of orders for heavy labour in all lines of manufacture exceeds the supply. Many of the packing plants have been unable to take care of increased orders because of the lack of men, which prevents them from absorbing any more women workers into their organizations. Winnipeg packing houses are especially exigent, and Calgary and Edmonton plants are also suffering. Calgary reports that 600 students will leave essential industries within the next week.

The completion of several vessels in the Port Arthur shipyards is being hastened as the close of navigation approaches and orders for some 38 craftsmen have been placed in clearance. The local aircraft plant has a large

number of women employees, as well as a considerable group of handicapped persons. The majority of male placements in the aircraft shop are men unable to assume heavier duties.

Some manufacturing establishments in the region are benefitting by the occasional lay-offs taking place. So far about 250 employees (half of them men) have been released in a lay-off in progress at the M. and C. Aviation plant in Prince Albert, and the men affected have been readily placed. About 70 workers have also been laid off by the Mid-West Aircraft factory in Winnipeg, and these are being absorbed elsewhere.

Construction.—One of the chief requirements of the construction industry at present is for expert workers capable of hard labour. Carpenters are in demand and some of those being laid off by aircraft plants are being absorbed, particularly for military hospital construction. Bricklayers are still needed for high priority projects, and with the advance of this work, orders for plasterers are being placed.

Transportation.—As winter approaches, transportation's labour demands include an increased need for truck drivers for the fuel companies, but the supply of suitable applicants for this work is limited. No alleviation of the shortage of railway maintenance labour is noticeable as yet, but it is hoped that the conclusion of the harvest will improve the situation. The higher priority ("A-E") granted on September 14 should also help matters. Some of the work must be done before the freeze-up. The Pas is urgent in its call for workers for both Canadian National and Hudson Bay railways, Regina has orders for another 100, and the Edmonton office states that an additional 300 bridge, building and section men could be utilized, but few of this number are available.

Grain Elevators—The grain elevators, also with an "A-E" priority rating, are in better labour position than earlier in the season. The congestion in the Port Arthur railway yards has been relieved during the past week, and little grain is arriving at the Lakehead for the time being. At present, another 69 shovellers would fill existing vacancies.

Pacific Region

Agriculture.—Throughout British Columbia the general agricultural labour situation is satisfactory. Fruit picking is proceeding with a sufficient number of pickers provided by the Emergency Farm Labour Service to handle the exceptionally heavy crops. In the fruit belt surrounding Kelowna some 3,000 people have been engaged in hop picking, and hundreds of others in the gathering of fruit and beans. Kelowna is still calling for 60 workers, and Prince George, with its harvest well on the way to completion, is sending female labour to the Okanagan.

The demand for dairy and general farm helpers continues in many parts of the province, and from the Victoria office comes the report that quite a number of auction sales are listed for the coming month by farmers wishing to dispose of their dairy herds on account of the lack of labour.

Logging.—The dearth of skilled and heavy labour is still a serious drawback to the logging industry. All districts have many unfilled orders for every type of bushworker, and are unanimous in stating that there are few men available for these vacancies. Kamloops and Prince George are especially exigent in their demands, and Vancouver reports that the lack of chokermen and riggers in particular is curtailing the placing of loggers of lesser skill.

On Vancouver Island rains have eased the fire hazard, and most firms are now operating to full capacity, with no men available to fill their demands for semi-skilled and heavy labour.

Sawmills.—The low production prevailing in the lumber camps is reflected in the output of the region's sawmills, which have also been forced to slacken their operations. New Westminster, as the foremost milling centre of the province, is the greatest sufferer: the temporary relief afforded by student labour has now been cut off and the mills are in serious difficulty owing to the lack of labourers and skilled workmen alike. The lack of adequate labour is hampering operations in all other sawmills and box factories throughout the region, in corresponding degree.

Mining.—While miners and underground workers are needed everywhere in the coal mines of British Columbia, the situation is not as serious as on the prairies. In general, surface work has been reduced owing to the lack of underground labour. The Crow's Nest Pass operations are affected by these conditions, and the mines in the Telkwa field of the Prince Rupert area are unable to take on more surface workers until reinforcements of miners and underground labour can be obtained. The local office at Courtenay reports 100 unfilled vacancies, for which no referrals are being made from outside the district. In the Princeton area the coal mines have lessened their demands for the time being.

British Columbia's base metal mines have had little success in reducing their labour needs. One mine at Kimberley is calling for at least 170 underground men, and many employed on back filling operations will be moved underground when winter comes. Nelson

projects are short of muckers, as well as experienced miners and timbermen. Princeton operations are still short of workers, and as a result only 99 men are at present employed underground.

Smelting operations at Prince George are completely shut down, and the staff have all gone to Kimberley and Trail. Other local mines have many unfilled vacancies and orders are also on hand for one operation at Burns Lake.

Manufacturing.—There has been no major development to change the labour picture in the manufacturing field. Packing houses and canneries are well supplied with workers, and the aircraft factory at Chilliwack is operating efficiently with two full crews.

Riveters, passers and markers are in demand at the Prince Rupert shipyard, and few carpenters are available to fill the needs of the wooden shipbuilding operations at Nanaimo. The Victoria shipbuilding yards, too, are calling for helpers, and no riveters are obtainable to complete the crews. In some of the Victoria shipyards, the completion of contracts on certain types of ships has necessitated the release of a number of men and women, mostly helpers and improvers. Practically all those who have been released will be absorbed by other industries in the area.

Construction.—The construction industry throughout the province is being maintained at a steady level, with demand and supply for the most part well balanced and few large contracts under way. All offices are watching their labour supply carefully and providing workers for high priority jobs before making any attempt to utilize available men on private or low priority construction. Prince George is the only part of the region which records any pressing need for construction labourers at the present time.

Transportation.—Transportation continues to make heavy demands on the British Columbia labour force. The call for railway track maintenance labourers has been swelled by an order from Whitehorse for 50 men to replace U.S. Army personnel. Boats are operating to schedule but with reduced crews since students returned to school or university, and some of the bus companies have met their manpower deficiency by the employment of female drivers.

Applications for Employment; Vacancies, and Placements; August, 1944.

DURING the five-week period July 28, to August 31, 1944, reports received from Employment and Selective Service Offices of the Unemployment Insurance Commission showed a decrease of 13 per cent in the average daily placements effected when compared with the period June 30, to July 27, 1944, and a loss of 15·9 per cent in comparison with the five weeks July 30, to September 2, 1943. Under the first comparison, except for a substantial increase in agriculture, all industrial groups registered declines, the greatest being in manufacturing and services. In comparison with the five-week period ending September 2, 1943, apart from an appreciable gain in agriculture and a minor expansion in forestry and logging, all industrial divisions registered losses, the most outstanding being in manufacturing though a fairly large reduction was noted in construction.

The accompanying chart shows the trend of employment since January, 1942, as represented by the ratios of vacancies notified and placements effected for each 100 applications for work registered at Employment and Selective Service Offices throughout Canada. It will be seen from the graph that the curve of vacancies in relation to applications took a decidedly upward course while the curve of placements in relation to applications showed a moderate decline. The ratio of vacancies to each 100 applications was 117·3 during the five weeks ending August 31, in contrast with 107·1 during the previous four weeks and 126·2 during the five-week period July 30, to September 2, last year. The ratio of placements to each 100 applications, during the period under review, was 70·3 compared with 72·8 during the four weeks June 30, to July 27, 1944, and 73·4 during the five-week period a year ago.

The average number of vacancies reported daily by employers to the Employment Offices throughout Canada during the five weeks July 28, to August 31, 1944, was 8,838 in comparison with 8,984 in the preceding four weeks and 10,841 during the five weeks July 30, to September 2, 1943. The average number of applications for employment received daily during the period under review was 7,534 compared with 8,385 in the previous period and 8,588 during the five weeks ending September 2, a year ago. The average number of placements made daily by the offices during
